(2) **Special rule where a domestic building and loan association or cooperative bank exceeds certain assets limitations.** If, for the taxable year, the taxpayer uses either the percentage of taxable income method described in paragraph (b) of this section or the percentage of real property loans method described in paragraph (c) of this section, and if for such year such taxpayer qualifies as a domestic building and loan association under the first sentence of paragraph (19) of section 7701(a) (or as a cooperative bank under paragraph (32) thereof) solely by reason of the application of the

second sentence of such paragraph (19) (that is, solely by reason of the fact that for such year more than 36 percent, but not more than 41 percent, of the amount of the total assets of such association or bank consists of assets other than assets described in section 7701(a)(19)(D)(ii)), then the maximum permissible addition for such year is equal to the amount determined under subparagraph (1) of this paragraph, reduced in accordance with the following table:

If the percentage of the taxpayer's assets which are not assets described in section 7701(a)(1)(D)(ii) exceeds—*Percent*	But does not exceed —*Percent*	The reduction shall be the following proportion of the amount determined under such subparagraph (1)—
36	37	1/12
37	38	1/6
38	39	1/4
39	40	1/3
40	41	5/12

(f) Definitions. For purposes of this section—

(1) Surplus, undivided profits, and reserves. The term "surplus, undivided profits, and reserves" means the amount by which the total assets of the taxpayer exceed its total liabilities. The determination of such total assets and total liabilities shall conform to the method of accounting employed by the taxpayer in determining taxable income and to the rules applicable in determining its earnings and profits. Total deposits or withdrawable accounts (as defined in subparagraph (3) of this paragraph but determined as of the beginning of the taxable year) shall be considered a liability. In the case of a domestic building and loan association having permanent nonwithdrawable capital stock represented by shares, the paid-in amount of such stock shall also be considered a liability. However, reserves for contingencies and other reserves which are mere appropriations of surplus are not liabilities for purposes of this section.

(2) Total assets. The term "total assets" means the sum of money (including time or demand deposits with, or withdrawable accounts in, any financial institution), plus the aggregate of the adjusted basis (determined under § 1.1011–1) of the property other than money held by the taxpayer. For special rules with respect to adjustments to basis in the case of property acquired by the taxpayer in a transaction described in section 595(a), see section 595.

(3) Total deposits or withdrawable accounts. The term "total deposits or withdrawable accounts" means the total of the amounts placed with the taxpayer for deposit or investment. Such term also includes earnings outstanding on the books of account of the taxpayer at the close of the taxable year which have been credited as dividends or interest upon such deposits or withdrawable accounts prior to the close of such taxable year, and which are withdrawable on demand subject only to customary notice of intention to withdraw. In the case of a domestic building and loan association, however, such phrase does not include permanent nonwithdrawable capital stock represented by shares, or earnings credited thereon.

(g) Examples. The provisions of this section may be illustrated by the following examples:

Example (1)—(i) Facts. X is a domestic building and loan association which was organized in 1947 and which makes its returns on the basis of the calendar year and the reserve method of accounting for bad debts. X's accounts contain the following entries:

Account	Balance as of— Jan. 1, 1965	Dec. 31, 1965
Total deposits or withdrawable accounts	$1,000,000	$1,200,000
Nonqualifying loans	50,000	60,000
Qualifying real property loans	900,000	940,000
Reserve for losses on nonqualifying loans	200	*160
Reserve for losses on qualifying real property loans	24,000	*21,000
Supplemental reserve for losses on loans	60,800	60,800
Surplus, undivided profits, and other reserves	15,000	18,040

* Computed before any addition for 1965 under section 166(c).

X's taxable income for 1965 (before any deductible addition to a reserve for bad debts and without regard to charitable contributions of $200) is $20,000, computed as follows:

Interest and other income	$19,940
Dividends received from Y Corporation, a domestic corporation subject to taxation under chapter 1 of the Code	400
	20,340
Deduction for 85 percent of dividends received computed without regard to the limitation of section 246(b)	340
Taxable income	20,000

It is assumed that under § 1.166–4 X's addition for 1965 to its reserve for losses on nonqualifying loans is $80.

(ii) Computation of addition to reserve for losses on qualifying real property loans—(a) In general. X determines that the reasonable addition for 1965 to its reserve for losses on qualifying real property loans is $11,920. Such amount, compared under the percentage of taxable income method, is the largest of the amounts determined under (b), (c), and (d) of this subdivision, and does not exceed the 12 percent of deposits limitation computed under (e) of this subdivision.

(b) **Percentage of taxable income method.** The amount determined under the percentage of taxable income method is $11,920, that is, 60 percent of the taxable income for 1965, or $12,000 (60 percent of $20,000), minus $80, the addition for such year to the reserve for losses on nonqualifying loans. This amount is not subject to reduction under the 6 percent of qualifying real property loans limitation described in paragraph (b)(1) of this section since the addition of $11,920 to the $21,000 balance of the reserve for losses on qualifying real property loans at the close of 1965 will not increase such balance to an amount in excess of $56,400, that is, 6 percent of such loans of $940,000 outstanding at such time.

(c) **Percentage of real property loans method.** Since X is not a new company within the meaning of paragraph (c)(2) of this section, the amount determined under the percentage of real property loans method is $7,200, that is, the amount necessary to increase the balance of the reserve for losses on qualifying real property loans at the close of 1965 from $21,000 to an amount equal to 3 percent of such loans outstanding at such time, or $28,200 (3 percent of $940,000).

(d) **Experience method.** The amount determined under the experience method is zero since it is assumed that the $21,000 balance of the reserve for losses on qualifying real property loans at the close of 1965 before any addition for such year exceeds the maximum amount to which such reserve could be increased under such method.

(e) **12 percent of deposits limitation.** The amount determined under the 12 percent of deposits limitation is $43,920, that is, $44,000 (the excess of 12 percent of $1,200,000 of deposits at the close of 1965, or $144,000, over the $100,000 of surplus, undivided profits, and reserves at the beginning of such year), minus $80, the addition for such year to the reserve for losses on nonqualifying loans. Since such $43,920 is greater than $11,920 (the amount determined under (b) of this subdivision), the 12 percent of deposits limitation does not apply for 1965.

(iii) **Computation of taxable income for 1965.** X's taxable income for 1965, after deducting the additions for such year to its reserves for losses on nonqualifying loans and on qualifying real property loans, after deducting the charitable contributions which were not taken into account in computing taxable income for purposes of the addition to the reserve for losses on qualifying real property loans, after including in taxable income dividends received from Y Corporation, and after taking into account the deduction for dividends received under section 243 (subject to the limitation in section 246(b)), is $7,800, computed as follows:

Interest and other income	$19,940	
Dividends received from Y Corporation	400	
		$20,340
Less:		
Deduction for charitable contributions	200	
85 percent of dividends received from Y Corporation	340	
Additions to reserves for bad debts	12,000	
		12,540
Taxable income		7,800

Example (2). Assume the same facts as in example (1), except that X Corporation was organized in 1957, and qualifies for the taxable year 1965 as a new company within the meaning of paragraph (c)(2) of this section. The maximum permissible addition for 1965 to X's reserve for losses on qualifying real property loans is $18,000, the amount computed under the percentage of real property loans method, since such amount is greater than (i) $11,920, the amount computed under the percentage of taxable income method, or (ii) zero, the amount computed under the experience method. The $18,000 amount (as computed under the percentage of real property loans method) is the amount necessary to increase the reserve for losses on qualifying real property loans from the $21,000 closing balance to $39,000, computed as follows:

3 percent of $940,000 of qualifying real property loans at close of 1965		$28,200
Plus:		
Lesser of $80,000 or $18,800 (2 percent of such loans of $940,000)	$18,800	
Reduced by the balance of supplemental reserve for losses on loans	8,000	
	10,800	
		39,000

Example (3). Assume the same facts as in example (1), except that for 1965, 38.4 percent of X's total assets consist of assets other than the assets described in section 7701(a)(19)(D)(ii). In such case, the maximum permissible addition of $11,920 for such year to the reserve for losses on qualifying real property loans (as determined under subdivision (ii) of example (1)) would be reduced by $2,980 (¼ of $11,920) to $8,940.

[T.D. 6728, 29 FR 5857, May 5, 1964, as amended by T.D. 7549, 43 FR 21455, May 18, 1978]

§ 1.593–6A Post-1969 addition to reserve for losses on qualifying real property loans.

(a) **In general—(1) Amount of addition determined for the taxable year.** For purposes of paragraph (a)(1)(ii) of § 1.593–5, the amount of the addition to the reserve for losses on qualifying real property loans for any taxable year beginning after July 11, 1969, is the amount which the taxpayer determines to constitute a reasonable addition to such reserve for such year. However, the amount so determined for such year—

(i) Cannot exceed the largest of the amount determined under section 593 (b)(2), (3), or (4) (relating, respectively, to the percentage of taxable income method, the percentage method, and the experience method), and

(ii) Shall be determined without regard to any amount charged for any taxable year against the reserve for losses on qualifying real property loans pursuant to § 1.593–10 (relating to certain distributions to shareholders by a domestic building and loan association).

For each taxable year the taxpayer must include in its income tax return for such year a computation of the amount of the addition determined under this section. The use of a particular method in the

return for a taxable year is not a binding election by the taxpayer to apply such method either for such taxable year or for subsequent taxable years. Thus, in the case of a subsequent adjustment described in paragraph (b)(2) of § 1.593–5 which has the effect of permitting an increase, or requiring a reduction, in the amount claimed in the return for a taxable year as an addition to the reserve for losses on qualifying real property loans, the amount of such addition may be recomputed under whichever method the taxpayer selects for the purpose of such recomputation, irrespective of the method initially applied for such taxable year.

(2) Method of determination. For purposes of this section and § 1.596–1 (relating to limitation on dividends received deduction), a thrift institution is deemed to have determined the addition to its reserve for losses on qualifying real property loans for the taxable year under the percentage of taxable income method provided by section 593(b)(2) and paragraph (b) of this section if the amount finally determined to be a reasonable addition for such year to such reserve exceeds the amount determined for such year under section 593(b)(3) (relating to the percentage method) and exceeds the amount determined for such year under section 593(b)(4) (relating to the experience method).

(b) Percentage of taxable income method—(1) In general. Subject to the limitations described in subparagraph (4) of this paragraph and in paragraph (e) of this section, the amount determined under section 593(b)(2) and this paragraph for the taxable year, if such section and paragraph are applicable, is an amount equal to the applicable percentage of the taxable income for such year, reduced by the amount determined under subparagraph (3) of this paragraph. For this purpose, taxable income is computed as provided in subparagraph (5) of this paragraph, and the applicable percentage (except as reduced under subparagraph (2) of this paragraph) is determined under the following table:

For a taxable year beginning in—	The applicable percentage under this subparagraph is—
1969	60 percent.
1970	57 percent.
1971	54 percent.
1972	51 percent.
1973	49 percent.
1974	47 percent.
1975	45 percent.
1976	43 percent.
1977	42 percent.
1978	41 percent.
1979 or thereafter	40 percent.

(2) Reduction of applicable percentage in certain cases—(i) General rules. If for the taxable year the percentage of the assets of a thrift institution, which are assets described in section 7701(a)(19)(C) (relating to assets of a domestic building and loan association) is less than—

(a) 82 percent of the total assets in the case of a thrift institution other than a mutual savings bank, the applicable percentage for such year provided by subparagraph (1) of this paragraph is reduced by three-fourths of 1 percentage point for each 1 percentage point of such difference; or

(b) 72 percent of the total assets in the case of a thrift institution which is a mutual savings bank, the applicable percentage for such year provided by subparagraph (1) of this paragraph is reduced by 1½ percentage points for each 1 percentage point of such difference.

If such percentage is less than 60 percent of the total assets in the case of any thrift institution (less than 50 percent of the total assets for a taxable year beginning before 1973 in the case of a thrift institution which is a mutual savings bank), section 593(b)(2) and this paragraph are not applicable. The percentage of total assets specified in this subparagraph is computed as of the close of the taxable year or, at the option of the taxpayer, may be computed on the basis of the average assets outstanding during the taxable year. Such average is determined by computing such percentage either as of the close of each month, as of the close of each quarter, or as of the close of each semiannual period during the taxable year and by using the yearly average of the monthly, quarterly, or semiannual percentages. A thrift institution which is a mutual savings bank and which determines the amount of the reasonable addition for the taxable year to the reserve for losses on qualifying real property loans under this paragraph shall file for such taxable year a statement which shall show the amount of assets defined in paragraph (e) of § 402.1–2 (Temporary Regulations on Procedure and Administration under Tax Reform Act of 1969) as of the close of the taxable year and a brief description and the amount of all other assets, together with a description of the method used in determining such amounts. If the percentage specified in this subparagraph is computed by such thrift institution on the basis of the average assets outstanding during the taxable year, the statement shall also show such information as of the end of

each month, each quarter, or each semiannual period and the manner of calculating the average.

(ii) **Example.** The provisions of this subparagraph may be illustrated by the following example:

Example. M is a cooperative bank to which section 593 applies. For its taxable year beginning in 1970, 80.4 percent of M's assets (computed as of the close of such year) constitute assets described in section 7701(a)(19)(C). M's assets which are assets described in section 7701(a)(19)(C), when computed on semiannual, quarterly, and monthly bases, constitute 79.8, 79.6, and 79.5 percent, respectively, of its total assets computed on the corresponding bases. M's applicable percentage for 1970 is 56.25 percent, determined as follows:

	Percent
Percentage of total assets specified in (*a*) of subdivision (i) of this subparagraph	82.0
Percentage of total assets constituting assets described in section 7701(a)(19)(C)	80.4
Difference	1.6
Applicable percentage determined under table in subparagraph (1) of this paragraph	57.0
Reduction of applicable percentage required by (*a*) of subdivision (i) of this subparagraph (¾ of 1 percentage point for each full percentage point of difference)	.75
Applicable percentage	56.25

(3) **Reduction for addition to reserve for nonqualifying loans—(i) General rule.** Subparagraph (1) of this paragraph provides that, subject to certain limitations, the amount determined under the percentage of taxable income method provided by section 593(b)(2) and this paragraph for the taxable year is an amount equal to the applicable percentage of the taxable income for such year, reduced by the amount determined under this subparagraph. In the case of a thrift institution other than a mutual savings bank, the amount determined under this subparagraph is an amount equal to the amount determined under paragraph (a)(1)(i) of § 1.593–5 to be a reasonable addition for the taxable year to the reserve for losses on nonqualifying loans multiplied by a fraction—

(a) The numerator of which is 18 percent, and

(b) The denominator of which is the percentage (in no case less than 18 percent) of the assets of the taxpayer for such year which are not assets defined in paragraph (e) of § 402.1–2 of this chapter.

In the case of a thrift institution which is a mutual savings bank, the amount determined under this subparagraph is an amount determined in the manner described in the preceding sentence, except that the numerator of the fraction described therein is 28 percent, and the denominator of such fraction shall not be less than 28 percent. For purposes of this subparagraph, the percentage of assets for a taxable year which are not assets defined in paragraph (e) of § 402.1–2 of this chapter is determined upon the same annual or average basis as is used in determining the percentage specified in subparagraph (2) of this paragraph.

(ii) **Examples.** The provisions of this subparagraph may be illustrated by the following examples:

Example (1). K is a domestic building and loan association to which section 593 applies. The amount determined under subparagraph (1) of this paragraph (before reduction by the amount determined under this subparagraph) to be the reasonable addition for the taxable year to K's reserve for losses on qualifying real property loans is $100,000. The amount determined under paragraph (a)(1)(i) of § 1.593–5 as the reasonable addition for the taxable year to the association's reserve for losses on nonqualifying loans is $10,000. The percentage of K's assets which are not assets defined in paragraph (e) of § 402.1–2 is 24 percent. The amount determined under subparagraph (1) of this paragraph ($100,000) must be reduced by $7,500.

$10,000 × 18 percent/24 percent.

Therefore, subject to the limitations described in subparagraph (4) of this paragraph and in paragraph (e) of this section, the amount determined under this paragraph to be the reasonable addition for the taxable year to K's reserve for losses on qualifying real property loans is $92,500 ($100,000 less $7,500).

Example (2). The facts are the same as in example (1), except that the percentage of K's assets which are not assets defined in paragraph (e) of § 402.1–2 is 12 percent. The amount determined under subparagraph (1) of this paragraph (before reduction by the amount determined under this subparagraph) to be the reasonable addition for the taxable year to K's reserve for losses on qualifying real property loans must be reduced by $10,000.

$10,000 × 18 percent/18 percent.

Because the denominator of the fraction may not be less than 18 percent, the fraction used in determining the amount of such reduction is equal to 1.

(4) **Overall limitation.** The amount determined under this paragraph shall not exceed the amount necessary to increase the balance (as of the close of the taxable year) of the reserve for losses on qualifying real property loans to 6 percent of such loans outstanding at such time.

(5) **Computation of taxable income.** For purposes of this paragraph, taxable income is computed—

(i) By excluding from gross income any amount included therein by reason of the application of section 593(e) and § 1.593–10 (relating to certain distributions to shareholders by a domestic building and loan association).

(ii) Without regard to any deduction allowable under section 166(c) (whether or not determined under section 593) and the regulations thereunder for an addition to a reserve for bad debts.

(iii)(a) By excluding from gross income an amount equal to the excess (if any) or (1) the total gains of the taxable year arising from sales and exchanges at a gain of (i) obligations the interest on which is excludable from gross income under section 103, and (ii) corporate stock, over (2) the total losses of such year arising from sales and exchanges at a loss of such obligations and stock.

(b) The provisions of this subdivision (iii) may be illustrated by the following example:

Example. For its taxable year beginning in 1971, the gains and losses of a domestic building and loan association from sales of stock and securities (all of which were made on December 31, 1971) were as follows:

	Gain	Loss
Municipal bonds acquired July 1, 1969, the interest on which is excludable from income under sec. 103	$25,000	....
Stock of Corporation A, acquired July 14, 1971	....	$6,000
Stock of Corporation B, acquired Dec. 22, 1970	$3,000	....

For purposes of this paragraph, the association's taxable income for 1971 is computed by excluding $22,000 ($25,000 + $3,000 – $6,000) from its gross income.

(iv) By excluding from gross income an amount equal to the lesser of (a) three-eighths of the net long-term capital gain for the taxable year or (b) three-eighths of the net long-term capital gain for the taxable year from the sale or exchange of property other than property described in subdivision (iii) of this subparagraph.

(v)(a) By excluding from gross income so much of the amount of dividends with respect to which a deduction is allowable under part VIII, subchapter B, chapter 1, subtitle A of the Code (section 241 and following) as is in excess of the applicable percentage (determined under subparagraphs (1) and (2) of this paragraph) of the dividends received deduction (determined under part VIII, subchapter B, chapter 1, subtitle A of the Code, without regard to section 596) for the taxable year.

(b) The provisions of this subdivision (v) may be illustrated by the following example:

Example. For its taxable year beginning in 1977, a domestic building and loan association receives dividends of $100 with respect to which a dividends received deduction of $85 is allowable under section 243(a)(1). The association receives no other dividends for the taxable year. The association's applicable percentage for the taxable year, as determined under subparagraphs (1) and (2) of this paragraph, is 42 percent. For purposes of this paragraph, the association's taxable income is computed by excluding from gross income the excess of the amount of dividends received ($100) over the applicable percentage of the allowable dividends received deduction (42 percent of $85, or $35.70), computed without regard to section 596. Thus, for purposes of this paragraph, $64.30 ($100 less $35.70) is excluded from gross income. See section 596 and § 1.596–1 with respect to the computation of the dividends received deduction for purposes of determining taxable income under section 63(a).

(vi) For taxable years beginning before January 1, 1978, without regard to any deduction the amount of which is computed upon, or may be subject to a limitation computed upon, the amount of taxable income, and without regard to any net operating loss carryback to such year from a taxable year beginning before January 1, 1979. (For purposes of this subparagraph, a net operating loss deduction under section 172 is not a deduction the amount of which may be subject to a limitation computed upon the amount of taxable income.)

(vii) For taxable years beginning after December 31, 1977, by taking into account any deduction the amount of which is computed upon or may be subject to a limitation computed upon the amount of taxable income, and any other deduction or loss allowed under subtitle A of the Code, such as any deduction allowable under section 172 or any loss allowable under section 1212(a), unless otherwise provided in this subparagraph.

(c) **Percentage method.** [Reserved]

(d) **Experience method.** [Reserved]

(e) **Percentage of deposits limitation where percentage of taxable income method or percentage method is applied.** If the amount determined by the taxpayer to constitute a reasonable addition for the taxable year to the reserve for losses on qualifying real property loans is greater than the amount determined under paragraph (d) of this section (relating to the experience method), the amount so determined cannot exceed an amount which, when added to the amount determined under paragraph (a)(1)(i) of § 1.593–5 to be a reasonable addition for such year to the reserve for losses on nonqualifying loans, equals the amount by which 12 percent of the total deposits or withdrawable accounts of depositors of the taxpayer at the close of such year exceeds the sum of the taxpayer's surplus, undivided profits, and reserves at the beginning of such year (taking into account any portion thereof which is attributable to the period before the first taxable year beginning after December 31, 1951. The terms "surplus, undivided profit, and reserves" and "total deposits or withdrawable accounts" have the same meanings as are assigned to them in paragraph (f) of § 1.593–6.

[T.D. 7549, 43 FR 21455, May 18, 1978, as amended by T.D. 7626, 44 FR 31177, May 31, 1979]

§ 1.593–7 Establishment and treatment of reserves for bad debts.

(a) Establishment of reserves—(1) In general. A taxpayer described in § 1.593–4 shall establish and maintain a reserve for losses on nonqualifying loans, a reservé for losses on qualifying real property loans, and, if required under paragraph (b)(4) or (c)(3)(i)(c) of this section, a supplemental reserve for losses on loans. For rules governing the crediting of additions to the reserve for losses on nonqualifying loans and the reserve for losses on qualifying real property loans, see paragraph (b) of § 1.593–5.

(2) Accounting for reserves. (i) The taxpayer shall establish and maintain as a permanent part of its regular books of account an account for each of the reserves established pursuant to subparagraph (1) of this paragraph. For purposes of the preceding sentence, a taxpayer may establish and maintain a permanent subsidiary ledger containing an account for each of such reserves. If a taxpayer maintains such a permanent subsidiary ledger, the total of the reserve accounts in such ledger and the total of the reserve accounts in any other ledger must be reconciled.

(ii) Any credit or charge to a reserve established pursuant to subparagraph (1) of this paragraph must be made to such reserve irrespective of whether the amount thereof is also credited or charged to any surplus, reserve, or other account which the taxpayer may be required or permitted to maintain pursuant to any Federal or State statute, regulation, or supervisory order. Minimum amounts credited in compliance with such Federal or State statutes, regulations, or supervisory orders to reserve or similar accounts, or additional amounts credited to such reserve or similar accounts and permissible under such statutes, regulations, or orders, against which charges may be made for the purpose of absorbing losses sustained by the taxpayer, may also be credited to the reserve for losses on nonqualifying loans or the reserve for losses on qualifying real property loans, provided that the total of the amounts so credited to the reserve for losses on nonqualifying loans, or to the reserve for losses on qualifying real property loans, for any taxable years does not exceed the amount described in subparagraph (1) or (2) of § 1.593–5(a) (whichever applies) as the addition to such reserve for such year.

(b) Allocation of pre-1963 reserves—(1) In general. In the case of a taxpayer described in § 1.593–4, the pre-1963 reserves, if any, of such taxpayer shall be allocated to (and constitute the opening balance of) the reserve for losses on nonqualifying loans, the reserve for losses on qualifying real property loans, and, if required under subparagraph (4) of this paragraph, the supplemental reserve for losses on loans. The term "pre-1963 reserves" means the net amount (determined as of the close of December 31, 1962) accumulated for taxable years beginning after December 31, 1951, in the taxpayer's reserve for bad debts pursuant to section 166(c) of the Internal Revenue Code of 1954 and section 23(k)(1) of the Internal Revenue Code of 1939 (including the amount of any bad debt reserves acquired from another taxpayer). For purposes of the preceding sentence in the case of a taxable year beginning before January 1, 1963, and ending after December 31, 1962, the part of such year occurring before January 1, 1963, shall be treated as a taxable year. Thus, the pre-1963 reserves of the taxpayer shall be an amount equal to—

(i) The sum of the amounts allowed as deductions for additions to a reserve for bad debts for taxable years beginning after December 31, 1951, and ending before January 1, 1963, plus

(ii) In the case of a taxable year beginning before January 1, 1963, and ending after December 31, 1962, the amount (determined under § 1.593–1 or 1.593–2) which would be allowable under section 166(c) as a deduction for an addition to a reserve for bad debts for the part of such year occurring before January 1, 1963, if such part year constituted a taxable year, minus

(iii) The total amount of bad debts charged against a reserve for bad debts during the period which begins with the opening of the first taxable year beginning after December 31, 1951, and which ends at the close of December 31, 1962 plus

(iv) The total amount of recoveries during the period described in subdivision (iii) of this subparagraph, on bad debts charged against a reserve for bad debts in a taxable year beginning after December 31, 1951.

(2) Allocation to opening balance of reserve for losses on nonqualifying loans. (i) As of the close of December 31, 1962 the pre-1963 reserves shall first be allocated to (and constitute the opening balance of) the reserve for losses on nonqualifying loans in an amount equal to the lesser of (a) the amount of such pre-1963 reserves, or (b) the amount determined under subdivision (ii) of this subparagraph.

(ii) The amount referred to in subdivision (i)(b) of this subparagraph shall be the amount which

would constitute a reasonable addition to the reserve for losses on nonqualifying loans under § 1.166–4 for a period in which the taxpayer's nonqualifying loans increased from zero to the amount thereof outstanding at the close of December 31, 1962.

(3) Allocation to opening balance of reserve for losses on qualifying real property loans. (i) Any portion of the pre-1963 reserves remaining after the allocation provided in subparagraph (2) of this paragraph shall, as of the close of December 31, 1962, be allocated to (and constitute the opening balance of) the reserve for losses on qualifying real property loans in an amount equal to the lesser of (a) the amount of such remaining portion, or (b) the amount determined under subdivision (ii) of this subparagraph. If the amount described in (a) of the preceding sentence is less than the amount described in (b) thereof, see § 1.593–8 for allocation of pre-1952 surplus, if any, to the opening balance of such reserve.

(ii) The amount referred to in subdivision (i)(b) of this subparagraph shall be an amount equal to the greater of—

(a) 3 percent of the taxpayer's qualifying real property loans outstanding at the close of December 31, 1962, or

(b) The amount which would constitute a reasonable addition to the reserve for losses on such loans under § 1.166–4 for a period in which the amount of such loans increased from zero to the amount thereof outstanding at the close of December 31, 1962.

(4) Allocation to supplemental reserve for losses on loans. Any portion of the pre-1963 reserves remaining after the allocations provided in subparagraphs (2) and (3) of this paragraph shall be allocated in its entirety to the supplemental reserve for losses on loans.

(5) Examples. This paragraph may be illustrated by the following examples:

Example (1)—(i) Facts. X Corporation, a domestic building and loan association organized on April 1, 1954, makes its returns on the basis of a taxable year ending March 31 and the reserve method of accounting for bad debts. For its taxable years ending March 31, 1955, through March 31, 1962, X was allowed a total of $750,000 as deductible additions to its reserve for bad debts under section 166(c). For its taxable year ending March 31, 1963, X was allowed a deduction under section 166(c) for an addition to a reserve for bad debts. Of such deduction $46,000 was determined under § 1.593–1 (relating to additions to reserve for bad debts) by reference to § 1.593–9 (relating to taxable income for taxable years beginning in 1962 and ending in 1963) as the amount which would be allowable for the period April 1 through December 31, 1962, if such period constituted a taxable year. During the taxable years ending March 31, 1955, through March 31, 1963, X charged bad debts of $55,000 against its reserve for bad debts and made recoveries on such debts of $10,000. Of such bad debt charges and recoveries, $50,000 was charged off and $9,000 was recovered prior to January 1, 1963. At the close of December 31, 1962, X had outstanding nonqualifying loans of $500,000 and outstanding qualifying real property loans of $10 million. It is assumed that, under § 1.166–4, $2,000 would constitute a reasonable addition to the reserve for losses on nonqualifying loans for a period in which such loans increased from zero to $500,000 and $20,000 would constitute a reasonable addition to the reserve for losses on qualifying real property loans for a period in which such loans increased from zero to $10 million.

(ii) Pre-1963 reserves determined. X's pre-1963 reserves are $755,000, computed as follows:

Deductible additions to reserve for bad debts:		
Years ending March 31, 1955 through March 31, 1962....	$750,000	
Period April 1 through December 31, 1962	46,000	
		$796,000
Less:		
Net bad debt losses for period April 1, 1954 through December 31, 1962:		
Bad debts	50,000	
Recoveries	(9,000)	41,000
		755,000

(iii) Allocation to opening balance of reserve for losses on nonqualifying loans. The portion of the $755,000 of pre-1963 reserves to be allocated to the reserve for losses on nonqualifying loans as the opening balance thereof is $2,000 since such amount would constitute a reasonable addition to the reserve for losses on nonqualifying loans under § 1.166–4 for a period in which the amount of such loans increased from zero to $500,000.

(iv) Allocation to opening balance of reserve for losses on qualifying real property loans. Of the $753,000 ($755,000 minus $2,000) of pre-1963 reserves remaining after the allocation described in subdivision (iii) of this example, $300,000 (3 percent of $10 million, the total amount of qualifying real property loans outstanding at the close of December 31, 1962) is allocated to the opening balance of the reserve for losses on qualifying real property loans, since such amount is greater than $20,000, the amount which would constitute a reasonable addition to the reserve for losses on such loans under § 1.166–4 for a period in which the amount of such loans increased from zero to $10 million.

(v) Allocation to supplemental reserve for losses on loans. The balance of the pre-1963 reserves, or $453,000 ($755,000 minus the sum of $2,000 and $300,000), is allocated in its entirety to the supplemental reserve for losses on loans.

Example (2). Assume the same facts as in example (1), except that X was organized in 1936, and on December 31, 1962, had pre-1963 reserves of only $15,000 (rather than $755,000). In such case, $2,000 of such pre-1963 reserves would be allocated to, and constitute the opening balance of, the reserve for losses on nonqualifying loans, and $13,000 ($15,000 minus $2,000) would be allocated to and constitute part of the opening balance of the reserve for losses on qualifying real property loans. However, since such $13,000 is less than $300,000 (3 percent of $10 million), the opening balance of the reserve for losses on qualifying real property loans must be increased by so much of the taxpayer's pre-1952

surplus as is necessary to increase such opening balance to $300,000. For rules on the allocation of pre-1952 surplus to the opening balance of the reserve for losses on qualifying real property loans, see § 1.593–8.

(c) **Treatment of reserves—(1) In general.** Except as provided in paragraph (d) of § 1.593–8 (relating to the allocation of pre-1952 surplus), each of the reserves established pursuant to paragraph (a) of this section shall be treated, for purposes of subtitle A of the Code, as a reserve for bad debts, except that no deduction shall be allowed under section 166 for any addition to the supplemental reserve for losses on loans. Accordingly, if in any taxable year the taxpayer charges any of the reserves established pursuant to paragraph (a) of this section for an item other than a bad debt, gross income for such year shall be increased by the amount of such charge. For special rules in case of certain nondeductible distributions to shareholders by a domestic building and loan association, see § 1.593–10.

(2) **Bad debt losses.** Any bad debt in respect of a nonqualifying loan shall be charged against the reserve for losses on nonqualifying loans, and any bad debt in respect of a qualifying real property loan shall be charged against the reserve for losses on qualifying real property loans. At the option of the taxpayer, however, any bad debt in respect of either class of loans may be charged in whole or in part against the supplemental reserve for losses on loans.

(3) **Recoveries of bad debts.** Any amount recovered after December 31, 1962, in respect of a bad debt shall be credited to the reserves established pursuant to paragraph (a) of this section in the following manner:

(i) If the recovery is in respect of a bad debt which was charged prior to January 1, 1963, against a reserve for bad debts established pursuant to section 166(c) of the Internal Revenue Code of 1954, or section 23(k)(1) of the Internal Revenue Code of 1939, then the amount recovered shall be credited—

(a) First, to the reserve for losses on nonqualifying loans in an amount equal to the amount, if any, by which the amount determined under subdivision (ii) of paragraph (b)(2) of this section exceeds the opening balance of such reserve (determined under such paragraph (b)(2)),

(b) Second, to the reserve for losses on qualifying real property loans in an amount equal to the amount, if any, by which the amount determined under subdivision (ii) of paragraph (b)(3) of this section exceeds the opening balance of such reserve (determined under such paragraph (b)(3)), and

(c) Finally, to the supplemental reserve for losses on loans.

For purposes of determining the amounts of the credits under (a) and (b) of this subdivision, the opening balances of the reserve for losses on nonqualifying loans and the reserve for losses on qualifying real property loans shall be deemed to include the sum of the amounts of any prior credits made to such reserves pursuant to this subdivision.

(ii) If the recovery is in respect of a bad debt which is charged after December 31, 1962, against only one of the reserves established pursuant to paragraph (a) of this section, the entire amount recovered shall be credited to the reserve so charged.

(iii) If the recovery is in respect of a bad debt which is charged after December 31, 1962, against more than one of the reserves established pursuant to paragraph (a) of this section, then the amount recovered shall be credited to each of the reserves so charged in the ratio which the amount of the bad debt charged against such reserve bears to the total amount of such bad debt charged against both such reserves.

(iv) Subdivision (i) of this subparagraph may be illustrated by the following example:

Example. In 1962, the taxpayer sustained a bad debt of $10,000, which was charged against a reserve for bad debts established pursuant to section 166(c). As of the close of December 31, 1962, the balance of the taxpayer's reserve for losses on nonqualifying loans was $2,000, the amount determined under paragraph (b)(2)(ii) of this section. As of the same time, the balance of the taxpayer's reserve for losses on qualifying real property loans was $100,000, but the amount determined under paragraph (b)(3)(ii) of this section was $106,-000. In 1963, the taxpayer recovers $8,000 of the $10,000 charged off in 1962. Of the $8,000 recovered in 1963, $6,000 ($106,000 minus $100,000) is credited to the reserve for losses on qualifying real property loans, and the balance of $2,000 is credited to the supplemental reserve for losses on loans.

[T.D. 6728, 29 FR 5859, May 5, 1964, as amended by T.D. 7549, 43 FR 21457, May 18, 1978]

§ 1.593–8 Allocation of pre-1952 surplus to opening balance of reserve for losses on qualifying real property loans.

(a) **General rule.** In the case of a taxpayer described in § 1.593–4, if the amount of pre-1963 reserves allocated (under paragraph (b)(3)(i) of § 1.593–7) to the opening balance of the reserve for losses on qualifying real property loans is less than an amount equal to the greater of—

(1) The total amount of qualifying real property loans outstanding at the close of December 31, 1962, multiplied by 3 percent, or

(2) The amount which would constitute a reasonable addition to the reserve for losses on such loans under § 1.166–4 for a period in which the amount of such loans increased from zero to the amount thereof outstanding at the close of December 31, 1962,

then such opening balance shall be increased by an amount equal to so much of the "pre-1952 surplus" of the taxpayer as is necessary to increase such opening balance to the greater of the amounts described in subparagraph (1) or (2) of this paragraph. The amount of such increase shall be deemed to be included in such opening balance solely for the limited purpose described in paragraph (d) of this section.

(b) Pre-1952 surplus defined—(1) In general. For purposes of this section and § 1.593–7, the term "pre-1952 surplus" means an amount equal to—

(i) The sum of the taxpayer's surplus, undivided profits, and reserves determined (under the principles of paragraph (d)(2) of § 1.593–1) as of the close of the taxpayer's last taxable year beginning before January 1, 1952 (including any amount acquired from another taxpayer), minus

(ii) The amount of any impairments of such sum (as determined under paragraph (c) of this section).

(2) Reduction for certain excludable interest. **(i)** The amount otherwise determined under subparagraph (1) of this paragraph may, at the option of the taxpayer, be reduced by the portion, if any, of such amount which is attributable to interest which would have been excludable from gross income of such taxpayer under section 22(b)(4) of the Internal Revenue Code of 1939 (relating to interest on governmental obligations) or the corresponding provisions of prior revenue laws, had such taxpayer been subject, when such interest was received or accrued, to the income tax imposed by such Code or prior revenue laws.

(ii) For purposes of subdivision (i) of this subparagraph, the portion of the amount otherwise determined under subparagraph (1) of this paragraph which is attributable to interest which would have been excludable from gross income shall be determined by multiplying such amount by the ratio which—

(a) The total amount of such excludable interest for the period before the taxpayer's first taxable year beginning after December 31, 1951, bears to

(b) The total amount of the taxpayer's gross income, plus the total amount of such excludable interest, for such period.

If the amount determined under subparagraph (1)(i) of this paragraph includes any amount acquired from another taxpayer, then the gross income and excludable interest of the taxpayer for the period before its first taxable year beginning after December 31, 1951, shall include the gross income and excludable interest (for the same period) of such other taxpayer.

(c) Impairment of surplus, undivided profits, and reserves—(1) General rule. In the case of a taxable year beginning after December 31, 1951, and ending before January 1, 1963, if for such year—

(i) The amount described in paragraph (b)(1)(i) of this section (as decreased under subparagraph (3)(i) of this paragraph), exceeds

(ii) The sum of the taxpayer's surplus, undivided profits, and reserves (excluding the amount of any pre-1963 reserves) determined as of the close of such year under the principles of paragraph (d)(2) of § 1.593–1,

then the amount described in paragraph (b)(1)(i) of this section may, at the option of the taxpayer, be reduced by the amount of such excess.

(2) Transition year. In the case of a taxable year beginning before January 1, 1963, and ending after December 31, 1962, the part of such year which occurs before January 1, 1963, shall be considered to be a taxable year for purposes of subparagraph (1) of this paragraph.

(3) Rules for applying subparagraph (1). **(i)** For purposes of subparagraph (1)(i) of this paragraph, the amount described in paragraph (b)(1)(i) of this section shall be decreased by the total of any reductions under subparagraph (1) of this paragraph for prior taxable years; and

(ii) For purposes of subparagraph (1)(ii) of this paragraph, the term "pre-1963 reserves" means the amount determined under the principles of paragraph (b)(1) of § 1.593–7 for the period which begins with the first day of the first taxable year beginning after December 31, 1951, and which ends at the close of the taxable year with respect to which the computation under subparagraph (1) is being made.

(d) **Treatment of pre-1952 surplus.** Any portion of the taxpayer's pre-1952 surplus which, pursuant to paragraph (a) of this section, is deemed to be included in the opening balance of the reserve for losses on qualifying real property loans shall not be treated as a reserve for bad debts for any purpose other than computing for any taxable year the amount determined under the method described in paragraph (b), (c), or (d) of § 1.593–6 (relating, respectively, to the percentage of taxable income method, the percentage of real property loans method, and the experience method) or paragraph (b), (c), or (d) of § 1.593–6A (relating, respectively, to the percentage of taxable income method, the percentage method, and the experience method). For such limited purpose, such portion shall be deemed to remain in, and constitute a part of, the reserve for losses on qualifying real property loans. For all other purposes, such portion will retain its character as part of the taxpayer's pre-1952 surplus.

(e) **Example.** The provisions of this section may be illustrated by the following example:

Example—(1) Facts. X Corporation, a mutual savings bank organized in 1934, makes its returns on the basis of the calendar year and the reserve method of accounting for bad debts. For the taxable years 1934 through 1951, X's gross income was $2.7 million, in addition to which X received $300,000 of interest which would have been excludable from gross income under section 22(b)(4) of the Internal Revenue Code of 1939, or the corresponding provisions of prior revenue laws, if X had been subject to the income tax imposed by such Code or prior revenue laws when such interest was received. At the close of 1951, the sum of X's surplus, undivided profits, and reserves was $650,000. At the close of 1954, X had pre-1963 reserves of $10,000, and surplus, undivided profits, and reserves of $630,000. At the close of 1955, X had pre-1963 reserves of $15,000, and surplus, undivided profits, and reserves of $625,000. At the close of 1962, X had pre-1963 reserves of $55,000, nonqualifying loans of $4 million, and qualifying real property loans of $10 million. It is assumed that, under § 1.166–4, $16,000 would constitute a reasonable addition to the reserve for losses on nonqualifying loans for a period in which such loans increased from zero to $4 million and $20,000 would constitute a reasonable addition to the reserve for losses on qualifying real property loans for a period in which such loans increased from zero to $10 million.

(2) Impairment of surplus, undivided profits, and reserves for 1954. The sum of X's surplus, undivided profits, and reserves at the close of 1951 was impaired during 1954 by $30,000, computed as follows:

Sum of surplus, undivided profits, and reserves at close of 1951	$650,000
Less:	
Sum of surplus, undivided profits, and reserves at close of 1954, excluding pre-1963 reserves at close of such year ($630,000 minus $10,000)	620,000
	30,000

(3) Impairment of surplus, undivided profits, and reserves for 1955. The sum of X's surplus, undivided profits, and reserves at the close of 1951 was further impaired during 1955 by $10,000, computed as follows:

Sum of surplus, undivided profits, and reserves at close of 1951, decreased by amount of 1954 impairment ($650,000 minus $30,000)	$620,000
Less:	
Sum of surplus, undivided profits, and reserves at close of 1955, excluding pre-1963 reserves at close of such year ($625,000 minus $15,000)	610,000
	10,000

(4) Pre-1952 surplus. X's pre-1952 surplus is $549,000, computed as follows:

Sum of surplus, undivided profits and reserves at close of 1951	$650,000	
Less:		
Sum of impairments for 1954 and 1955 ($30,000 plus $10,000)	40,000	
		$610,000
Less:		
Portion of such $610,000 which is attributable to excludable interest ($610,000 multiplied by $300,000/$3 million)		61,000
		549,000

(5) Allocation of pre-1963 reserves to reserve for losses on nonqualifying loans and to reserve for losses on qualifying real property loans. Of the $55,000 of pre-1963 reserves at the close of 1962, $16,000 (the amount which would constitute a reasonable addition to the reserve for losses on nonqualifying loans for a period in which such loans increased from zero to $4 million) shall be allocated to, and constitute the opening balance of, the reserve for losses on nonqualifying loans, and the balance of $39,000 ($55,000 minus $16,000) shall be allocated to, and constitute a part of the opening balance of, the reserve for losses on qualifying real property loans.

(6) Allocation of pre-1952 surplus to reserve for losses on qualifying real property loans. X's pre-1963 reserves are not sufficient to bring the opening balance of the reserve for losses on qualifying real property loans to $300,000, which is an amount equal to the greater of—

(i) $300,000 (*i.e.*, $10 million of qualifying real property loans outstanding at the close of 1962, multiplied by 3 percent), or

(ii) $20,000 (the amount which would constitute a reasonable addition to the reserve for losses on such loans under § 1.166–4 for a period in which the amount of such loans increased from zero to the $10 million).

Therefore, $261,000 ($300,000 minus $39,000) of X's pre-1952 surplus of $549,000 shall be deemed to be included in the opening balance of such reserve in order to increase such opening balance to $300,000.

[T.D. 6728, 29 FR 5861, May 5, 1964, as amended by T.D. 7549, 43 FR 21457, May 18, 1978]

§ 1.593–9 Taxable income for taxable years beginning in 1962 and ending in 1963.

(a) **In general.** For purposes of subtitle A of the Code, in the case of a taxable year beginning

before January 1, 1963, and ending after December 31, 1962, of a taxpayer described in § 1.593–4, taxable income for such taxable year shall be the sum of—

(1) An amount equal to (i) the portion of taxable income (as determined under paragraph (b) of this section) allocable to the part of such year occurring before January 1, 1963, minus (ii) the amount determined under § 1.593–1 or § 1.593–2 which would be allowable under section 166(c) as a deduction for an addition to a reserve for bad debts if such part year constituted a taxable year, and

(2) An amount equal to (i) the portion of taxable income (as determined under paragraph (b) of this section) allocable to the part of such year occurring after December 31, 1962, minus (ii) the amount determined under § 1.593–5 which would be allowable under section 166(c) as a deduction for an addition to a reserve for bad debts if such part year constituted a taxable year.

(b) Rules for applying paragraph (a). For purposes of paragraph (a)(1) and (2) of this section—

(1) In determining taxable income the rules of paragraph (b)(2) of § 1.593–6 shall apply.

(2) Taxable income (as determined under subparagraph (1) of this paragraph) shall be allocated to each part year (that is, the part occurring before January 1, 1963, and the part occurring after December 31, 1962) in the ratio which the number of days in such part year bears to the number of days in the entire taxable year.

(3) The sum of surplus, undivided profits, and reserves, the total deposits or withdrawable accounts, the amount of outstanding qualifying real property loans and nonqualifying loans, and any other account balance necessary to determine the addition to a reserve for bad debts for each part year, shall be the actual account balance as of the beginning or ending, as the case may be, of each such part year. See example (1) of paragraph (b)(5) of § 1.593–7.

(c) Example. This section may be illustrated by the following example:

Example. (i) For its taxable year beginning October 1, 1962, and ending September 30, 1963, corporation X, a domestic building and loan association, has taxable income of $1,825,000, determined without regard to any deduction under section 166(c) for an addition to a reserve for bad debts, without regard to a charitable contribution of $500, and without regard to $1,000 which is includible in gross income by reason of the application of § 1.593–10.

(ii) Under this section, $460,000 (92/365 of $1,825,000) of such taxable income is allocated to the part of the taxable year occurring before January 1, 1963 (that is, October 1 through December 31, 1962) and $1,365,000 (273/365 of $1,825,000) of such taxable income is allocated to the part of the taxable year occurring after December 31, 1962 (that is, January 1 through September 30, 1963). Corporation X's taxable income for the taxable year ending September 30, 1963, is $546,500, computed as follows:

Part year occurring in 1962:		
Taxable income	$460,000	
Amount of deduction assumed to be allowable under § 1.593–1 if such part year constituted a taxable year	460,000	
Part year occurring in 1963:		
Taxable income	$1,365,000	
Amount of deduction assumed to be allowable under § 1.593–5 if such part year constituted a taxable year	819,000	
		$546,000
		546,000
Add:		
Amount includible in gross income by reason of application of § 1.593–10		1,000
Less:		
Charitable contribution		500
Taxable income for taxable year; ending September 30, 1963		546,500

[T.D. 6728, 29 FR 5862, May 5, 1964]

§ 1.593–10 Certain distributions to shareholders by a domestic building and loan association.

(a) In general. Section 593(f) provides that if a domestic building and loan association (as defined in section 7701(a)(19) and the regulations thereunder) distributes property after December 31, 1962, to a shareholder with respect to its stock and if the amount of such distribution is not allowable to the association as a deduction under section 591 (relating to deduction for dividends paid on deposits), then, notwithstanding any other provision of the Code, the distribution shall be treated as provided in paragraphs (b) and (c) of this section. For purposes of the preceding sentence, the term "distribution" includes any distribution in redemption of stock to which section 302(a) or 303 applies, or in partial or complete liquidation of the association, as well as any other distribution which the association may make to a shareholder with respect to its stock. For definition of the term "property", see section 317(a). For determination of the amount of a distribution, see section 301(b). For taxable years beginning after July 11, 1969, this paragraph is not applicable to any transaction to which section 381 (relating to carryovers in certain corporate acquisitions) and the regulations thereunder apply.

(b) **Distributions out of certain reserves—(1) Distributions not in exchange for stock.** If the distribution is not a redemption to which section 302(a) or 303 applies or in partial or complete liquidation of the association, then to the extent that the distribution is not out of earnings and profits of the taxable year (within the meaning of section 316(a)(2)) or out of earnings and profits accumulated in taxable years beginning after December 31, 1951, the distribution shall be treated as made out of—

(i) First, the reserve for losses on qualifying real property loans (determined under subparagraph (3) of this paragraph), to the extent thereof,

(ii) Second, the supplemental reserve for losses on loans, to the extent thereof, and

(iii) Finally, such other accounts as may be proper.

(2) **Distributions in redemption of stock or in liquidation.** If the distribution is a redemption to which section 302(a) or 303 applies, or in partial or complete liquidation of the association, the distribution shall be treated as made out of—

(i) First, the reserve for losses on qualifying real property loans (as determined under subparagraph (3) of this paragraph), to the extent thereof,

(ii) Second, the supplemental reserve for losses on loans, to the extent thereof,

(iii) Third, earnings and profits of the taxable year (within the meaning of section 316(a)(2)),

(iv) Fourth, earnings and profits accumulated in taxable years beginning after December 31, 1951, and

(v) Finally, such other accounts as may be proper.

(3) **Special rule.** For purposes of subparagraphs (1)(i) and (2)(i) of this paragraph, the reserve for losses on qualifying real property loans shall be an amount equal to—

(i) The balance of such reserve determined as of the close of the taxable year after all adjustments for such year have been made (including the addition for such year determined under § 1.593–6 or § 1.593–6A (whichever is applicable)), minus.

(ii) The sum of—

(a) The amount which would have constituted the opening balance of such reserve (at the close of December 31, 1962) if such opening balance had been determined under the experience method described in paragraph (b)(3)(ii)(b) of § 1.593–7 (relating to allocation of pre-1963 reserves to the opening balance of the reserve for losses on qualifying real property loans), and

(b) The total amount of the annual additions which would have been made to such reserve under section 166(c) for taxable years ending after December 31, 1962, if each such addition had been determined under the experience method described in paragraph (d) of § 1.593–6 or paragraph (d) of § 1.593–6A, whichever is applicable for the taxable year of such addition.

For purposes of subdivision (i) of this subparagraph, the balance of the reserve for losses on qualifying real property loans shall include the total amount of any pre-1963 reserves allocated thereto under paragraph (b)(3) of § 1.593–7, but shall not include any pre-1952 surplus which is deemed to be included therein under paragraph (a) of § 1.593–8 (relating to allocation of pre-1952 surplus to the opening balance of the reserve for losses on qualifying real property loans).

(c) **Amount charged against reserve and included in gross income—(1) In general.** If a distribution is treated under paragraph (b)(1) or (2) of this section as having been made out of the reserve for losses on qualifying real property loans or out of the supplemental reserve for losses on loans, such reserves shall be charged with, and gross income for the taxable year shall be increased by, an amount equal to the lesser of—

(i) The amount of such reserves, or

(ii) The amount which, when reduced by the amount of income tax imposed by chapter 1 of the Code and attributable to the inclusion of such amount in gross income, is equal to the amount of such distribution.

(2) **Special rule.** For purposes of subparagraph (1)(ii) of this paragraph, in determining the income tax attributable to the inclusion of an amount in gross income, taxable income shall be determined without regard to any net operating loss carryback to the taxable year under section 172.

(d) **Examples.** This section may be illustrated by the following examples:

Example (1)—(i) Facts. X Corporation, a domestic building and loan association having nonwithdrawable capital stock represented by shares, was organized in 1946, and makes its returns on the basis of the calendar year and the reserve method of accounting for bad debts. As of the close of December 31, 1962, X had $6,900 of earnings and profits accumulated in taxable years beginning after December 31, 1951. X's taxable income for 1963 is $30,000 (computed prior to the inclusion of any amount in gross income for such year under section 593(f)) and during such year X received tax-ex-

empt interest of $500. X's earnings and profits for 1963 (computed at the close of the taxable year without diminution by reason of any distributions made during the taxable year) is $20,400. The opening balance of X's reserve for losses on qualifying real property loans as of the close of December 31, 1962 (determined under paragraph (b)(3)(ii)(a) of § 1.593–7) was $24,500. Pre-1963 reserves of $22,500 were included in such opening balance, but it is assumed that pre-1963 reserves of only $2,500 would have been included in the opening balance if the opening balance had been determined under the experience method described in paragraph (b)(3)(ii)(b) of § 1.593–7. Pre-1952 surplus of $2,000 was deemed included in such opening balance under paragraph (a) of § 1.593–8. The deductible addition to such reserve for 1963 is $47,000. It is assumed that the addition to such reserve for 1963 would have been $2,200 if such addition had been computed under the experience method described in paragraph (d) of § 1.593–6. On each of four dates during 1963 (January 1, April 1, July 1, and October 1), X made a $12,000 distribution (which was not a redemption to which section 302(a) or 303 applied or in partial or complete liquidation of X) to its shareholders with respect to its stock.

(ii) Reserve for losses on qualifying real property loans. For purposes of paragraph (b)(1)(i) of this section, X's reserve for losses on qualifying real property loans is $64,800, computed as follows:

Closing balance of reserve for losses on qualifying real property loans after addition for 1963 ($24,500 opening balance plus $47,000 addition)		$71,500
Minus:		
Amount of pre-1963 reserves which would have been included in opening balance under experience method	2,500	
Total additions which would have been made under experience method	2,200	
Pre-1952 surplus included in opening balance	2,000	
		6,700
		64,800

(iii) Treatment of distributions. Of each $12,000 quarterly distribution, $5,100 ($20,400) (earnings and profits of the taxable year divided by 4) is out of X's earnings and profits of the taxable year (within the meaning of section 316(a)(2)); the remainder of the January 1 distribution, $6,900 ($12,000 minus $5,100), is out of X's earnings and profits accumulated in taxable years beginning after December 31, 1951. Since $20,700 ($6,900 multiplied by 3) is not out of X's earnings and profits, such amount shall be treated as made out of X's reserve for losses on qualifying real property loans (as determined under subdivision (ii) of this example).

(iv) Amount charged against reserve for losses on qualifying real property loans and included in gross income. The reserve for losses on qualifying real property loans is charged with, and X's gross income for 1963 is increased by, $43,124, which is the lesser of—

(a) $64,800 (the reserve as of December 31, 1963, as determined under subdivision (ii) of this example), or

(b) $43,124, *i.e.*, the amount which, when reduced by the amount of income tax attributable to the inclusion of such amount in gross income, $22,424 ($43,124 multiplied by a tax rate of 52 percent), is equal to the amount of such distribution, $20,700.

Example (2)—(i) Facts. Assume the same facts as in example (1) and the following additional facts: X's taxable income for 1964 is $6,000. The deductible addition to the reserve for losses on qualifying real property loans for 1964 is $11,000, but it is assumed that only $2,676 would have been the addition to such reserve for 1964 if such addition had been computed under the experience method described in paragraph (d) of § 1.593–6. On December 31, 1964, X makes a $10,000 distribution in a redemption to which section 302(a) applies.

(ii) Reserve for losses on qualifying real property loans. For purposes of paragraph (b)(2)(i) of this section, X's reserve for losses on qualifying real property loans is $30,000, computed as follows:

Closing balance of reserve for losses on qualifying real property loans after addition for 1964 ($71,500 opening balance plus $11,000 addition)		$82,500
Minus:		
Amount of pre-1963 reserves which would have been included in opening balance under the experience method	$2,500	
Total additions which would have been made under the experience method ($2,200 for 1963 plus $2,676 for 1964)	4,876	
Pre-1952 surplus included in opening balance	2,000	
		9,376
		73,124
Less charge against reserve under subdivision (iv) of example (1) for 1963 distribution		43,124
		30,000

(iii) Treatment of distribution. The $10,000 distribution in a redemption to which section 302(a) applies shall be treated as made out of X's reserve for losses on qualifying real property loans (as determined under subdivision (ii) of this example).

(iv) Amount charged against reserve for losses on qualifying real property loans and included in gross income. The reserve for losses on qualifying real property loans is charged with, and X's gross income for 1964 is increased by, $12,820, which is the lesser of—

(a) $30,000 (the reserve as of December 31, 1964, as determined under subdivision (ii) of this example), or

(b) $12,820, *i.e.*, the amount which, when reduced by the amount of income tax attributable to the inclusion of such amount in gross income, $2,820 ($12,820 multiplied by a tax rate of 22 percent), is equal to the amount of such distribution, $10,000.

Example (3)—(i) Facts. X Corporation, a domestic building and loan association having nonwithdrawable capital stock represented by shares, was organized in 1946, and makes its returns on the basis of the calendar year and the reserve method of accounting for bad debts. As of the close of December 31, 1962, X had $6,900 of earnings and profits accumulated in taxable years beginning after December 31, 1951. X's taxable income for 1963 is $30,000 (computed prior to the inclusion of any amount in gross income for such year under section 593(f)) and during such year X received tax-exempt interest of $500. X's earnings and profits for 1963 (computed at the close of the taxable year without diminution by reason of any distributions made during the taxable year) is $20,400. The opening balance of X's reserve for losses on qualifying real property loans as of the close of December 31,

1962 (determined under paragraph (b)(3)(ii)(a) of § 1.593–7) was $24,500. Pre-1963 reserves of $24,500 were included in such opening balance, but it is assumed that pre-1963 reserves of only $4,500 would have been included in the opening balance if the opening balance had been determined under the experience method described in paragraph (b)(3)(ii)(b) of § 1.593–7. The deductible addition to such reserve for 1963 is $500. It is assumed that the addition to such reserve for 1963 would have been $100 if such addition had been computed under the experience method described in paragraph (d) of § 1.593–6. As of December 31, 1963, the balance of X's supplemental reserve for losses on loans is $30,000. On each of four dates during 1963 (January 1, April 1, July 1, and October 1), X made a $12,000 distribution (which was not a redemption to which section 302(a) or 303 applied or in partial or complete liquidation of X) to its shareholders with respect to its stock.

(ii) **Reserve for losses on qualifying real property loans.** For purposes of paragraph (b)(1)(i) of this section, X's reserve for losses on qualifying real property loans is $20,400, computed as follows:

Closing balance of reserve for losses on qualifying real property loans after addition for 1963 ($24,500 opening balance plus $500 addition)		$25,000
Minus:		
Amount of pre-1963 reserves which would have been included in opening balance under experience method......	$4,500	
Total additions which would have been made under experience method	100	
		4,600
		20,400

(iii) **Treatment of distributions.** Of each $12,000 quarterly distribution, $5,100 ($20,400 earnings and profits of the taxable year divided by 4) is out of X's earnings and profits of the taxable year (within the meaning of section 316(a)(2)); the remainder of the January 1 distribution, $6,900 ($12,000 minus $5,100), is out of X's earnings and profits accumulated in taxable years beginning after December 31, 1951. Since $20,-700 ($6,900 multiplied by 3) is not out of X's earnings and profits, $20,400 of such amount shall be treated as made out of X's reserve for losses on qualifying real property loans (as determined under subdivision (ii) of this example) and $300 ($20,700 minus $20,400) shall be treated as made out of X's supplemental reserve for losses on loans.

(iv) **Amount included in gross income.** X's gross income for 1963 is increased by $43,124, which is the lesser of—

(a) $50,400 ($20,400, the reserve for losses on qualifying real property loans, as determined under subdivision (ii) of this example, plus $30,000, the supplemental reserve for losses on loans), or

(b) $43,124, *i.e.,* the amount which, when reduced by the amount of income tax attributable to the inclusion of such amount in gross income, $22,424 ($43,124 multiplied by a tax rate of 52 percent), is equal to the amount of such distribution, $20,700.

(v) **Amount charged against reserve for losses on qualifying real property loans and supplemental reserve for losses on loans.** The reserve for losses on qualifying real property loans is charged with $20,400 (the balance of the reserve as of December 31, 1963, as determined under subdivision (ii) of this example), and the supplemental reserve for losses on loans is charged with $22,724 ($43,124, the amount included in gross income under subdivision (iv) of this example, minus $20,400).

[T.D. 6728, 29 FR 5862, May 5, 1964, as amended by T.D. 7549, 43 FR 21457, May 18, 1978]

§ 1.593–11 Qualifying real property loan and nonqualifying loan defined.

(a) **Loan defined.** For purposes of this section, the term "loan" means debt, as the term "debt" is used in section 166 and the regulations thereunder. The term "loan" also includes a redeemable ground rent (as defined in section 1055(c)) which is owned by the taxpayer, and any property acquired by the taxpayer in a transaction described in section 595(a). For determination of the amount of a loan, see paragraph (d) of this section.

(b) **Qualifying real property loan defined—(1) General rule.** For purposes of §§ 1.593–4 through 1.593–10, the term "qualifying real property loan" means any loan (other than a loan described in subparagraph (5) of this paragraph) which is secured by an interest in qualifying real property. For purposes of this section, the term "real property" means any property which, under the law of the jurisdiction in which such property is situated, constitutes real property. The term "real property" also includes a mobile unit which is permanently fixed to real property. The determination of whether a mobile unit is permanently fixed to real property shall be made on the basis of facts and circumstances in each particular case. For example, a mobile unit is permanently fixed to real property during a taxable year if, except for a brief period during which the unit is transported to a site, such unit was placed upon a foundation at a site with wheels and axles removed, affixed to the ground by means of straps, and connected to water, sewer, gas, and electric facilities.

(2) **Meaning of "secured".** A loan will be considered as "secured" only if the loan is on the security of any instrument (such as a mortgage, deed of trust, or land contract) which makes the interest of the debtor in the property described therein specific security for the payment of the loan, provided that such instrument is of such a nature that, in the event of default, the property could be subjected to the satisfaction of the loan with the same priority as a mortgage or deed of trust in the jurisdiction in which the property is situated.

(3) **Meaning of "interest".** The word "interest" means an interest in real property which, under the law of the jurisdiction in which such property is situated, constitutes either (i) an interest in fee in such property, (or in the case of a

mobile unit, an ownership interest), (ii) a leasehold interest in such property extending or renewable automatically for a period of at least 30 years, or at least 10 years beyond the date scheduled for the final payment on the loan secured by such interest, (iii) a leasehold interest in improved residential real property consisting of a structure or structures containing, in the aggregate, no more than four family units extending for a period of at least 2 years beyond the date scheduled for the final payment on the loan secured by such interest, or (iv) a leasehold interest in such property held subject to a redeemable ground rent defined in section 1055(c).

(4) **Meaning of "qualifying real property".** The term "qualifying real property" means any real property which is improved real property, or which from the proceeds of the loan will become improved real property. As used in the preceding sentence, the term "improved real property" means—

(i) Land on which is located any building of a permanent nature (such as a house, mobile unit, apartment house, office building, hospital, shopping center, warehouse, garage, or other similar permanent structure), provided that the value of such building is substantial in relation to the value of such land,

(ii) Any building lot or site which, by reason of installations and improvements that have been completed in keeping with applicable governmental requirements and with general practice in the community, is a building lot or site ready for the construction of any building of a permanent nature within the meaning of paragraph (b)(4)(i) of this section.

(iii) Real property which, because of its state of improvement, produces sufficient income to maintain such real property and retire the loan in accordance with the terms thereof, or

(iv) A mobile unit which is permanently fixed to real property.

(5) **Loans not included.** The term "qualifying real property loan" does not include—

(i) Any loan evidenced by a security as defined in section 165(g)(2)(C),

(ii) Any loan (whether or not evidenced by a security as so defined) the primary obligor on which is (a) a government or a political subdivision or instrumentality thereof, (b) a bank (as defined in section 581), or (c) another member of the same affiliated group,

(iii) Any loan to the extent such loan is secured by a deposit in or share of the taxpayer (including a share of nonwithdrawable capital stock), determined as of the close of the taxable year, and

(iv) Any loan which (within a 60-day period beginning in one taxable year of the taxpayer and ending in the next taxable year of such taxpayer) is made or acquired, and then repaid or disposed of, unless both the transaction by which the loan is made or acquired and the transaction by which the loan is repaid or disposed of are established to the satisfaction of the district director to be for bona fide business purposes.

As used in subdivision (ii)(c) of this subparagraph, the term "affiliated group" shall have the meaning assigned to such term by section 1504(a) (relating to the definition of an affiliated group), except that the phrase "more than 50 percent" shall be substituted for the phrase "at least 80 percent" each place the latter phrase appears in section 1504(a), and all corporations shall be treated as includible corporations (without regard to any of the exclusions provided in section 1504(b)).

(c) **Nonqualifying loan defined.** For purposes of §§ 1.593–4 through 1.593–9, the term "nonqualifying loan" means any loan which is not a qualifying real property loan.

(d) **Amount of loan determined—(1) General rule.** Except as provided in subparagraph (2) of this paragraph, the amount of any qualifying real property loan or nonqualifying loan, for purposes of section 593, is the adjusted basis of such loan as determined under § 1.1011–1. However, the adjusted basis, determined under § 1.1011–1, of any "loan in process" does not include the unadvanced portion of such loan. For the basis of a redeemable ground rent reserved or created by the taxpayer before April 11, 1963, see section 1055(b)(3); and for the basis of a loan represented by property acquired by the taxpayer in a transaction described in section 595(a), see section 595(c).

(2) **Limitation.** If the total amount advanced on any loan exceeds the loan value of any interest in qualifying real property which secures such loan, then the portion of such loan which, as of the close of any taxable year, will be considered as a qualifying real property loan shall be determined under the principles of section 7701(a)(19) and the regulations thereunder.

[T.D. 6728, 29 FR 5864, May 5, 1964, as amended by T.D. 7549, 43 FR 21458, May 18, 1978]

§ 1.594–1 Mutual savings banks conducting life insurance business.

(a) **Scope of application.** Section 594 applies to the case of a mutual savings bank not having capital stock represented by shares which conducts a life insurance business, if:

(1) The conduct of the life insurance business is authorized under State law,

(2) The life insurance business is carried on in a separate department of the bank,

(3) The books of account of the life insurance business are maintained separately from other departments of the bank, and

(4) The life insurance department of the bank would, if it were treated as a separate corporation, qualify as a life insurance company under section 801.

(b) **Computation of tax.** In the case of a mutual savings bank conducting a life insurance business to which section 594 is applicable, the tax upon such bank consists of the sum of the following:

(1) A partial tax computed under section 11 upon the taxable income of the bank determined without regard to any items of income or deduction properly allocable to the life insurance department, and

(2) A partial tax computed on the income (or, in the case of taxable years beginning before January 1, 1955, the taxable income (as defined in section 803)) of the life insurance department determined without regard to any items of income or deduction not properly allocable to such department, at the rates and in the manner provided in subchapter L (section 801 and following), chapter 1 of the Code, with respect to life insurance companies.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.595–1 Treatment of foreclosed property by certain creditors.

(a) Nonrecognition of gain or loss on the acquisition of security property by certain creditors—(1) In general. Section 595(a) provides that in the case of a creditor which is an organization described in section 593(a) (that is, a mutual savings bank not having capital stock represented by shares, a domestic building and loan association, or a cooperative bank without capital stock organized and operated for mutual purposes and without profit), no gain or loss shall be recognized, and no debt shall be considered as becoming worthless or partially worthless for purposes of section 166 (relating to bad debts), as the result of a transaction by which such creditor bids in at foreclosure, or reduces to ownership or possession by agreement or process of law, any property (whether real or personal, tangible or intangible) which was security for the payment of any indebtedness (whether or not a qualifying real property loan as defined in section 593(e)(1)). The treatment provided by section 595(a) is mandatory (regardless of whether such creditor utilizes the specific deduction or reserve method of accounting for bad debts) if, for the taxable year in which the property is bid in at foreclosure, or reduced to ownership or possession by agreement or process of law, the creditor is an organization described in section 593(a), even though the creditor subsequently becomes an organization not described in section 593(a). For definition of the terms "domestic building and loan association" and "cooperative bank" for taxable years beginning after October 16, 1962, see paragraphs (19) and (32), respectively, of section 7701(a).

(2) **Effective date.** Section 595 applies to any transaction (described in subparagraph (1) of this paragraph) occurring after December 31, 1962, except that such section does not apply to any such transaction in which the taxable event determined without regard to section 595 (that is, the sale or exchange to the creditor of the security property by reason of the default or anticipated default of the debtor) occurred before January 1, 1963.

(b) Rules for determining when security property is reduced to ownership or possession by agreement or process of law—(1) Ownership or possession. For purposes of this section, security property shall be considered as reduced to ownership or possession by agreement or process of law on the earliest date on which the creditor, by reason of the default or anticipated default of the debtor—

(i) Acquires, by agreement or process of law, a title to, or a right or interest in, the security property which under local law is indefeasible and which the creditor can validly dispose of apart from the indebtedness which the property secures, or

(ii) Acquires, by agreement or process of law, an enforceable right to direct the use to which the security property shall be put, including, in the case of real property, whether or not the property shall continue to be occupied by the debtor who

has defaulted (regardless of whether such creditor has obtained indefeasible title to the property), or

(iii) Sells or otherwise disposes of the security property or any interest therein.

(2) **Agreement or process of law.** The reduction of security property to ownership or possession by agreement includes, where valid under local law, such methods as voluntary conveyance from the debtor (including a conveyance directly to the Federal Housing Commissioner) and abandonment to the creditor. The reduction of security property to ownership or possession by process of law includes foreclosure proceedings in which a competitive bid is entered, such as foreclosure by judicial sale or by power of sale contained in the loan agreement without recourse to the courts, as well as those types of foreclosure proceedings in which a competitive bid is not entered, such as strict foreclosure and foreclosure by entry and possession, by writ of entry, or by publication or notice.

(c) **Examples.** The provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). On January 31, 1963, X, a creditor which is an organization described in section 593(a), purchases at a foreclosure sale residential real property which was security for a debt owing to X, and with respect to which the debtor has defaulted. Under local law, there is a 1-year statutory redemption period (during which period the debtor is entitled to remain in possession) so that X must wait until February 1, 1964, to obtain indefeasible title to the property. No gain or loss is recognized by reason of the purchase at the foreclosure sale on January 31, 1963. However, the date on which the security property is considered as reduced to ownership or possession by agreement or process of law is February 1, 1964. If, under local law, there were no statutory redemption period so that X obtained indefeasible title to the security property at the foreclosure sale, the date on which the security property would be considered as so reduced is January 31, 1963. Furthermore, with respect to either of the preceding situations, if the foreclosure sale had occurred on November 1, 1962 (instead of on January 31, 1963), section 595 would not apply to the transaction since the taxable event in respect of such transaction occurred prior to January 1, 1963.

Example (2). The facts are the same as in example (1), except that instead of purchasing the property at a foreclosure sale, X, pursuant to the provisions of local law, enters upon the security property on January 31, 1963, and acquires an enforceable right to direct whether the property shall continue to be occupied by the debtor. X does not obtain indefeasible title to the property until February 1, 1964. The date on which the security property is considered as reduced to ownership or possession by agreement or process of law is January 31, 1963.

(d) **Basis of acquired property.** Section 595(c) provides that the basis of any property to which section 595(a) applies (hereinafter referred to as "acquired property") shall be the adjusted basis of the indebtedness for which such property was security, determined as of the date of acquisition of such property, properly increased for costs of acquisition. The date of acquisition is the date, determined under paragraph (b) of this section, on which the security property is reduced to ownership or possession by agreement or process of law. Costs of acquisition are expenditures incurred by the creditor (for example, fees for an attorney, master, trustee, auctioneer, for publication, acquiring title, clearing liens, filing and recording, and court costs) which are directly related to the foreclosure sale or proceeding, or to the other process used to reduce the security property to ownership or possession, or both, by agreement or process of law. For purposes of determining the adjusted basis of the indebtedness for which the acquired property was security, there shall be included the amount of any unpaid interest with respect to such indebtedness, but only to the extent that it has been included in gross income. The basis of the acquired property, as determined under this paragraph, shall be adjusted in accordance with the rules provided in paragraph (e) of this section.

(e) **Characteristics of acquired property—(1) Depreciation; decline in fair market value.** Section 595(b) provides, in part, that for purposes of section 166 (relating to bad debts) acquired property shall be considered as property having the same characteristics as the indebtedness for which such property was security. Thus, no deduction for exhaustion, wear and tear, obsolescence, amortization, or depletion shall be allowed to a creditor with respect to acquired property. However, if, at any time, the adjusted basis of the acquired property exceeds the fair market value of such property (determined by proper appraisal and without regard to any outstanding right of redemption), and the creditor can establish (in the same manner as worthlessness in whole or in part is established for purposes of section 166) that an amount equal to any portion of such excess will not be collected with respect to the indebtedness for which such property was security, the creditor may treat such portion, under the provisions of section 166, as a worthless debt. In such case, the basis of the acquired property shall be reduced by the amount treated as a worthless debt.

(2) **Example.** The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. X Corporation, a creditor which is an organization described in section 593(a), makes its returns on the basis of the calendar year and the reserve method of accounting for bad debts. In 1963, A defaults in his payments on a debt owed to X which is secured by residential real property. X reduces

the property to ownership or possession by agreement or process of law by bidding it in at a foreclosure sale for $23,000. The adjusted basis of the indebtedness at the date of acquisition of the property (increased for costs of acquisition) is $25,000, and this amount becomes the basis of the acquired property. X obtains a deficiency judgment against A for $2,000. Later in 1963, a proper appraisal enables X to establish that the fair market value of the property is $18,000. X is also able to establish (under the rules of section 166 and the regulations thereunder) that due to A's poor financial condition only $1,000 can be collected on the outstanding deficiency judgment. For the year 1963, X may charge its bad debt reserve for $6,000, computed as follows:

Basis of acquired property	$25,000
Less: Fair market value of acquired property	18,000
Excess	7,000
Less: Collectible portion of deficiency judgment	1,000
Portion of excess treated as worthless debt	6,000

(3) **Capital improvements made after date of acquisition not treated as acquired property.** Except as provided in subparagraph (4) of this paragraph, the term "acquired property" does not include capital improvements made after the date of (acquisition within the meaning of paragraph (d) of this section) of the property. Thus, the applicable deduction for exhaustion, wear and tear, obsolescence, amortization, or depletion shall be allowed, if otherwise allowable, for improvements which are made by the creditor with respect to acquired property and which are properly chargeable to the capital account. If the creditor sells or otherwise disposes of the acquired property with such capital improvements, any amount realized by reason of such sale or other disposition shall be allocated in proportion to the respective fair market values of the acquired property and such capital improvements. The portion of the amount realized which is allocable to the acquired property shall be treated in accordance with the rules prescribed in subparagraph (6) of this paragraph. The portion of the amount realized which is allocable to such capital improvements shall be treated under the applicable rules governing the sale or other disposition of such property and without regard to section 595.

(4) **Treatment of minor capital improvements as acquired property.** A creditor may treat any minor capital improvements which it makes to a particular acquired property after the date of acquisition (within the meaning of paragraph (d) of this section) in the same manner as the acquired property, provided such creditor treats all minor capital improvements with respect to that particular acquired property in such manner. For purposes of section 595, a capital improvement shall be considered as "minor" only if the cost of such improvement does not exceed $3,000.

(5) **Records for capital improvements.** For purposes of subparagraphs (3) and (4) of this paragraph, the creditor must maintain such records as are necessary to clearly reflect, with respect to each particular acquired property, the cost of each capital improvement and whether the taxpayer treated minor capital improvements with respect to such property in the same manner as the acquired property.

(6) **Amounts realized with respect to acquired property.** Section 595(b) provides, in part, that any amount realized with respect to acquired property shall be treated as a payment on account of the indebtedness for which such property was security, and any loss with respect thereto shall be treated as a bad debt to which the provisions of section 166 (relating to bad debts) apply. An amount realized with respect to acquired property means an amount representing a recovery of capital, such as proceeds from the sale or other disposition of the property, payments on the original indebtedness made by or on behalf of the debtor (including amounts received under an insurance contract with the Federal Housing Administration or a guarantee by the Veterans' Administration), and collections on a deficiency judgment obtained against the debtor (other than amounts treated as interest under applicable local law). Amounts realized with respect to acquired property include amounts which otherwise would be treated in the manner prescribed in section 351 (relating to transfer to a corporation controlled by transferor), section 354 (relating to exchanges of stock and securities in certain reorganizations), section 453 (relating to installment method), section 1031 (relating to exchange of property held for productive use or for investment), or section 1033 (relating to involuntary conversions). For purposes of section 595(b), if a corporation distributes acquired property in a distribution to which section 311 (relating to taxability of corporation on distribution) or section 336 (relating to nonrecognition of gain or loss to a corporation on distribution of its property in partial or complete liquidation) applies, the fair market value of the acquired property at the time of the distribution shall be treated as an amount realized with respect to such property. However, no amount shall be considered realized by reason of the distribution or transfer of acquired property in a transaction to which section 381(a) (relating to carryovers in certain corporate acquisitions) applies, and in the case of such a distribution or transfer the acquired property shall be treated by the distributee or transferee as having the same characteristics as it had in the hands of the distributor or transferor at the time of such distribution

or transfer. The following rules shall apply to amounts realized with respect to acquired property:

(i) Any amount realized shall be applied against and reduce the adjusted basis of the acquired property, and to the extent that such amount exceeds the adjusted basis, it shall, in the case of a creditor using the specific deduction method of accounting for bad debts, be included in gross income as ordinary income, or, in the case of a creditor using the reserve method of accounting for bad debts, be credited to the appropriate bad debt reserve (that is, the reserve for losses on qualifying real property loans or the reserve for losses on nonqualifying loans). Any amounts credited during the taxable year to a reserve for bad debts pursuant to this subdivision shall not be considered as a part of the addition under section 593 for such year, but shall be included in the balance of the reserve for purposes of computing such addition to the reserve for such taxable year. Thus, for example, an amount credited to the reserve for losses on qualifying real property loans during a taxable year shall not be considered as a part of the addition to such reserve computed under the percentage of taxable income method. However, the amount of such credit shall be included in the balance of such reserve for the purpose of determining the amount necessary to increase the balance of such reserve (as of the close of such taxable year) to an amount equal to 3 percent of qualifying real property loans and for the purpose of determining whether such balance exceeds 6 percent of such loans.

(ii) If an amount realized on the sale or other disposition of the acquired property is insufficient to restore to the creditor the adjusted basis of the property, the difference between such adjusted basis and such amount realized shall be treated as a bad debt to which the provisions of section 166 apply. If the creditor subsequently realizes an additional amount with respect to the original indebtedness or the acquired property, such additional amount shall be treated as the recovery of a bad debt.

(7) Treatment of rents, similar amounts, and expenses. Section 595 does not change the treatment of rents, royalties, dividends, interest, or similar amounts received or accrued by the creditor with respect to acquired property, nor does it change the treatment of expenses incurred with respect to such property. (See, however, subparagraph (1) of this paragraph for treatment of depreciation, etc.) Thus, for example, if the acquired property is a governmental obligation within the meaning of section 103 (relating to interest on certain governmental obligations), interest payments received by the creditor with respect to such obligation would not be included in gross income.

(8) Examples. The provisions of subparagraphs (6) and (7) of this paragraph may be illustrated by the following examples:

Example (1)—(i) Facts. X Corporation, a creditor which is an organization described in section 593(a), uses the reserve method of accounting for bad debts. On May 1, 1964, X reduces to ownership or possession by agreement or process of law improved real property which is security for an indebtedness of A which is in default. On the date of acquisition there remains unpaid on the indebtedness $20,000 principal and $700 interest. X has previously included the $700 interest in gross income. Subsequent to acquisition, X incurs expenses totaling $500 for maintenance, and during the period June 1 through September 30, 1964, rents the property for a total rental of $400. Under local law, X is accountable to A for the rents received and A is accountable to X for the expenses incurred. There are no other receipts or expenses until October 1, 1964, at which time X sells the acquired property for $22,000. Under local law, A is not entitled to any portion of the sales proceeds.

(ii) Treatment of rents, expenses, and sales proceeds. X would treat rents, expenses, and sales proceeds in the following manner:

Basis of acquired property at acquisition (adjusted basis of indebtedness, i.e., $20,000 principal plus $700 interest)	$20,700
Plus: Expenses charged to debtor	500
	21,200
Less: Rents credited to debtor	400
Adjusted basis of acquired property at sale	20,800
Less: Portion of $22,000 sales proceeds applied in reduction of adjusted basis of acquired property	20,800
	0
Portion of sales proceeds credited to reserve for losses on qualifying real property loans ($22,000 minus $20,800)	1,200

(iii) Creditor using specific deduction method. If instead of using the reserve method of accounting for bad debts X used the specific deduction method, the $1,200 portion of the sales proceeds would be treated as ordinary income.

Example (2)—(i) Facts. The facts are the same as in example (1) except that under local law X is not accountable to A for any portion of the rents received and A is not accountable to X for the expenses incurred by X.

(ii) Treatment of rents and expenses. X includes in gross income the total rent receipts of $400 and deducts (if otherwise allowable) the expenses of $500.

(iii) Treatment of sales proceeds. As the result of the sale of the acquired property, X credits $1,300 to the reserve for losses on qualifying real property loans, computed as follows:

Basis of acquired property at acquisition and at date of sale (adjusted basis of indebtedness, i.e., $20,000 principal plus $700 interest)	$20,700
Less: Portion of $22,000 sales proceeds applied in reduction of adjusted basis of acquired property	20,700
	0
Portion of sales proceeds credited to reserve for losses on qualifying real property loans ($22,000 minus $20,700)	1,300

(iv) **Creditor using specific deduction method.** If instead of using the reserve method of accounting for bad debts X used the specific deduction method, the $1,300 portion of the sales proceeds would be treated as ordinary income.

Example (3)—(i) Facts. The facts are the same in example (1) except that X sells the acquired property for $15,000.

(ii) **Treatment of rents, expenses, and sales proceeds.** X would treat rents, expenses, and sales proceeds in the following manner:

Basis of acquired property at acquisition (adjusted basis of indebtedness, i.e., $20,000 principal plus $700 interest)	$20,700
Plus: Expenses charged to debtor	500
	21,200
Less: Rents credited to debtor	400
Adjusted basis of acquired property at sale ...	20,800
Less: Portion of $15,000 sales proceeds applied in reduction of adjusted basis of acquired property	15,000
Amount charged to reserve for losses on qualifying real property loans	5,800

(iii) **Creditor using specific deduction method.** If instead of using the reserve method of accounting for bad debts X used the specific deduction method, the excess of $5,800 would be allowed as a specific bad debt deduction.

[T.D. 6814, 30 FR 4473, April 7, 1965]

§ 1.596–1 Limitation on dividends received deduction.

(a) In general. For taxable years beginning after July 11, 1969, in the case of mutual savings banks, domestic building and loan associations, and cooperative banks, if the addition to the reserve for losses on qualifying real property loans for the taxable year is determined under section 593(b)(2) (relating to the percentage of taxable income method), the total amount allowed as a deduction with respect to dividends received under part VIII, subchapter B, chapter 1, subtitle A of the Code (section 241 et seq.) (determined without regard to section 596 and this section) for such taxable year is reduced as provided by this section. In such case, the dividends received deduction otherwise determined under part VIII, subchapter B, chapter 1, subtitle A of the Code, is reduced by an amount equal to the applicable percentage for such year (determined solely under subparagraphs (A) and (B) of section 593(b)(2) and the regulations thereunder) of such total amount. For the rule under which a mutual savings bank, domestic building and loan association, or cooperative bank is deemed to have determined the addition to its reserve for losses on qualifying real property loans for the taxable year under section 593(b)(2), see § 1.593–6A(a)(2).

(b) Example. The provisions of this section may be illustrated by the following example:

Example. X Corporation, a domestic building and loan association, determines the addition to its reserve for losses on qualifying real property loans under section 593(b)(2) for its taxable year beginning in 1971. During that taxable year, X Corporation received a total of $100,000 as dividends from domestic corporations subject to tax under chapter 1 of the Code. X Corporation received no other dividends during the taxable year. Under part VIII, subchapter B, chapter 1, subtitle A of the Code, a deduction, determined without regard to section 596 and this section, of $85,000 would be allowed with respect to the dividends. For the taxable year, the applicable percentage, determined under subparagraphs (A) and (B) of section 593(b)(2), is 54 percent. Under section 596 and this section, the amount allowed as a deduction under section 243 and the regulations thereunder is reduced by $45,900 (54 percent of $85,000) to $39,100 ($85,000 less $45,900).

(c) Dividends received by members of a controlled group. If a thrift institution that computes a deduction under section 593(b)(2) is a member of a controlled group of corporations (within the meaning of section 1563(a), determined by substituting "50 percent" for "80 percent" each place it appears therein) and if the thrift institution, without a bona fide business purpose, transfers stock, directly or indirectly, to another member of the group, the Commissioner may allocate any dividends with respect to the stock to the thrift institution. If the Commissioner allocates a dividend to a thrift institution under this paragraph (c), the Commissioner will also make appropriate correlative adjustments to the income of any other member of the group involved in the allocation, at a time and in a manner consistent with the procedures of § 1.482–1(d)(2). This paragraph (c) applies to taxable years ending on or after August 30, 1975.

[T.D. 7149, 36 FR 20944, Nov. 2, 1971, as amended by T.D. 7631, 44 FR 40496, July 11, 1979]

Bank Affiliates

§ 1.601-1 Special deduction for bank affiliates.

(a) The special deduction described in section 601 is allowed:

(1) To a holding company affiliate of a bank, as defined in section 2 of the Banking Act of 1933 (12 U.S.C. 221a), which holding company affiliate holds, at the end of the taxable year, a general voting permit granted by the Board of Governors of the Federal Reserve System.

(2) In the amount of the earnings or profits of such holding company affiliate which, in compliance with section 5144 of the Revised Statutes (12 U.S.C. 61), has been devoted by it during the taxable year to the acquisition of readily marketable assets other than bank stock.

(3) Upon certification by the Board of Governors of the Federal Reserve System to the Commissioner that such an amount of the earnings or profits has been so devoted by such affiliate during the taxable year.

No deduction is allowable under section 601 for the amount of readily marketable assets in excess of what is required by section 5144 of the Revised Statutes (12 U.S.C. 61) to be acquired by such affiliate, or in excess of the taxable income for the taxable year computed without regard to the special deductions for corporations provided in part VIII (section 241 and following), subchapter B, chapter 1 of the Code. Nor may the aggregate of the deductions allowable under section 601 and the credits allowable under the corresponding provision of any prior income tax law for all taxable years exceed the amount required to be devoted under such section 5144 to the acquisition of readily marketable assets other than bank stock.

(b) Every taxpayer claiming a deduction provided for in section 601 shall attach to its return a supplementary statement setting forth all the facts and information upon which the claim is predicated, including such facts and information as the Board of Governors of the Federal Reserve System may prescribe as necessary to enable it, upon the request of the Commissioner subsequent to the filing of the return, to certify to the Commissioner the amount of earnings or profits devoted to the acquisition of such readily marketable assets. A certified copy of such supplementary statement shall be forwarded by the taxpayer to the Board of Governors at the time of the filing of the return. The holding company affiliate shall also furnish the Board of Governors such further information as the Board shall require. For the requirements with respect to the amount of such readily marketable assets which must be acquired and maintained by a holding company affiliate to which a voting permit has been granted, see section 5144(b) and (c) of the Revised Statutes (12 U.S.C. 61).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

NATURAL RESOURCES

Deductions

§ 1.611-0 Regulatory authority.

Sections 1.611-1 through 1.614-8, inclusive, are prescribed under the authority granted the Secretary or his delegate by section 611(a) of the Code to prescribe regulations under which a reasonable allowance for depletion and depreciation of improvements shall be allowed, according to the peculiar conditions in each case, in the case of mines, oil and gas wells, other natural deposits and timber.

[T.D. 6965, 33 FR 10692, July 26, 1968]

§ 1.611-1 Allowance of deduction for depletion.

(a) Depletion of mines, oil and gas wells, other natural deposits, and timber—(1) In general. Section 611 provides that there shall be allowed as a deduction in computing taxable income in the case of mines, oil and gas wells, other natural deposits, and timber, a reasonable allowance for depletion. In the case of standing timber, the depletion allowance shall be computed solely upon the adjusted basis of the property. In the case of other exhaustible natural resources the allowance for depletion shall be computed upon either the adjusted depletion basis of the property (see section 612, relating to cost depletion) or upon a percentage of gross income from the property (see section 613, relating to percentage depletion), whichever results in the greater allowance for depletion for any taxable year. In no case will depletion based upon discovery value be allowed.

(2) See § 1.611–5 for methods of depreciation relating to improvements connected with mineral or timber properties.

(3) See paragraph (d) of this section for definition of terms.

(b) **Economic interest.** (1) Annual depletion deductions are allowed only to the owner of an economic interest in mineral deposits or standing timber. An economic interest is possessed in every case in which the taxpayer has acquired by investment any interest in mineral in place or standing timber and secures, by any form of legal relationship, income derived from the extraction of the mineral or severance of the timber, to which he must look for a return of his capital. For an exception in the case of certain mineral production payments, see section 636 and the regulations thereunder. A person who has no capital investment in the mineral deposit or standing timber does not possess an economic interest merely because through a contractual relation he possesses a mere economic or pecuniary advantage derived from production. For example, an agreement between the owner of an economic interest and another entitling the latter to purchase or process the product upon production or entitling the latter to compensation for extraction or cutting does not convey a depletable economic interest. Further, depletion deductions with respect to an economic interest of a corporation are allowed to the corporation and not to its shareholders.

(2) No depletion deduction shall be allowed the owner with respect to any timber, coal, or domestic iron ore that such owner has disposed of under any form of contract by virtue of which he retains an economic interest in such timber, coal, or iron ore, if such disposal is considered a sale of timber, coal, or domestic iron ore under section 631(b) or (c).

(c) **Special rules—(1) In general.** For the purpose of the equitable apportionment of depletion among the several owners of economic interests in a mineral deposit or standing timber, if the value of any mineral or timber must be ascertained as of any specific date for the determination of the basis for depletion, the values of such several interests therein may be determined separately, but, when determined as of the same date, shall together never exceed the value at that date of the mineral or timber as a whole.

(2) **Leases.** In the case of a lease, the deduction for depletion under section 611 shall be equitably apportioned between the lessor and lessee. In the case of a lease or other contract providing for the sharing of economic interests in a mineral deposit or standing timber, such deduction shall be computed by each taxpayer by reference to the adjusted basis of his property determined in accordance with sections 611 and 612, or computed in accordance with section 613, if applicable, and the regulations thereunder.

(3) **Life tenant and remainderman.** In the case of property held by one person for life with remainder to another person, the deduction for depletion under section 611 shall be computed as if the life tenant were the absolute owner of the property so that he will be entitled to the deduction during his life, and thereafter the deduction, if any, shall be allowed to the remainderman.

(4) **Mineral or timber property held in trust.** If a mineral property or timber property is held in trust, the allowable deduction for depletion is to be apportioned between the income beneficiaries and the trustee on the basis of the trust income from such property allocable to each, unless the governing instrument (or local law) requires or permits the trustee to maintain a reserve for depletion in any amount. In the latter case, the deduction is first allocated to the trustee to the extent that income is set aside for a depletion reserve, and any part of the deduction in excess of the income set aside for the reserve shall be apportioned between the income beneficiaries and the trustee on the basis of the trust income (in excess of the income set aside for the reserve) allocable to each. For example:

(i) If under the trust instrument of local law the income of a trust computed without regard to depletion is to be distributed to a named beneficiary, the beneficiary is entitled to the deduction to the exclusion of the trustee.

(ii) If under the trust instrument or local law the income of a trust is to be distributed to a named beneficiary, but the trustee is directed to maintain a reserve for depletion in any amount, the deduction is allowed to the trustee (except to the extent that income set aside for the reserve is less than the allowable deduction). The same result would follow if the trustee sets aside income for a depletion reserve pursuant to discretionary authority to do so in the governing instrument.

No effect shall be given to any allocation of the depletion deduction which gives any beneficiary or the trustee a share of such deduction greater than his pro rata share of the trust income, irrespective of any provisions in the trust instrument, except as otherwise provided in this paragraph when the

trust instrument or local law requires or permits the trustee to maintain a reserve for depletion.

(5) Mineral or timber property held by estate. In the case of a mineral property or timber property held by an estate the deduction for depletion under section 611 shall be apportioned between the estate and the heirs, legatees, and devisees on the basis of income of the estate from such property which is allocable to each.

(d) Definitions. As used in this part, and the regulations thereunder, the term—

(1) "Property" means—(i) in the case of minerals, each separate economic interest owned in each mineral deposit in each separate tract or parcel of land or an aggregation or combination of such mineral interests permitted under section 614(b), (c), (d), or (e); and (ii) in the case of timber, an economic interest in standing timber in each tract or block representing a separate timber account (see paragraph (d) of § 1.611–3). For rules with respect to waste or residue of prior mining, see paragraph (c) of § 1.614–1. When, in the regulations under this part, either the word "mineral" or "timber" precedes the word "property", such adjectives are used only to classify the type of "property" involved. For further explanation of the term "property", see section 614 and the regulations thereunder.

(2) "Fair market value" of a property is that amount which would induce a willing seller to sell and a willing buyer to purchase.

(3) "Mineral enterprise" is the mineral deposit or deposits and improvements, if any, used in mining or in the production of oil and gas, and only so much of the surface of the land as is necessary for purposes of mineral extraction. The value of the mineral enterprise is the combined value of its component parts.

(4) "Mineral deposit" refers to minerals in place. When a mineral enterprise is acquired as a unit, the cost of any interest in the mineral deposit or deposits is that proportion of the total cost of the mineral enterprise which the value of the interest in the deposit or deposits bears to the value of the entire enterprise at the time of its acquisition.

(5) "Minerals" includes ores of the metals, coal, oil, gas, and all other natural metallic and nonmetallic deposits, except minerals derived from sea water, the air, or from similar inexhaustible sources. It includes but is not limited to all of the minerals and other natural deposits subject to depletion based upon a percentage of gross income from the property under section 613 and the regulations thereunder.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6841, 30 FR 9305, July 27, 1965; T.D. 7261, 38 FR 5467, March 1, 1973]

§ 1.611–2 Rules applicable to mines, oil and gas wells, and other natural deposits.

(a) Computation of cost depletion of mines, oil and gas wells, and other natural deposits. (1) The basis upon which cost depletion is to be allowed in respect of any mineral property is the basis provided for in section 612 and the regulations thereunder. After the amount of such basis applicable to the mineral property has been determined for the taxable year, the cost depletion for that year shall be computed by dividing such amount by the number of units of mineral remaining as of the taxable year (see subparagraph (3) of this paragraph), and by multiplying the depletion unit, so determined, by the number of units of mineral sold within the taxable year (see subparagraph (2) of this paragraph). In the selection of a unit of mineral for depletion, preference shall be given to the principal or customary unit or units paid for in the products sold, such as tons of ore, barrels of oil, or thousands of cubic feet of natural gas.

(2) As used in this paragraph, the phrase "number of units sold within the taxable year"—

(i) In the case of a taxpayer reporting income on the cash receipts and disbursements method, includes units for which payments were received within the taxable year although produced or sold prior to the taxable year, and excludes units sold but not paid for in the taxable year, and

(ii) In the case of a taxpayer reporting income on the accrual method, shall be determined from the taxpayer's inventories kept in physical quantities and in a manner consistent with his method of inventory accounting under section 471 or 472.

The phrase does not include units with respect to which depletion deductions were allowed or allowable prior to the taxable year.

(3) "The number of units of mineral remaining as of the taxable year" is the number of units of mineral remaining at the end of the year to be recovered from the property (including units recovered but not sold) plus the "number of units sold within the taxable year" as defined in this section.

(4) In the case of a natural gas well where the annual production is not metered and is not capable of being estimated with reasonable accuracy,

the taxpayer may compute the cost depletion allowance in respect of such property for the taxable year by multiplying the adjusted basis of the property by a fraction, the numerator of which is equal to the decline in rock pressure during the taxable year and the denominator of which is equal to the expected total decline in rock pressure from the beginning of the taxable year to the economic limit of production. Taxpayers computing depletion by this method must keep accurate records of periodical pressure determinations.

(5) If an aggregation of two or more separate mineral properties is made during a taxable year under section 614, cost depletion for each such property shall be computed separately for that portion of the taxable year ending immediately before the effective date of the aggregation. Cost depletion with respect to the aggregated property shall be computed for that portion of the taxable year beginning on such effective date. The allowance for cost depletion for the taxable year shall be the sum of such cost depletion computations. For purposes of this paragraph, each such portion of the taxable year shall be considered as a taxable year. Similar rules shall be applied where a separate mineral property is properly removed from an existing aggregation during a taxable year. See section 614 and the regulations thereunder for rules relating to the effective date of an aggregation of mineral interests and for rules relating to the adjusted basis of an aggregation.

(6) The apportionment of the deduction among the several owners of economic interests in the mineral deposit or deposits will be made as provided in paragraph (c) of § 1.611-1.

(b) Depletion accounts of mineral property. **(1)** Every taxpayer claiming and making a deduction for depletion of mineral property shall keep a separate account in which shall be accurately recorded the cost or other basis provided by section 1012, of such property together with subsequent allowable capital additions to each account and all the other adjustments required by section 1016.

(2) Mineral property accounts shall thereafter be credited annually with the amounts of the depletion so computed in accordance with section 611 or 613 and the regulations thereunder; or the amounts of the depletion computed in shall be credited to depletion reserve accounts. No further deductions for cost depletion shall be allowed when the sum of the credits for depletion equals the cost or other basis of the property, plus allowable capital additions. However, depletion deductions may be allowable thereafter computed upon a percentage of gross income from the property. See section 613 and the regulations thereunder. In no event shall percentage depletion in excess of cost or other basis of the property be credited to the improvements account or the depreciation reserve account.

(c) Determination of mineral contents of deposits. **(1)** If it is necessary to estimate or determine with respect to any mineral deposit as of any specific date the total recoverable units (tons, pounds, ounces, barrels, thousands of cubic feet, or other measure) of mineral products reasonably known, or on good evidence believed, to have existed in place as of that date, the estimate or determination must be made according to the method current in the industry and in the light of the most accurate and reliable information obtainable. In the selection of a unit of estimate, preference shall be given to the principal unit (or units) paid for in the product marketed. The estimate of the recoverable units of the mineral products in the deposit for the purposes of valuation and depletion shall include as to both quantity and grade:

(i) The ores and minerals "in sight", "blocked out", "developed", or "assured", in the usual or conventional meaning of these terms with respect to the type of the deposits, and

(ii) "Probable" or "prospective" ores or minerals (in the corresponding sense), that is, ores or minerals that are believed to exist on the basis of good evidence although not actually known to occur on the basis of existing development. Such "probable" or "prospective" ores or minerals may be estimated:

(a) As to quantity, only in case they are extensions of known deposits or are new bodies or masses whose existence is indicated by geological surveys or other evidence to a high degree of probability, and

(b) As to grade, only in accordance with the best indications available as to richness.

(2) If the number of recoverable units of mineral in the deposit has been previously estimated for the prior year or years, and if there has been no known change in the facts upon which the prior estimate was based, the number of recoverable units of mineral in the deposit as of the taxable year will be the number remaining from the prior estimate. However, for any taxable year for which it is ascertained either by the taxpayer or the district director from any source, such as operations or development work prior to the close

of the taxable year, that the remaining recoverable mineral units as of the taxable year are materially greater or less than the number remaining from the prior estimate, then the estimate of the remaining recoverable units shall be revised, and the annual cost depletion allowance with respect to the property for the taxable year and for subsequent taxable years will be based upon the revised estimate until a change in the facts requires another revision. Such revised estimate will not, however, change the adjusted basis for depletion.

(d) Determination of fair market value of mineral properties, and improvements, if any. (1) If the fair market value of the mineral property and improvements at a specified date is to be determined for the purpose of ascertaining the basis, such value must be determined, subject to approval or revision by the district director, by the owner of such property and improvements in the light of the conditions and circumstances known at that date, regardless of later discoveries or developments or subsequent improvements in methods of extraction and treatment of the mineral product. The district director will give due weight and consideration to any and all factors and evidence having a bearing on the market value, such as cost, actual sales and transfers of similar properties and improvements, bona fide offers, market value of stock or shares, royalties and rentals, valuation for local or State taxation, partnership accountings, records of litigation in which the value of the property and improvements was in question, the amount at which the property and improvements may have been inventoried or appraised in probate or similar proceedings, and disinterested appraisals by approved methods.

(2) If the fair market value must be ascertained as of a certain date, analytical appraisal methods of valuation, such as the present value method will not be used:

(i) If the value of a mineral property and improvements, if any, can be determined upon the basis of cost or comparative values and replacement value of equipment, or

(ii) If the fair market value can reasonably be determined by any other method.

(e) Determination of the fair market value of mineral property by the present value method. (1) To determine the fair market value of a mineral property and improvements by the present value method, the essential factors must be determined for each mineral deposit. The essential factors in determining the fair market value of mineral deposits are:

(i) The total quantity of mineral in terms of the principal or customary unit (or units) paid for in the product marketed,

(ii) The quantity of mineral expected to be recovered during each operating period,

(iii) The average quality or grade of the mineral reserves,

(iv) The allocation of the total expected profit to the several processes or operations necessary for the preparation of the mineral for market,

(v) The probable operating life of the deposit in years,

(vi) The development cost,

(vii) The operating cost,

(viii) The total expected profit,

(ix) The rate at which this profit will be obtained, and

(x) The rate of interest commensurate with the risk for the particular deposit.

(2) If the mineral deposit has been sufficiently developed, the valuation factors specified in subparagraph (1) of this paragraph may be determined from past operating experience. In the application of factors derived from past experience, full allowance should be made for probable future variations in the rate of exhaustion, quality or grade of the mineral, percentage of recovery, cost of development, production, interest rate, and selling price of the product marketed during the expected operating life of the mineral deposit. Mineral deposits for which these factors cannot be determined with reasonable accuracy from past operating experience may also be valued by the present value method; but the factors must be deduced from concurrent evidence, such as the general type of the deposit, the characteristics of the district in which it occurs, the habit of the mineral deposits, the intensity of mineralization, the oil-gas ratio, the rate at which additional mineral has been disclosed by exploitation, the stage of the operating life of the deposit, and any other evidence tending to establish a reasonable estimate of the required factors.

(3) Mineral deposits of different grades, locations, and probable dates of extraction should be valued separately. The mineral content of a deposit shall be determined in accordance with paragraph (c) of this section. In estimating the average grade of the developed and prospective mineral, account should be taken of probable increases

or decreases as indicated by the operating history. The rate of exhaustion of a mineral deposit should be determined with due regard to the limitations imposed by plant capacity, by the character of the deposit, by the ability to market the mineral product, by labor conditions, and by the operating program in force or reasonably to be expected for future operations. The operating life of a mineral deposit is that number of years necessary for the exhaustion of both the developed and prospective mineral content at the rate determined as above. The operating life of oil and gas wells is also influenced by the natural decline in pressure and flow, and by voluntary or enforced curtailment of production. The operating cost includes all current expense of producing, preparing, and marketing the mineral product sold (due consideration being given to taxes) exclusive of allowable capital additions, as described in §§ 1.612–2 and 1.612–4, and deductions for depreciation and depletion, but including cost of repairs. This cost of repairs is not to be confused with the depreciation deduction by which the cost of improvements is returned to the taxpayer free from tax. In general, no estimates of these factors will be approved by the district director which are not supported by the operating experience of the property or which are derived from different and arbitrarily selected periods.

(4) The value of each mineral deposit is measured by the expected gross income (the number of units of mineral recoverable in marketable form multiplied by the estimated market price per unit) less the estimated operating cost, reduced to a present value as of the date for which the valuation is made at the rate of interest commensurate with the risk for the operating life, and further reduced by the value at that date of the improvements and of the capital additions, if any, necessary to realize the profits. The degree of risk is generally lowest in cases where the factors of valuation are fully supported by the operating record of the mineral enterprise before the date for which the valuation is made. On the other hand, higher risks ordinarily attach to appraisals upon any other basis.

(f) Revaluation of mineral property not allowed. No revaluation of a mineral property whose value as of any specific date has been determined and approved will be made or allowed during the continuance of the ownership under which the value was so determined and approved, except in the case of misrepresentation or fraud or gross error as to any facts known on the date as of which the valuation was made. Revaluation on account of misrepresentation or fraud or such gross error will be made only with the written approval of the Commissioner.

(g) Statement to be attached to return when valuation, depletion, or depreciation of mineral property or improvements are claimed. (1) For the first taxable year ending before December 31, 1967, for which a taxpayer asserts a value for any mineral property or improvement as of a specific date or claims a deduction for depletion, or depreciation, there shall be attached to the return of the taxpayer for such taxable year a statement setting forth, in complete, summary form, the pertinent information required by this paragraph with respect to each such mineral property or improvement (including oil and gas properties or improvements). The summary statement shall be deemed a part of the income tax return to which it relates. In addition to such summary statement, the taxpayer must assemble, segregate and have readily available at his principal place of business, all the supporting data (listed in subparagraphs (2), (3), and (4) of this paragraph) which is used in compiling the summary statement. For taxable years after such first taxable year, and ending before December 31, 1967, the taxpayer need attach to his return only an explanation of the changes, if any, in the information previously furnished. For example, when a taxpayer has filed adequate maps with the district director he may be relieved of filing further maps of the same area, if all additional information necessary for keeping the maps up-to-date is filed each year. In any case in which any of the information required by this paragraph has been previously filed by the taxpayer (including information furnished in accordance with corresponding provisions of prior regulations), such information need not be filed again, but a statement should be attached to the return of the taxpayer indicating clearly when and in what form such information was previously filed. For provisions relating to the data which shall be submitted with returns for taxable years ending on or after December 31, 1967, see subparagraph (5) of this paragraph.

(2) The information referred to in subparagraph (1) of this paragraph is as follows:

(i) An adequate map showing the name, description, location, date of surveys, and identification of the deposit or deposits;

(ii) A description of the character of the taxpayer's property, accompanied by a copy of the instrument or instruments by which it was acquired;

(iii) The date of acquisition of the property, the exact terms and dates of expiration of all leases involved, and if terminated, the reasons therefor;

(iv) The cost of the mineral property and improvements, stating the amount paid to each vendor, with his name and address;

(v) The date as of which the mineral property and improvements are valued, if a valuation is necessary to establish the basis as provided by section 1012;

(vi) The value of the mineral property and improvements on that date with a statement of the precise method by which it was determined;

(vii) An allocation of the cost or value among the mineral property, improvements and the surface of the land for purposes other than mineral production;

(viii) The estimated number of units of each kind of mineral at the end of the taxable year, and also at the date of acquisition, if acquired during the taxable year or at the date as of which any valuation is made, together with an explanation of the method used in the estimation, the name and address of the person making the estimate, and an average analysis which will indicate the quality of the mineral valued, including the grade or gravity in the case of oil;

(ix) The number of units sold and the number of units for which payment was received or accrued during the year for which the return is made (in the case of newly developed oil and gas deposits it is desirable that this information be furnished by months);

(x) The gross amount received from the sale of mineral;

(xi) The amount of depreciation for the taxable year and the amount of cost depletion for the taxable year;

(xii) The amounts of depletion and depreciation, if any, stated separately, which for each and every prior year:

(a) Were allowed (see section 1016(a)(2)),

(b) Were allowable, and

(c) Would have been allowable without reference to percentage or discovery depletion;

(xiii) The fractions (however measured) of gross production from the deposit or deposits to which the taxpayer and other persons are entitled together with the names and addresses of such other persons; and

(xiv) Any other data which will be helpful in determining the reasonableness of the valuation asserted or of the deductions claimed.

(3) In the case of oil and gas properties, the following information with respect to each property is required in addition to that information set forth in subparagraph (2) of this paragraph:

(i) The number of acres of producing oil or gas land and, if additional acreage is claimed to be proven, the amount of such acreage and the reasons for believing it to be proven;

(ii) The number of wells producing at the beginning and end of the taxable year;

(iii) The date of completion of each well finished during the taxable year;

(iv) The date of abandonment of each well abandoned during the taxable year;

(v) Maps showing the location of the tracts or leases and of the producing and abandoned wells, dry holes, and proven oil and gas lands (the maps should show depth, initial production, and date of completion of each well, etc., to the extent that these data are available);

(vi) The number of pay sands and average thickness of each pay sand or zone;

(vii) The average depth to the top of each of the different pay sands;

(viii) The annual production of the deposit or of the individual wells, if the latter information is available, from the beginning of its productivity to the end of the taxable year, the average number of wells producing during each year, and the initial daily production of each well (the extent to which oil or gas is used for fuel on the premises should be stated with reasonable accuracy);

(ix) All available data regarding change in operating conditions, such as unit operation, proration, flooding, use of air-gas lift, vacuum, shooting, and similar information, which have a direct effect on the production of the deposit; and

(x) Available geological information having a probable bearing on the oil and gas content; information with respect to edge water, water drive, bottom hole pressures, oil-gas ratio, porosity of reservoir rock, percentage of recovery, expected date of cessation of natural flow, decline in estimated potential, and characteristics similar to characteristics of other known fields.

(4) For rules relating to an additional statement to be attached to the return when the depletion deduction is computed upon a percentage of gross income from the property, see § 1.613–6.

(5) A taxpayer who claims a total deduction of more than $200 for depletion of mines, oil and gas wells, or other natural deposits for the taxable year ending on or after December 31, 1967, and before December 31, 1968, shall submit with his return for such taxable year a filled-out Form M (Mines and Other Natural Deposits—Depletion Data) or Form O (Oil and Gas Depletion Data). See section 6011(a). For the purpose of this subparagraph, the determination under section 631(c) of gain or loss upon the disposition of coal or domestic iron ore with a retained economic interest shall not be regarded as the claiming of a deduction for depletion. Such forms shall be filed for any subsequent taxable year if the Commissioner determines that the forms are required for such year. Where appropriate, both Form M and Form O shall be filed. Forms M and O shall be deemed to be part of the return to which they relate. If a taxpayer mines more than one mineral, a separate Form M shall be filed for each such mineral. If a taxpayer has both domestic and foreign properties, separate forms shall be filed for each country in which a taxpayer's properties are located. All data relating to a taxpayer's domestic oil and gas properties shall be summarized on a single Form O, and data relating to a taxpayer's domestic mineral properties (other than oil and gas properties) shall be summarized on a single Form M for each mineral. Similarly, all data relating to a taxpayer's oil and gas properties in a specific foreign country shall be summarized on a single Form O, and data relating to a taxpayer's mineral properties (other than oil and gas properties) in a specific foreign country shall be summarized on a single Form M for each mineral. In addition, the taxpayer shall assemble, segregate, and have readily available at his principal place of business, the data listed in subparagraphs (2), (3), and (4) of this paragraph.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6938, 32 FR 17518, Dec. 7, 1967; T.D. 7170, 37 FR 5373, March 15, 1972]

§ 1.611–3 Rules applicable to timber.

(a) Capital recoverable through depletion allowance in case of timber. In general, the capital remaining in any year recoverable through depletion allowances is the basis provided by section 612 and the regulations thereunder. For the method of determining fair market value and quantity of timber, see paragraphs (d), (e), and (f) of this section. For capitalization of carrying charges, see section 1016(a)(1)(A). Amounts paid or incurred in connection with the planting of timber (including planting for Christmas tree purposes) shall be capitalized and recoverable through depletion allowances. Such amounts include, for example, expenditures made for the preparation of the timber site for planting or for natural seeding and the cost of seedlings. The apportionment of deductions between the several owners of economic interests in standing timber will be made as provided in paragraph (c) of § 1.611–1.

(b) Computation of allowance for depletion of timber for taxable year. (1) The depletion of timber takes place at the time timber is cut, but the amount of depletion allowable with respect to timber that has been cut may be computed when the quantity of cut timber is first accurately measured in the process of exploitation. To the extent that depletion is allowable in a particular taxable year with respect to timber the products of which are not sold during such year, the depletion so allowable shall be included as an item of cost in the closing inventory of such products for such year.

(2) The depletion unit of the timber for a given timber account in a given year shall be the quotient obtained by dividing (i) the basis provided by section 1012 and adjusted as provided by section 1016, of the timber on hand at the beginning of the year plus the cost of the number of units of timber acquired during the year plus proper additions to capital, by (ii) the total number of units of timber on hand in the given account at the beginning of the year plus the cost of the number of units of timber acquired during the year plus the number of units acquired during the year plus (or minus) the number of units required to be added (or deducted) by way of correcting the estimate of the number of units remaining available in the account. The number of units of timber of a given timber account cut during any taxable year multiplied by the depletion unit of that timber account applicable to such year shall be the amount of depletion allowable for the taxable year. Those taxpayers who keep their accounts on a monthly basis may, at their option, keep their depletion accounts on such basis, in which case the amount allowable on account of depletion for a given month will be determined in the manner outlined herein for a given year. The total amount of the allowance for depletion in any taxable year shall be the sum of the amounts allowable for the several timber accounts. For a description of timber accounts, see paragraphs (c) and (d) of this section.

(3) When a taxpayer has elected to treat the cutting of timber as a sale or exchange of such timber under the provisions of section 631(a), he shall reduce the timber account containing such timber by an amount equal to the adjusted depletion basis of such timber. In computing any further gain or loss on such timber, see paragraph (e) of § 1.631–1.

(c) **Timber depletion accounts on books.** (1) Every taxpayer claiming or expecting to claim a deduction for depletion of timber property shall keep accurate ledger accounts in which shall be recorded the cost or other basis provided by section 1012 of the property and land together with subsequent allowable capital additions in each account and all other adjustments provided by section 1016 and the regulations thereunder.

(2) In such accounts there shall be set up separately the quantity of timber, the quantity of land, and the quantity of other resources, if any, and a proper part of the total cost or value shall be allocated to each after proper provision for immature timber growth. See paragraph (d) of this section. The timber accounts shall be credited each year with the amount of the charges to the depletion accounts computed in accordance with paragraph (b) of this section or the amount of the charges to the depletion accounts shall be credited to depletion reserve accounts. When the sum of the credits for depletion equals the cost or other basis of the timber property, plus subsequent allowable capital additions, no further deduction for depletion will be allowed.

(d) **Aggregating timber and land for purposes of valuation and accounting.** (1) With a view to logical and reasonable valuation of timber, the taxpayer shall include his timber in one or more accounts. In general, each such account shall include all of the taxpayer's timber which is located in one "block". A block may be an operation unit which includes all the taxpayer's timber which would logically go to a single given point of manufacture. In those cases in which the point of manufacture is at a considerable distance, or in which the logs or other products will probably be sold in a log or other market, the block may be a logging unit which includes all of the taxpayer's timber which would logically be removed by a single logging development. Blocks may also be established by geographical or political boundaries or by logical management areas. Timber acquired under cutting contracts should be carried in separate accounts and shall not constitute part of any block. In exceptional cases, provided there are good and substantial reasons, and subject to approval or revision by the district director on audit, the taxpayer may divide the timber in a given block into two or more accounts. For example, timber owned on February 28, 1913, and that purchased subsequently may be kept in separate accounts, or timber owned on February 28, 1913, and the timber purchased since that date in several distinct transactions may be kept in several distinct accounts. Individual tree species or groups of tree species may be carried in distinct accounts, or special timber products may be carried in distinct accounts. Blocks may be divided into two or more accounts based on the character of the timber or its accessibility, or scattered tracts may be included in separate accounts. If such a division is made, a proper portion of the total value or cost, as the case may be, shall be allocated to each account.

(2) The timber accounts mentioned in subparagraph (1) of this paragraph shall not include any part of the value or cost, as the case may be, of the land. In a manner similar to that prescribed in subparagraph (1) of this paragraph, the land in a given "block" may be carried in a single land account or may be divided into two or more accounts on the basis of its character or accessibility. When such a division is made, a proper portion of the total value or cost, as the case may be, shall be allocated to each account.

(3) The total value or total cost, as the case may be, of land and timber shall be equitably allocated to the timber and land accounts, respectively. In cases in which immature timber growth is a factor, a reasonable portion of the total value or cost shall be allocated to such immature timber, and when the timber becomes merchantable such value or cost shall be recoverable through depletion allowances.

(4) Each of the several land and timber accounts carried on the books of the taxpayer shall be definitely described as to their location on the ground either by maps or by legal descriptions.

(5) For good and substantial reasons satisfactory to the district director, or as required by the district director on audit, the timber or the land accounts may be readjusted by dividing individual accounts, by combining two or more accounts, or by dividing and recombining accounts.

(e) **Determination of quantity of timber.** Each taxpayer claiming or expecting to claim a deduction for depletion is required to estimate with respect to each separate timber account the total units (feet board measure, log scale, cords, or

other units) of timber reasonably known, or on good evidence believed, to have existed on the ground on March 1, 1913, or on the date of acquisition of the property, whichever date is applicable in determining the basis for cost depletion. This estimate shall state as nearly as possible the number of units which would have been found present by careful estimate made on the specified date with the object of determining 100 percent of the quantity of timber which the area covered by the specific account would have produced on that date if all of the merchantable timber had been cut and utilized in accordance with the standards of utilization prevailing in that region at that time. If subsequently during the ownership of the taxpayer making the return, as the result of the growth of the timber, of changes in standards of utilization, of losses not otherwise accounted for, of abandonment of timber, or of operations or development work, it is ascertained either by the taxpayer or the district director that there remain on the ground, available for utilization, more or less units of timber at the close of the taxable year (or at the close of the month if the taxpayer keeps his depletion accounts on a monthly basis) than remain in the timber account or accounts on the basis of the original estimate, then the original estimate (but not the basis for depletion) shall be revised. The depletion unit shall be changed when such revision has been made. The annual charge to the depletion account with respect to the property shall be computed by using such revised unit for the taxable year for which the revision is made and all subsequent taxable years until a change in facts requires another revision.

(f) **Determination of fair market value of timber property.** (1) If the fair market value of the property at a specified date is the basis for depletion deductions, such value shall be determined, subject to approval or revision by the district director upon audit, by the owner of the property in the light of the most reliable and accurate information available with reference to the condition of the property as it existed at that date, regardless of all subsequent changes, such as changes in surrounding circumstances, and methods of exploitation, in degree of utilization, etc. Such factors as the following will be given due consideration:

(i) Character and quality of the timber as determined by species, age, size, condition, etc.;

(ii) The quantity of timber per acre, the total quantity under consideration, and the location of the timber in question with reference to other timber;

(iii) Accessibility of the timber (location with reference to distance from a common carrier, the topography and other features of the ground upon which the timber stands and over which it must be transported in process of exploitation, the probable cost of exploitation and the climate and the state of industrial development of the locality); and

(iv) The freight rates by common carrier to important markets.

(2) The timber in each particular case will be valued on its own merits and not on the basis of general averages for regions; however, the value placed upon it, taking into consideration such factors as those mentioned in this paragraph, will be consistent with that of other similar timber in the region. The district director will give weight and consideration to any and all facts and evidence having a bearing on the market value, such as cost, actual sales and transfers of similar properties, the margin between the cost of production and the price realized for timber products, market value of stock or shares, royalties and rentals, valuation for local or State taxation, partnership accountings, records of litigation in which the value of the property has been involved, the amount at which the property may have been inventoried or appraised in probate or similar proceedings, disinterested appraisals by approved methods, and other factors.

(g) **Revaluation of timber property not allowed.** No revaluation of a timber property whose value as of any specific date has been determined and approved will be made or allowed during the continuance of the ownership under which the value was so determined and approved, except in the case of misrepresentation or fraud or gross error as to any facts known on the date as of which the valuation was made. Revaluation on account of misrepresentation or fraud or such gross error will be made only with the written approval of the Commissioner. The depletion unit shall be revised when such a revaluation of a timber property has been made and the annual charge to the depletion account with respect to the property shall be computed by using such revised unit for the taxable year for which such revision is made and for all subsequent taxable years.

(h) **Information to be furnished by taxpayer claiming depletion of timber.** A taxpayer claiming a deduction for depletion of timber and for depreciation of plant and other improvements shall attach to his income tax return a filled-out Form T-Timber for the taxable year covered by the

income tax return, including the following information:

(1) A map where necessary to show clearly timber and land acquired, timber cut, and timber and land sold;

(2) Description of, cost of, and terms of purchase of timberland or timber, or cutting rights, including timber or timber rights acquired under any type of contract;

(3) Profit or loss from sale of land, or timber, or both;

(4) Description of timber with respect to which claim for loss, if any, is made;

(5) Record of timber cut;

(6) Changes in each timber account as a result of purchase, sale, cutting, reestimate, or loss;

(7) Changes in improvements accounts as the result of additions to or deductions from capital and depreciation, and computation of profit or loss on sale or other disposition of such improvements;

(8) Operation data with respect to raw and finished material handled and inventoried;

(9) Statement as to application of the election under section 631(a) and pertinent information in support of the fair market value claimed thereunder;

(10) Information with respect to land ownership and capital investment in timberland; and

(11) Any other data which will be helpful in determining the reasonableness of the depletion or depreciation deductions claimed in the return.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.611–4 Depletion as a factor in computing earnings and profits for dividend purposes.

For rules with respect to computation of earnings and profits where depletion is a factor in the case of corporations, see paragraph (c)(1) of § 1.312–6.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.611–5 Depreciation of improvements.

(a) In general. Section 611 provides in the case of mines, oil and gas wells, other natural deposits, and timber that there shall be allowed as a deduction a reasonable allowance for depreciation of improvements. Such allowance shall include exhaustion, wear and tear, and obsolescence. The deduction allowed under section 611 shall be determined under the provisions of section 167 and the regulations thereunder. For purposes of section 167 the unit of production method may, under appropriate circumstances, be considered a reasonable method under section 167(a), and therefore, not subject to the limitations prescribed by section 167(b).

(b) Special rules for mines, oil and gas wells, other natural deposits and timber. (1) For principles governing the apportioning of depreciation allowances under sections 611 and 167 in the case of property held by one person for life with remainder to another or in the case of property held in trust or by an estate, see § 1.167(h)–1.

(2) A reasonable allowance for depreciation on account of obsolescence or decay shall be required in an appropriate case during periods when the improvement is not used in production or is used in producing at a rate below its normal capacity. This rule is applicable whether or not the taxpayer uses the unit of production method.

(3) See sections 615 and 616 and the regulations thereunder for special rules for treatment of allowances for depreciation of improvements with respect to the exploration and development of a mine or other natural deposit (other than oil or gas).

(4) In the case of operating oil or gas properties, the deduction for depreciation shall be allowed for those costs of improvements such as machinery, tools, equipment, pipes, and other similar items and the costs of installation which are not treated as a deductible expense under section 263(c). See § 1.612–4.

(c) Accounting and recordkeeping. See § 1.167(a)–7 for accounting and recordkeeping requirements for taxpayers claiming deductions under section 611 and this section.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3655, March 24, 1964; T.D. 6836, 30 FR 8902, July 15, 1965]

§ 1.612–1 Basis for allowance of cost depletion.

(a) In general. The basis upon which the deduction for cost depletion under section 611 is to be allowed in respect of any mineral or timber property is the adjusted basis provided in section 1011 for the purpose of determining gain upon the sale or other disposition of such property except as provided in paragraph (b) of this section. The adjusted basis of such property is the cost or other

basis determined under section 1012, relating to the basis of property, adjusted as provided in section 1016, relating to adjustments to basis, and the regulations under such sections. In the case of the sale of a part of such property, the unrecovered basis thereof shall be allocated to the part sold and the part retained.

(b) **Special rules.** (1) The basis for cost depletion of mineral or timber property does not include:

(i) Amounts recoverable through depreciation deductions, through deferred expenses, and through deductions other than depletion, and

(ii) The residual value of land and improvements at the end of operations.

In the case of any mineral property the basis for cost depletion does not include amounts representing the cost or value of land for purposes other than mineral production. Furthermore, in the case of certain mineral properties, such basis does not include exploration or development expenditures which are treated under section 615(b) or 616(b) as deferred expenses to be taken into account as deductions on a ratable basis as the units of minerals benefited thereby are produced and sold. However, there shall be included in the basis for cost depletion of oil and gas property the amounts of capitalized drilling and development costs which, as provided in § 1.612–4, are recoverable through depletion deductions. In the case of timber property, the basis for cost depletion does not include amounts representing the cost or value of land.

(2) Where a taxpayer elects to treat the cutting of timber as a sale or exchange of such timber, the basis for cost depletion shall be the fair market value of such timber as of the first day of the taxable year in which such timber is cut and such value shall be considered for such taxable year and all subsequent taxable years as the cost of such timber for all purposes for which such cost is a necessary factor. See section 631(a).

(c) **Cross references.** In cases where the valuation, revaluation, or mineral content of deposits is a factor, see paragraphs (c), (d), (e), and (f) of § 1.611–2. In cases where the valuation, revaluation, or quantity of timber is a factor, see paragraphs (e), (f), and (g) of § 1.611–3. For definitions of the terms "property", "fair market value", "mineral enterprise", "mineral deposit", and "minerals", see paragraph (d) of § 1.611–1. For rules with respect to treatment of depletion accounts on taxpayers' books, see paragraph (b) of § 1.611–2 in the case of mineral property, and paragraph (c) of § 1.611–3 in the case of timber property.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.612–2 Allowable capital additions in case of mines.

(a) **In general.** Expenditures for improvements and for replacements, not including expenditures for ordinary and necessary maintenance and repairs, shall ordinarily be charged to capital account recoverable through depreciation deductions. Expenditures for equipment (including its installation and housing) and for replacements thereof, which are necessary to maintain the normal output solely because of the recession of the working faces of the mine and which—

(1) Do not increase the value of the mine, or

(2) Do not decrease the cost of production of mineral units, or

(3) Do not represent an amount expended in restoring property or in making good the exhaustion thereof for which an allowance is or has been made shall be deducted as ordinary and necessary business expenses.

(b) **Special rule.** For special provisions applicable to treatment of expenditures for certain exploration and development costs (other than for the acquisition, restoration, or betterment of improvements) with respect to minerals other than oil or gas, see sections 615 and 616 and the regulations thereunder.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.612–3 Depletion; treatment of bonus and advanced royalty.

(a) **Bonus.** (1) If a bonus in addition to royalties is received upon the grant of an economic interest in a mineral deposit, or standing timber, there shall be allowed to the payee as a cost depletion deduction in respect of the bonus an amount equal to that proportion of his basis for depletion as provided in section 612 and § 1.612–1 which the amount of the bonus bears to the sum of the bonus and the royalties expected to be received. Such allowance shall be deducted from the payee's basis for depletion and the remainder of the basis is recoverable through depletion deductions as the royalties are thereafter received. (But see paragraph (e) of this section.) For example, a taxpayer leases mineral property to another reserving a one-eighth royalty and in addition receives a bonus of $10,000. Assuming that the

taxpayer's basis with respect to the mineral property is $21,000 and that the royalties expected to be received are estimated to total $20,000, the depletion on the bonus would be $7,000:

[$21,000 (basis)×$10,000 (bonus)]÷$30,000 (bonus plus estimated royalties).

The remaining $14,000 of basis will be recovered through depletion as the royalties are received.

(2) If the grant of an economic interest in a mineral deposit or standing timber with respect to which a bonus was received expires, terminates, or is abandoned before there has been any income derived from the extraction of mineral or cutting of timber, the payee shall adjust his capital account by restoring thereto the depletion deduction taken on the bonus and a corresponding amount must be returned as income in the year of such expiration, termination, or abandonment.

(3) In the case of the payor, payment of the bonus constitutes a capital investment made for the acquisition of an economic interest in a mineral deposit or standing timber recoverable through the depletion allowance. See paragraph (c)(5)(ii) of § 1.613–2 in cases in which percentage depletion is used.

(b) Advanced royalties. (1) If the owner of an operating interest in a mineral deposit or standing timber is required to pay royalties on a specified number of units of such mineral or timber annually whether or not extracted or cut within the year, and may apply any amounts paid on account of units not extracted or cut within the year against the royalty on the mineral or timber thereafter extracted or cut, the payee shall compute cost depletion on the number of units so paid for in advance of extraction or cutting and shall treat the amount so determined as an allowable deduction for depletion from the gross income of the year in which such payment or payments are made. No deduction for depletion by such payee shall be claimed or allowed in any subsequent year on account of the extraction or cutting in such year of any mineral or timber so paid for in advance and for which deduction has once been made. (But see paragraph (e) of this section.)

(2) If the right to extract minerals or to cut timber against which the advanced royalties may be applied expires, terminates, or is abandoned before all such minerals or timber have been extracted or cut, the payee shall adjust his capital account by restoring thereto the depletion deductions made in prior years on account of any units of mineral or timber paid for in advance but not extracted or cut, and a corresponding amount must be returned as income for the year of such expiration, termination or abandonment. (But see paragraph (e) of this section.)

(3) The payor shall treat the advanced royalties paid or accrued in connection with mineral property as deductions from gross income for the year the mineral product, in respect of which the advanced royalties were paid or accrued, is sold. For purposes of the preceding sentence, in the case of mineral sold before production the mineral product is considered to be sold when the mineral is produced (*i.e.*, when a mineral product first exists). However, in the case of advanced mineral royalties paid or accrued in connection with mineral property as a result of a minimum royalty provision, the payor, at his option, may instead treat the advanced royalties as deductions from gross income for the year in which the advanced royalties are paid or accrued. See section 446 (relating to general rule for methods of accounting) and the regulations thereunder. For purposes of this paragraph, a minimum royalty provision requires that a substantially uniform amount of royalties be paid at least annually either over the life of the lease or for a period of at least 20 years, in the absence of mineral production requiring payment of aggregate royalties in a greater amount. For purposes of the preceding sentence, in the case of a lease which is subject to renewal or extension, the period for which it can be renewed or extended shall be treated as part of the term of the original lease. For special rules applicable when the payor is a sublessor of coal or domestic iron ore, see paragraph (b)(3) of § 1.631–3. Every taxpayer who pays or accrues advanced royalties resulting from a minimum royalty provision must make an election as to the treatment of all such advanced royalties in his return for the first taxable year ending after December 31, 1939, in which the advanced royalties are paid or accrued. The taxpayer's treatment of the advanced royalties for the first year shall be deemed to be the exercise of the election. Accordingly, a failure to deduct the advanced royalties for that year will constitute an election to have all the advanced royalties treated as deductions for the year of the sale of the mineral product in respect of which the advanced royalties are paid or accrued. See section 7807(b)(2). For additional rules relating to elections in the case of partners and partnerships, see section 703(b) and the regulations thereunder. The provisions of this subparagraph do not allow as deductions from gross income amounts disallowed as deductions under other provisions of the Code, such as section 461 (relating to general rule for taxable year of deduction), section 465 (relat-

ing to deductions limited to amount at risk in case of certain activities), or section 704(d) (relating to limitation on allowance to partners of partnership losses).

(4) The application of subparagraphs (2) and (3) of this paragraph may be illustrated by the following examples:

Example (1). B leased certain mineral lands from A under a lease in which A reserved a royalty of 10 cents a ton on minerals mined and sold by B. The lease also provided that B had to pay an annual minimum royalty of $10,000 representing the amount due on 100,000 tons of the particular mineral whether or not B mined and sold that amount. It was further provided that, if B did not mine and sell 100,000 tons in any year, he could mine and sell in any subsequent year the amount of mineral on which he had paid the royalty without the payment of any additional royalty. However, this right of recoupment was limited to minerals mined and sold in any later year in excess of the 100,000 tons represented by the $10,000 minimum royalty required to be paid for that later year. Assume that in 1956 B paid A the minimum royalty of $10,000, but mined and sold only 60,000 tons of the mineral and that in 1957 he abandoned the lease without any further production. Since the $10,000 represents royalties on 100,000 tons of mineral and only 60,000 tons were mined and sold, A must restore in 1957 to his capital account the depletion deductions taken in 1956 on $4,000 on account of the 40,000 tons paid for in advance but not mined and sold, and must also return the corresponding amount as income in 1957.

Example (2). Assume that B, under the lease in example (1), paid the $10,000 minimum royalty and mined no minerals in 1956 but that in 1957 B mined and sold 200,000 tons of mineral. If this is B's first such expenditure, B has an option, for the purpose of computing taxable income under section 63, to deduct in 1956 the $10,000 paid in that year although no mineral was mined, or to take the deduction in 1957 when the mineral, for which the $10,000 was paid in 1956, was mined and sold. (For treatment under percentage depletion, see example in paragraph (c)(5)(iii) of § 1.613–2.)

(c) **Delay rental.** (1) A delay rental is an amount paid for the privilege of deferring development of the property and which could have been avoided by abandonment of the lease, or by commencement of development operations, or by obtaining production.

(2) Since a delay rental is in the nature of rent it is ordinary income to the payee and not subject to depletion. The payor may at his election deduct such amount as an expense, or under section 266 and the regulations thereunder, charge it to depletable capital account.

(d) **Percentage depletion deduction with respect to bonus and advanced royalty.** In lieu of the allowance based on cost depletion computed under paragraphs (a) and (b) of this section, the payees referred to therein may be allowed a depletion deduction in respect of any bonus or advanced royalty for the taxable year in an amount computed on the basis of the percentage of gross income from the property as provided in section 613 and the regulations thereunder.

(e) **Cross reference.** In the case of bonuses and advanced royalties received in connection with a contract of disposal of timber covered by section 631(b) or coal or iron ore covered by section 631(c), see that section and the regulations thereunder.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6841, 30 FR 9305, July 27, 1965; T.D. 7523, 42 FR 63641, Dec. 19, 1977]

§ 1.612–4 Charges to capital and to expense in case of oil and gas wells.

(a) **Option with respect to intangible drilling and development costs.** In accordance with the provisions of section 263(c), intangible drilling and development costs incurred by an operator (one who holds a working or operating interest in any tract or parcel of land either as a fee owner or under a lease or any other form of contract granting working or operating rights) in the development of oil and gas properties may at his option be chargeable to capital or to expense. This option applies to all expenditures made by an operator for wages, fuel, repairs, hauling, supplies, etc., incident to and necessary for the drilling of wells and the preparation of wells for the production of oil or gas. Such expenditures have for convenience been termed intangible drilling and development costs. They include the cost to operators of any drilling or development work (excluding amounts payable only out of production or gross or net proceeds from production, if such amounts are depletable income to the recipient, and amounts properly allocable to cost of depreciable property) done for them by contractors under any form of contract, including turnkey contracts. Examples of items to which this option applies are, all amounts paid for labor, fuel, repairs, hauling, and supplies, or any of them, which are used—

(1) In the drilling, shooting, and cleaning of wells,

(2) In such clearing of ground, draining, road making, surveying, and geological works as are necessary in preparation for the drilling of wells, and

(3) In the construction of such derricks, tanks, pipelines, and other physical structures as are necessary for the drilling of wells and the preparation of wells for the production of oil or gas.

In general, this option applies only to expenditures for those drilling and developing items which in themselves do not have a salvage value. For the

purpose of this option, labor, fuel, repairs, hauling, supplies, etc., are not considered as having a salvage value, even though used in connection with the installation of physical property which has a salvage value. Included in this option are all costs of drilling and development undertaken (directly or through a contract) by an operator of an oil and gas property whether incurred by him prior or subsequent to the formal grant or assignment to him of operating rights (a leasehold interest, or other form of operating rights, or working interest); except that in any case where any drilling or development project is undertaken for the grant or assignment of a fraction of the operating rights, only that part of the costs thereof which is attributable to such fractional interest is within this option. In the excepted cases, costs of the project undertaken, including depreciable equipment furnished, to the extent allocable to fractions of the operating rights held by others, must be capitalized as the depletable capital cost of the fractional interest thus acquired.

(b) Recovery of optional items, if capitalized. (1) Items returnable through depletion: If the taxpayer charges such expenditures as fall within the option to capital account, the amounts so capitalized and not deducted as a loss are returnable through depletion insofar as they are not represented by physical property. For the purposes of this section the expenditures for clearing ground, draining, road making, surveying, geological work, excavation, grading, and the drilling, shooting, and cleaning of wells, are considered not to be represented by physical property, and when charged to capital account are returnable through depletion.

(2) Items returnable through depreciation: If the taxpayer charges such expenditures as fall within the option to capital account, the amounts so capitalized and not deducted as a loss are returnable through depreciation insofar as they are represented by physical property. Such expenditures are amounts paid for wages, fuel, repairs, hauling, supplies, etc., used in the installation of casing and equipment and in the construction on the property of derricks and other physical structures.

(3) In the case of capitalized intangible drilling and development costs incurred under a contract, such costs shall be allocated between the foregoing classes of items specified in subparagraphs (1) and (2) for the purpose of determining the depletion and depreciation allowances.

(4) Option with respect to cost of nonproductive wells: If the operator has elected to capitalize intangible drilling and development costs, then an additional option is accorded with respect to intangible drilling and development costs incurred in drilling a nonproductive well. Such costs incurred in drilling a nonproductive well may be deducted by the taxpayer as an ordinary loss provided a proper election is made in the return for the first taxable year beginning after December 31, 1942, in which such a nonproductive well is completed. Such election with respect to intangible drilling and development costs of nonproductive wells is a new election, and, when made, shall be binding for all subsequent years. Any taxpayer who incurs optional drilling and development costs in drilling a nonproductive well must make a clear statement of election under this option in the return for the first taxable year beginning after December 31, 1942, in which such nonproductive well is completed. The absence of a clear indication in such return of an election to deduct as ordinary losses intangible drilling and development costs of nonproductive wells shall be deemed to be an election to recover such costs through depletion to the extent that they are not represented by physical property, and through depreciation to the extent that they are represented by physical property.

(c) Nonoptional items distinguished. (1) Capital items: The option with respect to intangible drilling and development costs does not apply to expenditures by which the taxpayer acquires tangible property ordinarily considered as having a salvage value. Examples of such items are the costs of the actual materials in those structures which are constructed in the wells and on the property, and the cost of drilling tools, pipe, casing, tubing, tanks, engines, boilers, machines, etc. The option does not apply to any expenditure for wages, fuel, repairs, hauling, supplies, etc., in connection with equipment, facilities, or structures, not incident to or necessary for the drilling of wells, such as structures for storing or treating oil or gas. These are capital items and are returnable through depreciation.

(2) Expense items: Expenditures which must be charged off as expense, regardless of the option provided by this section, are those for labor, fuel, repairs, hauling, supplies, etc., in connection with the operation of the wells and of other facilities on the property for the production of oil or gas.

(d) Manner of making election. The option granted in paragraph (a) of this section to charge intangible drilling and development costs to expense may be exercised by claiming intangible drilling and development costs as a deduction on the taxpayer's return for the first taxable year in

which the taxpayer pays or incurs such costs; no formal statement is necessary. If the taxpayer fails to deduct such costs as expenses in such return, he shall be deemed to have elected to recover such costs through depletion to the extent that they are not represented by physical property, and through depreciation to the extent that they are represented by physical property.

(e) **Effect of option and election.** This section does not grant a new option under paragraph (a) of this section or new election under paragraph (b) of this section. Section 3 of the Act of October 23, 1962 (Public Law 87–863, 76 Stat. 1142) granted any taxpayer who had exercised an option to capitalize intangible drilling and development costs under Regulations 111, § 29.23(m)–16 (1939 Code) or Regulations 118, § 39.23(m)–16 (1939 Code) a new option for the first taxable year ending after October 22, 1962, to deduct such costs as expenses. Unless he has exercised the new option granted by such Act, any taxpayer who exercised an option or made an election under the regulations described in the preceding sentence is, by such option or election, bound with respect to all intangible drilling and development costs (whether made before January 1, 1954, or after December 31, 1953) in connection with oil and gas properties. See section 7807(b)(2). Any taxpayer who has not made intangible drilling and development expenditures in any taxable year beginning after December 31, 1942, prior to his first taxable year beginning after December 31, 1953, and ending after August 16, 1954, must exercise the option granted in paragraph (a) of this section in the return for the first taxable year in which the taxpayer pays or incurs such expenditures. If such return is required by law (including extensions thereof) to be filed before November 1, 1965, the option under paragraph (a) of this section, or the election under paragraph (b) of this section, may be exercised or changed not later than November 1, 1965. The exercise of or change in such option or election shall be effective with respect to the earliest taxable year to which the option or election is applicable in respect of which assessment of a deficiency or credit or refund of an overpayment, as the case may be, resulting from such exercise or change is not prevented by any law or rule of law on the date such option is exercised or such election is made. Any such option or election shall be binding upon the taxpayer for the first taxable year for which it is effective and for all subsequent taxable years.

[T.D. 6836, 30 FR 8902, July 15, 1965]

§ 1.612–5 Charges to capital and to expense in case of geothermal wells.

(a) **Option with respect to intangible drilling and development costs.** In accordance with the provisions of section 263(c), intangible drilling and development costs incurred by an operator (one who holds a working or operating interest in any tract or parcel of land either as a fee owner or under a lease or any other form of contract granting working or operating rights) in the development of a geothermal deposit (as defined in section 613(e)(3) and the regulations thereunder) may at the operator's option be chargeable to capital or to expense. This option applies to all expenditures made by an operator for wages, fuel, repairs, hauling, supplies, etc., incident to and necessary for the drilling of wells and the preparation of wells for the production of geothermal steam or hot water. Such expenditures have for convenience been termed intangible drilling and development costs. They include the cost to operators of any drilling or development work (excluding amounts payable only out of production or gross or net proceeds from production, if such amounts are depletable income to the recipient, and amounts properly allocable to cost of depreciable property) done for them by contractors under any form of contract, including turnkey contracts. Examples of items to which this option applies are all amounts paid for labor, fuel, repairs, hauling, and supplies, or any of them, which are used:

(1) In the drilling, shooting, and cleaning of wells,

(2) In such clearing of ground, draining, road making, surveying, and geological work as are necessary in preparation for the drilling of wells, and

(3) In the construction of such derricks, tanks, pipelines, and other physical structures as are necessary for the drilling of wells and the preparation of wells for the production of geothermal steam or hot water.

In general, this option applies only to expenditures for those drilling and developing items which in themselves do *not* have a salvage value. For the purpose of *this* option, labor, fuel, repairs, hauling, supplies, etc. are not considered as having a salvage value, even though used in connection with the installation of physical property which has a salvage value. Included in this option are all costs of drilling and development undertaken (directly or through a contract) by an operator of a geothermal property whether incurred by the operator prior or subsequent to the formal grant or assign-

ment of operating rights (a leasehold interest, or other form of operating rights, or working interest); except that in any case where any drilling or development project is undertaken for the grant or assignment of a fraction of the operating rights, only that part of the costs thereof which is attributable to such fractional interest is within this option. In the excepted cases, costs of the project undertaken, including depreciable equipment furnished, to the extent allocable to fractions of the operating rights held by others, must be capitalized as the depletable capital cost of the fractional interest thus acquired.

(b) Recovery of optional items, if capitalized. (1) Items recoverable through depletion: If the taxpayer charges such expenditures as fall within the option to capital account, the amounts so capitalized and not deducted as a loss are recoverable through depletion insofar as they are not represented by physical property. For the purposes of this section the expenditures for clearing ground, draining, road making, surveying, geological work, excavation, grading, and the drilling, shooting, and cleaning of wells, are considered not to be represented by physical property, and when charged to capital account are recoverable through depletion.

(2) Items recoverable through depreciation: If the taxpayer charges such expenditures as fall within the option to capital account, the amounts so capitalized and not deducted as a loss are recoverable through depreciation insofar as they are represented by physical property. Such expenditures are amounts paid for wages, fuel, repairs, hauling, supplies, etc. used in the installation of casing and equipment and in the construction on the property of derricks and other physical structures.

(3) In the case of capitalized intangible drilling and development costs incurred under a contract, such costs shall be allocated between the foregoing classes of items specified in paragraphs (b)(1) and (2) of this section for the purpose of determining the depletion and depreciation allowances.

(4) Option with respect to cost of nonproductive wells: If the operator has elected to capitalize intangible drilling and development costs; then an additional option is accorded with respect to intangible drilling and development costs incurred in drilling a nonproductive well. Such costs incurred in drilling a nonproductive well may be deducted by the taxpayer as an ordinary loss provided a proper election is made in the taxpayer's original or amended return for the first taxable year ending on or after October 1, 1978, in which such a nonproductive well is completed. The taxpayer must make a clear statement of election under this option in the return or amended return. The election may be revoked by the filing of an amended return that does not contain such a statement. The absence of a clear indication in such return of an election to deduct as ordinary losses intangible drilling and development costs of nonproductive wells shall be deemed to be an election to recover such costs through depletion to the extent that they are not represented by phy^ical property, and through depreciation to the extent that they are represented by physical property. Upon the expiration of the time for filing a claim for credit or refund of any overpayment of tax imposed by chapter 1 of the Code with respect to the first taxable year ending on or after October 1, 1978 in which a nonproductive well is completed, the taxpayer is bound for all subsequent years by his exercise of the option to deduct intangible drilling and development costs of nonproductive wells as an ordinary loss or his deemed election to recover such costs through depletion or depreciation.

(c) Nonoptional items distinguished—(1) Capital items: The option with respect to intangible drilling and development costs does not apply to expenditures by which the taxpayer acquires tangible property ordinarily considered as having a salvage value. Examples of such items are the costs of the actual materials in those structures which are constructed in the wells and on the property, and the cost of drilling tools, pipe, casing, tubing, tanks, engines, boilers, machines, etc. The option does not apply to any expenditure for wages, fuel, repairs, hauling, supplies, etc., in connection with equipment, facilities, or structures, not incident to or necessary for the drilling of wells, such as structures for treating geothermal steam or hot water. These are capital items and are recoverable through depreciation.

(2) Expense items: Expenditures which must be charged off as expense, regardless of the option provided by this section, are those for labor, fuel, repairs, hauling, supplies, etc., in connection with the operation of the wells and of other facilities on the property for the production of geothermal steam or hot water.

(d) Manner of making election. The option granted in paragraph (a) of this section to charge intangible drilling and development costs to expense may be exercised by claiming intangible drilling and development costs as a deduction on the taxpayer's original or amended return for the first taxable year ending on or after October 1,

1978, in which the taxpayer pays or incurs such costs with respect to a geothermal well commenced on or after that date. No formal statement is necessary. The exercise of the option may be revoked by the filing of an amended return that does not claim such a deduction. If the taxpayer fails to deduct such costs as expenses in any such return, he shall be deemed to have elected to recover such costs through depletion to the extent that they are not represented by physical property, and through depreciation to the extent that they are represented by physical property. Upon the expiration of the time for filing a claim for credit or refund of any overpayment of tax imposed by chapter 1 of the Code with respect to the first taxable year ending on or after October 1, 1978, in which the taxpayer pays or incurs intangible drilling and development costs with respect to a geothermal well commenced on or after that date, the taxpayer is bound by his exercise of the option to charge such costs to expense or his deemed election to recover such costs through depletion or depreciation for that year and for all subsequent years.

(e) Effective date. The option granted by paragraph (a) of this section is available only for taxable years ending on or after October 1, 1978, with respect to geothermal wells commenced on or after that date.

[T.D. 7806, 47 FR 4061, Jan. 28, 1982]

§ 1.613–1 Percentage depletion; general rule.

In the case of a taxpayer computing the deduction for depletion under section 611 with respect to minerals on the basis of a percentage of gross income from the property, as defined in section 613(c) and §§ 1.613–3 and 1.613–4, such deduction shall be the percentage of such gross income as specified in section 613(b) and § 1.613–2. The deduction shall not exceed 50 percent of the taxpayer's taxable income from the property (computed without allowance for depletion). Such taxable income shall be computed in accordance with § 1.613–5. In no case shall the deduction for depletion computed under this section be less than the deduction computed upon the cost or other basis of the property provided in section 612 and the regulations thereunder. The apportionment of the deduction between the several owners of economic interests in a mineral deposit will be made as provided in paragraph (c) of § 1.611–1. For rules with respect to "gross income from the property" and for definition of the term "mining", see §§ 1.613–3 and 1.613–4. For definitions of the terms "property", "mineral deposit", and "minerals", see paragraph (d) of § 1.611–1.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960 as amended by T.D. 7170, 37 FR 5374, March 15, 1972]

§ 1.613–2 Percentage depletion rates.

(a) In general. Subject to the provisions of paragraph (b) of this section and as provided in section 613(b), in the case of mines, wells, or other natural deposits, a taxpayer may deduct as an allowance for depletion under section 611 the percentages of gross income from the property as set forth in subparagraphs (1), (2), and (3) of this paragraph.

(1) Without regard to situs of deposits. The following rates are applicable to the minerals listed in this subparagraph regardless of the situs of the deposits from which the minerals are produced:

(i) 27½ percent—Gas wells, oil wells.

(ii) 23 percent—Sulfur, uranium.

(iii) 15 percent—Ball clay, bentonite, china clay, metal mines [1], sagger clay, rock asphalt, vermiculite.

(iv) 10 percent—Asbestos [1], brucite, coal, lignite, perlite, sodium chloride, wollastonite.

(v) 5 percent—Brick and tile clay, gravel, mollusk shells (including clam shells and oyster shells), peat, pumice, sand, scoria, shale, stone (except dimension or ornamental stone). If from brine wells—Bromine, calcium chloride, magnesium chloride.

(2) Production from United States deposits. A rate of 23 percent is applicable to the minerals listed in this subparagraph if produced from deposits within the United States:

Anorthosite.[2]

Asbestos.

Bauxite.

Beryl.[3]

Celestite.

Chromite.

Corundum.

Fluorspar.

Graphite.

Ilmenite.

Kyanite.

[1] Not applicable if the rate prescribed in subparagraph (2) of this paragraph is applicable.

[2] The rate prescribed in this subparagraph does not apply except to the extent that alumina and aluminum compounds are extracted therefrom.

[3] Applicable only for taxable years beginning before January 1, 1964.

Mica.

Olivine.

Quartz crystals (radio grade).

Rutile.

Block Steatite talc.

Zircon.

Ores of the following metals—

Antimony.

Beryllium.[4]

Bismuth.

Cadmium.

Cobalt.

Columbium.

Lead.

Lithium.

Manganese.

Mercury.

Nickel.

Platinum.

Platinum group metals.

Tantalum.

Thorium.

Tin.

Titanium.

Tungsten.

Vanadium.

Zinc.

(3) **Other minerals.** A rate of 15 percent is applicable to the minerals listed in this subparagraph regardless of the situs of the deposits from which the minerals are produced, provided the minerals are not used or sold for use by the mine owner or operator as rip rap, ballast, road material, rubble, concrete aggregates, or for similar purposes. If, however, such minerals are sold or used for the purposes described in the preceding sentence, a rate of 5 percent is applicable to any of such minerals unless sold on bid in direct competition with a bona fide bid to sell any of the minerals listed in subdivision (iii) of subparagraph (1) of this paragraph, in which case the rate is 15 percent. In addition, the provisions of this subparagraph are not applicable with respect to any of the minerals listed herein if the rate prescribed in subparagraph (2) of this paragraph is applicable.

Aplite.

Barite.

Bauxite.

Beryl.[5]

Borax.

Calcium carbonates.

Clay, refractory and fire.[6]

Diatomaceous earth.

Dolomite.

Feldspar.

Flake Graphite.

(4) For purposes of this section, the term "all other minerals" does not include (i) soil, sod, dirt, turf, water, or mosses; or (ii) minerals from sea water, the air, or similar inexhaustible sources. However, the term "all other minerals" is not limited in meaning to the minerals listed in section 613(b), but includes all other minerals (except those to which a specific percentage rate applies under subparagraphs (1), (2), (3), (4), and (5), of section 613(b)): For example, gypsum, novaculite, natural mineral pigments, quartz sand and quartz pebbles, graphite and kyanite (if section 613(b)(2)(B) does not apply), and anorthosite to the extent that alumina and aluminum compounds are not extracted therefrom. The 15 percent rate applies to such "all other minerals" when used or sold for use by the mine owner or operator for purposes other than as rip rap, ballast, road material, rubble, concrete aggregates, or for similar purposes. When any such minerals are used or sold for use by the mine owner or operator as rip rap, ballast, road material, rubble, concrete aggregates, or for similar purposes, the 5 percent rate applies except that, when sold for such use by the mine owner or operator on a bid in direct competition with a bona fide bid to sell a mineral listed in section 613(b)(3), the 15 percent rate applies. For example, limestone sold on a bid in direct competition with a bona fide bid to sell rock asphalt for road building purposes may be entitled to a 15 percent rate. In every case the taxpayer must establish to the satisfaction of the district director that there was a bona fide bid to sell a mineral listed under section 613(b)(3) by a person other than the taxpayer, and that the mineral sold by the taxpayer was sold on a bid in direct competition with such bona fide bid to sell such other material.

Fluorspar.

Fullers earth.

Barnet.

Gilsonite.

Granite.

Lepidolite.

Limestone.

[4] Applicable only for taxable years beginning after December 31, 1963.

[5] Applicable only for taxable years beginning before January 1, 1964.

[6] Not applicable for taxable years beginning after December 31, 1960.

Magnesite.
Magnesium carbonates.
Marble.
Mica.
Phosphate rock.
Potash.
Quartzite.
Slate.
Soapstone.
Spodumene.
Stone (dimension or[7] ornamental).
Talc (including pyrophyllite).
Thernardite.
Tripoli.
Trona.
All other minerals.[7]

(b) Definition of terms. (1) For purposes of this section, the minerals indicated below shall have the following meanings:

(i) Clay, brick and tile—Clay used or sold for use in the manufacture of common brick, drain and roofing tile, sewer pipe, flower pots, and kindred products (other than clay specifically identified as a clay for which a 15 percent rate of percentage allowance is provided).

(ii) Clay, refractory and fire—Clay which has a pyrometric cone equivalent of 19 or higher.

(iii) Pumice—All pumice including pumicite.

(iv) Scoria—Only scoria produced from natural deposits.

(2) For purposes of this section, the term "United States" means the States and the District of Columbia. See section 7701(a)(9).

(3) For purposes of this section, the term "dimension stone" means blocks and slabs of natural stone, subsequently cut to definite shapes and sizes and used or sold for such uses as building stone (excluding rubble), monumental stone, paving blocks, curbing and flagging. For purposes of this section, "ornamental stone" means blocks and slabs of natural stone, subsequently cut to definite shapes and sizes and used or sold for use for making ornaments or statues.

(c) Rules for application of paragraph (a) of this section. (1) In no case may the allowance for depletion computed upon the basis of a percentage of gross income from the property exceed 50 percent of the taxpayer's taxable income from the property (computed without allowance for depletion). For rules relating to the computation of such taxable income, see § 1.613–5.

(2) In cases in which there are produced from a mineral property two or more minerals, each entitled to a different percentage depletion rate under section 613(b) and this section or any of which is entitled to cost depletion only, the percentage depletion allowance is the sum of the results obtained by applying the percentage applicable to each mineral (zero, if not entitled to percentage depletion) to the "gross income from the property" attributable to such mineral. The sum so computed is subject to the limitation provided in section 613(a) and § 1.613–1, that is, 50 percent of the taxpayer's taxable income from the property (computed without allowance for depletion). Such taxable income (computed in accordance with § 1.613–4) is the total taxable income resulting from the sale of all minerals produced from the mineral property (as defined in section 614 and the regulations thereunder). The provisions of this subparagraph may be illustrated by the following examples:

Example (1). Pyrite, an iron sulfide, may be sold for either its sulfur content or its iron content, or both. Sulfur is entitled to a percentage depletion deduction based on 23 percent of gross income from the property whereas the percentage depletion deduction for iron is based on 15 percent of such gross income. Therefore, in the case of a taxpayer who sells pyrite for both its sulfur and iron content, 23 percent of his gross income from sulfur plus 15 percent of his gross income from iron would be his maximum allowable percentage depletion deduction. However, this maximum deduction would be subject to the limitation provided for in section 613(a), *i.e.*, 50 percent of "taxable income from the property (computed without allowance for depletion)", such taxable income being the overall taxable income resulting from the sale of both minerals contained in the deposit.

Example (2). Oil and gas are produced from a single mineral property of a taxpayer who operates a retail outlet for the sale of oil products within the meaning of section 613A(d)(2). The taxpayer is not entitled to percentage depletion on the gross income attributable to the oil, but is entitled to percentage depletion on the gross income attributable to gas which is regulated gas under section 613A(b)(2)(B). Accordingly, the taxpayer's maximum allowable percentage depletion deduction would be zero percent of gross income from the property with respect to oil, plus 22 percent (see section 613A(b)(1)) of gross income from the property with respect to gas. This maximum deduction would be subject to the limitation provided for in section 613(a), *i.e.*, 50 percent of "taxable income from the property (computed without allowance for depletion)," such taxable income being the overall taxable income resulting from the sale of both oil and gas. However, in the case of oil or gas production which qualifies for percentage depletion under section 613A(c), see the special allocation rules contained in section 613A(c)(7)(C) and (E) and § 1.613A–4.

[7] The 15-percent rate is applicable only to stone used or sold for use by the mine owner or operator as dimension stone or ornamental stone.

(3) Except as provided in section 613(d) and the regulations thereunder relating to special rules for determining rates of depletion for taxable years ending after December 31, 1953, to which the Internal Revenue Code of 1939 applies—

(i) The percentage rates set forth in this section are applicable only for taxable years beginning after December 31, 1953, and ending after August 16, 1954; and

(ii) The percentage rates set forth in 26 CFR (1939) 39.23(m)–5 (Regulations 118) are applicable for taxable years beginning before January 1, 1954, or ending before August 17, 1954.

(4) Percentage depletion is not allowable with respect to the income from a disposal of coal (including lignite) or domestic iron ore (as defined in paragraph (e) of § 1.631–3) with a retained economic interest to the extent that such income is treated as from a sale of coal or iron ore under section 631(c) and § 1.631–3. Rents or royalties paid or incurred by a taxpayer with respect to coal (including lignite) or domestic iron ore shall be excluded by such taxpayer in determining "gross income from the property" without regard to the treatment under section 631(c) of such rents and royalties in the hands of the recipient.

(5)(i) In all cases there shall be excluded in determining the "gross income from the property" an amount equal to any rents or royalties (which are depletable income to the payee) which are paid or incurred by the taxpayer in respect of the property and are not otherwise excluded from "gross income from the property". The following example illustrates this rule:

Example. A leases coal-bearing lands to B on condition that B will annually pay a royalty of 25 cents a ton on coal mined and sold by B. During the year 1956, B mines and sells f.o.b. mine 100,000 tons of coal for $600,000. In computing "gross income from the property" for the year 1956, B will exclude $25,000 (100,000 tons×$0.25) in computing his allowable percentage depletion deduction. B's allowable percentage depletion deduction (without reference to the limitation based on taxable income from the property) for the year 1956 will be $57,500 (($600,000–$25,000)×10 percent).

(ii) If bonus payments have been paid in respect of the property in any taxable year or any prior taxable years, there shall be excluded in determining the "gross income from the property", an amount equal to that part of such payments which is allocable to the product sold (or otherwise giving rise to gross income) for the taxable year. For purposes of the preceding sentence, bonus payments include payments by the lessee with respect to a production payment which is treated as a bonus under section 636(c). Such a production payment is equally allocable to all mineral from the mineral property burdened thereby. The following examples illustrate the provisions of this subdivision:

Example (1). In 1956, A leases oil bearing lands to B, receiving $200,000 as a bonus and reserving a royalty of one-eighth of the proceeds of all oil produced and sold. It is estimated at the time the lease is entered into that there are 1,000,000 barrels of oil recoverable. In 1956, B produces and sells 100,000 barrels for $240,000. In computing his "gross income from the property" for the year 1956, B will exclude $30,000 (⅛ of $240,000), the royalty paid to A, and $20,000 (100,000 bbls. sold/1,000,000 bbls. estimated to be available × $200,000 bonus), the portion of the bonus allocable to the oil produced and sold during the year. However, in computing B's taxable income under section 63, the $20,000 attributable to the bonus payment shall not be either excluded or deducted from B's gross income computed under section 61. (See paragraph (a)(3) of § 1.612–3.)

Example (2). In 1971, C leases to D oil bearing lands estimated to contain 1,000,000 barrels of oil, reserving a royalty of one-eighth of the proceeds of all oil produced and sold and a $500,000 production payment payable out of 50 percent of the first oil produced and sold attributable to the seven-eighths operating interest. In 1972, D produces and sells 100,000 barrels of oil. In computing his "gross income from the property" for the year 1972, D will exclude, in addition to the royalty paid to C, $50,000 (100,000 bbls. sold/1,000,000 bbls. estimated to be available × $500,000 treated under section 636(c) as a bonus), the portion of the production payment allocable to the oil produced and sold during the taxable year. However, in computing D's taxable income under section 63, the $50,000 attributable to the retained production payment shall not be either excluded or deducted from D's gross income computed under section 61.

(iii) If advanced royalties have been paid in respect of the property in any taxable year, the amount excluded from "gross income from the property" of the payor for the current taxable year on account of such payment, shall be an amount equal to the deduction for such taxable year taken on account of such payment pursuant to paragraph (b)(3) of § 1.612–3.

Example. If B in example (2) in paragraph (b)(4) of § 1.612–3, elects to deduct in 1956 the $10,000 paid to A in that year, he must exclude the same amount from "gross income from the property" in 1956; however, if B elects to defer the deduction until 1957 when he mined and sold the mineral, he must exclude the $10,000 from "gross income from the property" in 1957.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6841, 30 FR 9306, July 27, 1965; T.D. 7170, 37 FR 5374, March 15, 1972; T.D. 7261, 38 FR 5467, March 1, 1973; T.D. 7487, 42 FR 24263, May 13, 1977]

§ 1.613–3 Gross income from the property.

(a) **Oil and gas wells.** In the case of oil and gas wells, "gross income from the property", as used in section 613(c)(1), means the amount for which the taxpayer sells the oil or gas in the immediate vicinity of the well. If the oil or gas is not sold on

the premises but is manufactured or converted into a refined product prior to sale, or is transported from the premises prior to sale, the gross income from the property shall be assumed to be equivalent to the representative market or filed price of the oil or gas before conversion or transportation.

(b) Minerals other than oil and gas—(1) In general. The term "gross income from the property," as used in section 613(c)(1), means, in the case of a mineral property other than an oil or gas property, gross income from mining. "Gross income from mining" is that amount of income which is attributable to the processes of extraction of the ores or minerals from the ground and the application of mining processes, including mining transportation. For the purpose of this section, "ordinary treatment processes" (applicable to the taxable years beginning before January 1, 1961) and "treatment processes considered as mining" (applicable to the taxable years beginning after December 31, 1960) will be referred to as "mining processes." Processes, including packaging and transportation, which do not qualify as mining will be referred to as "nonmining processes." Also for the purpose of this section, transportation which qualifies as "mining" will be referred to as "mining transportation" and transportation which does not qualify as "mining" will be referred to as "nonmining transportation." See paragraph (f) of this section for the definition of the term "mining" and paragraph (g) of this section for rules relating to nonmining processes.

(2) Sales prior to the application of nonmining processes including nonmining transportation. (i) Subject to the adjustments required by paragraph (e)(1) of this section, gross income from mining means (except as provided in subdivision (ii) of this subparagraph) the actual amount for which the ore or mineral is sold if the taxpayer sells the ore or mineral—

(a) As it emerges from the mine, prior to the application of any process other than a mining process or any transportation, or

(b) After application of only mining processes, including mining transportation, and before any nonmining transportation.

If the taxpayer sells his ore or mineral in more than one form, and if only mining processes are applied to the ore or mineral, gross income from mining is the actual amount for which the various forms of the ore or mineral are sold, after any adjustments required by paragraph (e)(1) of this section. For example, if, at his mine or quarry, a taxpayer sells several sizes of crushed gypsum and also sells gypsum fines produced as an incidental by-product of his crushing operations, without applying any nonmining processes, gross income from mining will ordinarily be the total amount for which such crushed gypsum and fines are actually sold. See paragraphs (f) and (g) of this section for provisions defining mining and nonmining processes for various minerals.

(ii) [Reserved]

(c) Sales after the application of nonmining processes including nonmining transportation where a representative market or field price for the taxpayer's ore or mineral can be ascertained—(1) General rule. If the taxpayer processes the ore or mineral before sale by the application of nonmining processes (including nonmining transportation), gross income from the property shall be computed by use of the representative market or field price of an ore or mineral of like kind and grade as the taxpayer's ore or mineral after the application of the mining processes (if any) actually applied and before any nonmining transportation, subject to any adjustments required by paragraph (e) of this section. The objective in computing gross income from the property by the representative market or field price method is to ascertain, on the basis of a study of actual competitive sales by the taxpayer or others, the dollar figure or amount which most nearly represents the approximate price at which the taxpayer, in light of market conditions, could have sold his ores or minerals if, prior to the application of nonmining processes, the taxpayer had sold the quantities and types of ores and minerals to which he applied nonmining processes. If it is possible to determine a market or field price under the provisions of this paragraph, and if such price is determined to be representative, the taxpayer's gross income from the property shall be determined on the basis of such price and not under the provisions of paragraph (d) of this section. The taxpayer's own actual sales prices for ores or minerals of like kind and grade shall be taken into account when establishing market or field prices, provided that such sales are determined to be representative.

(2) Criteria for determining whether an ore or mineral is of like kind and grade as the taxpayer's ore or mineral. An ore or mineral will be considered to be of like kind and grade as the taxpayer's ore or mineral if, in common commercial practice, it is sufficiently similar in chemical, mineralogical, or physical characteristics to the taxpayer's ore or mineral so that it is used or is economically suitable for use for essentially the same purposes as the uses to which the taxpayer's

ore or mineral is put. Whether an ore or mineral is of like kind and grade as the taxpayer's ore or mineral will generally be determined by reference to industrial specifications and by consideration of chemical and physical data relating to the minerals and deposits in question. An ore or mineral may be considered to be of like kind and grade as the taxpayer's ore or mineral even though the chemical, mineralogical, or physical characteristics (including size, mineral content, structure, and impurities) of such ore or mineral are not precisely identical to those of the taxpayer's ore or mineral. Similarly, the fact that the taxpayer applies slightly different size reduction processes, the fact that the taxpayer uses slightly different benefication processes, or the fact that the taxpayer sells his ore or mineral for different purposes, will not in itself, prevent another person's ore or mineral from being considered to be of like kind and grade as the taxpayer's ore or mineral. On the other hand, the fact that the taxpayer's ore or mineral is suitable for the same general commercial use as another person's ore or mineral will not cause the two ores or minerals to be considered to be of like kind and grade if the desirable natural constituents of the two ores or minerals are markedly different substances. For example, anthracite coal will not be considered to be of like kind as bituminous coal merely because both types of coal can be used as fuel. Similarly, bituminous coal which does not possess coking qualities will not be considered to be of like grade as bituminous coking coal. However, in the case of a taxpayer who mines and uses his bituminous coal in the production of coke, all bituminous coals in the same marketing area will be considered to be of like kind, and all such bituminous coals having the same or similar coking quality suitable for commercial use by coke producers will be considered to be of like grade as the coal mined and used by the taxpayer.

(3) Factors to be considered in determining the representative market or field price for the taxpayer's ore or mineral. In determining the representative market or field price for the taxpayer's ore or mineral, consideration shall be given only to prices of ores or minerals of like kind and grade as the taxpayer's ore or mineral and with which, under commercially accepted standards, the taxpayer's ore or mineral would be considered to be in competition if it were sold under the conditions described in paragraph (b)(2)(i) of this section. A weighted average of the selling prices of ores or minerals of like kind and grade as the taxpayer's, beneficiated only by mining processes, in the taxpayer's actual or potential lines of commerce, and in the marketing area of the taxpayer's mine, although not a prerequisite to the determination of the representative market or field price, is an important factor in the determination of such price. The taxpayer's own competitive sales prices for minerals which have been subjected only to mining processes shall be taken into account in computing such a weighted average. The identity of the taxpayer's actual or potential lines of commerce, the geographical extent of the relevant markets, and the price within such markets which is the representative market or field price, are necessarily factual determinations to be made on the basis of the facts and circumstances of each individual case. These facts and circumstances include the similarity of the taxpayer's ore or mineral to the ores or minerals marketed by others, the location of the mines or quarries at which sales of ores or minerals take place, the frequency and volume of such sales, the functional product markets in which miners' ores or minerals are sold, the amount of competition within the relevant markets, the date or dates at which sales take place, the prices paid by the taxpayer and by others when purchasing similar ores or minerals, and all other relevant factors.

(4) Type of sales which may be considered in determining the representative market or field price for the taxpayer's ore or mineral. Sales or purchases, including the taxpayer's, of ores or minerals of like kind and grade as the taxpayer's will be taken into consideration in determining the representative market or field price for the taxpayer's ore or mineral only if such sales or purchases are the result of competitive transactions. Accordingly, primary consideration will be given to sales in markets characterized by a substantial number of unrelated buyers and sellers, no one of whom controls a substantial portion of the sales or purchases in the market. For the purpose of determining the representative market or field price for the taxpayer's ore or mineral, exceptional, insignificant, unusual, tie-in, or accommodation sales shall be disregarded. Representative market or field prices shall not be determined by reference to prices established in transactions between members of a controlled group. See paragraph (a) of section 1.482–1 for the definitions of the terms "controlled" and "group".

(5) Information to be furnished by a taxpayer computing gross income from the property by use of a representative market or field price. A taxpayer who computes his gross income from the property pursuant to the provisions of this paragraph shall attach to his return a statement indicating the price or prices used by him in comput-

ing gross income from mining under this paragraph and the source of his information as to such price or prices.

(6) **Limitation on gross income from the property computed under the provisions of this paragraph.** It shall be presumed that a price is not a representative market or field price for the taxpayer's ore or mineral if the sum of such price plus the total of all costs of the nonmining processes (including nonmining transportation) which the taxpayer applies to his ore or mineral regularly exceeds the taxpayer's actual sales price of his first marketable product or group of products. See paragraph (d)(1)(iv) of this section for the definition of the term "first marketable product or group of products". For example, if the total of all costs of nonmining processes applied by the taxpayer to coal for the purpose of making coke is $12 per ton, and if the taxpayer's actual sale price for such coke is $18 per ton, a price of $7 per ton would not be a representative market or field price for the taxpayer's coal. In order to rebut the presumption set forth in the first sentence of this subparagraph, evidence must be produced to establish to the satisfaction of the district director that the loss on nonmining operations is directly attributable to unusual, peculiar, and nonrecurring factors rather than to the use of a market or field price which is not representative. For example, the first sentence of this subparagraph shall not apply if the taxpayer establishes in an appropriate case that the loss on nonmining operations is directly attributable to unusual, peculiar, and nonrecurring events such as a fire, flood, explosion, earthquake, strike, or a similar event which is not a normal part of the operations of the taxpayer.

(d) **Sales after the application of nonmining processes where a representative market or field price cannot be ascertained—(1) Computation of gross income from the property by use of the proportionate profits method.** (i) If it is impossible to determine a representative market or field price as described in paragraph (c) of this section, then, except as provided in subparagraph (2) of this paragraph, gross income from the property shall be computed by use of the proportionate profits method. See § 1.611–0. The objective of the proportionate profits method of computation is to ascertain gross income from the property by applying the principle that each dollar of the total costs paid or incurred to produce, transport and sell the first marketable product or group of products earns the same percentage of profit. Accordingly, in the proportionate profits method no ranking of costs is permissible which results in excluding or minimizing the effect of any costs incurred to produce, sell and transport the first marketable product or group of products. See subdivision (iv) of this subparagraph for the definition of the term "first marketable product or group of products".

(ii) The proportionate profits method of computation is applied by multiplying the taxpayer's gross sales (actual or constructive) of his first marketable product or group of products (after making the adjustments required by paragraph (e) of this section) by a fraction whose numerator is the sum of all the costs allocable to those mining processes which are applied to produce, sell, and transport the first marketable product or group of products, and whose denominator is the total of all the mining and nonmining costs paid or incurred to produce, sell, and transport the first marketable product or group of products (after making the adjustments required by this paragraph and paragraph (e) of this section). See subdivisions (iv) and (v) of this subparagraph for the definitions of the terms "first marketable product or group of products" and "gross sales (actual or constructive)", respectively. The method as described herein is merely a restatement of the method formerly set forth in the second sentence of Regulations 118, § 39.23(m)–1(e)(3) (1939 Code). The proportionate profits method of computation may be illustrated by the following equation:

Mining costs ÷ Total costs × Gross sales = Gross income from mining.

(iii) Those costs which are paid or incurred by the taxpayer to produce, sell, and transport the first marketable product or group of products, and which are not directly identifiable with either a particular mining process or a particular nonmining process shall be properly apportioned to mining and to nonmining. In the absence of any specific provision of this section providing an apportionment method, such costs shall be apportioned by use of a method which is reasonable in the circumstances. One method which may be reasonable in a particular case is an allocation based on the proportion that the direct costs of mining processes and the direct costs of nonmining processes bear to each other. For example, the salary of a corporate officer engaged in overseeing all of the taxpayer's processes is an expense which would normally be apportioned on the basis of the ratio between the direct costs of mining and nonmining processes. On the other hand, an expense such as workmen's compensation premiums would normally be apportioned on the basis of direct labor costs. For the rule relating to selling expenses, see paragraph (c) of § 1.613–4.

(iv) As used in this section, the term "first marketable product or group of products" means the product (or group of essentially the same products) produced by the taxpayer as a result of the application of nonmining processes, in the form or condition in which such product or products are first marketed in significant quantities by the taxpayer or by others in the taxpayer's marketing area. For this purpose, bulk and packaged products are considered to be essentially the same product. The first marketable product or group of products does not include a product or group of products additionally refined, beneficiated, altered, or manufactured as a result of the application of additional nonmining processes. For example, if a cement manufacturer sells his own finished cement of various types in bulk and bags and also sells concrete blocks or dry ready-mix aggregates containing additives, the finished cement of various types, in bulk and bags, constitutes the first marketable product or group of products produced by him. Similarly, if an integrated iron ore and steel producer sells both pig iron in various sizes and rolled sheet iron or shapes, his first marketable product is the pig iron in its various sizes. Further, if an integrated clay and brick producer sells both unglazed bricks and tiles of various shapes and sizes and additionally manufactured bricks and tiles which are specially glazed, the unglazed products, both packaged and unpackaged, constitute his first marketable product or group of products.

(v) As used in this paragraph, the term "gross sales (actual or constructive)" means the total of the taxpayer's actual sales to others of the first marketable product or group of products, plus the taxpayer's constructive sales of the first marketable product or group of products used or retained for use in his own subsequent operations. The prices at which actual or constructive sales are made are to be determined in accordance with the principles set forth in this paragraph and in paragraphs (b), (c), and (e) of this section, as appropriate. In the case of constructive sales of the taxpayer's first marketable product or group of products, the taxpayer shall attach to his return a statement indicating the price or prices used by him in computing the representative market or field price for such product or products, and the source of his information as to such price or prices. The prices at which actual or constructive sales are made shall not be determined by reference to prices established in transactions between members of a controlled group. See paragraph (a) of § 1.482–1 for the definitions of the terms "controlled" and "group".

(vi) The provisions of this subparagraph may be illustrated by the following example:

Example.—(a) Facts. A is engaged in the mining of a mineral to which section 613 applies, and in the application thereto of nonmining processes. During 1968, A incurred extraction costs of $35,000; other mining costs of $56,000; $150,000 for manufacturing costs; $46,000 for other nonmining processes; and $14,000 for the company president's salary and similar costs. The actual gross sales price of A's first marketable group of products (after the adjustments required by paragraph (e) of this section) was $6 per ton for all products. During 1968, A sold 70,000 tons of these manufactured products. It is not possible to establish a representative market or field price for A's mineral before the application of nonmining processes.

(b) Computation. (1) The computation of A's gross income from mining by use of the proportionate profits method involves two steps. The first step is to apportion A's costs to mining and to nonmining. A apportions the company president's salary and similar costs to mining and to nonmining in the manner described in the third and fourth sentences of subdivision (iii) of this subparagraph, and apportions his remaining costs as follows:

Cost	Mining	Nonmining	Total
Extraction	$35,000	....	$35,000
Other mining processes	56,000	56,000	
Manufacturing	....	$150,000	150,000
Other nonmining processes	....	46,000	46,000
Subtotal	91,000	196,000	287,000
President's salary and similar costs	4,439	9,561	14,000
Total costs	95,439	205,561	301,000

(2) The second step is to apply the proportionate profits fraction so as to compute A's gross income from mining. To do this, A first computes his gross sales of his first marketable group of products. In this case, the actual gross sales price of A's first marketable group of products (after the adjustments required by paragraph (e) of this section) was $6 per ton for all products. Since 70,000 tons of these products were sold, A's actual gross sales were $420,000. Next, A multiplies his actual gross sales of $420,000 by the proportionate profits fraction, whose numerator consists of his total mining costs ($95,439) and whose denominator consists of his total costs ($301,000). This procedure indicates that A's gross income from mining is $133,170 (*i.e.*, 95,439/301,000ths of A's actual gross sales of $420,000).

(2) [Reserved]

(3) Costs to be used in computing gross income from the property by use of the proportionate profits method or another approved method based on the taxpayer's costs. In determining the taxpayer's gross income from the property by use of the proportionate profits method or another approved method based on the taxpayer's costs, only costs actually paid or incurred shall be taken into consideration. In general, if the taxpayer has consistently employed a reasonable method of determining the costs of the various individual phas-

es of his mining and nonmining processes (such as extraction, loading for shipment, calcining, packaging, etc.), such method shall not be disturbed. The amount of any particular item to be taken into account shall, for taxable years beginning after November 30, 1968, be the amount used in determining the taxpayer's income for tax purposes. For example, the depreciation lives, methods, and records used for tax purposes, if different from those used for book purposes, shall be the basis for determining the amount of depreciation to be used in the proportionate profits computation of gross income from mining.

(4) **Treatment of particular items in computing gross income from the property by use of the proportionate profits method or another approved method based on the taxpayer's costs.** (i) Except as specifically provided elsewhere in this section, when determining gross income from the property by use of the proportionate profits method or any other approved method which is based on the taxpayer's costs, the costs attributable to mining transportation shall be treated as mining costs, and the costs attributable to nonmining transportation shall be treated as nonmining costs. Accordingly, except as specifically provided elsewhere in this section, all profits attributable to mining transportation shall be treated as mining profits, and all profits attributable to nonmining transportation shall be treated as nonmining profits. For this purpose, mining transportation means so much of the transportation of ores or minerals (whether or not by common carrier) from the point of extraction from the ground to plants or mills in which other mining processes are applied thereto as is not in excess of 50 miles or, if the taxpayer files an application pursuant to paragraph (h) of this section and the Commissioner finds that both the physical and other requirements are such that the ores or minerals must be transported a greater distance to such plants or mills, the transportation over the greater distance. Further, for this purpose, nonmining transportation includes the transportation (whether or not by common carrier) of ores, minerals, or the products produced therefrom, from the point of extraction from the ground to nonmining facilities, or from a mining facility to a nonmining facility, or from one nonmining facility to another, or from a nonmining facility to the customers who purchase the taxpayer's first marketable product or group of products. See paragraph (e)(2) of this section for provisions relating to purchased transportation to the customer, and paragraph (g)(3) of this section for provisions relating to transportation the primary purpose of which is marketing or distribution. In the absence of other methods which the district director determines will clearly reflect the costs of the various phases of transportation, the cost attributable to nonmining transportation shall be an amount which is in the same ratio to the costs incurred for the total transportation as the distance of the nonmining transportation is to the distance of the total transportation. Where the plants or mills in which mining processes are applied to ores or minerals are in excess of 50 miles from the point of extraction from the ground (or in excess of a greater distance approved by the Commissioner), the costs incurred for transportation to such plants or mills in excess of 50 miles (or of such greater distance) shall be treated as nonmining costs in determining gross income from mining. Accordingly, all profits attributable to such excess transportation are treated as nonmining profits. However, except in the case of transportation performed in conveyances owned or leased by the taxpayer, the preceding sentence shall apply only to taxable years beginning after November 30, 1968.

(ii) In determining gross income from the property by use of the proportionate profits method or any other approved method which is based on the taxpayer's costs, a process shall not be considered as a mining process to the extent it is applied to ores, minerals, or other materials with respect to which the taxpayer is not entitled to a deduction for depletion under section 611. The costs of such nondepletable ores, minerals, or materials; the costs of the processes (including blending, size reduction, etc.) applied thereto; and the transportation costs thereof, if any, shall be considered as nonmining costs in determining gross income from mining. If a mining process is applied to an admixture of depletable and nondepletable material, the cost of the process and the cost of transportation, if any, attributable to the nondepletable material shall be considered as nonmining costs in determining gross income from mining. Accordingly, all profits attributable thereto are treated as nonmining profits. In the absence of methods which will more clearly reflect the cost attributable to the processing and transportation, if any, of the nondepletable admixed material, the cost attributable thereto shall be deemed to be that proportion of the costs which the tonnage of nondepletable material bears to the total tonnage of both depletable and nondepletable material.

(iii) In determining gross income from the property by use of the proportionate profits method (or any other approved method which is based on the taxpayer's costs)—

(a) The costs attributable to containers, bags, packages, pallets, and similar items as well as the costs of materials and labor attributable to bagging, packaging, palletizing, or similar operations shall be considered as nonmining costs.

(b) The costs attributable to the bulk loading of manufactured products shall be considered as nonmining costs.

(c) The costs attributable to the operation of warehouses or distribution terminals for manufactured products shall be considered as nonmining costs.

Accordingly, all profits attributable thereto are treated as nonmining profits.

(iv) In computing gross income from the property by means of the proportionate profits method or any other approved method based on the taxpayer's costs, the principles set forth in paragraph (c) of § 1.613–4 shall apply when determining whether selling expenses and trade association dues are to be treated, in whole or in part, as mining costs or as nonmining costs. To the extent that selling expenses and trade association dues are treated as nonmining costs, all profits attributable thereto are treated as nonmining profits.

(v) In computing gross income from the property by means of the proportionate profits method or any other approved method based on the taxpayer's costs, allowances to customers which are determined to have the effect of trade or cash discounts under the provisions of paragraph (e)(1)(ii) of this section, shall (if not otherwise taken into account) be excluded from the denominator of the proportionate profits fraction. See paragraph (e)(1)(i) of this section for provisions excluding such allowances from the taxpayer's gross sales of his first marketable product or group of products.

(e) Reductions of sales price in computing gross income from the property—(1) Discounts. (i) The amount of any trade or (for taxable years beginning after November 30, 1968) cash discounts actually allowed by a taxpayer computing gross income from the property under the provisions of paragraph (b)(2) of this section shall be subtracted from the sale price of the taxpayer's ore or mineral. In the case of a taxpayer computing gross income from the property under the provisions of paragraph (c) of this section, any such discounts actually allowed (if not otherwise taken into account) by the person or persons making the sales on the basis of which the representative market or field price for the taxpayer's ore or mineral is to be determined shall be subtracted from the sale price in computing such representative market or field price. In the case of a taxpayer computing gross income from the property under the provisions of paragraph (d) of this section, such discounts (if not otherwise taken into account) shall be subtracted from the gross sales (actual or constructive) of the first marketable product or group of products.

(ii) The provisions of subdivision (i) of this subparagraph apply even though a trade or cash discount is allowed in some form other than a direct reduction in sale price. Accordingly, allowances (no matter how designated) which are determined to have the same effect as trade or cash discounts shall be subject to such subdivision. For example, in a particular case freight absorption and special services to customers may in effect constitute trade or cash discounts. Further, interlocking sale and purchase arrangements may in effect constitute trade or cash discounts in instances in which a miner sells his mineral product to a vendee at an excessive price, in return for an agreement to purchase the vendee's product at a price which is also excessive. The dollar amount of an allowance having the same effect as a trade or cash discount shall be determined in light of all the facts and circumstances; and shall include an appropriate share of the taxpayer's overhead and profit in instances which a service is rendered by the taxpayer or his employees. For example, in instances in which gross income from mining is computed under paragraph (d)(1) of this section, the dollar amount attributable to services performed by the taxpayer or his employees shall include a proportionate share of the taxpayer's overhead and profit.

(2) Purchased transportation to the customer. (i) A taxpayer who computes gross income from mining under the provisions of paragraph (c) of this section and who sells his ore or mineral after the application of only mining processes but after nonmining transportation shall use as the representative market or field price (as described in paragraph (c) of this section) his delivered price (if otherwise representative) reduced by costs paid or incurred by him for purchased transportation to the customer as defined in subdivision (iii) of this subparagraph. If the transportation by the taxpayer is not purchased transportation to the customer, and if other producers in the taxpayer's marketing area sell significant quantities of the ore or mineral of like kind and grade after the application of only mining processes but after purchased transportation to the customer (as defined in subdivision (iii) of this subparagraph), the delivered price at which the ore or mineral is sold by such other producers (if otherwise representative) re-

duced by the costs of purchased transportation to the customer paid or incurred by such producers shall be used by the taxpayer as the representative market or field price for his ore or mineral. When applying the preceding sentence, appropriate adjustments shall be made to take into account differences in mode of transportation and distance. For purposes of this subdivision, any delivered price shall be adjusted as provided in subparagraph (1) of this paragraph.

(ii) In the case of a taxpayer computing gross income from mining under the provisions of paragraph (d)(1) of this section, the cost of purchased transportation to the customer (as defined in subdivision (iii) of this subparagraph) shall be excluded from the taxpayer's gross sales of his first marketable product or group of products (after any adjustments required by subparagraph (1) of this paragraph) and from the denominator of the proportionate profits fraction, without attributing profits to the cost of such transportation. Similar transportation cost adjustments may be made, if appropriate, in the case of methods of computation which are approved under paragraph (d)(2) of this section and which are based on the taxpayer's costs. For the treatment of costs and profits attributable to transportation which does not meet the requirements of subdivision (iii) of this subparagraph, see paragraph (d)(4)(i) of this section.

(iii) For purposes of this section, the term "purchased transportation to the customer" means, in general, nonmining transportation from the taxpayer's mine or plant to the customer—

(a) Which is performed in conveyances owned or leased by persons other than the taxpayer, rather than in conveyances owned or leased by the taxpayer;

(b) Which is performed solely to deliver the taxpayer's minerals or mineral products to the customer, rather than to transport such minerals or products for packaging or other additional processing by the taxpayer (other than incidental storage or handling); and

(c) Which is charged to the customer in such a way that the taxpayer ordinarily does not earn any profit with respect to such transportation.

For purposes of the preceding sentence, transportation which is performed by a person controlling or controlled by the taxpayer (within the meaning of paragraph (a)(3) of § 1.482-1) shall be deemed to have been performed in conveyances owned or leased by the taxpayer unless it is established by the taxpayer that the price charged by the controlling or controlled person for such transportation constitutes an arm's-length charge (under the standard described in paragraph (b)(1) of § 1.482-1). The term "purchased transportation to the customer" includes transportation to a warehouse, terminal, or distribution facility owned or operated by the taxpayer, provided that such transportation is performed under the conditions described in the first sentence of this subdivision. The taxpayer must demonstrate the nonprofit character of the transportation services, as described in (c) of this subdivision, in light of all the facts and circumstances. It shall be presumed that the requirements set forth in either (a) or (c) of this subdivision (relating, respectively, to conveyance ownership and profits) are not satisfied if the taxpayer requires customers to purchase minerals or mineral products only on a delivered basis, by failing to offer such minerals or products for sale on the basis of a price f.o.b. the taxpayer's mine or plant, or by other means. In the case of taxpayers computing gross income from mining under the provisions of paragraph (d) of this section, the term "purchased transportation to the customer" refers to transportation which conforms with the other requirements of this subdivision and which is performed to transport the taxpayer's first marketable product or group of products (as defined in paragraph (d)(1)(iv) of this section) rather than to transport minerals or mineral products which do not yet constitute the taxpayer's first marketable product or group of products.

(iv) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). A is engaged in the mining of an ore of mineral M and in the production and sale of M concentrate. A retains a portion of his concentrate for use in his own nonmining operations. During 1968, A sold 100,000 tons of M concentrate of ore mined and processed by him. Such sales constituted a significant portion of his total production. 80,000 tons of such concentrate were sold by A on the basis of a representative price (after adjustments required by subparagraph (1) of this paragraph) of $30 per ton f.o.b. mine or plant. The remaining 20,000 tons were sold by A, both directly and through terminals, on the basis of a delivered price (after adjustments required by subparagraph (1) of this paragraph) at City X of $40 per ton. The delivered price included the $15 per ton cost of purchased transportation from the mine or plant to customers in City X. The representative market or field price of the concentrate sold by A on the basis of a delivered price is $25 per ton, determined by subtracting the cost of the purchased transportation to the customer ($15 per ton) from the delivered price for the concentrate ($40 per ton). Accordingly, A's gross income from mining with respect to the 20,000 tons of M concentrate sold on a delivered basis is $500,000. The representative market or field price for the concentrate retained by A and used in his own nonmining operations may be computed by reference to the weighted average price for both A's f.o.b. mine and A's delivered sales of concentrate, with the delivered sales prices reduced in the manner described

above. On this basis, the representative market or field price for the retained concentrate is $29 per ton.

Example (2). B is engaged in the mining of an ore of mineral N and in the production of its concentrate. B retains all but an insignificant amount of his concentrate for use in his own nonmining operations. Other producers in B's marketing area sell significant amounts of N concentrate of like kind and grade, both on an f.o.b. mine or plant basis and on a delivered basis. In this case, the prices for both the f.o.b. and the delivered sales made by other producers (after any adjustments required by subparagraph (1) of this paragraph), with the delivered prices reduced by the cost of purchased transportation to the customer, shall, if such prices are otherwise representative, be taken into account when establishing the representative market or field price for the N concentrate produced and used by B.

(f) Definition of mining—(1) In general. The term "mining" includes only—

(i) The extraction of ores or minerals from the ground;

(ii) Mining processes, as described in subparagraphs (2) through (5) of this paragraph; and

(iii) So much of the transportation (whether or not by common carrier) of ores or minerals from the point of extraction of the ores or minerals from the ground to the plants or mills in which the processes referred to in subdivision (ii) of this subparagraph are applied thereto as is not in excess of 50 miles, and, if the Commissioner finds that both the physical and other requirements are such that the ores or minerals must be transported a greater distance to such plants or mills, the transportation over such greater distance as the Commissioner authorizes. See paragraph (h) of this section for rules relating to the filing of applications to treat as mining any transportation in excess of 50 miles.

(2) Definition of mining processes. (i) As used in subparagraph (1)(ii) of this paragraph, the term "mining processes" means, for taxable years beginning before January 1, 1961, the ordinary treatment processes normally applied by mine owners or operators in order to obtain the commercially marketable mineral product or products, including the following processes (and the processes necessary or incidental thereto), and, for taxable years beginning after December 31, 1960, means the following processes (and the processes necessary or incidental thereto):

(a) In the case of coal—cleaning, breaking, sizing, dust allaying, treating to prevent freezing, and loading for shipment;

(b) In the case of sulfur recovered by the Frasch process—cleaning, pumping to vats, cooling, breaking, and loading for shipment;

(c) In the case of iron ore, bauxite, ball and sagger clay, rock asphalt, and ores or minerals which are customarily sold in the form of a crude mineral product (as defined in subparagraph (3)(iv) of this paragraph)—

(1) Where applied for the purpose of bringing to shipping grade and form (as defined in paragraph (f)(3)(iii) of this section)—sorting, concentrating, sintering, and substantially equivalent processes, and

(2) Loading for shipment.

(d) In the case of lead, zinc, copper, gold, silver, uranium, or fluorspar ores, potash, and ores or minerals which are not customarily sold in the form of the crude mineral product—crushing, grinding, and beneficiation by concentration (gravity, flotation, amalgamation, electrostatic, or magnetic), cyanidation, leaching, crystallization, precipitation (but not including electrolytic deposition, roasting, thermal or electric smelting, or refining), or by substantially equivalent processes or combination of processes used in the separation or extraction of the product or products from the ore or the mineral or minerals from other material from the mine or other natural deposit; and

(e) In the case of the following ores or minerals—

(1) The furnacing of quicksilver ores,

(2) The pulverization of talc,

(3) The burning of magnesite, and

(4) The sintering and nodulizing of phosphate rock.

(ii) For taxable years beginning after December 31, 1960, the term "mining processes" also includes:

(a) In the case of calcium carbonates and other minerals when used in making cement—all processes (other than preheating the kiln feed) applied prior to the introduction of the kiln feed into the kiln, but not including any subsequent process; and

(b) In the case of clay to which section 613(b)(5)(B) applies—crushing, grinding, and separating the clay from waste, but not including any subsequent process.

(iii) A process is "necessary" to another related process if it is essential to the performance of the other process. For example, if the concentrating of low-grade iron ores to bring to shipping grade and form cannot be effectively accomplished with-

out fine pulverization, such pulverization may be treated as a process which is "necessary" to the concentration process. Accordingly, because concentration is a mining process, such pulverization is also a mining process. Furthermore, if mining processes cannot be effectively applied to a mineral without storage of the mineral while awaiting the application of such processes, such storage may be treated as a process which is "necessary" to the accomplishment of such mining processes. A process is "incidental" to another related process if the cost thereof is insubstantial in relation to the cost of the other process or if the process is merely the coincidental result of the application of the other process. For example, the use of thawing equipment to unload frozen ore cars at concentration plants will be considered incidental to concentration, where the cost of using such equipment is insubstantial in relation to the cost of the concentration process. Further, where crushing of a crude mineral is treated as a mining process, the production of fines as a by-product is ordinarily the coincidental result of the application of a mining process. If a taxpayer demonstrates that a particular process is necessary or incidental solely to a process named as a mining process in section 613(c)(4) or this paragraph, the necessary or incidental process will also be considered a mining process.

(iv) The term "mining" does not include purchasing minerals from another. Accordingly, the processes listed in this paragraph shall be considered as mining processes only to the extent that they are applied by a mine owner or operator to an ore or mineral in respect of which he is entitled to a deduction for depletion under section 611. The application of these processes to purchased ores, minerals, or materials does not constitute mining.

(3) Processes recognized as mining for ores or minerals covered by section 613(c)(4)(C). (i) As used in section 613(c)(4)(C) and subparagraph (2)(i)(c) of this paragraph, the terms "sorting" and "concentrating" mean the process of eliminating waste, separating the valuable mineral from the valueless, or separating two or more valuable minerals or ores. Examples of sorting and concentrating processes are hand or mechanical sorting, magnetic separation, gravity concentration, jigging, the use of shaking or concentrating tables, the use of spiral concentrators, the use of sluices or sluice boxes, sink-and-float processes, and floatation processes such as bubble, skin, and froth flotation. Under section 613(c)(4)(C), concentration will be considered a mining process only where it is applied to bring an ore or mineral to shipping grade and form.

(ii) As used in section 613(c)(4)(C) and subparagraph (2)(i)(c) of this paragraph, the term "sintering" means the agglomeration of fine particles by heating to a temperature at which incipient, but not complete, fusion occurs. Sintering will be considered a mining process only where it is applied to an ore or mineral, or a concentrate of an ore or mineral, as an auxiliary process necessary to bring the ore or mineral to shipping grade and form. A thermal action which is applied in the manufacture of a finished product will not be considered to be a mining process, even though such thermal action may cause the agglomeration of fine particles by incipient fusion, and even though such action does not cause a chemical change in the agglomerated particles. For example, the sintering of finely ground iron ore concentrate prior to shipment from the concentration plant for the purpose of preventing the risk of loss of the finely divided particles is considered a mining process. On the other hand, for example, a heating process applied to expand or harden clay, shale, perlite, vermiculite, or other materials in the course of the manufacture of lightweight aggregate or other building materials is not considered to be a mining process.

(iii) As used in section 613(c)(4)(C) and this section, to "bring to shipping grade and form" means to bring (by the application of mining processes at the mine or concentration plant) the quality or size of an ore or mineral to the initial condition at which a significant portion thereof customarily is shipped by ordinary miners for sale or for use in a manufacturing process. The determination as to when an ore or mineral reaches shipping grade and form shall be made on the basis of U.S. nationwide mining practice, except that, in the case of a mineral industry in which the U.S. practice is shown to be unrepresentative of the mining practices of U.S. taxpayers in such industry, the determination shall be made in light of worldwide mining practice by U.S. taxpayers in such industry. A process will not be recognized as a process applied to bring a mineral to shipping grade and form if the process is applied following shipment to a facility at which processes described in paragraph (g) of this section are applied, or if such process (wherever applied) beneficiates the ore or mineral to the degree that such process constitutes smelting or refining, or any other nonmining process within the meaning of paragraph (g) of this section.

(iv) An ore or mineral is "customarily sold in the form of a crude mineral product," within the

meaning of section 613(c)(4)(C), if a significant portion of the production thereof is sold or used in a nonmining process prior to the alteration of its inherent mineral content by some form of beneficiation, concentration, or ore dressing. An ore or mineral does not lose its classification as a crude mineral product by reason of the fact that, before sale or use in a nonmining process, the ore or mineral may be crushed or subjected to other processes which do not alter its inherent mineral content. Whether the portion of production sold or used in the form of a crude mineral product is a significant portion of the total production of an ore or mineral is a question of fact, to be determined by reference to the U.S. nationwide pattern of sales and uses for such ore or mineral, except that, in the case of a mineral industry in which the U.S. pattern of sales and uses is shown to be unrepresentative of the pattern of sales and uses of U.S. taxpayers in such industry, the determination shall be made in light of the worldwide pattern of sales and uses by U.S. taxpayers in such industry.

(4) Type of processes recognized as mining for ores or minerals covered by section 613(c)(4)(D). Cyanidation, leaching, crystallization, and precipitation, which are listed in section 613(c)(4)(D) as treatment processes considered as mining, and the processes (or combination of processes) which are substantially equivalent thereto, will be recognized as mining only to the extent that they are applied to the taxpayer's ore or mineral for the purpose of separation or extraction of the valuable mineral product or products from the ore, or for the purpose of separation or extraction of the mineral or minerals from other material extracted from the mine or other natural deposit. A process, no matter how denominated, will not be recognized as mining if the process beneficiates the ore or mineral to the degree that such process, in effect, constitutes smelting, refining, or any other nonmining process within the meaning of paragraph (g) of this section. As used in section 613(c)(4)(D) and subparagraph (2)(i)(d) of this paragraph, the term "concentration" has the meaning set forth in the first two sentences of subparagraph (3)(i) of this paragraph.

(g) Nonmining processes—(1) General rule. Unless they are otherwise provided for in paragraph (f) of this section as mining processes (or are necessary or incidental to processes listed therein), the following processes are not considered to be mining processes—electrolytic deposition, roasting, calcining, thermal or electric smelting, refining, polishing, fine pulverization, blending with other materials, treatment effecting a chemical change, thermal action, and molding or shaping. See subparagraph (6) of this paragraph for definitions of certain of these terms.

(2) Necessary or incidental processes; sequence. (i) A process (even though otherwise nominally specified as a mining process in section 613(c) or this section) shall not be considered as mining if it functions in any significant degree as a necessary or incidental part of such nonmining processes as refining, smelting, roasting, manufacturing, or packaging, or any other nonmining activity. For example, the crushing and grinding or the loading for shipment of products which have been molded, shaped, or fired shall not be considered as mining. See paragraph (f)(2)(iii) of this section for the definitions of the terms "necessary" and "incidental".

(ii) Ordinarily, a process applied subsequent to a nonmining process shall also be considered to be a nonmining process. However, exceptions to this rule shall be made in those instances in which the rule would discriminate between similarly situated producers of the same mineral. For example, roasting is specifically designated in subdivision (i) of this subparagraph as a nonmining process, but in the case of minerals referred to in section 613(c)(4)(C) sintering is recognized as a mining process. However, if certain impurities in an ore can only be removed by roasting in order to bring it to the same shipping grade and form as a competitive sintered ore of the same kind which requires no roasting, the subsequent sintering of the roasted ore will be treated as a mining process, although the roasting of the ore is a nonmining process and will be treated as such. The test of nondiscrimination shall be applied by reference to the U.S. nationwide pattern of production in the particular mineral industry, except that, in the case of a mineral industry in which the U.S. pattern of production is shown to be unrepresentative of the pattern of production of U.S. taxpayers in such industry, the determination shall be made in light of the worldwide pattern of production by U.S. taxpayers in such industry. In addition, exceptions to the rule set forth in the first sentence of this subdivision shall be made in cases in which a nonmining process is incidental to a process specified as mining. See paragraph (f)(2)(iii) of this section for the definition of the term "incidental." For example, the sprinkling of coal with dots of paper to identify the coal for trade name purposes prior to loading for shipment shall not prevent the loading for shipment from being considered as mining.

(3) **Transportation for the purpose of marketing or distribution; storage.** Transportation the primary purpose of which is marketing, distribution, or delivery for the application of only nonmining processes shall not be considered as mining. Nor shall transportation be considered as mining merely because, during the course of such transportation, some extraneous matter is removed from the ore or mineral by the operation of forces of nature, such as evaporation, drainage, or gravity flow. Similarly, storage or warehousing of manufactured products shall not be considered as mining. The preceding sentence shall apply even though, during the course of such storage or warehousing, some extraneous matter is removed from the ore or mineral by the operation of forces of nature, such as evaporation, drainage, or gravity flow.

(h) **Application to treat, as mining, transportation in excess of 50 miles.** If a taxpayer desires to include in the computation of his gross income from mining transportation in excess of 50 miles from the point of extraction of the minerals from the ground, he shall file an original and one copy of an application for the inclusion of such greater distance with the Commissioner of Internal Revenue, Washington, D.C. 20224. The application must include a statement setting forth in detail the facts concerning the physical and other requirements which prevented the construction and operation of the plant (in which mining processes, as defined in paragraph (f) of this section, are applied) at a place nearer to the point of extraction from the ground. These facts must be sufficient to apprise the Commissioner of the exact basis of the application. If the taxpayer's return is filed prior to receipt of notice of the Commissioner's action upon the application, a copy of such application shall be attached to the return. If, after an application is approved by the Commissioner, there is a material change in any of the facts relied upon in such application, a new application must be submitted by the taxpayer.

(i) **Extraction from waste or residue.** "Extraction of ores or minerals from the ground" means not only the extraction of ores or minerals from a deposit, but also the extraction by mine owners or operators of ores or minerals from waste or residue of their prior mining. The preceding sentence does not apply to any such extraction of ores or minerals by the purchaser of such waste or residue or the purchaser of the rights to extract ores or minerals from such waste or residue. The term "purchaser" does not apply to any person who acquires a mineral property, including such waste or residue, in a tax-free exchange, such as a corporate reorganization, from a person who was entitled to a depletion allowance upon ores or minerals produced from such waste or residue, or from a person who would have been entitled to such depletion allowance had section 613(c)(3) been in effect at the time of the transfer. The term "purchaser" also does not apply to a lessee who has renewed a mineral lease if the lessee was entitled to a depletion allowance (or would have been so entitled had section 613(c)(3) been in effect at the time of the renewal) upon ores or minerals produced from such waste or residue before renewal of the lease. It is not necessary, for purposes of the preceding sentence, that the mineral lease contain an option for renewal. The term "purchaser" does include a person who acquires such waste or residue in a taxable transaction, even though such waste or residue is acquired merely as an incidental part of the entire mineral enterprise. It is immaterial whether the waste or residue results from the process of extraction from the ground or from application of mining processes, as defined in paragraph (f) of this section. However, extraction of ores or minerals from waste or residue which results from processes which are not allowable as mining processes is not treated as mining. For special rules with respect to certain corporate acquisitions referred to in section 381(a), see section 381(c)(18) and the regulations thereunder.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6965, 33 FR 10692, July 26, 1968]

§ 1.613–4 Gross income from the property in the case of minerals other than oil and gas.

(a) **In general.** The rules contained in this section are applicable to the determination of gross income from the property in the case of minerals other than oil and gas and the rules contained in § 1.613–3 are not applicable to such determination, notwithstanding provisions to the contrary in § 1.613–3. The term "gross income from the property," as used in section 613(c)(1), means, in the case of a mineral property other than an oil or gas property, gross income from mining. "Gross income from mining" is that amount of income which is attributable to the extraction of the ores or minerals from the ground and the application of mining processes, including mining transportation. For the purpose of this section, "ordinary treatment processes" (applicable to the taxable years beginning before January 1, 1961) and "treatment processes considered as mining" (applicable to the taxable years beginning after December 31, 1960) will be referred to as "mining processes." Processes, including packaging and transportation,

which do not qualify as mining will be referred to as "nonmining processes." Also for the purpose of this section, transportation which qualifies as "mining" will be referred to as "mining transportation" and transportation which does not qualify as "mining" will be referred to as "nonmining transportation." See paragraph (f) of this section for the definition of the term "mining" and paragraph (g) of this section for rules relating to nonmining processes.

(b) Sales prior to the application of nonmining processes including nonmining transportation. **(1)** Subject to the adjustments required by paragraph (e)(1) of this section, gross income from mining means (except as provided in subparagraph (2) of this paragraph) the actual amount for which the ore or mineral is sold if the taxpayer sells the ore or mineral—

(i) As it emerges from the mine, prior to the application of any process other than a mining process or any transportation, or

(ii) After application of only mining processes, including mining transportation, and before any nonmining transportation.

If the taxpayer sells his ore or mineral in more than one form, and if only mining processes are applied to the ore or mineral, gross income from mining is the actual amount for which the various forms of the ore or mineral are sold, after any adjustments required by paragraph (e)(1) of this section. For example, if, at his mine or quarry, a taxpayer sells several sizes of crushed gypsum and also sells gypsum fines produced as an incidental by-product of his crushing operations, without applying any nonmining processes, gross income from mining will ordinarily be the total amount for which such crushed gypsum and fines are actually sold. See paragraphs (f) and (g) of this section for provisions defining mining and nonmining processes for various minerals.

(2) In the case of sales between members of a controlled group (including sales as to which the district director exercises his authority under section 482 and the regulations thereunder), the prices for such sales (which shall be deemed to be the actual amount for which the ore or mineral is sold) shall be determined, if possible, by use of the representative market or field price method, as described in paragraph (c) of this section; otherwise such prices shall be determined by the appropriate pricing method as provided in paragraph (d)(1) of this section. For the definitions of the terms "controlled" and "group", see paragraph (j)(1) and (2) of this section.

(c) Cases where a representative market or field price for the taxpayer's ore or mineral can be ascertained—(1) General rule. If the taxpayer processes the ore or mineral before sale by the application of nonmining processes (including nonmining transportation), or uses it in his operations, gross income from mining shall be computed by use of the representative market or field price of an ore or mineral of like kind and grade as the taxpayer's ore or mineral after the application of the mining processes actually applied (if any), including mining transportation (if any), and before any nonmining transportation, subject to any adjustments required by paragraph (e)(1) of this section. See paragraph (e)(2)(i) of this section for certain other situations in which this paragraph shall apply. The objective in computing gross income from mining by the representative market or field price method is to ascertain, on the basis of an analysis of actual competitive sales by the taxpayer or others, the dollar figure or amount which most nearly represents the approximate price at which the taxpayer, in light of market conditions, could have sold his ores or minerals if, prior to the application of nonmining processes, the taxpayer had sold the quantities and types of ores and minerals to which he applied nonmining processes. If it is possible to determine a market or field price under the provisions of this paragraph, and if that price is determined to be representative, the taxpayer's gross income from mining shall be determined on the basis of that price and not under the provisions of paragraph (d) of this section. The taxpayer's own actual sales prices for ores or minerals of like kind and grade shall be taken into account when establishing market or field prices, provided that those sales are determined to be representative.

(2) Criteria for determining whether an ore or mineral is of like kind and grade as the taxpayer's ore or mineral. An ore or mineral will be considered to be of like kind and grade as the taxpayer's ore or mineral if, in common commercial practice, it is sufficiently similar in chemical, mineralogical, or physical characteristics to the taxpayer's ore or mineral that it is used, or is commercially suitable for use, for essentially the same purposes as the uses to which the taxpayer's ore or mineral is put. Whether an ore or mineral is of like kind and grade as the taxpayer's ore or mineral will generally be determined by reference to industrial or commercial specifications and by consideration of chemical and physical data relating to the minerals and deposits in question. The fact that the taxpayer applies slightly different size

reduction processes, or the fact that the taxpayer uses slightly different beneficiation processes, or the fact that the taxpayer sells his ore or mineral for different purposes, will not, in itself, prevent another person's ore or mineral from being considered to be of like kind and grade as the taxpayer's ore or mineral. On the other hand, the fact that the taxpayer's ore or mineral is suitable for the same general commercial use as another person's ore or mineral will not cause the two ores or minerals to be considered to be of like kind and grade if the desirable natural constituents of the two ores or minerals are markedly different substances. For example, anthracite coal will not be considered to be of like kind as bituminous coal merely because both types of coal can be used as fuel. Similarly, bituminous coal which does not possess coking qualities will not be considered to be of like grade as bituminous coking coal. However, in the case of a taxpayer who mines and uses his bituminous coal in the production of coke, all bituminous coals in the same marketing area will be considered to be of like kind, and all such bituminous coals having the same or similar coking quality suitable for commercial use by coke producers will be considered to be of like grade as the coal mined and used by the taxpayer.

Fine distinctions between various grades of minerals are to be avoided unless those distinctions are clearly shown to have genuine commercial significance.

(3) **Factors to be considered in determining the representative market or field price for the taxpayer's ore or mineral.** In determining the representative market or field price for the taxpayer's ore or mineral, consideration shall be given only to prices of ores or minerals of like kind and grade as the taxpayer's ore or mineral and with which, under commercially accepted standards, the taxpayer's ore or mineral would be considered to be in competition if it were sold under the conditions described in paragraph (b)(1) of this section. A weighted average of the competitive selling prices of ores or minerals of like kind and grade as the taxpayer's, beneficiated only by mining processes, if any, in the relevant markets, although not determinative of the representative market or field price, is an important factor in the determination of that price. The taxpayer's own competitive sales prices for minerals which have been subjected only to mining processes shall be taken into account in computing such a weighted average. For purposes of the preceding sentence, if the district director has exercised his authority under section 482 and the regulations thereunder and has determined the appropriate price with respect to specific sales transactions by the taxpayer, that price shall be deemed to be a competitive sales price for those transactions. Sales or purchases, including the taxpayer's, of ores or minerals of like kind and grade as the taxpayer's, will be taken into consideration in determining the representative market or field price for the taxpayer's ore or mineral only if those sales or purchases are the result of competitive transactions. The identity of the taxpayer's relevant markets (including their accessibility to the taxpayer), and the representative market or field price within those markets, are necessarily factual determinations to be made on the basis of the facts and circumstances of each individual case. For the purpose of determining the representative market or field price for the taxpayer's ore or mineral, exceptional, insignificant, unusual, tie-in, or accommodation sales shall be disregarded. Except as provided above, representative market or field prices shall not be determined by reference to prices established between members of a controlled group. See paragraph (j) of this section for the definitions of the terms "controlled" and "group".

(4) **Use of prices of mineral of different grade.** If there is no representative market or field price for a mineral of like kind and grade as the taxpayer's, representative market or field prices for an ore or mineral which is of like kind but which is not of like grade as his ore or mineral may be used, with appropriate adjustments for differences in mineral content. Representative market or field prices of an ore or mineral of like kind but not of like grade may be used only if such adjustments are readily ascertainable. For example, it may be appropriate in a particular case to establish the representative market or field price for an ore having 50 percent X mineral content by reference to the representative market or field price for the same kind of ore having 60 percent X mineral content with an appropriate adjustment for the differences in the valuable mineral content of the two ores, any differences in processing costs attributable to impurities, and any other relevant factors.

(5) **Information to be furnished by a taxpayer computing gross income from mining by use of a representative market or field price.** A taxpayer who computes his gross income from mining pursuant to the provisions of this paragraph shall attach to his return a summary statement indicating the prices used by him in computing gross income from mining under this paragraph and the source of his information as to those prices, and the relevant supporting data shall be assembled,

segregated, and made readily available at the taxpayer's principal place of business.

(6) Limitation on gross income from mining computed under the provisions of this paragraph. It shall be presumed that a price is not a representative market or field price for the taxpayer's ore or mineral if the sum of such price plus the total of all costs of the nonmining processes (including nonmining transportation) which the taxpayer applies to his ore or mineral regularly exceeds the taxpayer's actual sales price of his product. For example, if on a regular basis the total of all costs of nonmining processes applied by the taxpayer to coal for the purpose of making coke is $12 per ton, and if the taxpayer's actual sale price for such coke is $18 per ton, a price of $7 per ton would not be a representative market or field price for the taxpayer's coal which is used for making coke. In order to rebut the presumption set forth in the first sentence of this subparagraph, it must be established that the loss on nonmining operations is directly attributable to unusual, peculiar and nonrecurring factors rather than to the use of a market or field price which is not representative. For example, the first sentence of this subparagraph shall not apply if the taxpayer establishes in an appropriate case that the loss on nonmining operations is directly attributable to an event such as a fire, flood, explosion, earthquake, or strike.

(d) Cases where a representative market or field price cannot be ascertained—(1) General rule. (i) If it is impossible to determine a representative market or field price as described in paragraph (c) of this section then, except as provided in subdivision (ii) of this subparagraph, gross income from mining shall be computed by use of the proportionate profits method as set forth in subparagraph (4) of this paragraph. A method of computing gross income from mining under the provisions of this paragraph shall not be deemed to be a method of accounting for purposes of paragraph (e) of § 1.446-1.

(ii)(a) The Office of the Assistant Commissioner (Technical) may determine that a method of computation is more appropriate than the proportionate profits method or the method being used by the taxpayer. The taxpayer may request such a determination (see (d) of this subdivision (ii)). If the taxpayer is using a method of computation which has been determined by the Office of Assistant Commissioner (Technical) to be more appropriate than the proportionate profits method, such method shall continue to be used until it is determined by the Office of Assistant Commissioner (Technical) that either the proportionate profits method or another method is more appropriate.

(b) The proportionate profits method is more appropriate than the method being used under (a) if, under the particular facts and circumstances, the method being used under (a) consistently fails to clearly reflect gross income from mining and the proportionate profits method more clearly reflects gross income from mining for the taxable year.

(c) An alternative method (a method other than the method being used under (a) (if any) and the proportionate profits method) is more appropriate than the method being used under (a) (if any) and the proportionate profits method if, under the particular facts and circumstances, the latter methods consistently fail to clearly reflect gross income from mining, and the alternative method being considered more clearly reflects gross income from mining on a consistent basis than the method being used under (a) (if any) and the proportionate profits method. When determining whether a method of computation clearly reflects gross income from mining, it is relevant to compare the gross income from mining produced by such method with the gross income from mining, on an equivalent amount of production, which results from the computation methods used by competitors. When determining the acceptability of proposed alternative methods, primary consideration will be given to computation methods based upon representative charges for ores, minerals, products, or services. See paragraph (c) of this section for principles determining the representative character of a charge.

(d) Application for permission to compute gross income from mining by use of an alternative method shall be made by submitting a request to the Commissioner of Internal Revenue, Attention: Assistant Commissioner (Technical), Washington, D.C. 20224.

(e) Among the alternative methods of computation to which consideration will be given, provided that the requirements of this subdivision (ii) are met, are the methods listed in subparagraphs (5), (6), and (7) of this paragraph. The order in which these methods are listed is not significant, and the listing of these methods does not preclude a request to make use of a method which is not listed.

(iii) Approval and continued use of any method of computation under this paragraph depends upon all the facts and circumstances in each case, and shall be subject to such terms and conditions as may be necessary in the opinion of the Commis-

sioner to reflect clearly the gross income from mining. Accordingly, the use of such a method for any taxable year shall be subject to review and change.

(2) **Costs to be used in computing gross income from mining by use of methods based on the taxpayer's costs.** In determining the taxpayer's gross income from mining by use of methods based on the taxpayer's costs, only costs actually paid or incurred shall be taken into consideration. In general, if the taxpayer has consistently employed a reasonable method of determining the costs of the various individual phases of his mining and nonmining processes (such as extraction, loading for shipment, calcining, packaging, etc.), such method shall not be disturbed. The amount of any particular item to be taken into account shall, for taxable years beginning after November 30, 1968, be the amount used in determining the taxpayer's income for tax purposes. For example, the depreciation lives, methods, and records used for tax purposes, if different from those used for book purposes, shall be the basis for determining the amount of depreciation to be used. However, a taxpayer may continue to use a reasonable method for determining those costs on the basis of the amounts computed for cost control or similar financial or accounting books and records if that method has been used consistently and is applied to the determination of all those costs.

(3) **Treatment of particular items in computing gross income from the mining by use of methods based on the taxpayer's costs.** (i) Except as specifically provided elsewhere in this section, when determining gross income from mining by use of methods based on the taxpayer's costs, the costs attributable to mining transportation shall be treated as mining costs, and the costs attributable to nonmining transportation shall be treated as nonmining costs. Accordingly, except as specifically provided elsewhere in this section, all profits attributable to mining transportation shall be treated as mining profits, and all profits attributable to nonmining transportation shall be treated as nonmining profits. For this purpose, mining transportation means so much of the transportation of ores or minerals (whether or not by common carrier) from the point of extraction from the ground to plants or mills in which other mining processes are applied thereto as is not in excess of 50 miles or, if the taxpayer files an application pursuant to paragraph (h) of this section and the Commissioner finds that both the physical and other requirements are such that the ores or minerals must be transported a greater distance to such plants or mills, the transportation over the greater distance. Further, for this purpose, nonmining transportation includes the transportation (whether or not by common carrier) of ores, minerals, or the products produced therefrom, from the point of extraction from the ground to nonmining facilities, or from a mining facility to a nonmining facility, or from one nonmining facility to another, or from a nonmining facility to the customers who purchase the taxpayer's first marketable product or group of products. See paragraph (e)(2) of this section for provisions relating to purchased transportation to the customer and paragraph (g)(3) of this section for provisions relating to transportation the primary purpose of which is marketing or distribution. In the absence of other methods which clearly reflect the costs of the various phases of transportation, the cost attributable to nonmining transportation shall be an amount which is in the same ratio to the costs incurred for the total transportation as the distance of the nonmining transportation is to the distance of the total transportation. As an example, where the plants or mills in which mining processes are applied to ores or minerals are in excess of 50 miles from the point of extraction from the ground (or in excess of a greater distance approved by the Commissioner), the costs incurred for transportation to those plants or mills in excess of 50 miles (or of that greater distance) shall be treated as nonmining costs in determining gross income from mining. Accordingly, all profits attributable to that excess transportation are treated as nonmining profits. However, except in the case of transportation performed in conveyances owned or leased by the taxpayer, the preceding sentence shall apply only to taxable years beginning after November 30, 1968.

(ii) In determining gross income from mining by use of methods based on the taxpayer's costs, a process shall not be considered as a mining process to the extent it is applied to ores, minerals, or other materials with respect to which the taxpayer is not entitled to a deduction for depletion under section 611. The costs of such nondepletable ores, minerals, or materials; the costs of the processes (including blending, size reduction, etc.) applied thereto; and the transportation costs thereof, if any, shall be considered as nominating costs in determining gross income from mining. If a mining process is applied to an admixture of depletable and nondepletable material, the cost of the process and the cost of transportation, if any, attributable to the nondepletable material shall be considered as nonmining costs in determining gross income from mining. Accordingly, all prof-

its attributable thereto are treated as nonmining profits. In the absence of other methods which clearly reflect the cost attributable to the processing and transportation, if any, of the nondepletable admixed material, that cost shall be deemed to be that proportion of the costs which the tonnage of nondepletable material bears to the total tonnage of both depletable and nondepletable material.

(iii) In determining gross income from mining by use of methods based on the taxpayer's costs—

(a) The costs attributable to containers, bags, packages, pallets, and similar items as well as the costs of materials and labor attributable to bagging, packaging, palletizing, or similar operations shall be considered as nonmining costs.

(b) The costs attributable to the bulk loading of manufactured products shall be considered as nonmining costs.

(c) The costs attributable to the operation of warehouses or distribution terminals for manufactured products shall be considered as nonmining costs.

Accordingly, all profits attributable thereto are treated as nonmining profits.

(iv) In computing gross income from mining by the use of methods based on the taxpayer's costs, the principles set forth in paragraph (c) of § 1.613-5 shall apply when determining whether selling expenses and trade association dues are to be treated, in whole or in part, as mining costs or as nonmining costs. To the extent that selling expenses and trade association dues are treated as nonmining costs, all profits attributable thereto are treated as nonmining profits.

(v) See paragraph (e)(1) of this section for provisions excluding certain allowances from the taxpayer's gross sales and costs of his first marketable product or group of products.

(4) Proportionate profits method. (i) The objective of the "proportionate profits method" of computation is to ascertain gross income from mining by applying the principle that each dollar of the total costs paid or incurred to produce, sell, and transport the first marketable product or group of products (as defined in subdivision (iv) of this subparagraph) earns the same percentage of profit. Accordingly, in the proportionate profits method no ranking of costs is permissible which results in excluding or minimizing the effect of any costs incurred to produce, sell, and transport the first marketable product or group of products. For purposes of this subparagraph, members of a controlled group shall be treated as divisions of a single taxpayer. See paragraph (j) of this section for the definitions of the terms "controlled" and "group".

(ii) The proportionate profits method of computation is applied by multiplying the taxpayer's gross sales (actual or constructive) of his first marketable product or group of products (after making the adjustments required by paragraph (e) of this section) by a fraction whose numerator is the sum of all the costs allocable to those mining processes which are applied to produce, sell, and transport the first marketable product or group of products, and whose denominator is the total of all the mining and nonmining costs paid or incurred to produce, sell, and transport the first marketable product or group of products (after making the adjustments required by this paragraph and paragraph (e) of this section). The method as described herein is merely a restatement of the method formerly set forth in the second sentence of Regulations 118, section 39.23(m)–1 (e)(3) (1939 Code). The proportionate profits method of computation may be illustrated by the following equation:

Mining Costs $\div$ Total Costs $\times$ Gross Sales = Gross Income from Mining

(iii) Those costs which are paid or incurred by the taxpayer to produce, sell, and transport the first marketable product or group of products, and which are not directly identifiable with either a particular mining process or a particular nonmining process shall, in the absence of a specific provision of this section providing an apportionment method, be apportioned to mining and to nonmining by use of a method which is reasonable under the circumstances. One method which may be reasonable in a particular case is an allocation based on the proportion that the direct costs of mining processes and the direct costs of nonmining processes bear to each other. For example, the salary of a corporate officer engaged in overseeing all of the taxpayer's processes is an expense which may reasonably be apportioned on the basis of the ratio between the direct costs of mining and nonmining processes. On the other hand, an expense such as workmen's compensation premiums would normally be apportioned on the basis of direct labor costs. For the rule relating to selling expenses, see paragraph (c)(4) of § 1.613–5.

(iv) As used in this section, the term "first marketable product or group of products" means the product (or group of essentially the same products) produced by the taxpayer as a result of the application of nonmining processes, in the

form or condition in which such product or products are first marketed in significant quantities by the taxpayer or by others in the taxpayer's marketing area. For this purpose, bulk and packaged products are considered to be essentially the same product. Sales between members of a controlled group (as defined in paragraph (j) of this section) shall not be considered in making a determination under this subdivision. The first marketable product or group of products does not include any product which results from additional manufacturing or other nonmining processes applied to the product or products first marketed in significant quantities by the taxpayer or others in the taxpayer's marketing area. For example, if a cement manufacturer sells his own finished cement in bulk and bags and also sells concrete blocks or dry ready-mix aggregates containing additives, the finished cement, in bulk and bags, constitutes the first marketable product or group of products produced by him. Similarly, if an integrated iron ore and steel producer sells both pig iron in various sizes and rolled sheet iron or shapes, his first marketable product is the pig iron in its various sizes. Further, if an integrated clay and brick producer sells both unglazed bricks and tiles of various shapes and sizes and additionally manufactured bricks and tiles which are specially glazed, the unglazed products, both packaged and unpackaged, constitute his first marketable product or group of products.

(v)(a) As used in this subparagraph, the term "gross sales (actual or constructive)" means the total of the taxpayer's actual competitive sales to others of the first marketable product or group of products, plus the taxpayer's constructive sales of the first marketable product or group of products used or retained for use in his own subsequent operations, subject to the adjustments required by paragraph (e) of this section. See (b) of this subdivision in the case of actual sales between members of controlled groups and in the case of constructive sales. A "constructive sale" occurs when a miner-manufacturer is deemed, for percentage depletion purposes, to be selling the first marketable product or group of products to himself.

(b) In the case of sales between members of a controlled group as to which the district director has exercised his authority under section 482 and the regulations thereunder and has determined the appropriate price with respect to specific sales transactions, that price shall be deemed, for those transactions, to be the actual amount for which the first marketable product or group of products is sold for purposes of this subdivision (v). In the case of all other sales between members of a controlled group, and in the case of constructive sales, the prices for such sales shall be determined by use of the principles set forth in paragraph (c) of this section, subject to the adjustments required by paragraph (e) of this section. In the case of constructive sales, see paragraph (c)(4) of this section for rules relating to information to be furnished by the taxpayer.

(vi) The provisions of this subparagraph may be illustrated by the following examples:

Example (1)—(a) Facts. A is engaged in the mining of a mineral to which section 613 applies and in the application thereto of nonmining processes. During 1968, A incurred extraction costs of $35,000; other mining costs of $56,000; $150,000 for manufacturing costs; $46,000 for other nonmining processes; and $14,000 for the company president's salary and similar costs resulting from both nonmining and mining processes. During that year, A produced and sold 70,000 tons of his first marketable product for an actual gross sales price of $420,000, after the adjustments required by paragraph (e) of this section. A representative market or field price for A's mineral before the application of nonmining processes cannot be established.

(b) Computation. (1) The computation of A's gross income from mining by use of the proportionate profits method involves two steps. The first step is to apportion A's costs to mining and to nonmining. A apportions the company president's salary and similar costs to mining and to nonmining in the manner described in the second and third sentences of subdivision (iii) of this subparagraph, and apportions his remaining costs as follows:

Cost	Mining	Nonmining	Total
Extraction	$35,000	....	$35,000
Other mining processes	56,000	....	56,000
Manufacturing	....	$150,000	150,000
Other nonmining processes	....	46,000	46,000
Subtotal	91,000	196,000	287,000
President's salary and similar costs	4,439	9,561	14,000
Total costs	95,439	205,561	301,000

(2) The second step is to apply the proportionate profits fraction so as to compute A's gross income from mining. To do this, A first computes his gross sales of his first marketable group of products, in this case $420,000. A multiplies his actual gross sales of $420,000 by the proportionate profits fraction, whose numerator consists of his total mining costs ($95,439) and whose denominator consists of his total costs ($301,000). Thus, A's gross income from mining is $133,170 (*i.e.*, 95,439/301,000ths of A's actual gross sales of $420,000).

Example (2). B, who leases a mineral property from C, is engaged in the mining of a mineral to which section 613 applies and in the application thereto of nonmining processes. Pursuant to the terms of the lease, B is required to pay C 10 cents for each ton of mineral which B mines. During 1971, B extracted 100,000 tons of mineral. He sold his first marketable product for an actual gross sales price of $225,000 after the adjustments required by paragraph (e) of this section. A representative

market or field price for B's mineral before the application of nonmining processes cannot be established. During 1971, with respect to the 100,000 tons of mineral extracted, B incurred mining costs of $50,000 and nonmining costs of $100,000, and paid $10,000 to C as C's royalty. Since the royalty payment is considered to be C's share of the gross income from mining under section 613(a), it is not considered to be either a mining cost or a nonmining cost of B. B's gross income from mining is $65,000 under the proportionate profits method, determined as follows: The $225,000 gross receipts must be multiplied by the proportionate profits fraction which is $50,000 mining costs over $150,000 total costs ($50,000 + $100,000 nonmining costs). Since the resulting $75,000 is the total gross income from mining with respect to the property, it must be allocated between B's lease interest and C's royalty interest. The $10,000 paid to C must be subtracted from the $75,000 leaving $65,000 which represents B's gross income from mining. C's gross income from mining is the royalty he received or $10,000.

(5) Representative schedule method. The "representative schedule method" is a pricing formula which uses representative finished product prices, penalties, charges and adjustments, established in arms-length transactions between unrelated parties, to determine the market or field price for a crude mineral product. The representative character of a price, penalty, charge, or adjustment shall be determined by applying the principles set forth in paragraph (c) of this section. The representative schedule method is principally intended for use in those industries in which such a schedule-type pricing method is in general use to determine the price paid to unintegrated mineral producers for their crude mineral product. For example, if unintegrated producers of copper concentrate in a particular field or market customarily sell their product at prices which are determined in accordance with a schedule-type pricing formula, consideration will be given to the determination of concentrate prices for integrated copper producers in accordance with the same pricing formula. The representative schedule method shall not be used if it is impossible to determine one or more of the elements in the representative schedule formula by reference to prices, penalties, charges, or adjustments established in representative transactions between unrelated parties. See paragraph (c) of this section for principles determining the representative character of a charge.

(6) Method using prices outside the taxpayer's market. Under the "other market method" the taxpayer uses representative market or field prices established outside his markets, provided that conditions there are substantially the same as in his markets. For example, it may be appropriate in a particular case to establish the representative market or field price for pellets containing 60 percent iron which are produced and used in market area X by reference to the representative market or field price for pellets containing 60 percent iron which are produced and sold in adjacent market area Y, provided that conditions in the two marketing areas are shown to be substantially the same.

(7) Rate of return on investment method. [Reserved]

(e) Reductions of sales price in computing gross income from mining—(1) Discounts. If a taxpayer computes gross income from mining under the provisions of paragraph (b)(1) of this section, trade discounts and, for taxable years beginning after November 30, 1968, cash discounts actually allowed by the taxpayer shall be subtracted from the sale price of the taxpayer's ore or mineral. If a taxpayer computes gross income from mining under the provisions of paragraph (c) of this section, any such discounts actually allowed (if not otherwise taken into account) by the person or persons making the sales on the basis of which the representative market or field price for the taxpayer's ore or mineral is to be determined shall be subtracted from the sale price in computing such representative market or field price. If a taxpayer computes gross income from mining under the provisions of paragraph (d) of this section, such discounts actually allowed (if not otherwise taken into account) shall be subtracted from the gross sales (actual or constructive), and shall not be considered a cost, of the first marketable product or group of products. The provisions of this subparagraph shall apply to arrangements which have the same effect as trade or cash discounts, regardless of the form of the arrangements.

(2) Purchased transportation to the customer. (i) A taxpayer who computes gross income from mining under the provisions of paragraph (c) of this section and who sells his ore or mineral after the application of only mining processes but after nonmining transportation shall use as the representative market or field price his delivered price (if otherwise representative) reduced by costs paid or incurred by him for purchased transportation to the customer as defined in subdivision (iii) of this subparagraph. If the transportation by the taxpayer is not purchased transportation to the customer, or if the taxpayer does not sell the ore or mineral until after the application of nonmining processes, and if other producers in the taxpayer's marketing area sell significant quantities of an ore or mineral of like kind and grade after the application of only mining processes but after purchased transportation to the customer, the representative delivered price at which the ore or mineral is sold by those other producers reduced by representative costs of purchased transportation to the customer

paid or incurred by those producers shall be used by the taxpayer as the representative market or field price for his ore or mineral in applying paragraph (c) of this section. Furthermore, appropriate adjustments shall be made to take into account differences in mode of transportation and distance. When applying this subdivision, the representative market or field price so computed shall not exceed the taxpayer's delivered price less his actual costs of transportation to the customer. For purposes of this subdivision, any delivered price shall be adjusted as provided in subparagraph (1) of this paragraph.

(ii) If a taxpayer computes gross income from mining under the provisions of paragraph (d) of this section, the cost of purchased transportation to the customer (as defined in subdivision (iii) of this subparagraph) shall be excluded from the gross sales of his first marketable product or group of products (after any adjustments required by subparagraph (1) of this paragraph), and from the denominator of the proportionate profits fraction, so as not to attribute profits to the cost of that transportation. Similar transportation cost adjustments may be made, if appropriate, in the case of other methods of computation which are based on the taxpayer's costs. For the treatment of costs and profits attributable to transportation which is not purchased transportation to the customer as defined in subdivision (iii) of this subparagraph, see paragraph (d)(3)(i) of this section.

(iii) For purposes of this section, the term "purchased transportation to the customer" means, in general, nonmining transportation of the taxpayer's minerals or mineral products to the customer—

(a) Which is not performed in conveyances owned or leased directly or indirectly, in whole or in part, by the taxpayer,

(b) Which is performed solely to deliver the taxpayer's minerals or mineral products to the customer, rather than to transport such minerals or products for packaging or other additional processing by the taxpayer (other than incidental storage or handling), and

(c) With respect to which the taxpayer ordinarily does not earn any profit.

For purposes of the preceding sentence, transportation which is performed by a person controlling or controlled by the taxpayer (within the meaning of paragraph (j)(1) of this section) shall be deemed to have been performed in conveyances owned or leased by the taxpayer unless it is established by the taxpayer that the price charged by the controlling or controlled person for such transportation constitutes an arm's-length charge (under the standard described in paragraph (b)(1) of § 1.482–1). The term "purchased transportation to the customer" includes transportation to a warehouse, terminal, or distribution facility owned or operated by the taxpayer, provided that such transportation is performed under the conditions described in the first sentence of this subdivision. A taxpayer will not be deemed ordinarily to earn a profit on transportation merely because charges for the transportation are included in the stated selling price, rather than being separately stated or segregated from other billing. A taxpayer will not be deemed ordinarily to earn a profit on transportation if the rates for the transportation constitute an arm's-length charge ordinarily paid by shippers of the same product in similar circumstances. If a taxpayer computes gross income from mining under the provisions of paragraph (d) of this section, the term "purchased transportation to the customer" refers to transportation which conforms to the other requirements of this subdivision and which is performed to transport the taxpayer's first marketable product or group of products (as defined in paragraph (d)(4)(iv) of this section) rather than to transport minerals or mineral products which do not yet constitute the taxpayer's first marketable product or group of products.

(iv) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). A is engaged in the mining of an ore of mineral M and in the production and sale of M concentrate. A retains a portion of his concentrate for use in his own nonmining operations. During 1968, A sold 100,000 tons of M concentrate of ore mined and processed by him, which sales constituted a significant portion of his total production. Eighty thousand tons of that concentrate were sold by A on the basis of a representative price (after adjustments required by subparagraph (1) of this paragraph) of $30 per ton f.o.b. mine or plant, resulting in gross income from mining of $2,400,000. The remaining 20,000 tons were sold by A, both directly and through terminals, on the basis of a delivered price (after adjustments required by subparagraph (1) of this paragraph) at City X of $40 per ton. The delivered price included $15 per ton cost of purchased transportation from the mine or plant to customers in City X. The representative market or field price of the concentrate sold by A on the basis of a delivered price is $25 per ton, determined by subtracting the cost of the purchased transportation to the customer ($15 per ton) from the delivered price for the concentrate ($40 per ton). Accordingly, A's gross income from mining with respect to the 20,000 tons of M concentrate sold on a delivered basis is $500,000. The representative market or field price for the concentrate retained by A and used in his own nonmining operations may be computed by reference to the weighted average price for both A's f.o.b. mine and A's delivered sales of concentrate, with the delivered sales prices reduced in the manner described above. On this basis, the representative market or field price for the retained concentrate is $29 per ton.

Example (2). B is engaged in the mining of an ore of mineral N and in the production of N concentrate. B retained all but an insignificant amount of his concentrate for use in his own nonmining operations. Other producers in B's marketing area sell significant amounts of N concentrate of like kind and grade, both on an f.o.b. mine or plant basis and on a delivered basis. In this case, the prices for both the f.o.b. and the delivered sales made by other producers (after any adjustments required by subparagraph (1) of this paragraph), after reduction of the delivered prices by the cost of purchased transportation to the customer, shall, if such prices are otherwise representative, be taken into account in establishing the representative market or field price for the N concentrate produced and used by B.

(f) Definition of mining—(1) In general. The term "mining" includes only—

(i) The extraction of ores or minerals from the ground;

(ii) Mining processes, as described in subparagraphs (2) through (6) of this paragraph; and

(iii) So much of the transportation (whether or not by common carrier) of ores or minerals from the point of extraction of the ores or minerals from the ground to the plants or mills in which the processes referred to in subdivision (ii) of this subparagraph are applied thereto as is not in excess of 50 miles, and, if the Commissioner finds that both the physical and other requirements are such that the ores or minerals must be transported a greater distance to such plants or mills, the transportation over such greater distance as the Commissioner authorizes. See paragraph (h) of this section for rules relating to the filing of applications to treat as mining any transportation in excess of 50 miles.

(2) Definition of mining processes. (i) As used in subparagraph (1)(ii) of this paragraph, the term "mining processes" means, for taxable years beginning before January 1, 1961, the ordinary treatment processes normally applied by mine owners or operators in order to obtain the commercially marketable mineral product or products, including the following processes (and the processes necessary or incidental thereto), and, for taxable years beginning after December 31, 1960, the following processes (and the processes necessary or incidental thereto):

(a) In the case of coal—cleaning, breaking, sizing, dust allaying, treating to prevent freezing, and loading for shipment;

(b) In the case of sulfur recovered by the Frasch process—cleaning, pumping to vats, cooling, breaking, and loading for shipment;

(c) In the case of iron ore, bauxite, ball and sagger clay, rock asphalt, and ores or minerals which are customarily sold in the form of a crude mineral product (as defined in subparagraph (3)(iv) of this paragraph)—

(1) Where applied for the purpose of bringing to shipping grade and form (as defined in subparagraph (3)(iii) of this paragraph)—sorting, concentrating, sintering, and substantially equivalent processes, and

(2) Loading for shipment.

(d) In the case of lead, zinc, copper, gold, silver, uranium, or fluorspar ores, potash, and ores or minerals which are not customarily sold in the form of the crude mineral product—crushing, grinding, and beneficiation by concentration (gravity, flotation, amalgamation, electrostatic, or magnetic), cyanidation, leaching, crystallization, precipitation (but not including electrolytic deposition, roasting, thermal or electric smelting, or refining), or by substantially equivalent processes or combination of processes used in the separation or extraction of the product or products from the ore or the mineral or minerals from other material from the mine or other natural deposit; and

(e) In the case of the following ores or minerals—

(1) The furnacing of quicksilver ores,

(2) The pulverization of talc,

(3) The burning of magnesite, and

(4) The sintering and nodulizing of phosphate rock.

(ii) The term "mining processes" also includes the following processes (and, except as otherwise provided in this subdivision, the processes necessary or incidental thereto):

(a) For taxable years beginning after December 31, 1960, in the case of calcium carbonates and other minerals when used in making cement—all processes (other than preheating the kiln feed) applied prior to the introduction of the kiln feed into the kiln, but not including any subsequent process;

(b) For taxable years beginning after December 31, 1960, and before November 14, 1966, in the case of clay to which former section 613(b)(5)(B) applied, and for taxable years beginning after November 13, 1966, in the case of clay to which section 613(b)(5) or (6)(B) applies—crushing, grinding, and separating the clay from waste, but not including any subsequent process;

(c) For taxable years beginning after October 9, 1969, in the case of minerals (other than sodium chloride) extracted from brines pumped from a saline perennial lake (as defined in paragraph (b) of § 1.613–2)—the extraction of such minerals from the brines, but in no case including any further processing or refining of such extracted minerals; and

(d) For taxable years beginning after December 30, 1969, in the case of oil shale (as defined in paragraph (b) of § 1.613–2)—extraction from the ground, crushing, loading into the retort, and retorting, but in no case hydrogenation, refining, or any other process subsequent to retorting.

(iii) A process is "necessary" to another related process if it is prerequisite to the performance of the other process. For example, if the concentrating of low-grade iron ores to bring to shipping grade and form cannot be effectively accomplished without fine pulverization, such pulverization shall be treated as a process which is "necessary" to the concentration process. Accordingly, because concentration is a mining process, such pulverization is also a mining process. Furthermore, if mining processes cannot be effectively applied to a mineral without storage of the mineral while awaiting the application of such processes, such storage shall be treated as a process which is "necessary" to the accomplishment of such mining processes. A process is "incidental" to another related process if the cost thereof is insubstantial in relation to the cost of the other process, or if the process is merely the coincidental result of the application of the other process. For example, the sprinkling of coal, prior to loading for shipment, with dots of paper to identify the coal for trade-name purposes will be considered incidental to the loading where the cost of that sprinkling is insubstantial in relation to the cost of the loading process. Also, where crushing of a crude mineral is treated as a mining process, the production of fines as a by-product is ordinarily the coincidental result of the application of a mining process. If a taxpayer demonstrates that, as a factual matter, a particular process is necessary or incidental to a process named as a mining process in section 613(c)(4) of this paragraph, the necessary or incidental process will also be considered a mining process.

(iv) The term "mining" does not include purchasing minerals from another. Accordingly, the processes listed in this paragraph shall be considered as mining processes only to the extent that they are applied by a mine owner or operator to an ore or mineral in respect of which he is entitled to a deduction for depletion under section 611. The application of these processes to purchased ores, minerals, or materials does not constitute mining.

(3) **Processes recognized as mining for ores or minerals covered by section 613(c)(4)(C).** (i) As used in section 613(c)(4)(C) and subparagraph (2)(i)(c) of this paragraph, the terms "sorting" and "concentrating" mean the process of eliminating substantial amounts of the impurities or foreign matter associated with the ores or minerals in their natural state, or of separating two or more valuable minerals or ores, without changing the physical or chemical identity of the ores or minerals. Examples of sorting and concentrating processes are hand or mechanical sorting, magnetic separation, gravity concentration, jigging, the use of shaking or concentrating tables, the use of spiral concentrators, the use of sluices or sluice boxes, sink-and-float processes, classifiers, hydrotators and flotation processes. Under section 613(c)(4)(C), sorting and concentration will be considered mining processes only where they are applied to bring an ore or mineral to shipping grade and form.

(ii) As used in section 613(c)(4)(C) and subparagraph (2)(i)(c) of this paragraph, the term "sintering" means the agglomeration of fine particles by heating to a temperature at which incipient, but not complete, fusion occurs. Sintering will be considered a mining process only where it is applied to an ore or mineral, or a concentrate of an ore or mineral, as an auxiliary process necessary to bring the ore or mineral to shipping form. A thermal action which is applied in the manufacture of a finished product will not be considered to be a mining process even though such thermal action may cause the agglomeration of fine particles by incipient fusion, and even though such action does not cause a chemical change in the agglomerated particles. For example, the sintering of finely ground iron ore concentrate, prior to shipment from the concentration plant, for the purpose of preventing the risk of loss of the finely divided particles during shipment is considered a mining process. On the other hand, for example, a heating process applied to expand or harden clay, shale, perlite, vermiculite, or other materials in the course of the manufacture of lightweight aggregate or other building materials is not considered to be a mining process.

(iii) As used in section 613(c)(4)(C) and this section, to "bring to shipping grade and form" means, with respect to taxable years beginning after December 31, 1960, to bring (by the application of mining processes at the mine or concentration plant) the quality or size of an ore or mineral

to the stage or stages at which the ore or mineral is shipped to customers or used in nonmining processes (as defined in paragraph (g) of this section) by the taxpayer.

(iv) An ore or mineral is "customarily sold in the form of a crude mineral product", within the meaning of section 613(c)(4)(C), if a significant portion of the production thereof is sold or used in a nonmining process prior to the alteration of its inherent mineral content by some form of beneficiation, concentration, or ore dressing. An ore or mineral does not lose its classification as a crude mineral product by reason of the fact that, before sale or use in a nonmining process, the ore or mineral may be crushed or subjected to other processes which do not alter its inherent mineral content. Whether the portion of production sold or used in the form of a crude mineral product is a significant portion of the total production of an ore or mineral is a question of fact.

(4) Type of processes recognized as mining for ores or minerals covered by section 613(c)(4)(D). Cyanidation, leaching, crystallization, and precipitation, which are listed in section 613(c)(4)(D) as treatment processes considered as mining, and the processes (or combination of processes) which are substantially equivalent thereto, will be recognized as mining only to the extent that they are applied to the taxpayer's ore or mineral for the purpose of separation or extraction of the valuable mineral product or products from the ore, or for the purpose of separation or extraction of the mineral or minerals from other material extracted from the mine or other natural deposit. A process, no matter how denominated, will not be recognized as mining if the process beneficiates the ore or mineral to the degree that such process, in effect, constitutes smelting, refining, or any other nonmining process within the meaning of paragraph (g) of this section. As used in section 613(c)(4)(D) and subparagraph (2)(i)(d) of this paragraph, the term "concentration" has the meaning set forth in the first two sentences of subparagraph (3)(i) of this paragraph.

(5) Processes recognized as mining under section 613(c)(4)(I). Under the authority granted the Secretary or his delegate in section 613(c)(4)(I), the processes which are described in subdivisions (i) through (iv) of this subparagraph, and the processes necessary or incidental thereto, are recognized as mining processes for taxable years beginning after December 31, 1960. The processes described in subdivisions (i) through (iv) of this subparagraph are in addition to the specific processes recognized as mining under section 613(c)(4). Such additional processes are:

(i) Crushing and grinding, but not fine pulverization (as defined in paragraph (g)(6)(v) of this section);

(ii) Size classification processes applied to the products of an allowable mining process;

(iii) Drying to remove free water, provided that such drying does not change the physical or chemical identity or composition of the mineral; and

(iv) Washing or cleaning the surface of mineral particles (including the washing of sand and gravel and the treatment of kaolin particles to remove surface stains), provided that such washing or cleaning does not activate or otherwise change the physical or chemical structure of the mineral particles.

(6) In the case of a process applied subsequent to a nonmining process, see paragraph (g)(2) of this section.

(g) Nonmining processes—(1) General rule. Unless they are otherwise provided for in paragraph (f) of this section as mining processes (or are necessary or incidental to processes listed therein), the following processes are not considered to be mining processes—electrolytic deposition, roasting, calcining, thermal or electric smelting, refining, polishing, fine pulverization, blending with other materials, treatment effecting a chemical change, thermal action, and molding or shaping. See subparagraph (6) of this paragraph for definitions of certain of these terms.

(2) Processes subsequent to nonmining processes. Notwithstanding any other provision of this section, a process applied subsequent to a nonmining process (other than nonmining transportation) shall also be considered to be a nonmining process. Exceptions to this rule shall be made, however, in those instances in which the rule would discriminate between similarly situated producers of the same mineral. For example, roasting is specifically designated in subparagraph (1) of this paragraph as a nonmining process, but in the case of minerals referred to in section 613(c)(4)(C) sintering is recognized as a mining process. If certain impurities in an ore can only be removed by roasting in order to bring it to the same shipping grade and form as a competitive sintered ore of the same kind which requires no roasting, the subsequent sintering of the roasted ore will be treated as a mining process. In that case, however, the roasting of the ore will none-

theless continue to be treated as a nonmining process.

(3) **Transportation for the purpose of marketing or distribution; storage.** Transportation the primary purpose of which is marketing, distribution, or delivery for the application of only nonmining processes shall not be considered as mining. Nor shall transportation be considered as mining merely because, during the course of such transportation, some extraneous matter is removed from the ore or mineral by the operation of forces of nature, such as evaporation, drainage, or gravity flow. Similarly, storage or warehousing of manufactured products shall not be considered as mining. The preceding sentence shall apply even though, during the course of such storage or warehousing, some extraneous matter is removed from the ore or mineral by the operation of forces of nature, such as evaporation, drainage, or gravity flow.

(4) **Manufacturing, etc.** The production, packaging, distribution, and marketing of manufactured products, and the processes necessary or incidental thereto, are nonmining processes.

(5) **Transformation processes.** Processes which effect a substantial physical or chemical change in a crude mineral product, or which transform a crude mineral product into new or different mineral products, or into refined or manufactured products, are nonmining processes except to the extent that such processes are allowed as mining processes under section 613(c) or under paragraph (f) of this section.

(6) **Definitions.** As used in section 613(c)(5) and this section—

(i) The term "calcining" refers to processes used to expel the volatile portions of a mineral by the application of heat, as, for example, the burning of carbonate rock to produce lime, the heating of gypsum to produce calcined gypsum or plaster of Paris, or the heating of clays to reduce water of crystallization.

(ii) The term "thermal smelting" refers to processes which reduce, separate, or remove impurities from ores or minerals by the application of heat, as, for example, the furnacing of copper concentrates, the heating of iron ores, concentrates, or pellets in a blast furnace to produce pig iron, or the heating of iron ores or concentrates in a direct reduction kiln to produce a feed for direct conversion into steel.

(iii) The term "refining" refers to processes (other than mining processes designated in section 613(c)(4) or this section) used to eliminate impurities or foreign matter from smelted or partially processed metallic and nonmetallic ores and minerals, as, for example, the refining of blister copper. In general, a refining process is designed to achieve a high degree of purity by removing relatively small amounts of impurities or foreign matter from smelted or partially processed ores or minerals.

(iv) The term "polishing" refers to processes used to smooth the surface of minerals, as, for example, sawing applied to finish rough cut blocks of stone, sand finishing, buffing, or otherwise smoothing blocks of stone.

(v) The term "fine pulverization" refers to any grinding or other size reduction process applied to reduce the normal topsize of a mineral product to less than .0331 inches, which is the size opening in a No. 20 Screen (U.S. Standard Sieve Series). A mineral product will be considered to have a normal topsize of .0331 inches if at least 98 percent of the product will pass through a No. 20 Screen (U.S. Standard Sieve Series), provided that at least 5 percent of the product is retained on a No. 45 Screen (U.S. Standard Sieve Series). Compliance with the normal topsize test may also be demonstrated by other tests which are shown to be reasonable in the circumstances. The normal topsize test shall be applied to the product of the operation of each separate and distinct piece of size reduction equipment utilized (such as a roller mill), rather than to the final products for sale. Fine pulverization includes the repeated recirculation of material through crushing or grinding equipment to accomplish fine pulverization. Separating or screening the product of a fine pulverization process (including separation by air or water flotation) shall be treated as a nonmining process.

(vi) The term "blending with other materials" refers to processes used to blend different kinds of minerals with one another, as, for example, blending iodine with common salt for the purpose of producing iodized table salt.

(vii) The term "treatment effecting a chemical change" refers to processes which transform or modify the chemical composition of a crude mineral, as, for example, the coking of coal. The term does not include the use of chemicals to clean the surface of mineral particles provided that such cleaning does not make any change in the physical or chemical structure of the mineral particles.

(viii) The term "thermal action" refers to processes which involve the application of artificial heat to ores or minerals, such as, for example, the

burning of bricks, the coking of coal, the expansion or popping of perlite, the exfoliation of vermiculite, the heat treatment of garnet, and the heating of shale, clay, or slate to produce lightweight aggregates. The term does not include drying to remove free water.

(h) Application to treat, as mining, transportation in excess of 50 miles. If a taxpayer desires to include in the computation of his gross income from mining transportation in excess of 50 miles from the point of extraction of the minerals from the ground, he shall file an original and one copy of an application for the inclusion of such greater distance with the Commissioner of Internal Revenue, Washington, D.C. 20224. The application must include a statement setting forth in detail the facts concerning the physical and other requirements which prevented the construction and operation of the plant (in which mining processes, as defined in paragraph (f) of this section, are applied) at a place nearer to the point of extraction from the ground. These facts must be sufficient to apprise the Commissioner of the exact basis of the application. If the taxpayer's return is filed prior to receipt of notice of the Commissioner's action upon the application, a copy of such application shall be attached to the return. If, after an application is approved by the Commissioner, there is a material change in any of the facts relied upon in such application, a new application must be submitted by the taxpayer.

(i) Extraction from waste or residue. "Extraction of ores or minerals from the ground" means not only the extraction of ores or minerals from a deposit, but also the extraction by mine owners or operators of ores or minerals from waste or residue of their prior mining. It is immaterial whether the waste or residue results from the process of extraction from the ground or from application of mining processes as defined in paragraph (f) of this section. However, extraction of ores or minerals from waste or residue which results from processes which are not allowable as mining processes is not treated as mining. "Extraction of ores or minerals from the ground" does not include extraction of ores or minerals by the purchaser of waste or residue or the purchaser of the rights to extract ores or minerals from waste or residue. The term "purchaser" does not apply to any person who acquires a mineral property, including waste or residue, in a tax-free exchange, such as a corporate reorganization, from a person who was entitled to a depletion allowance upon ores or minerals produced from such waste or residue, or from a person who would have been entitled to such depletion allowance had section 613(c)(3) been in effect at the time of the transfer. The term "purchaser" also does not apply to a lessee who has renewed a mineral lease if the lessee was entitled to a depletion allowance (or would have been so entitled had section 613(c)(3) been in effect at the time of the renewal) upon ores or minerals produced from waste or residue before renewal of the lease. It is not necessary, for purposes of the preceding sentence, that the mineral lease contain an option for renewal. The term "purchaser" does include a person who acquires waste or residue in a taxable transaction, even though such waste or residue is acquired merely as an incidental part of the entire mineral enterprise. For special rules with respect to certain corporate acquisitions referred to in section 381(a), see section 381(c)(18) and the regulations thereunder.

(j) Definition of controlled group. When used in this section—

(1) The term "controlled" includes any kind of control, direct or indirect, whether or not legally enforceable, and however exercisable or exercised. It is the reality of the control which is decisive, not its form or the mode of its exercise. A presumption of control arises if income or deductions have been arbitrarily shifted.

(2) The term "group" means the organizations, trades, or businesses owned or controlled by the same interests.

[T.D. 7170, 37 FR 5374, March 15, 1972]

§ 1.613–5 Taxable income from the property.

(a) General rule. The term "taxable income from the property (computed without allowance for depletion)", as used in section 613 and this part, means "gross income from the property" as defined in section 613(c) and §§ 1.613–3 and 1.613–4, less all allowable deductions (excluding any deduction for depletion) which are attributable to mining processes, including mining transportation, with respect to which depletion is claimed. These deductible items include operating expenses, certain selling expenses, administrative and financial overhead, depreciation, taxes deductible under section 162 or 164, losses sustained, intangible drilling and development costs, exploration and development expenditures, etc. See paragraph (c) of this section for special rules relating to discounts and to certain of these deductible items. Expenditures which may be attributable both to the mineral property upon which depletion is claimed and to other activities shall be properly

apportioned to the mineral property and to such other activities. Furthermore, where a taxpayer has more than one mineral property, deductions which are not directly attributable to a specific mineral property shall be properly apportioned among the several properties. In determining the taxpayer's taxable income from the property, the amount of any particular item to be taken into account shall be determined in accordance with the principles set forth in paragraph (d)(2) and (3) of § 1.613–4.

(b) Special rule; decrease in mining expenses resulting from gain recognized under section 1245(a)(1). (1) If during any taxable year beginning after December 31, 1962, the taxpayer disposes of an item of section 1245 property (as defined in section 1245(a)(3)) which has been used in connection with a mineral property, then for the purpose of computing the taxable income from such mineral property for such taxable year, the allowable deductions taken into account with respect to expenses of mining (that is, expenses attributable to a mineral property other than an oil and gas property) shall be decreased by an amount equal to the portion of any gain recognized under section 1245(a)(1)(relating to treatment of gain from dispositions of certain depreciable property as ordinary income) which is properly allocable to such mineral property in respect of which the taxable income is being computed. The portion of such gain which is properly allocable to such mineral property shall bear the same ratio to the total of such gain as—

(i) The portion of the "adjustments reflected in the adjusted basis" (as such term is defined in paragraph (a)(2) of § 1.1245–2, relating to definition of recomputed basis) of such section 1245 property, which were allowable as deductions from the "gross income from the property" (as defined in section 613(c) and § 1.613–3) in computing the taxable income from such mineral property, bears to

(ii) The total of the "adjustments reflected in the adjusted basis" of such section 1245 property.

(2) For the purposes of this paragraph, the adjustments reflected in the adjusted basis of the section 1245 property disposed of shall be deemed to have been taken into account in computing the taxable income from the mineral property for any taxable year notwithstanding that for the taxable year the allowance for depletion was determined without reference to percentage depletion under section 613.

(3) If the amount of gain described in subparagraph (1) of this paragraph allocable to a mineral property for a taxable year exceeds the allowable deductions otherwise taken into account in computing the taxable income from the mineral property for the taxable year, the excess may not be taken into account in computing the taxable income from the mineral property for any other taxable year.

(4) To the extent that the adjustments reflected in the adjusted basis of the section 1245 property are allocable to mineral property which the taxpayer no longer owns in the taxable year in which he disposes of the section 1245 property, the gain recognized under section 1245(a)(1) does not result in any tax benefit to the taxpayer under this paragraph since he has no taxable income from the mineral property for such year. However, if a taxpayer has, in the taxable year in which he disposes of an item of section 1245 property, only a portion of the original mineral property to which gain described in subparagraph (1) of this paragraph with respect to the section 1245 property is properly allocable, the entire amount of that gain shall nevertheless be taken into account in computing the taxable income of the remaining portion of the mineral property. Furthermore, the fact that a mineral property to which section 1245 gain is properly allocable is (in the taxable year in which the taxpayer disposes of an item of section 1245 property) no longer in existence merely because the mineral property has been made a part of an aggregation or has been deaggregated will not result in the loss of tax benefits under this section. Accordingly,

(i) If a taxpayer has made an aggregation of mineral properties (see section 614 and the regulations thereunder), the amount of any gain described in subparagraph (1) of this paragraph which is properly allocable to the aggregation shall include the portion of any gain which would be properly allocable to the mineral properties which existed separately prior to the aggregation and of which the aggregation is or was composed, if the prior mineral properties had not been aggregated; and

(ii) If a taxpayer has deaggregated a mineral property, the amount of any gain described in subparagraph (1) of this paragraph which is properly allocable to each of the resulting mineral properties shall include a part of the portion of any gain which would be properly allocable to the prior aggregation if the aggregation had not been deaggregated, the part properly allocable to each of the resulting properties being determined by

allocating the gain between the resulting properties in the same manner as basis is allocated between them for tax purposes (see paragraph (a)(2) of § 1.614–6 and example (5) of subparagraph (7) of this paragraph).

(5) In any case in which it is necessary to determine the portion of any gain recognized under section 1245(a)(1) which is properly allocable to the mineral property in respect of which the taxable income is being computed, the taxpayer shall have available permanent records of all the facts necessary to determine with reasonable accuracy the amount of such portion. In the absence of such records, none of the gain recognized under section 1245(a)(1) shall be allocable to such mineral property.

(6) As used in this paragraph, the term "mineral property" has the meaning assigned to it by section 614 and § 1.614–1.

(7) The provisions of this paragraph may be illustrated by the following examples:

Example (1). A, who uses the calendar year as his taxable year, operated and treated as separate properties mines Nos. 1 and 2. On January 1, 1963, A acquired a truck which was section 1245 property. During 1963 and 1964 the truck was used 25 percent of the time at mine No. 1 and 75 percent of the time at mine No. 2. For each such year the depreciation adjustments allowed in respect of the truck were $800 (the amount allowable). In computing the taxable income from mines Nos. 1 and 2 for each such year, $200 (25 percent of $800) of the depreciation adjustments was allocated by A to mine No. 1 and $600 (75 percent of $800) to mine No. 2. Thus, for the 2 years, the total of the depreciation adjustments on the truck was $1,600, of which $400 was allocated to mine No. 1 and $1,200 to mine No. 2. On January 1, 1965, A recognized upon sale of the truck a gain of $500 to which section 1245(a)(1) applied. During 1965, A did not recognize any other gain to which section 1245(a)(1) applied. In computing taxable income from the mines for 1965, the expenses otherwise required to be taken into account are reduced by $125 (that is $400/$1,600 of $500) for mine No. 1 and by $375 (that is $1,200/$1,600 of $500) for mine No. 2.

Example (2). The situation is the same as in example (1), except that the truck in question is used 25 percent of the time at mine No. 1, and 75 percent of the time in a nonmining business owned by A. Accordingly, in computing taxable income from A's mines for 1965, the expenses for mine No. 1 otherwise required to be taken into account are reduced by $125 (that is $400/$1,600 of $500), but no reduction is made in the expenses for mine No. 2, since the truck in question was not used in connection with that mineral property.

Example (3). The situation is the same as in example (1), except that the truck in question was used exclusively at mine No. 1 in 1963. On January 1, 1964, the truck was transferred to mine No. 2, and was used exclusively at mine No. 2 during the remaining period prior to its sale. However, A continued to own and operate mine No. 1. For the 2 years 1963 and 1964, the total of the depreciation adjustments on the truck was $1,600, of which $800 was allocated to mine No. 1 and $800 to mine No. 2. In computing taxable income from A's mines for 1965, the expenses for mines Nos. 1 and 2 otherwise required to be taken into account are reduced by $250 each (that is $800/$1,600 of $500). If A had sold mine No. 1 on January 1, 1964, no reduction in expenses would be allowable as a result of the operation of the truck at mine No. 1, since A would no longer have owned mine No. 1 in the year in which the truck was sold.

Example (4). On January 1, 1963, B, who uses the calendar year as his taxable year and who normally allocates depreciation costs to mines according to the percentage of time which the depreciable asset is used with respect to the mines, acquired a truck which was section 1245 property. During 1963 the truck was used exclusively on mine No. 1, which B operated and treated as a separate property. The depreciation adjustments allowed in respect of the truck for 1963 were $1,000 (the amount allowable), which amount was allocated to mine No. 1 in computing the taxable income therefrom. On January 1, 1964, B acquired and began operating mine No. 2 and elected under section 614(c) to aggregate and treat as one property mines Nos. 1 and 2. During 1964 B used the truck 60 percent of the time for mine No. 1 and 40 percent of the time for mine No. 2. For 1964 the depreciation adjustments allowed in respect of the truck were $1,000 (the amount allowable), which amount was allocated to the aggregation of mines Nos. 1 and 2 in computing the taxable income therefrom. On December 31, 1964, B sold mine No. 2. For 1965 the depreciation adjustments allowed in respect to the truck were $1,000 (the amount allowable), which amount was allocated to mine No. 1 in computing the taxable income therefrom. On January 1, 1966, B recognized gain upon sale of the truck of $600 to which section 1245(a)(1) applied. In computing the taxable income from mine No. 1 for 1966, the expenses otherwise required to be taken into account are reduced by $600, since all the depreciation adjustments allowed with respect to the truck, including those allowed with respect to the use of the truck at mine No. 2 ($400 for 1964), relate to the same mineral property from which B had taxable income in 1966, the taxable year in which he sold the truck.

Example (5). On January 1, 1962, A, who uses the calendar year as his taxable year, elected under section 614(c) to aggregate and treat as one mineral property his operating mineral interests in mines Nos. 1 and 2. On January 1, 1963, A acquired a truck which was section 1245 property, to be used at both mine No. 1 and mine No. 2. A later elected (with the consent of the Commissioner) to deaggregate mines Nos. 1 and 2, and this deaggregation became effective on January 1, 1964. At the time of deaggregation, half of the tax basis of the aggregated property was allocated to mine No. 1, and the other half to mine No. 2. During each of the years 1963 and 1964, the truck was used 25 percent of the time on mine No. 1 and 75 percent of the time on mine No. 2, and the depreciation adjustments allowed in respect of the truck were $800 (the amount allowable). On January 1, 1965, A recognized upon sale of the truck a gain of $500 to which section 1245(a)(1) applied. In computing taxable income from A's mines for 1965, the expenses otherwise required to be taken into account are reduced by $187.50 (that is half of $250 for 1963 and $200/$800 of $250 for 1964) for mine No. 1 and by $312.50 (that is half of $250 for 1963 and $600/$800 of $250 for 1964) for mine No. 2.

(c) Treatment of particular items in computing taxable income from the property. In determining taxable income from the property under the provisions of paragraph (a) of this section—

(1) Trade or cash discounts (or allowances determined to have the same effect as trade or cash discounts) which are actually allowed to the tax-

payer in connection with the acquisition of property, supplies, or services shall not be included in the cost of such property, supplies, or services.

(2) Intangible drilling and development costs which are deducted under section 263(c) and § 1.612-4 shall be subtracted from the gross income from the property.

(3) Exploration and development expenditures which are deducted for the taxable year under sections 615, 616, or 617 shall be subtracted from the gross income from the property.

(4)(i) Selling expenses, if any, paid or incurred with respect to a raw mineral product shall be subtracted from gross income from the property. See subdivision (iii) of this subparagraph for the definition of the term "raw mineral product." For example, the selling expenses paid or incurred by a producer of raw mineral products with respect to products such as crude oil, raw gas, coal, iron ore, or crushed dolomite shall be subtracted from gross income from the property.

(ii) A reasonable portion of the expenses of selling a refined, manufactured, or fabricated product shall be subtracted from gross income from the property. Such reasonable portion shall be equivalent to the typical selling expenses which are incurred by unintegrated miners or producers in the same mineral industry so as to maintain equality in the tax treatment of unintegrated miners or producers in comparison with integrated miner-manufacturers or producer-manufacturers. If unintegrated miners or producers in the same mineral industry do not typically incur any selling expenses, then no portion of the expenses of selling a refined, manufactured, or fabricated product shall be subtracted from gross income from the property when determining the taxpayer's taxable income from the property.

(iii) For purposes of this subparagraph, a product will be considered to be a raw mineral product if (in the case of oil and gas) it is sold in the immediate vicinity of the well or if (in the case of minerals other than oil and gas) it is sold under the conditions described in paragraph (b)(1) of § 1.613-4. In addition, a product will be considered to be a raw mineral product if only insubstantial value is added to the product by nonmining processes (or, in the case of oil and gas, by conversion or transportation processes). For example, in the case of a producer of crushed granite poultry grit, both bulk and bagged grit will be deemed to be a raw mineral product for purposes of the selling expense rule set forth in this subparagraph.

(iv) The term "selling expenses", for purposes of this subparagraph, includes sales management salaries, rent of sales offices, sales clerical expenses, salesmen's salaries, sales commissions and bonuses, advertising expenses, sales traveling expenses, and similar expenses, together with an allocable share of the costs of supporting services, but the term does not include delivery expenses.

(5) Taxes which are taken as a credit rather than as a deduction or which are capitalized shall not be subtracted from the gross income from the property.

(6) Trade association dues paid or incurred by a producer of crude oil or gas or a raw mineral product shall be subtracted from the gross income from the property. See subparagraph (4)(iii) of this paragraph for the definition of the term "raw mineral product". In addition, a reasonable portion of the trade association dues incurred by a producer of a refined, manufactured, or fabricated product shall also be subtracted from gross income from the property if the activities of the association relate to production, treatment and marketing of the crude oil or gas or raw mineral product. One reasonable method of allocating the trade association dues described in the preceding sentence is an allocation based on the proportion that the direct costs of mining processes and the direct costs of nonmining processes (or in the case of oil and gas, conversion and transportation processes) bear to each other. The foregoing rules shall apply even though one of the principal purposes of an association is to advise, promote, or assist in the production, marketing, or sale of refined, manufactured, or fabricated products. For example, a reasonable portion of the trade association dues paid to an association which promotes the sale of cement, refined petroleum, or copper products shall be subtracted from gross income from the property.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6955, 33 FR 6968, May 9, 1968. Redesignated by T.D. 7170, 37 FR 5374, March 15, 1972, as amended by T.D. 7170, 37 FR 5381, March 15, 1972]

§ 1.613-6 Statement to be attached to return when depletion is claimed on percentage basis.

In addition to the requirements set forth in paragraph (g) of § 1.611-2, a taxpayer who claims the percentage depletion deduction under section 613 for any taxable year shall attach to his return for such year a statement setting forth in complete, summary form, with respect to each property for

which such deduction is allowable, the following information:

(a) All data necessary for the determination of the "gross income from the property", as defined in §§ 1.613-3 from 1.613-4, including—

(1) Amounts paid as rents or royalties including amounts which the recipient treats under section 631(c),

(2) Proportion and amount of bonus excluded, and

(3) Amounts paid to holders of other interests in the mineral deposit.

(b) All additional data necessary for the determination of the "taxable income from the property (computed without the allowance for depletion)", as defined in § 1.613-5.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7170, 37 FR 5374, 5382, March 15, 1972]

§ 1.613-7 Application of percentage depletion rates provided in section 613 (b) to certain taxable years ending in 1954.

(a) Election of taxpayer. In the case of any taxable year ending after December 31, 1953, to which the Internal Revenue Code of 1939 is applicable, the taxpayer may elect in accordance with section 613(d) and this section to apply the appropriate percentage depletion rate specified in section 613 in respect of any mineral property (within the meaning of the 1939 Code). In the case of mines, wells, or other natural deposits listed in section 613(b), the election may be made by the taxpayer irrespective of whether his depletion allowance with respect to the property for the taxable year was computed upon the basis of cost, discovery value, or upon a percentage of gross income from the property. Once made, the election shall be irrevocable with respect to the property for which it is exercised. The election may be made for any mineral property of the taxpayer and need not be made for all such properties. "Gross income from the property" and "net income from the property" shall have the same meaning as those terms are used in 26 CFR (1939) 39.23(m)-1 (Regulations 118).

(b) Computation of depletion allowance. The depletion allowance for any taxable year with respect to any property for which the taxpayer makes the election under section 613(d) shall be an amount equal to the sum of—

(1) That portion of a tentative allowance, computed under the provisions of the Internal Revenue Code of 1939 (without regard to paragraph (1) of section 613(d)), which the number of days in the taxable year prior to January 1, 1954, bears to the total number of days in such taxable year; plus

(2) That portion of a tentative allowance, computed by using the appropriate percentage depletion rate specified in section 613(b) (but otherwise computed under the provisions of the Internal Revenue Code of 1939), which the number of days in the taxable year after December 31, 1953, bears to the total number of days in such taxable year.

In the case of any taxable year beginning after December 31, 1953, and ending before August 17, 1954, the depletion allowance with respect to any property for which the taxpayer makes the election under section 613(d) shall be computed under the provisions of the Internal Revenue Code of 1939, except that the appropriate percentage depletion rate specified in section 613(b) shall be used. In making such computation, "gross income from the property" and "net income from the property" shall be determined in the same manner as specified in paragraph (a) of this section.

(c) Examples. The provisions of this section may be illustrated by the following examples:

Example (1). A is a taxpayer who reports income on the basis of a taxable year ending June 30. For the taxable year ended June 30, 1954, A had gross income from a uranium property in the amount of $100,000 and his depletion allowance was computed with reference to percentage depletion. His net income from this property, for purposes of limiting the depletion allowance, was $40,000. The 15-percent rate of depletion provided for in the Internal Revenue Code of 1939 for metal mines resulted in a depletion allowance for the taxable year of $15,000. Percentage depletion computed with reference to the 23-percent rate provided for uranium under section 613(b) is $23,000 ($100,000 times 23 percent). However, the allowance computed on this basis is limited to $20,000 (50 percent of A's net income from the property). If A exercises the election provided for in section 613(d) his depletion allowance for the taxable year is the aggregate of $7,561.64 (184/365 times $15,000) plus $9,917.80 (181/365 times $20,000) or $17,479.44.

Example (2). Assume the same facts as in example (1) except that A's depletion allowance was computed on the basis of cost and amounted to $17,500. If the election is made, A's allowance for the taxable year is the aggregate of $8,821.92 (184/365 times $17,500) plus $9,917.80 (181/365 times $20,-000) or $18,739.72.

(d) Requirement for making election. **(1)** The election under section 613(d) shall be made by filing a statement with the district director with whom the income tax return was filed for the taxable year to which the election is applicable. Such statement shall indicate that an election is being made under section 613(d), shall contain a recomputation of the depletion allowance and the tax liability for all taxable years affected by the exercise of the election, and shall be accompanied

either by a claim for refund or credit or by an amended return or returns, whichever is appropriate.

(2) If the treatment of any item upon which a tax previously determined was based, or if the application of any provisions of the internal revenue laws with respect to such tax, depends upon the amount of income (e.g., charitable contributions, foreign tax credit, dividends received credit, and medical expenses), readjustment in these particulars will be necessary as part of any recomputation in conformity with the change in the amount of the income which results solely from the making of the election under section 613(d).

(e) **Administrative provisions; etc.** (1) Section 36(b) of the Technical Amendments Act of 1958 (72 Stat. 1633) provides as follows:

Sec. 36. Percentage depletion rates for certain taxable years ending in 1954. * * *

(b) **Statute of limitations, etc.; Interest.** If refund or credit of any overpayment resulting from the application of the amendment made by subsection (a) of this section is prevented on the date of the enactment of this Act, or within 6 months from such date, by the operation of any law or rule of law (other than section 3760 of the Internal Revenue Code of 1939 or section 7121 of the Internal Revenue Code of 1954, relating to closing agreements, and other than section 3761 of the Internal Revenue Code of 1939 or section 7122 of the Internal Revenue Code of 1954, relating to compromises), refund or credit of such overpayment may, nevertheless, be made or allowed if claim therefor is filed within 6 months from such date. No interest shall be paid on any overpayment resulting from the application of the amendment made by subsection (a) of this section.

(2) If refund or credit of any overpayment resulting from the application of section 613(d) is prevented on September 2, 1958, or on or before March 2, 1959, by the operation of any law or rule of law (other than section 3760 of the Internal Revenue Code of 1939 or section 7121 of the Internal Revenue Code of 1954, relating to closing agreements, and other than section 3761 of the Internal Revenue Code of 1939 or section 7122 of the Internal Revenue Code of 1954, relating to compromises), refund or credit of such overpayment may, nevertheless, be made or allowed if claim therefor is filed on or before March 2, 1959. If such refund or credit is not prevented on or before March 2, 1959, the time for filing claim therefor shall be governed by the rules of law generally applicable to credits and refunds.

(3) The amount of any refund or credit which is allowable by reason of section 613(d) shall not exceed the decrease in income tax liability resulting solely from the application of the percentage rates specified in section 613(b). No interest shall be allowed or paid on any overpayment resulting from the application of section 613(d).

(4) For purposes of this section the "decrease in income tax liability" shall be the amount by which the tax previously determined (as defined in section 3801(d) of the Internal Revenue Code of 1939) exceeds the tax as recomputed under section 613(d) and this section.

(f) **Adjustment to basis.** Proper adjustment shall be made to the basis of any property as required by section 113(b)(1) of the Internal Revenue Code of 1939 and 26 CFR (1939) 39.-113(b)(1)–1(c) (Regulations 118) to reflect any change in the depletion allowance resulting from the application of section 613(d) of the Internal Revenue Code of 1954.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960. Redesignated by T.D. 7170, 37 FR 5374, March 15, 1972]

§ 1.613A–1 Post-1974 limitations on percentage depletion in case of oil and gas wells; general rule.

Except as otherwise provided in section 613A and the regulations thereunder, in the case of oil or gas which is produced after December 31, 1974, and to which gross income from the property is attributable after such year, the allowance for depletion under section 611 with respect to any oil or gas well shall be computed without regard to section 613. In the case of a taxable year beginning before January 1, 1975, and ending after that date, the percentage depletion allowance (but not the cost depletion allowance) with respect to oil and gas wells for such taxable year shall be determined by treating the portion thereof in 1974 as if it were a short taxable year for purposes of section 613 and the portion thereof in 1975 as if it were a short taxable year for purposes of section 613A.

[T.D. 7487, 42 FR 24264, May 13, 1977]

§ 1.613A–2 Exemption for certain domestic gas wells. [Reserved]

[T.D. 7487, 42 FR 24264, May 13, 1977]

§ 1.613A–3 Exemption for independent producers and royalty owners. [Reserved]

[T.D. 7487, 42 FR 24264, May 13, 1977]

§ 1.613A–4 Limitations on application of § 1.613A–3 exemption. [Reserved]

[T.D. 7487, 42 FR 24264, May 13, 1977]

§ 1.613A–5 Election under section 613A(c)(4).

The election under section 613A(c)(4) is an annual election which the taxpayer may make by claiming percentage depletion deductions for the taxable year based upon such election. The election may be made, on an original or amended tax return or a claim for credit or refund, at any time prior to the expiration of the statutory period (including any extensions thereof) for the filing of a claim for credit or refund by the taxpayer. The election may be changed by the taxpayer by filing an amended return or a claim for credit or refund. The election allows the taxpayer to treat as his depletable natural gas quantity an amount equal to 6,000 cubic feet multiplied by the number of barrels of the taxpayer's depletable oil quantity to which the election applies. The election applies to secondary or tertiary production, as well as primary production, but in determining the taxpayer's depletable natural gas quantity with respect to secondary or tertiary production the taxpayer's depletable oil quantity shall be determined without regard to section 613A(c)(3)(A)(ii) with respect to production from secondary or tertiary processes.

[T.D. 7487, 42 FR 24264, May 13, 1977]

§ 1.613A–6 Recordkeeping requirements.

(a) Principal value of property demonstrated. In the case of a transfer (as defined in § 1.613A–7(n)) after December 31, 1974, of an interest in an oil or gas property (as defined in § 1.613A–7(p)), the transferee (as defined in section 1.613A–7(*o*)) shall keep records showing the terms of the transfer, any geological and geophysical data in the possession of the transferee or other exploratory data with respect to the property transferred, and any other information which bears upon the question of whether at the time of the transfer the principal value of the property transferred had been demonstrated by prospecting, exploration, and discovery work.

(b) Production from secondary or tertiary processes. Every taxpayer who claims depletion with respect to oil or gas produced by secondary or tertiary processes (as defined in § 1.613A–7(k)) shall keep records of the secondary and tertiary processes applied and maintain records of the amount of production so resulting.

(c) Retention of records. The records required by this section shall be kept at all times available for inspection by authorized Internal Revenue officers or employees, and shall be retained so long as the contents may become material in the administration of any Internal Revenue law.

[T.D. 7487, 42 FR 24264, May 13, 1977]

§ 1.613A–7 Definitions. [Reserved]

[T.D. 7487, 42 FR 24264, May 13, 1977]

§ 1.614–0 Introduction.

Section 614 relates to the definition of property and to the various special rules by means of which taxpayers are permitted to aggregate or combine separate properties or to treat such properties as separate. These rules are set forth in detail in §§ 1.614–1 through 1.614–8. Section 1.614–1 sets forth rules under section 614(a) relating to the definition of the term "property." Section 1.614–2 contains the rules relating to the election under section 614(b), as it existed prior to its amendment by section 226(a) of the Revenue Act of 1964, to aggregate operating mineral interests. In the case of mines, the rules contained in § 1.614–2 are applicable only to taxable years beginning before January 1, 1958, to which the Internal Revenue Code of 1954 applies. In the case of oil and gas wells, the rules contained in § 1.614–2 are applicable only to taxable years beginning before January 1, 1964, to which the Internal Revenue Code of 1954 applies. In the case of oil and gas wells, the taxpayer may, however, for taxable years beginning before January 1, 1964, treat any operating mineral interests as if section 614(a) and (b) (as it existed prior to its amendment by section 226(a) of the Revenue Act of 1964) had not been enacted. If any operating mineral interests are so treated, the rules contained in § 1.614–2 are not applicable to such interests and such interests are, in respect of taxable years beginning before January 1, 1964, subject to the rules set forth in § 1.614–4 relating to the Internal Revenue Code of 1939 treatment of separate operating mineral interests in the case of oil and gas wells. Section 1.614–3 prescribes the rules relating to the election under section 614(c)(1) permitting the aggregation of operating mineral interests in the cases of mines for taxable years beginning after December 31, 1957. Section 1.614–3 also sets forth rules relating to the election under section 614(c)(2) in the case of mines by means of which a taxpayer is permitted to treat a single operating mineral interest as more than one such interest for taxable years beginning after December 31, 1957. At the election of the taxpayer with respect to an operating unit, the rules contained in § 1.614–3 are also applicable to taxable years beginning before January 1, 1958, to which the Internal Revenue Code of 1954 applies. If the

taxpayer makes such an election, the rules contained in § 1.614–2 are not applicable to any of the operating mineral interests which are part of the operating unit with respect to which the election described in § 1.614–3 is made. Section 1.614–5 sets forth the rules relating to the aggregation of nonoperating mineral interests. Section 1.614–6 contains the rules relating to basis, holding period, and abandonment and casualty losses where properties have been aggregated or combined. Section 1.614–7 relates to the extension of time for performing certain acts. Section 1.614–8 contains the rules relating to the elections under section 614(b) as amended by section 226(a) of the Revenue Act of 1964 to treat separate operating mineral interests in the case of oil and gas wells as separate properties or in combination for taxable years beginning after December 31, 1963.

[T.D. 6524, 26 FR 145, Jan. 10, 1961, as amended by T.D. 6859, 30 FR 13699, Oct. 28, 1965]

§ 1.614–1 Definition of property.

(a) General rule. **(1)** For purposes of subtitle A of the Code, in the case of mines, wells, and other natural deposits, the term "property" means each separate interest owned by the taxpayer in each mineral deposit in each separate tract or parcel of land.

(2) The term "interest" means an economic interest in a mineral deposit. See paragraph (b) of § 1.611–1. The term includes working or operating interests, royalties, overriding royalties, net profits interests, and, to the extent not treated as loans under section 636, production payments.

(3) The term "tract or parcel of land" is merely descriptive of the physical scope of the land to which the taxpayer's interest relates. It is not descriptive of the nature of his rights or interests in the land. All contiguous areas (even though separately described) included in a single conveyance or grant or in separate conveyances or grants at the same time from the same owner constitute a single separate tract or parcel of land. Areas included in separate conveyances or grants (whether or not at the same time) from separate owners are separate tracts or parcels of land even though the areas described may be contiguous. If the taxpayer's rights or interests within the same tract or parcel of land are dissimilar, then each such dissimilar interest constitutes a separate property. If the taxpayer's rights or interests (whether or not dissimilar) within the same tract or parcel of land relate to more than one separate mineral deposit, then his interest with respect to each such separate deposit is a separate property.

(4) Upon the transfer of a "property" in any transaction in which the basis of such property in the hands of the transferee is determined by reference to the basis of such property in the hands of the transferor, such property shall, notwithstanding the provisions of subparagraph (3) of this paragraph, retain the same status and identity in the hands of the transferee as it had in the hands of the transferor. See paragraph (c) of § 1.614–6 if the transferor has made a binding election to treat a separate mineral interest as a separate property, to treat a separate mineral interest as more than one property under section 614(c), or to treat two or more separate mineral interests as an aggregated or combined property under section 614(b) (as it existed either before or after its amendment by section 226(a) of the Revenue Act of 1964), (c), or (e).

(5) The provisions of this paragraph may be illustrated by the following examples:

Example (1). A taxpayer owns one tract of land under which lie three separate and distinct seams of coal. Therefore, the taxpayer owns three separate mineral interests each of which constitutes a separate property.

Example (2). A taxpayer conducts mining operations on eight tracts of land as a single unit. He acquired his interests in each of the eight tracts from separate owners. Even if each tract of land contains part of the same mineral deposit, the taxpayer owns eight separate mineral interests each of which constitutes a separate property.

Example (3). A taxpayer owns a tract of land under which lies one mineral deposit. The taxpayer operates a well on part of the tract and leases to another operator the mineral rights in the remainder retaining a royalty interest therein. The taxpayer thereafter owns two separate mineral interests each of which constitutes a separate property.

Example (4). In 1954, a taxpayer acquires from a single owner, in a single deed, three noncontiguous tracts of mineral land for a single consideration. Even if each tract contains part of the same mineral deposit, the taxpayer owns three separate mineral interests each of which constitutes a separate property.

Example (5). In 1954, taxpayer A simultaneously acquires in fee two contiguous tracts of mineral land from two separate owners. The same mineral deposit underlies both tracts. Thereafter, taxpayer A owns two separate mineral interests each of which constitutes a separate property.

Example (6). Assume that in 1955, taxpayer A, in example (5), leases the two contiguous tracts of mineral land that he acquired in 1954 to taxpayer B by means of a single lease. Thereafter, taxpayer B owns one mineral interest which constitutes a separate property for such time as the lease continues in existence.

Example (7). Assume that in 1955, taxpayer A, in example (5), sells at the same time all the mineral land he acquired in 1954 to taxpayer B. Thereafter, taxpayer B owns one mineral interest which constitutes a separate property. If taxpayer B acquires the mineral land in a transaction in which the basis of such mineral land in his hands is determined by reference to the basis of such mineral land in the hands of taxpayer A, then

taxpayer B owns two separate mineral interests each of which constitutes a separate property.

Example (8). In 1954, taxpayer A simultaneously acquires two contiguous leasehold interests from two separate owners. The same mineral deposit underlies both tracts. Thereafter, taxpayer A owns two separate mineral interests each of which constitutes a separate property.

Example (9). In 1955, taxpayer A, in example (8), simultaneously assigns the two leases to taxpayer B. Thereafter, taxpayer B owns two separate mineral interests each of which constitutes a separate property.

(b) Separation of interests treated as "single property" under prior regulations. Each separate mineral interest which, in accordance with paragraph (a) of this section, is a separate property shall be so treated, notwithstanding the fact that the taxpayer under paragraph (i) of § 39.23(m)–1 of this chapter (Regulations 118) and corresponding provisions of prior regulations may have treated more than one of such interests as a "single property." The basis of each such separate property must be established by a reasonable method. See, however, section 614(b) and (d) (as they existed prior to amendment by section 226 of the Revenue Act of 1964), section 614(c) and (e), and §§ 1.614–2, 1.614–3, 1.614–4, and 1.614–5 for special rules relating to the treatment of two or more separate mineral interests as a single property.

(c) Treatment of a waste bank or residue. A waste bank or residue of prior mining, the extraction of ores or minerals from which is treated as mining under section 613(c)(3), shall not be considered to be a separate mineral deposit but is a part of the mineral deposit from which it was extracted. However, if the owner of such waste bank or residue has disposed of the deposit from which the waste bank or residue was accumulated, or if the waste bank or residue cannot practicably be attributed to a particular deposit of the owner, the waste bank or residue will be regarded as a separate deposit.

[T.D. 6524, 26 FR 147, Jan. 10, 1961, as amended by T.D. 6859, 30 FR 13699, Oct. 28, 1965; T.D. 7261, 38 FR 5467, March 1, 1973]

§ 1.614–2 Election to aggregate separate operating mineral interests under section 614(b) prior to its amendment by Revenue Act of 1964.

(a) General rule. (1) The provisions of this section relate to the election, under section 614(b) prior to its amendment by section 226(a) of the Revenue Act of 1964, to aggregate separate operating mineral interests, and, unless otherwise indicated, all references in this section to section 614(b) or any paragraph or subparagraph thereof are references to section 614(b) or a paragraph or subparagraph thereof as it existed prior to such amendment. Notwithstanding the preceding sentence, the definitions contained in paragraphs (b) and (c) of this section shall apply both before and after such amendment. All references in this section to section 614(d) are references to section 614(d) as it existed prior to its amendment by section 226(b)(3) of the Revenue Act of 1964.

(2) A taxpayer who owns two or more separate operating mineral interests, which constitute part or all of an operating unit, may elect under section 614(b) and this section to form one aggregation of any two or more of such operating mineral interests and to treat such aggregation as one property. Any operating mineral interest which the taxpayer does not elect to include within the aggregation within the time prescribed in paragraph (d) of this section shall be treated as a separate property. The aggregation of separate properties which results from exercising the election shall be considered as one property for all purposes of subtitle A of the Code. The preceding sentence does not preclude the use of more than one account under a single method of computing depreciation or the use of more than one method of computing depreciation under section 167, if otherwise proper. Any reasonable and consistently applied method or methods of computing depreciation of the improvements made with respect to the separate properties aggregated may be continued in accordance with section 167 and the regulations thereunder. Operating interests in different minerals which comprise part or all of the same operating unit may be included in the aggregation. It is not necessary for purposes of the aggregation that the separate operating mineral interests be included in a single tract or parcel of land or in contiguous tracts or parcels of land so long as such interests are a part of the same operating unit. Under section 614(b), a taxpayer cannot elect to form more than one aggregation of separate operating mineral interests within one operating unit. For definitions of "operating mineral interest" and "operating unit" see respectively paragraphs (b) and (c) of this section.

(b) Operating mineral interest defined. The term "operating mineral interest" means a separate mineral interest as described in section 614(a), in respect of which the costs of production are required to be taken into account by the taxpayer for purposes of computing the limitation of 50 percent of the taxable income from the property in determining the deduction for percentage depletion computed under section 613, or such costs would be so required to be taken into account if the mine,

well, or other natural deposit were in the production stage. The term does not include royalty interests or similar interests, such as production payments or net profits interests. For the purpose of determining whether a mineral interest is an operating mineral interest, "costs of production" do not include intangible drilling and development costs, exploration expenditures under section 615, or development expenditures under section 616. Taxes, such as production taxes, payable by holders of nonoperating interests are not considered costs of production for this purpose. A taxpayer may not aggregate operating mineral interests and nonoperating mineral interests such as royalty interests.

(c) Operating unit defined. **(1)** The term "operating unit" refers to the operating mineral interests which are operated together for the purpose of producing minerals. An "operating unit" of a particular taxpayer must be determined on the basis of his own operations. It is recognized that operating units may not be uniform in the various natural resources industries or in any one of the natural resources industries, such as coal, oil and gas, and the like. As to a particular taxpayer, business reasons may require the formation of operating units that vary in size and content. The term "operating unit" refers to a producing unit, and not to an administrative or sales organization. Among the factors which indicate that mineral interests are operated together as a unit are—

(i) Common field or operating personnel,

(ii) Common supply and maintenance facilities,

(iii) Common processing or treatment plants, and

(iv) Common storage facilities.

However, operating mineral interests which are geographically widespread may not be treated as parts of the same operating unit merely because a single set of accounting records, a single executive organization, or a single sales force is maintained by the taxpayer with respect to such interests, or merely because the products of such interests are processed at the same treatment plant.

(2) If aggregated, an undeveloped operating mineral interest shall be aggregated only with those interests with which it will be operated as a unit when it reaches the production stage.

(3) While a taxpayer may operate an operating mineral interest through an agent, a coowner may aggregate only his operating mineral interests that are actually operated as a unit. For example, if A owned and actually operated the entire working interest in lease X and also owned an undivided fraction of lease Y in which B owned the remaining interest and which B actually operated as a unit with lease Z, A may not aggregate his interest in lease X with his undivided interest in lease Y, since they are not actually operated as a unit.

(4) The determination of the taxpayer as to what constitutes an operating unit is to be accepted unless there is a clear and convincing basis for a change in such determination.

(d) Manner and scope of election—(1) Election; when made. (i) Except as provided in subparagraph (2)(ii) of this paragraph, the election under section 614(b) and paragraph (a) of this section to treat a mineral interest as part of an aggregation shall be made not later than the time prescribed by law for filing the taxpayer's income tax return (including extensions thereof), for whichever of the following taxable years is the later:

(a) The first taxable year beginning after December 31, 1953, and ending after August 16, 1954, or

(b) The first taxable year in which any expenditure for exploration, development, or operation in respect of the separate operating mineral interest is made by the taxpayer after the acquisition of such interest.

See, however, paragraph (c) of § 1.614–6 as to the binding effect of an election where the basis of a separate operating mineral interest in the hands of the taxpayer is determined by reference to the basis in the hands of a transferor. The election under section 614(b) may not be made with respect to any taxable year beginning after December 31, 1957, except in the case of oil and gas wells. See paragraph (e) of this section for rules with respect to the termination of the election under section 614(b) except in the case of oil and gas wells. If an expenditure has been made in respect of a separate operating mineral interest, it is immaterial whether or not any proven deposit has been discovered with respect to such interest when such expenditure has been made. The provisions of this subdivision may be illustrated by the following example:

Example. Taxpayer A is producing from an oil and gas horizon and in 1958 he drills for the purpose of locating a deeper horizon which will be operated in the same operating unit as the upper producing horizon. At the end of the taxable year 1958 he has expended $50,000 drilling for the purpose of locating a deeper horizon although at such time there is no assurance that such a horizon will be found. If taxpayer A desires to aggregate the deeper horizon, if found, with the upper horizon under section 614(b), he must elect to do so in his return for 1958. If the election to aggregate the upper and

lower horizons as one property is made, the drilling expenditures with respect to the prospective lower horizon must be taken into account along with the income and expenses with respect to the upper producing horizon in computing the depletion allowance on the aggregated property.

However, where expenditures for development of, or production from, a particular mineral deposit result in the discovery of another mineral deposit, the election with respect to such other deposit shall be made for the taxable year in which it is discovered and not for the taxable year in which the expenditures were first made which resulted in such discovery.

(ii) Except in the case of oil and gas wells, if a taxpayer fails to make an election under section 614(b) to aggregate a particular operating mineral interest on or before the time prescribed for the making of such election, such interest will be treated as if an election had been made under section 614(b) to treat it as a separate property and it cannot be included in any aggregation within the operating unit of which it is a part unless the taxpayer obtains the consent of the Commissioner. However, where the taxpayer owns more than one property within an operating unit, but has elected to treat such properties separately and one or more additional operating mineral interests are subsequently acquired, any one or more of the latter may be aggregated with one of the existing separate properties within the operating unit but not with more than one of them since they cannot be validly aggregated with each other.

(iii) In the case of oil and gas wells, if the taxpayer fails to make an election under section 614(b) with respect to a particular operating mineral interest on or before the time prescribed for the making of such election, the taxpayer shall be deemed to have treated such interest under the provisions of section 614(d). See section 614(d) and § 1.614–4.

(iv) For purposes of section 614(b), the acquisition of an option to acquire an economic interest in minerals in place does not constitute the acquisition of a mineral interest. Thus, a taxpayer who makes expenditures for the exploration of minerals on a particular tract under an option to acquire an economic interest in minerals in place is not required to make an election with respect to such interest at that time. Furthermore, the election need not be made in the taxable year in which payments are made for the acquisition of a lease, such as the payment of a bonus, unless exploratory, development, or operation expenditures are made thereafter with respect to the property in that year.

(2) *Election; how made.* (i) The election under section 614(b) must be made by a statement attached to the income tax return of the taxpayer for the first taxable year for which the election is made. This statement shall indicate that the taxpayer is making an aggregation of separate operating mineral interests within an operating unit under section 614(b) and shall contain a description of the aggregation and describe the operating mineral interests within the operating unit which are to be treated as separate properties apart from the aggregation. A general description, accompanied by maps appropriately marked, which accurately circumscribes the scope of the aggregation and identifies the properties which are to be treated separately will be sufficient. The statement shall also contain a description of the operating unit in sufficient detail to show that the aggregated operating mineral interests are properly within a single operating unit. See paragraph (c) of this section. The taxpayer shall maintain adequate records and maps in support of the above information. In the event expenditures are first made on an operating mineral interest within an operating unit after an election with respect to the aggregation of interests in that operating unit has been made, the taxpayer shall furnish only information describing such operating mineral interest, its location in the operating unit, and whether it is to be included within the aggregation.

(ii) If the taxpayer made or did not make the election under section 614(b) with respect to a particular operating mineral interest and the last day prescribed by law for filing the return (including extensions of time therefor) on which the election was required to be made falls on or before May 1, 1961, consent is hereby given to the taxpayer to make or change the election not later than May 1, 1961. Any such election or change of such election shall be effective with respect to the earliest taxable year to which the election is applicable in respect of which assessment of a deficiency or credit or refund of an overpayment, as the case may be, resulting from such election or change is not prevented by any law or rule of law on the date such election or change is made. An election or change of election made pursuant to this subdivision shall be binding upon the taxpayer for the first taxable year for which it is effective and for all subsequent taxable years unless consent to a different treatment is obtained from the Commissioner. (See, however, paragraph (e) of this section for rules relating to the termination and nonapplicability of the election under section 614(b) except in the case of oil and gas wells.) Such election or change shall be made in the form

of a statement setting forth the nature of the election or change, including information substantially the same as that required by subdivision (i) of this subparagraph, and shall be accompanied by an amended return or returns if necessary or, if appropriate, a claim for refund or credit. The appropriate documents must be filed on or before May 1, 1961 with the district director for the district in which the original return was filed.

(3) **Election; when effective.** If a taxpayer has elected to aggregate an operating mineral interest, the date on which the aggregation becomes effective is the earliest date within the taxable year affected, on which the taxpayer incurred any expenditure for exploration, development, or operation of such interest. The application of this rule may be illustrated by the following examples:

Example (1). In 1953, a taxpayer owned and operated mineral interests Nos. 1, 2, and 3. All three interests form one operating unit. The taxpayer, who files his return on a calendar year basis, continued to own and operate these interests during the year 1954, and in his return for that year, filed on April 15, 1955, elected to aggregate these three interests. As the result of this election, the aggregation was effective for all purposes of subtitle A of the Code as of January 1, 1954.

Example (2). Assume that, on March 1, 1955, the taxpayer described in example (1) acquired operating mineral interest No. 4 which was also a part of the operating unit composed of operating mineral interests Nos. 1, 2, and 3, that he made his first expenditure for exploration with respect to operating mineral interest No. 4 on September 1, 1955, and that, in his return filed on April 15, 1956, he elected to aggregate operating mineral interest No. 4 with the aggregation consisting of Nos. 1, 2, and 3. As the result of that election, operating mineral interest No. 4 became a part of the aggregation for all purposes of subtitle of the Code on September 1, 1955.

(4) **Election; binding effect.** A valid election made under section 614(b) and this section shall be binding upon the taxpayer for the taxable year for which made and all subsequent taxable years unless consent to make a change is obtained from the Commissioner. However, see paragraph (e) of this section for rules with respect to the termination of the election under section 614(b) except in the case of oil and gas wells. For rules relating to the binding effect of an election where the basis of a separate or an aggregated property in the hands of the transferee is determined by reference to the basis in the hands of the transferor, see paragraph (c) of § 1.614–6. A taxpayer can neither include within the aggregation a separate operating mineral interest which he had previously elected to treat separately, nor exclude from the aggregation a separate operating mineral interest previously included therein unless consent to do so is obtained from the Commissioner. A change in tax consequences alone is not sufficient to obtain consent to change the treatment of an operating mineral interest. However, consent may be appropriate where, for example, there has been a substantial change in the taxpayer's operations so that a major part of an aggregation becomes a part of another operating unit. Applications for consent shall be made in writing to the Commissioner of Internal Revenue, Washington, D.C. 20224. The application must be accompanied by a statement indicating the reason or reasons for the change and furnishing the information required under subdivision (i) of subparagraph (2) of this paragraph, unless such information has been previously filed and is current.

(5) **Invalid aggregations—(i) In general.** In addition to aggregations which are invalid under section 614(b) because of the failure to make timely elections, aggregations may be invalid under such section in situations which may be divided into two general categories. The first category involves basic aggregations which were timely but otherwise initially invalid. The second category involves invalid additions of operating mineral interests to basic aggregations which additions became subject to the election in years subsequent to the year in which the initial basic aggregation or aggregations were formed.

(ii) **Invalid basic aggregations.** The term "invalid basic aggregations" refers to those aggregations which are initially invalid. Generally, such basic aggregations will be invalid because more than one aggregation has been formed within an operating unit or because operating mineral interests in two or more operating units have been improperly aggregated. For any year in which an invalid basic aggregation exists, each operating mineral interest included in such aggregation shall be treated for all purposes as a separate property unless consent is obtained from the Commissioner to treat any such interest in a different manner. Consent will be granted in appropriate cases as, for example, where the taxpayer demonstrates that he inadvertently formed an invalid basic aggregation. The provisions of this subdivision may be illustrated by the following examples:

Example (1). In 1953, taxpayer A owned six operating mineral interests, designated No. 1 through No. 6, and he continued to own and operate such interests during 1954. He acquired no other operating mineral interests during such year. All six of these operating mineral interests form one operating unit. Assume that A elected under section 614(b) to aggregate operating mineral interests Nos. 1 through 3 into one aggregation and Nos. 4 through 6 into another aggregation. Since A has formed two aggregations in one operating unit, they are invalid basic aggregations. Therefore, interests Nos. 1 through 6 must be treated as separate properties for 1954 and all subsequent taxable years unless consent is obtained from the Commissioner to treat any of such interests in a different manner.

Example (2). Assume the same facts as in example (1) and assume also that, in his return for 1954, A correctly elected to aggregate all six operating mineral interests into one aggregation under section 614(b). Assume further that all these operating mineral interests continued to be in one operating unit for the years 1954, 1955, and 1956 but that, because of changes in the facts and circumstances of A's operations, in 1957 operating mineral interests Nos. 1, 2, and 3 became a part of one operating unit and Nos. 4, 5, and 6 became a part of another operating unit. Notwithstanding the change in operations, the election made by A shall continue to be binding unless consent to change such election is obtained from the Commissioner.

(iii) Invalid additions. The term "additions" refers to the additions that a taxpayer makes by electing to aggregate an operating mineral interest with an aggregation formed in a previous year. Such additions will be invalid where the taxpayer either elected to aggregate an operating mineral interest with an invalid basic aggregation or elected to aggregate an operating mineral interest which is part of one operating unit with an aggregation of operating mineral interests which is a part of another operating unit. An operating mineral interest which is invalidly added to either a valid basic aggregation or to an invalid basic aggregation shall be considered as a separate property unless consent is obtained from the Commissioner to treat such interest in a different manner. The following are examples of invalid additions:

Example (1). In 1953, taxpayer A owned six operating mineral interests designated No. 1 through No. 6 and he continued to own and operate such interests during 1954. He acquired no other operating mineral interests during that year. Nos. 1 through 3 formed one operating unit and Nos. 4 through 6 formed another operating unit. In his return for 1954, A incorrectly elected to aggregate all six operating mineral interests into one aggregation under section 614(b). In 1955, A acquired and commenced development of operating mineral interest No. 7 which is correctly a part of the operating unit of which operating mineral interests Nos. 1, 2, and 3 are a part. A elected under section 614(b), for the year 1955, to aggregate operating mineral interest No. 7 with the invalid basic aggregation composed of Nos. 1 through 6. Since operating mineral interest No. 7 was aggregated with an invalid basic aggregation, it is an invalid addition and must be treated as a separate property unless consent is obtained from the Commissioner to treat it in a different manner.

Example (2). In 1953, taxpayer A owned nine operating mineral interests designated No. 1 through No. 9. During 1954, he continued to own and operate such interests and acquired no other operating mineral interest. Interests No. 1 through No. 3 form one operating unit, Nos. 4 through 6 form another operating unit, and Nos. 7 through 9 form a third operating unit. For the year 1954, A elected under section 614(b) to aggregate operating mineral interests Nos. 1, 2, 3, and 4 into one aggregation, to treat Nos. 5 and 6 as separate properties, and to aggregate Nos. 7, 8, and 9 into another aggregation. Assume that in 1955 A acquired and commenced development of operating mineral interest No. 10 which was a part of the operating unit composed of Nos. 1, 2, and 3. Assume further that he elected under section 614(b) to aggregate No. 10 with the aggregation composed of Nos. 7, 8, and 9. This would be an invalid addition to a valid basic aggregation since operating mineral interest No. 10 was not properly a part of the operating unit formed by Nos. 7, 8, and 9. Therefore, interest No. 10 must be treated as a separate property for 1955 and all subsequent taxable years unless consent is obtained from the Commissioner to treat it in a different manner. However, the valid basic aggregation composed of interests Nos. 7 through 9 is not affected by the invalid addition of interest No. 10.

Example (3). Assume the same facts as in example (2) except that A elected under section 614(b) in 1955 to aggregate No. 10 with the aggregation of Nos. 1 through 4. This would also be an invalid addition because the aggregation composed of Nos. 1 through 4 is an invalid basic aggregation since operating mineral interest No. 4 is not a part of the operating unit consisting of Nos. 1, 2, and 3. Therefore, interest No. 10 must be treated as a separate property for 1955 and all subsequent taxable years unless consent is obtained from the Commissioner to treat such interest in a different manner.

(e) **Termination of election—(1) Taxable years beginning after December 31, 1963, in the case of oil and gas wells.** In the case of oil and gas wells, the election provided for under section 614(b) and paragraph (a) of this section to form an aggregation of separate operating mineral interests shall not apply with respect to any taxable year beginning after December 31, 1963. In addition, if a taxpayer treated certain separate operating mineral interests in a single tract or parcel of land as separate rather than as an aggregation and decides to continue such treatment for taxable years beginning after December 31, 1963, he must make an appropriate election under section 614(b) as amended by the Revenue Act of 1964. See § 1.614–8.

(2) Taxable years beginning after December 31, 1957, in the case of mines. Except in the case of oil and gas wells, the election provided for under section 614(b) and paragraph (a) of this section to form an aggregation of separate operating mineral interests shall not apply with respect to any taxable year beginning after December 31, 1957. Thus, if a taxpayer makes a binding election under section 614(b) to form an aggregation of separate operating mineral interests within an operating unit for taxable years beginning before January 1, 1958, he must make a new election for the first taxable year beginning after December 31, 1957, under section 614(c) within the time prescribed in § 1.614–3 if he wishes to aggregate any separate operating mineral interests within such operating unit. A new election must be made under section 614(c) notwithstanding the fact that the aggregation formed under section 614(b) would constitute a valid aggregation under section 614(c). Failure to make such an election within the time prescribed shall constitute an election to treat each separate operating mineral interest within the operating unit as a separate property for taxable years beginning after December 31, 1957.

(3) Taxable years beginning before January 1, 1958, in the case of mines. An election made under section 614(b) and paragraph (a) of this section to form an aggregation of separate operating mineral interests within a particular operating unit shall not apply with respect to any taxable year beginning prior to January 1, 1958, for which the taxpayer makes an election under section 614(c)(3)(B) and paragraph (f)(2) of § 1.614–3 which is applicable to any separate operating mineral interest within the same operating unit. The provisions of this subparagraph may be illustrated by the following examples:

Example (1). In 1953, taxpayer A owned six separate operating mineral interests, designated No. 1 through No. 6, which he operated as a unit. Operating mineral interests Nos. 1 through 5 comprise a mine, and operating mineral interest No. 6 represents one mineral deposit in a single tract of land which is being extracted by means of two mines. Taxpayer A previously made a binding election under section 614(b) to aggregate operating mineral interests Nos. 1 through 5 and to treat operating mineral interest No. 6 as a separate property. Under section 614(c)(2) and (3)(B) taxpayer A makes an election which is applicable for the taxable year 1954 and all subsequent taxable years to treat operating mineral interest No. 6 as two separate operating mineral interests. Therefore, the previous election of taxpayer A to aggregate operating mineral interests Nos. 1 through 5 under section 614(b) does not apply. Unless taxpayer A also makes an election to aggregate operating mineral interests Nos. 1 through 5 as one property under section 614(c)(1) and (3)(B) within the time prescribed in paragraph (f)(2) of § 1.614–3, he shall be deemed to have made an election to treat each of such interests as a separate property for 1954 and all subsequent taxable years.

Example (2). In 1953, taxpayer B owned six separate operating mineral interests, designated No. 1 through No. 6, which he operated as a unit. Operating mineral interests Nos. 1 through 3 comprise a mine and Nos. 4 through 6 comprise a second mine. Taxpayer B previously made a binding election under section 614(b) to aggregate operating mineral interests Nos. 1 through 8 and to treat Nos. 4 through 6 as separate properties. Under section 614(c)(1) and (3)(B) taxpayer B makes an election which is applicable for the taxable year 1954 and all subsequent taxable years to aggregate operating mineral interests Nos. 4 through 6 as one property. The previous election of the taxpayer under section 614(b) to aggregate operating mineral interests Nos. 1 through 3 does not apply even though such aggregation would constitute a valid aggregation if formed under section 614(c)(1). Therefore, if taxpayer B wishes to continue to treat operating mineral interests Nos. 1 through 3 as one property, he must also make an election to do so under section 614(c)(1) and (3)(B) within the time prescribed in paragraph (f)(2) of § 1.614–3.

(4) Bases of separate operating mineral interests. If an aggregation formed under section 614(b) is terminated by reason of the provisions of section 614(b)(4)(A), is terminated under section 614(b)(4)(B) for any taxable year after the first taxable year to which the election under section 614(b) applies, or is terminated by reason of the provisions of section 614(b) as amended by the Revenue Act of 1964, the bases of the separate operating mineral interests (and combinations thereof) included in such aggregation shall be determined in accordance with the rules contained in paragraph (a)(2) of § 1.614–6 as of the first day of the first taxable year for which the termination is effective. However, if by reason of the provisions of section 614(b)(4)(B), an election to aggregate under section 614(b) does not apply for any taxable year for which such election was made, the bases of the separate operating mineral interests included in the aggregation formed under section 614(b) shall be determined without regard to the election under section 614(b).

(f) Alternative treatment of separate operating mineral interests in the case of oil and gas wells. For rules relating to an alternative treatment of separate operating mineral interests in the case of oil and gas wells, see § 1.614–4.

[T.D. 6524, 26 FR 147, Jan. 10, 1961, as amended by T.D. 6859, 30 FR 13700, Oct. 28, 1965]

§ 1.614–3 Rules relating to separate operating mineral interests in the case of mines.

(a) Election to aggregate separate operating mineral interests—(1) General rule. Except in the case of oil and gas wells, a taxpayer who owns two or more separate operating mineral interests, which constitute part or all of the same operating unit, may elect under section 614(c)(1) and this paragraph to form an aggregation of all such operating mineral interests which comprise any one mine or any two or more mines and to treat such aggregation as one property. The aggregated property which results from the exercise of such election shall be considered as one property for all purposes of subtitle A of the Code. The preceding sentence does not preclude the use of more than one account under a single method of computing depreciation or the use of more than one method of computing depreciation under section 167, if otherwise proper. Any reasonable and consistently applied method or methods of computing depreciation of the improvements made with respect to the separate properties aggregated may be continued in accordance with section 167 and the regulations thereunder. It is not necessary for purposes of the aggregation that the separate operating mineral interests be included in a single tract or parcel of land or in contiguous tracts or parcels of land so long as such interests constitute part or all of the same operating unit. A taxpayer may elect to form more than one aggregation of separate operating mineral interests within one operating unit so long as each aggregation consists of all the separate operating mineral interests which comprise

any one mine or any two or more mines. Thus, no aggregation may include any separate operating mineral interest which is a part of a mine without including all of the separate operating mineral interests which comprise such mine in the first taxable year for which the election to aggregate is effective. Any separate operating mineral interest which becomes a part of such mine in a subsequent taxable year must also be included in such aggregation as of the taxable year that such interest becomes a part of such mine. The taxable year in which such interest becomes a part of such mine shall be determined upon the basis of the facts and circumstances of the particular case. If a taxpayer fails to make an election under this paragraph to aggregate a particular operating mineral interest (other than an interest which becomes a part of a mine with respect to which the interests have been aggregated in a prior taxable year) on or before the last day prescribed for making such an election, such interest shall be treated as if an election had been made to treat it as a separate property. A taxpayer may not aggregate operating mineral interests and nonoperating mineral interests such as royalty interests. For definitions of the terms "operating mineral interest", "operating unit", and "mine", see respectively paragraphs (c), (d), and (e) of this section.

(2) Aggregation in subsequent taxable years. If the taxpayer has made an election under section 614(c)(1) for a particular taxable year with respect to any operating mineral interest or interests within a particular operating unit, and if, for a subsequent taxable year, the taxpayer desires to make an election with respect to an additional operating mineral interest within the same operating unit, then whether or not the taxpayer may elect to include such additional interest in an aggregation or treat it as a separate property depends upon the nature of such additional interest and of the taxpayer's previous elections. If the additional interest is a part of a mine with respect to which the other interests have been aggregated, the additional interest must be included in such aggregation. If the additional interest is a part of a mine with respect to which the other interests have been treated as separate properties, the additional interest must be treated as a separate property. If the additional interest is part of a mine which previously consisted of only a single interest which has not been aggregated with any other mine, such additional interest may be aggregated or treated as a separate property. If the additional interest is an entire mine, it may, at the election of the taxpayer, (i) be added to any aggregation within the same operating unit, (ii) be aggregated with any other single interest which is an entire mine provided both interests are within the same operating unit even though such single interest has previously been treated as a separate property, or (iii) be treated as a separate property.

(b) Election to treat a single operating mineral interest as more than one property—(1) General rule. Except in the case of oil and gas wells, a taxpayer who owns a separate operating mineral interest in a mineral deposit in a single tract or parcel of land may elect under section 614(c)(2) and this paragraph to treat such interest as two or more separate operating mineral interests if such mineral deposit is being developed or extracted by means of two or more mines. In order for this election to be applicable, there must be at least two mines with respect to each of which an expenditure for development or operation has been made by the taxpayer. The election under section 614(c)(2) may also be made with respect to a separate operating mineral interest formed by a previous election under section 614(c)(2) at such time as the mineral deposit previously allocated to such interest is being developed or extracted by means of two or more mines. If there is more than one mineral deposit in a single tract or parcel of land, an election under section 614(c)(2) with respect to any one of such mineral deposits has no application to the other mineral deposits. The election under section 614(c)(2) may not be made with respect to an aggregated property or with respect to any operating mineral interest which is a part of any aggregation formed by the taxpayer unless the taxpayer obtains consent from the Commissioner. Such consent will not be granted where the principal purpose for the request to make the election is based on tax consequences. Application for such consent shall be made in writing to the Commissioner of Internal Revenue, Washington, D.C. 20224. The application must be accompanied by a statement setting forth in detail the reason or reasons for the request to exercise the election with respect to an aggregated property.

(2) Allocation of mineral deposit. If the taxpayer elects to treat a separate operating mineral interest in a mineral deposit in a single tract or parcel of land as more than one separate operating mineral interest, then all of such mineral deposit therein and all of the portion of the tract or parcel of land allocated thereto must be allocated to the newly formed separate operating mineral interests. A portion of such mineral deposit and such tract or parcel of land must be allocated to each such newly formed separate operating mineral interest.

There must be at least one mine, with respect to which an expenditure for development or operation has been made by the taxpayer, with respect to each such portion. The extent of the portion to be allocated to each newly formed separate operating mineral interest is to be determined upon the basis of the facts and circumstances of the particular case.

(3) **Basis of newly formed separate operating mineral interests.** The adjusted basis of each of the separate operating mineral interests formed by the making of the election under section 614(c)(2) shall be determined by apportioning the adjusted basis of the separate operating mineral interest with respect to which such election was made between (or among) the newly formed separate operating mineral interests in the same proportion as the fair market value of each such newly formed interest (as of the date on which the election becomes effective) bears to the total fair market value of the interest with respect to which the election was made as of such date.

(4) **Aggregation of newly formed separate operating mineral interests.** Any separate operating mineral interest formed by the making of the election under section 614(c)(2) may be included as a part of an aggregation subject to the requirements of paragraph (a) of this section, provided that the time for making the election under section 614(c)(1) to include such separate operating mineral interest in such aggregation has not expired. See paragraph (f) of this section. The provisions of this subparagraph may be illustrated by the following example:

Example. In 1958, taxpayer A acquired two separate operating mineral interests designated No. 1 and No. 2. Each is an interest in a single mineral deposit in a single tract of land. In the same year, taxpayer A made his first development expenditure with respect to a mine on operating mineral interest No. 1 and a mine on operating mineral interest No. 2. Operating mineral interests Nos. 1 and 2 are operated as a unit. Taxpayer A did not elect to aggregate operating mineral interests Nos. 1 and 2 under section 614(c)(1) within the time prescribed for making such an election. In 1960 taxpayer A made his first development expenditure with respect to a second mine on operating mineral interest No. 2. Taxpayer A elected under section 614(c)(2) to treat operating mineral interest No. 2 as two separate operating mineral interests, designated as Nos. 2(a) and 2(b), for the taxable year 1960 and all subsequent taxable years. No. 2(a) contained the mine for which the first development expenditure was made in 1958, and No. 2(b) contained the mine for which the first development expenditure was made in 1960. If taxpayer A wishes to do so, he may elect to aggregate mineral interests Nos. 1 and 2(b) under section 614(c)(1) for the taxable year 1960 and all subsequent taxable years since the first development expenditure with respect to the mine on operating mineral interest No. 2(b) was made during the taxable year 1960. Taxpayer A may not elect to aggregate mineral interests Nos. 1 and 2(a) under such section since the time for making such an election has expired.

(c) **Operating mineral interest defined.** For the definition of the term "operating mineral interest" as used in this section, see paragraph (b) of § 1.614–2.

(d) **Operating unit defined.** For the definition of the term "operating unit" as used in this section, see paragraph (c) of § 1.614–2.

(e) **Mine defined.** For purposes of this section, the term "mine" means any excavation or other workings or series of related excavations or related workings, as the case may be, for the purpose of extracting any known mineral deposit except oil and gas deposits. For the purpose of the preceding sentence, the term "excavations" or "workings" includes quarries, pits, shafts, and wells (except oil and gas wells). The number of excavations or workings that constitute a mine is to be determined upon the basis of the facts and circumstances of the particular case such as the nature and position of the mineral deposit or deposits, the method of mining the mineral, the location of the excavations or other workings in relation to the mineral deposit or deposits, and the topography of the area. The determination of the taxpayer as to the composition of a mine is to be accepted unless there is a clear and convincing basis for a change in such determination.

(f) **Manner and scope of election—(1) Election to apply section 614(c)(1) and (2) for taxable years beginning after December 31, 1957.** Except as provided in subparagraphs (2) and (3) of this paragraph, the election under section 614(c)(1) and paragraph (a) of this section to treat an operating mineral interest as part of an aggregation shall be made under section 614(c)(3)(A) not later than the time prescribed by law for filing the taxpayer's income tax return (including extensions thereof) for whichever of the following taxable years is the later:

(i) The first taxable year beginning after December 31, 1957, or

(ii) The first taxable year in which any expenditure for development or operation in respect of the separate operating mineral interest is made by the taxpayer after the acquisition of such interest.

Except as provided in subparagraphs (2) and (3) of this paragraph, the election under section 614(c)(2) and paragraph (b) of this section to treat a single operating mineral interest as more than one operating mineral interest shall be made under section 614(c)(3)(A) not later than the time prescribed by law for filing the taxpayer's income tax return

(including extensions thereof) for whichever of the following taxable years is the later:

(iii) The first taxable year beginning after December 31, 1957, or

(iv) The first taxable year in which expenditures for development or operation of more than one mine in respect of the separate operating mineral interest are made by the taxpayer after the acquisition of such interest.

However, if the latest time at which an election may be made under this subparagraph falls on or before May 1, 1961, such election may be made or modified at any time on or before May 1, 1961. See paragraph (c) of § 1.614–6 as to the binding effect of an election where the basis of a separate operating mineral interest in the hands of the taxpayer is determined by reference to the basis in the hands of a transferor.

(2) Election to apply section 614(c)(1) and (2) for taxable years beginning before January 1, 1958. In accordance with section 614(c)(3)(B), the election under section 614(c)(1) and paragraph (a) of this section to treat an operating mineral interest as part of an aggregation may, at the election of the taxpayer, be made not later than the time prescribed by law for filing the taxpayer's income tax return (including extensions thereof) for whichever of the following taxable years is the later:

(i) The first taxable year beginning after December 31, 1953, and ending after August 16, 1954, for which assessment of a deficiency or credit or refund of an overpayment, as the case may be, resulting from an election under section 614(c)(1), is not prevented on September 2, 1958, by the operation of any law or rule of law, or

(ii) The first taxable year in which any expenditure for development or operation in respect of the separate operating mineral interest is made by the taxpayer after the acquisition of such interest.

In accordance with section 614(c)(3)(B), the election under section 614(c)(2) and paragraph (b) of this section to treat an operating mineral interest as more than one operating mineral interest may, at the election of the taxpayer, be made not later than the time prescribed by law for filing the taxpayer's income tax return (including extensions thereof) for whichever of the following taxable years is the later:

(iii) The first taxable year beginning after December 31, 1953, and ending after August 16, 1954, for which assessment of a deficiency or credit or refund of an overpayment, as the case may be, resulting from an election under section 614(c)(2), is not prevented on September 2, 1958, by the operation of any law or rule of law, or

(iv) The first taxable year in which expenditures for development or operation of more than one mine in respect of the separate operating mineral interest are made by the taxpayer after the acquisition of such interest.

However, if the latest time at which an election may be made under this subparagraph falls on or before May 1, 1961, such election may be made or modified at any time on or before May 1, 1961. See paragraph (c) of § 1.614–6 as to the binding effect of an election where the basis of a separate operating mineral interest in the hands of the taxpayer is determined by reference to the basis in the hands of a transferor.

(3) Limitation. If the taxpayer makes an election under section 614(c)(1) or (2) in accordance with section 614(c)(3)(B) and subparagraph (2) of this paragraph with respect to any operating mineral interest which constitutes part or all of an operating unit, such taxpayer may not make any election under section 614(c)(1) or (2) in accordance with section 614(c)(3)(A) and subparagraph (1) of this paragraph with respect to any operating mineral interest which constitutes part or all of such operating unit. The provisions of this subparagraph may be illustrated by the following example:

Example: In 1953, taxpayer A owned six separate operating mineral interests, designated No. 1 through No. 6, which he operated as a unit. Operating mineral interests Nos. 1 through 5 comprise a mine, and operating mineral interest No. 6 represents one mineral deposit in a single tract of land which is being extracted by means of two mines. In accordance with section 614(c)(3)(B) and subparagraph (2) of this paragraph, taxpayer A elects under section 614(c)(2) to treat operating mineral interest No. 6 as two separate operating mineral interests for the taxable year 1954 and all subsequent taxable years. Unless taxpayer A also makes an election under section 614(c)(1) to aggregate operating mineral interests Nos. 1 through 5 for the taxable year 1954 and all subsequent taxable years in accordance with section 614(c)(3)(B) and subparagraph (2) of this paragraph, he shall be deemed to have made an election to treat each of such interests as a separate property. Taxpayer A may not elect, under section 614(c)(1) and (3)(A), to aggregate operating mineral interests Nos. 1 through 5 for the taxable year 1958 or any subsequent taxable year.

(4) Statute of limitations. If the taxpayer makes any election in accordance with section 614(c)(3)(B) and subparagraph (2) of this paragraph and if assessment of any deficiency for any taxable year resulting from such election is prevented on May 1, 1961, or at any time within one year after such first day, by the operation of any law or rule of law, such assessment may, nevertheless, be made within one year after May 1, 1961.

Any election by a taxpayer in accordance with section 614(c)(3)(B) shall constitute consent to the assessment of any deficiency resulting from any such election. If refund or credit of any overpayment of income tax resulting from any election made in accordance with section 614(c)(3)(B) is prevented on May 1, 1961, or at any time within one year after May 1, 1961, by the operation of any law or rule of law, refund or credit of such overpayment may, nevertheless, be made or allowed but only if claim therefor is filed within one year after May 1, 1961. This subparagraph shall not apply with respect to any taxable year of a taxpayer for which an assessment of a deficiency resulting from an election made in accordance with section 614(c)(3)(B) or a refund or credit of an overpayment resulting from any such election, as the case may be, is prevented by the operation of any law or rule of law on September 2, 1958.

(5) Elections—how made—(i) General rule. Except as provided in subdivision (ii) of this subparagraph, an election under section 614(c)(1) or (2) and paragraph (a) or (b) of this section must be made by a statement attached to the income tax return of the taxpayer for the first taxable year for which the election is made. The statement shall contain the following information:

(a) Whether the taxpayer is making an election or elections with respect to the operating unit in accordance with section 614(c)(3)(A) or (B);

(b) A description of the operating unit of the taxpayer in sufficient detail to identify the operating mineral interests which are included within such operating unit;

(c) A description of each aggregation to be formed within the operating unit in sufficient detail to show that each aggregation consists of all the separate operating mineral interests which comprise any one mine or any two or more mines;

(d) A description of each separate operating mineral interest within the operating unit which is to be treated as a separate property in sufficient detail to show that such interest is not a part of any mine for which an election to aggregate has been made;

(e) The taxable year in which the first expenditure for development or operation was made by the taxpayer with respect to each separate operating mineral interest within the operating unit, but if the first expenditure for development or operation has not been made with respect to a separate operating mineral interest before the close of the taxable year for which the election under this section is made, such information should also be included;

(f) A description of each separate operating mineral interest within the operating unit which the taxpayer elects to treat as more than one such interest under section 614(c)(2) in sufficient detail to show that the separate operating mineral interest was not a part of an aggregation formed by the taxpayer under section 614(c)(1) for any taxable year prior to the taxable year for which the election under section 614(c)(2) is made, and to show that the mineral deposit representing the separate operating mineral interest is being developed or extracted by means of two or more mines;

(g) The taxable year in which the first expenditure for development or operation was made by the taxpayer with respect to each mine on the separate operating mineral interest that the taxpayer is electing to treat as more than one such interest; and

(h) The allocation of the mineral deposit representing the separate operating mineral interest between (or among) the newly formed interests and the method by which such allocation was made.

For the purpose of applying subdivisions (e) and (g) of this subdivision, if the first expenditure for development or operation with respect to a separate operating mineral interest or a mine was made prior to the first taxable year for which the election with respect to such interest or mine is applicable, the taxpayer may state that such is the case in lieu of identifying the exact taxable year in which such first expenditure was made. In any case where part of the information required under this subdivision can be adequately supplied by means of appropriately marked maps, the statement may be accompanied by such maps and may omit the required descriptive material to the extent replaced by the maps. The taxpayer shall maintain adequate records and maps in support of the above information. In the event that the first expenditure for development or operation with respect to a separate operating mineral interest is made by the taxpayer in a taxable year subsequent to the taxable year for which an election under this section has been made with respect to the operating unit of which such interest is a part, the taxpayer shall furnish information describing such interest in sufficient detail to identify it as a part of such operating unit, to show whether it is a part of a mine with respect to which the interests have previously been aggregated or have previously been treated as separate properties, and to indicate whether it is to be included within an aggregation.

(ii) Special rule. If the last day prescribed by law for filing the taxpayer's income tax return (including extensions thereof) for the first taxable year for which an election under section 614(c)(1) or (2) is made falls before May 1, 1961, the statement of election or modification thereof for such taxable year must be filed on or before May 1, 1961, with the district director for the district in which such return was filed. The statement must contain the information as required in subdivision (i) of this subparagraph, must indicate the first taxable year for which the election contained therein is made, and shall be accompanied by an amended return or returns if necessary or, if appropriate, a claim for refund or credit.

(6) Elections; when effective. If the taxpayer has elected to form an aggregation under section 614(c)(1) and this section, the date on which the aggregation becomes effective is the first day of the first taxable year for which the election is made; except that if any separate operating mineral interest included in such aggregation was acquired after such first day, the date on which the inclusion of such interest in such aggregation becomes effective is the date of its acquisition. If the taxpayer elects to add another operating mineral interest to such aggregation for a subsequent taxable year, the date on which aggregation of the additional interest becomes effective is the first day of such subsequent taxable year or the date of acquisition of such interest, whichever is later. If an operating mineral interest is required to be included in the aggregation for a subsequent taxable year because such interest becomes a part of a mine which the taxpayer has previously elected to aggregate, the date on which the inclusion of such interest in the aggregation becomes effective is the first day of the subsequent taxable year or the date of acquisition of such interest, whichever is later. If the taxpayer has elected to treat a separate operating mineral interest as more than one such interest, the date on which the election becomes effective is the first day of the first taxable year for which the election is made or the earliest date on which the first expenditure for development or operation has been made by the taxpayer with respect to a mine on each newly formed separate operating mineral interest, whichever is later.

(7) Elections; binding effect. A valid election under section 614(c)(1) or (2) whether made in accordance with section 614(c)(3)(A) or (B) shall be binding upon the taxpayer for the taxable year for which made and for all subsequent taxable years unless consent to change the treatment of an operating mineral interest with respect to which an election has been made is obtained from the Commissioner. For rules relating to the binding effect of an election where the basis of a separate or an aggregated property in the hands of the transferee is determined by reference to the basis in the hands of the transferor, see paragraph (c) of § 1.614–6. A taxpayer can neither include within an aggregation a separate operating mineral interest which he has previously elected to treat as a separate property, nor exclude from an aggregation a separate operating mineral interest which he has properly elected to include within such aggregation unless consent to do so is obtained from the Commissioner. A change in tax consequences alone is not sufficient to obtain consent to change the treatment of an operating mineral interest. However, consent may be appropriate where, for example, there has been a substantial change in the taxpayer's operations so that a major part of an aggregation becomes a part of another operating unit. Applications for consent shall be made in writing to the Commissioner of Internal Revenue, Washington, D.C. 20224. The application must be accompanied by a statement indicating the reason or reasons for the change and furnishing the information required in subparagraph (5)(i) of this paragraph, unless such information has been previously filed and is current.

(8) Invalid aggregations—(i) General rule. In addition to aggregations which are invalid under this section because of the failure to make timely elections, aggregations may be invalid under this section in situations which may be divided into two general categories. The first category involves invalid basic aggregations. The second category involves invalid additions to basic aggregations.

(ii) Invalid basic aggregations. The term "invalid basic aggregations" refers to aggregations which are initially invalid. Generally, a basic aggregation is initially invalid because it does not include all the separate operating mineral interests which comprise a complete mine or mines or because it includes separate operating mineral interests which are not part of the same operating unit. If the taxpayer makes an invalid basic aggregation, each of the separate operating mineral interests included in such aggregation shall be treated as a separate property for the first taxable year for which the election is made and for all subsequent taxable years unless consent is obtained from the Commissioner to treat any such interest in a different manner. Consent will be granted in appropriate cases. For example, assume that the taxpayer elects to form an aggregation of the operating mineral interests which comprise one or more complete mines. If the taxpayer demon-

strates that he inadvertently failed to include a minor part of one of the aggregated mines or inadvertently included a minor part of another mine that is not a part of the aggregation, consent will ordinarily be granted to maintain the aggregation by including the part omitted or by excluding the part included. The provisions of this subdivision may be illustrated by the following examples:

Example (1). In 1958, taxpayer A owned ten operating mineral interests, designated No. 1 through No. 10, which he operated as a unit. Interests Nos. 1 through 5 comprised mine X, and interests Nos. 6 through 10 comprised mine Y. Taxpayer A had made his first development expenditure with respect to each of the ten interests before January 1, 1958. Taxpayer A elected under section 614(c)(1) and (3)(A) to aggregate interests Nos. 1 through 8 for 1958 and all subsequent taxable years. The aggregation formed by taxpayer A is an invalid basic aggregation because it does not include all the operating mineral interests which comprise a complete mine or mines. Therefore, interests Nos. 1 through 8 must be treated as separate properties for 1958 and all subsequent taxable years unless consent is obtained from the Commissioner to treat any of such interests in a different manner.

Example (2). In 1958, taxpayer B owned ten operating mineral interests designated No. 1 through No. 10. Interests Nos. 1 through 5 comprised mine X, and interests Nos. 6 through 10 comprised mine Y. Taxpayer B had made his first development expenditure with respect to each of the ten interests before January 1, 1958. Taxpayer B elected under section 614(c)(1) and (3)(A) to aggregate interests Nos. 1 through 10 for 1958 and all subsequent taxable years. Upon audit, it was determined that mines X and Y were in two separate operating units. Therefore, the aggregation formed by taxpayer B is invalid, and interests Nos. 1 through 10 must be treated as separate properties for 1958 and all subsequent taxable years unless consent is obtained from the Commissioner to treat any of such interests in a different manner.

(iii) Invalid additions. The term "invalid addition" refers to an operating mineral interest which is invalidly aggregated with an existing aggregation. Generally, an addition is invalid because it is a part of a mine and is aggregated with an aggregation which does not include other interests which are parts of the same mine, or because it is in one operating unit and is included as part of an aggregation which is in another operating unit. If an invalid addition is properly a part of a mine with respect to which other interests have been validly aggregated for a taxable year prior to the first taxable year for which the election to aggregate the invalid addition is made, then the invalid addition shall be included in the aggregation of which it is properly a part for such first taxable year and all subsequent taxable years. Any other invalid addition shall be treated as a separate property for the first taxable year for which the election to aggregate such addition is made and for all subsequent taxable years unless consent is obtained from the Commissioner to treat any such interest in a different manner. The provisions of this subdivision may be illustrated by the following examples:

Example (1). In 1958, taxpayer A owned six operating mineral interests, designated No. 1 through No. 6, which he operated as a unit. Interests Nos. 1 through 3 comprised mine X, and interests Nos. 4 through 6 comprised mine Y. Taxpayer A had made his first development expenditure with respect to each of the six interests before January 1, 1958. Taxpayer A elected under section 614(c)(1) and (3)(A) to aggregate interests Nos. 1 through 3 for 1958 and all subsequent taxable years. He elected to treat interests Nos. 4 through 6 as separate properties for 1958 and all subsequent taxable years. In 1959, taxpayer A acquired and made his first development expenditure with respect to interest No. 7. Interest No. 7 was a part of the mine composed of interests Nos. 4 through 6. Taxpayer A elected under section 614(c)(1) and (3)(A) to aggregate interest No. 7 with the aggregation of interests Nos. 1 through 3 for 1959 and all subsequent taxable years. Interest No. 7 is an invalid addition and must be treated as a separate property for 1959 and all subsequent taxable years. It cannot be aggregated with interests Nos. 4 through 6 since taxpayer A has previously elected to treat such interests as separate properties. However, the valid basic aggregation composed of interests Nos. 1 through 3 is not affected by the invalid addition of interest No. 7.

Example (2). Assume the same facts as in example (1) except that taxpayer A elected under section 614(c)(1) and (3)(A) to aggregate interests Nos. 1 through 3 as one aggregation and interests Nos. 4 through 6 as another aggregation for 1958 and all subsequent taxable years. The aggregation of interest No. 7 with the aggregation consisting of interests Nos. 1 through 3 constitutes an invalid addition. Interest No. 7 must be included in the aggregation consisting of interests Nos. 4 through 6 for 1959 and all subsequent taxable years.

Example (3). In 1958, taxpayer B owned three operating mineral interests, designated No. 1 through No. 3, which comprised mine X. Taxpayer B had made his first development expenditure with respect to each of the three interests before January 1, 1958. Taxpayer B elected under section 614(c)(1) and (3)(A) to aggregate interests Nos. 1 through 3 for 1958 and all subsequent taxable years. In 1959, taxpayer B acquired interests Nos. 4 through 7 which comprised mine Y. Taxpayer B made his first development expenditure with respect to each of the four interests during 1959. Taxpayer B elected under section 614(c)(1) and (3)(A) to aggregate interests Nos. 4 through 6 and to aggregate interest No. 7 with the aggregation consisting of interests Nos. 1 through 3 for 1959 and all subsequent taxable years. The aggregation consisting of interests Nos. 4 through 6 is an invalid basic aggregation, and the aggregation of interest No. 7 is an invalid addition. Interests Nos. 4 through 7 must be treated as separate properties for 1959 and all subsequent taxable years unless consent is obtained from the Commissioner to treat such interests in a different manner.

(g) Special rule as to deductions under section 615(a) prior to aggregation—(1) General rule. If an aggregation of operating mineral interests under section 614(c)(1) and paragraph (a) of this section includes any interest or interests in respect of which exploration expenditures, paid or incurred after the acquisition of such interest or interests, were deducted by the taxpayer under section 615(a) for any taxable year which precedes the date on which such aggregation becomes effective, then the tax imposed by chapter 1 of the Code for

the taxable year or years in which such exploration expenditures were so deducted shall be recomputed in accordance with the rules contained in this paragraph. If an operating mineral interest is added to such aggregation for a subsequent taxable year and exploration expenditures made with respect to such interest after its acquisition were deducted by the taxpayer under section 615(a) for any taxable year which precedes the date on which the aggregation of such additional interest becomes effective, then the tax imposed by chapter 1 of the Internal Revenue Code of 1954 for the taxable year or years in which such exploration expenditures were so deducted shall be recomputed. For purposes of this paragraph, such taxable year or years shall be referred to as the taxable year or years for which a recomputation is required to be made. See paragraph (f)(6) of this section for rules relating to the date on which an aggregation becomes effective or the date on which the aggregation of an additional interest to an aggregation becomes effective. See subparagraph (3) of this paragraph for rules relating to the method of recomputation of tax. The provisions of this subparagraph may be illustrated by the following examples:

Example (1). In 1954, taxpayer A owned two operating mineral interests designated Nos. 1 and 2. Interest No. 1 was in the production stage prior to 1954. The first exploration expenditures with respect to interest No. 2 were made by taxpayer A in 1954 and were deducted under section 615(a) on his return for that year. In 1955, taxpayer A made his first development expenditure with respect to interest No. 2, and thereafter it was operated with interest No. 1 as a unit. Taxpayer A elected under section 614(c)(1) and (3)(B) to form an aggregation of interests Nos. 1 and 2 for 1955 and all subsequent taxable years. Taxpayer A must recompute his tax for 1954 in accordance with this paragraph.

Example (2). Assume the same facts as in example (1) except that, in 1957, taxpayer A acquired another operating mineral interest, designated No. 3, made his first exploration expenditures with respect to such interest in that year, and deducted such expenditures under section 615(a) on his return for that year. In 1958, taxpayer A made his first development expenditure with respect to interest No. 3. Interest No. 3 was part of the same operating unit as interests Nos. 1 and 2. Taxpayer A elected under section 614(c)(1) and (3)(B) to add interest No. 3 to his aggregation of interests Nos. 1 and 2 for 1958 and all subsequent taxable years. Taxpayer A must recompute his tax for 1957 in accordance with this paragraph.

(2) Exceptions—(i) Taxable years beginning before January 1, 1958. In the case of exploration expenditures deducted by the taxpayer with respect to an operating mineral interest for any taxable year beginning before January 1, 1958, subparagraph (1) of this paragraph shall apply only if the taxpayer has made an election under section 614(c)(1) or (2) with respect to the operating unit of which such interest is a part and such election applies to the taxable year for which such exploration expenditures were deducted. Thus, if the taxpayer does not make an election with respect to the operating unit under section 614(c)(1) or (2) and (3)(B), subparagraph (1) of this paragraph does not apply in the case of exploration expenditures deducted with respect to any operating mineral interest which is a part of such operating unit for any taxable year beginning before January 1, 1958. The provisions of this subdivision may be illustrated by the following examples:

Example (1). In 1956, taxpayer A acquired two operating mineral interests designated Nos. 1 and 2. Interest No. 1 was in the production stage at that time. Taxpayer A made his first exploration expenditures with respect to interest No. 2 in 1956, 1957, and 1958 and deducted such expenditures under section 615(a) on his returns for such years. In 1959, taxpayer A made his first development expenditure with respect to interest No. 2. Interests Nos. 1 and 2 were operated as a unit. Taxpayer A elected under section 614(c)(1) and (3)(A) to aggregate interests Nos. 1 and 2 for 1959 and all subsequent taxable years. Only the exploration expenditures deducted by the taxpayer for 1958 must be taken into account for purposes of applying subparagraph (1) of this paragraph.

Example (2). In 1954, taxpayer B owned two operating mineral interests, designated Nos. 1 and 2, which he operated as a unit. Interest No. 1 was in the production stage at that time, and interest No. 2 represented one mineral deposit in a single tract of land which was being extracted by means of two mines. Under section 614(c)(2) and (3)(B), taxpayer B elects to treat interest No. 2 as two separate operating mineral interests, designated as Nos. 2(a) and 2(b), for 1954 and all subsequent taxable years. In 1955, taxpayer B acquired operating mineral interest No. 3. He made his first exploration expenditures with respect to interest No. 3 in 1955, 1956, and 1957 and deducted such expenditures under section 615(a) on his returns for such years. In 1958, taxpayer B made his first development expenditure with respect to interest No. 3, and thereafter it was operated with interests Nos. 1, 2(a), and 2(b) as a unit. Taxpayer B elects under section 614(c)(1) and (3)(B) to aggregate interests Nos. 1 and 3 for 1958 and all subsequent taxable years. The exploration expenditures deducted by the taxpayer for 1955, 1956, and 1957 must be taken into account for purposes of applying subparagraph (1) of this paragraph since the taxpayer has made an election under section 614(c)(2) with respect to the operating unit of which interest No. 3 is a part and such election applies to the taxable years 1955, 1956, and 1957.

(ii) Interests formed pursuant to an election under section 614(c)(2). In the case of exploration expenditures deducted with respect to an operating mineral interest which the taxpayer elects to treat as more than one such interest under section 614(c)(2) and paragraph (b) of this section, subparagraph (1) of this paragraph shall not apply. Thus, if the taxpayer deducts exploration expenditures with respect to an operating mineral interest, subsequently elects to treat such interest as more than one interest under section 614(c)(2), and includes one of the newly formed interests in an aggregation under section 614(c)(1), subparagraph (1) of this paragraph does not apply in the case of the exploration expenditures deducted with respect

to the interest which the taxpayer elected to treat as more than one interest. The provisions of this subdivision may be illustrated by the following examples:

Example (1). In 1958, taxpayer A acquired two operating mineral interests, designated Nos. 1 and 2, which he operated as a unit. Each interest was an interest in a single mineral deposit in a single tract or parcel of land. There was a mine in the production stage of each of two interests at that time. Taxpayer A elected under section 614(c)(1)(B) to treat interests Nos. 1 and 2 as separate properties. In 1959 and 1960, taxpayer A made exploration expenditures with respect to interest No. 2 for the purpose of extracting the mineral by means of a second mine, and he deducted such expenditures on his returns for such years. In 1961, taxpayer A made his first development expenditure with respect to a second mine on interest No. 2. Taxpayer A elected under section 614(c)(2) to treat interest No. 2 as two separate operating mineral interests, designated as Nos. 2(a) and 2(b), for 1961 and all subsequent taxable years. Interest No. 2(a) contained the producing mine and interest No. 2(b) contained the subsequently developed mine. In his return for 1961, taxpayer A also elected under section 614(c)(1)(A) to aggregate interests Nos. 1 and 2(b) for 1961 and all subsequent taxable years. The exploration expenditures deducted with respect to interest No. 2 prior to the effective date of the formation of interests Nos. 2(a) and 2(b) need not be taken into account for purposes of applying subparagraph (1) of this paragraph.

Example (2). In 1954, taxpayer B owned two operating mineral interests designated Nos. 1 and 2. Interest No. 1 was an interest in a single mineral deposit in a single tract of land which was being extracted by means of two mines. Taxpayer B elected under section 614(c)(2) and (3)(B) to treat interest No. 1 as two separate operating mineral interests, designated as Nos. 1(a) and 1(b), for 1954 and all subsequent taxable years. In 1955, 1956, and 1957, taxpayer B made exploration expenditures with respect to interest No. 2 and deducted such expenditures on his returns for such years. In 1958, taxpayer B made his first development expenditure with respect to interest No. 2, and, on his return for that year, taxpayer B elected to aggregate interests Nos. 1(a) and 2 under section 614(c)(1) for 1958 and all subsequent taxable years. The exploration expenditures deducted with respect to interest No. 2 for 1955, 1956, and 1957 shall be taken into account for purposes of applying subparagraph (1) of this paragraph since such exploration expenditures were deducted with respect to an interest to which this subdivision does not apply.

(3) Recomputation of tax—(i) General rule. In the case of an aggregation formed under section 614(c)(1) and paragraph (a) of this section in respect of which a recomputation of tax is required to be made under the provisions of subparagraphs (1) and (2) of this paragraph for any taxable year or years, the tax imposed by chapter 1 of the Internal Revenue Code of 1954 shall be recomputed for each such taxable year as if—

(a) The taxpayer had elected to form an aggregation for the taxable year for which the recomputation is required to be made, and

(b) Such aggregation had included all the interests included in the aggregation formed under section 614(c)(1) except those interests which the taxpayer did not own during the taxable year for which the recomputation is required to be made and those interests in respect of which the taxpayer had made no expenditures for exploration, development, or operation before or during the taxable year for which the recomputation is required to be made.

If a recomputation of tax is required to be made for any taxable year in the case of the aggregation of an additional interest to an existing aggregation under section 614(c)(1), such recomputation shall be made as if—

(c) The taxpayer had elected to form an aggregation for the taxable year for which the recomputation is required to be made, and

(d) Such aggregation had included all the interests included in the aggregation formed under section 614(c)(1) (including any interest which the taxpayer had disposed of prior to the date on which the aggregation of the additional interest becomes effective) except those interests which the taxpayer did not own during the taxable year for which the recomputation is required to be made and those interests in respect of which the taxpayer had made no expenditures for exploration, development, or operation before or during the taxable year for which the recomputation is required to be made.

For purposes of this paragraph, any aggregation which is treated as having been formed under subdivisions (a) and (b) or under subdivisions (c) and (d) shall be referred to as the "constructed aggregated property".

(ii) Recomputation of depletion allowance. The taxpayer shall compute the depletion allowance with respect to the constructed aggregated property for the taxable year for which the recomputation is required to be made. In making this computation, cost depletion for such taxable year shall be computed with reference to the depletion unit for the constructed aggregated property. See paragraph (a) of § 1.611–2. Percentage depletion for such taxable year shall not exceed 50 percent of the taxable income from the constructed aggregated property computed in accordance with § 1.613–5. If a recomputation is required to be made for the same taxable year with respect to any other aggregation or aggregations formed by the taxpayer under section 614(c)(1), the depletion allowance with respect to the other constructed aggregated property or properties shall be similarly computed. If, for a taxable year in respect of which a recomputation is required, the sum of the depletion allowance or allowances as computed under this subdivision is less than the sum of the

depletion allowance or allowances actually deducted for such taxable year with respect to all the properties required to be taken into account in making the computation under this subdivision, then the total depletion allowance deducted by the taxpayer for such taxable year shall be reduced by the difference. The taxable income or net operating loss of the taxpayer for such taxable year shall be adjusted to reflect such reduction for purposes of the recomputation of tax. However, if for a taxable year in respect of which a recomputation is required, the sum of the depletion allowance or allowances as computed under this subdivision exceeds the sum of the depletion allowance or allowances actually deducted for such taxable year with respect to all the properties required to be taken into account in making the computation under this subdivision, the recomputation of tax for such taxable year is disregarded for purposes of applying section 614(c)(4)(B), (C), and (D).

(iii) Effect of recomputation with respect to items based on amount of income. In making the recomputation of tax under this subparagraph for any taxable year, any deduction, credit, or other allowance which is based upon the adjusted gross income or taxable income of the taxpayer for such year shall be recomputed taking into account the adjustment required under subdivision (ii) of this subparagraph. For example, if a corporate taxpayer's taxable income is increased under the provisions of such subdivision, then the amount of charitable contributions which may be deducted under the limitation contained in section 170(b)(2) shall be correspondingly increased for purposes of the recomputation. Moreover, the effect that the recomputation of any deduction, credit, or other allowance for a taxable year has on the tax imposed for any other taxable year shall also be taken into account for purposes of the recomputation of tax under this subparagraph. Any change in items of tax preferences (as defined in section 57 and the regulations thereunder) must also be taken into account for purposes of the recomputation under this subparagraph.

(iv) Effect of recomputation with respect to a net operating loss and a net operating loss deduction. If the recomputation of tax under this subparagraph for the taxable year for which the recomputation is required to be made results in a reduction of a net operating loss for such year, then the taxpayer shall take into account the effect of such reduction on the tax imposed by chapter I of the Internal Revenue Code of 1954 (or by corresponding provisions of the Internal Revenue Code of 1939) for any taxable year affected by such reduction. If the recomputation of tax for the taxable year for which the recomputation is required to be made results in an increase in taxable income as defined in section 172(b)(2) for such year, then the taxpayer shall take into account the effect of such increase on the tax imposed by chapter I of the Internal Revenue Code of 1954 (or by corresponding provisions of the Internal Revenue Code of 1939) for any taxable year affected by such increase. Furthermore, in making the recomputation of tax for any taxable year for which the recomputation is required to be made, the taxpayer shall take into account any change in the net operating loss deduction for such year resulting from the recomputation of tax for any other taxable year for which a recomputation is required to be made. For provisions relating to the net operating loss deduction, see section 172 and the regulations thereunder. For rules relating to the effect of the net operating loss deduction on the minimum tax for tax preferences see section 56 and the regulations thereunder and § 1.58–7.

(v) Determination of increase in tax. If the taxpayer elects to form an aggregation or aggregations for a taxable year under section 614(c)(1) and if a recomputation of tax is required to be made under this paragraph for any prior taxable year or years, then the taxpayer shall compute the difference between the tax, including the tax imposed by section 56 (relating to the minimum tax for tax preferences), as recomputed under this subparagraph for such prior taxable year or years (and other taxable years affected by the recomputation) and the tax liability previously determined (computed without regard to section 614(c)(4)) with respect to such prior taxable year or years (and other taxable years affected by the recomputation). If the taxpayer is subsequently required to make a recomputation with respect to any taxable year or years for which he has previously made a recomputation, then the taxpayer shall compute the difference between the tax as subsequently recomputed for such taxable year or years (and other taxable years affected by the subsequent recomputation) and the tax as previously recomputed for such taxable year or years (and other taxable years affected by the subsequent recomputation). For treatment of the increase in tax resulting from the recomputation of tax under this subparagraph, see subparagraph (4) of this paragraph.

(4) Treatment of increase in tax—(i) General rule. If the taxpayer elects to form an aggregation or aggregations for a taxable year under section 614(c)(1) and if a recomputation of tax is required to be made for any prior taxable year or years, then the total increase in tax resulting from such

recomputation determined under subparagraph (3)(v) of this paragraph shall be taken into account in the first taxable year to which the election to form such aggregation or aggregations is applicable and in each succeeding taxable year until the full amount of such total increase in tax has been taken into account. The number of taxable years over which such total increase shall be taken into account shall be equal to the number of taxable years for which a recomputation of tax is required to be made under subparagraph (1) of this paragraph as limited by subparagraph (2) of this paragraph and for which such recomputation results in a reduction of the taxpayer's depletion allowance under subparagraph (3)(ii) of this paragraph. The amount of the increase in tax which is to be taken into account in a taxable year is determined by dividing the total increase in tax by the number of taxable years over which such total increase is to be taken into account. The tax imposed by chapter I of the Code for each of the taxable years over which the total increase in tax is to be taken into account shall be increased by the amount determined in accordance with the preceding sentence. However, such increase in tax for each of such taxable years shall have no effect upon the determination of the amount of any credit against the tax for any of such taxable years. For example, the amount of such increase shall not affect the computation of the limitation on the foreign tax credit under section 904. The amount of the increase in tax which is required to be taken into account by the taxpayer in a particular taxable year under section 614(c)(4)(C) shall be treated as a tax imposed with respect to such taxable years even though, without regard to section 614(c)(4) and this paragraph, such taxpayer would otherwise have no tax liability for such taxable year.

(ii) Increase in tax not determinable as of first taxable year of aggregation. If the recomputation of tax under subparagraph (3) of this paragraph, for any taxable year or years prior to the first taxable year to which the election to form an aggregation or aggregations under section 614(c)(1) applies, results in a reduction of any net operating loss carryover to a taxable year subsequent to such first taxable year, then the total increase in tax resulting from the recomputation is not determinable as of such first taxable year. In such case, the total increase in tax shall be taken into account in equal installments in the first taxable year for which such total increase is determinable and in each succeeding taxable year for which a portion of the increase in tax would have been taken into account under subdivision (i) of this subparagraph if the total increase had been determinable as of the first taxable year to which the election to form the aggregation or aggregations under section 614(c)(1) applies. The provisions of this subdivision may be illustrated by the following example:

Example. Assume that taxpayer A elects under section 614(c)(1) to form an aggregation for 1960 and all subsequent taxable years. Assume further that taxpayer A is required to recompute his tax for four prior taxable years under subparagraphs (1) and (2) of this paragraph and that the recomputation for each of such taxable years results in a reduction of taxpayer A's depletion allowance. Under subdivision (i) of this subparagraph, the total increase in tax resulting from the recomputation is to be taken into account in equal installments in 1960, 1961, 1962, and 1963. However, if the total increase in tax is not determinable until 1961 because the recomputation for the prior taxable years results in the reduction of a net operating loss carryover to 1961, then the total increase shall be taken into account in equal installments in 1961, 1962, and 1963. In like manner, if the total increase in tax is not determinable until 1962, it shall be taken into account in equal installments in 1962 and 1963.

(iii) Death or cessation of existence of taxpayer. If the taxpayer dies or ceases to exist, the portion of the increase in tax determined under subparagraph (3)(v) of this paragraph which has not been taken into account under subdivision (i) or (ii) of this subparagraph for taxable years prior to the taxable year of the occurrence of such death or such cessation of existence, as the case may be, shall be taken into account for the taxable year in which such death or such cessation of existence, as the case may be, occurs.

(5) Adjustments to basis of aggregated property. If the taxpayer elects to form an aggregated property or properties under section 614(c)(1) for a taxable year and if a recomputation of tax is required to be made for any taxable year which results in reduction of the depletion allowance previously deducted by the taxpayer for such year, then proper adjustments shall be made with respect to the adjusted basis of such aggregated property or properties. In such a case—

(i) If the sum of the depletion allowances actually deducted with respect to the interests included in a constructed aggregated property exceeds the depletion allowance computed under subparagraph (3)(ii) of this paragraph with respect to such constructed aggregated property, the adjusted basis of the aggregated property formed under section 614(c)(1) shall be increased by such excess, and

(ii) If the depletion allowance computed under subparagraph (3)(ii) of this paragraph with respect to a constructed aggregated property exceeds the sum of the depletion allowances actually deducted with respect to the interests included in such constructed aggregated property, the adjusted basis

of the aggregated property formed under section 614(c)(1) shall be reduced (but not below zero) by such excess.

However, the adjusted basis of an aggregated property formed under section 614(c)(1) may be increased only to the extent such excess would have resulted in an increase in such adjusted basis if taken into account under paragraph (a) of § 1.614–6. Thus, if depletion previously allowed with respect to the separate operating mineral interests included in the aggregation formed under section 614(c)(1) exceeds the total of the unadjusted bases of such interests by $5,000, and if the recomputation of tax required to be made under this paragraph results in a depletion allowance which is $7,000 less than the depletion actually deducted with respect to such interests, then the adjusted basis of such aggregation may be increased by only $2,000. If, with respect to the same aggregated property formed under section 614(c)(1), adjustments to adjusted basis are required under this subparagraph as a result of recomputation of tax for two or more taxable years, the total or net amount of such adjustments shall be taken into account. Any adjustment to the adjusted basis of an aggregation required by this subparagraph shall be taken into account as of the effective date of the election to form such aggregation under section 614(c)(1) and shall be effective for all purposes of subtitle A of the Code. For other rules relating to the determination of the adjusted basis of an aggregated property, see paragraph (a) of § 1.614–6.

[T.D. 6524, 26 FR 150, Jan. 10, 1961, as amended by T.D. 7170, 37 FR 5382, March 15, 1972; T.D. 7564, 43 FR 40494, Sept. 12, 1978]

§ 1.614–4 Treatment under the Internal Revenue Code of 1939 with respect to separate operating mineral interests for taxable years beginning before January 1, 1964, in the case of oil and gas wells.

(a) General rule. **(1)** All references in this section to section 614(b) or any paragraph or subparagraph thereof are references to section 614(b) or a paragraph or subparagraph thereof as it existed prior to its amendment by section 226(a) of the Revenue Act of 1964. All references in this section to section 614(d) are references to section 614(d) as it existed prior to its amendment by section 226(b)(3) of the Revenue Act of 1964.

(2) For taxable years beginning before January 1, 1964, in the case of oil and gas wells, a taxpayer may treat under section 614(d) and this section any property as if section 614(a) and (b) had not been enacted. For purposes of this section, the term "property" means each separate operating mineral interest owned by the taxpayer in each mineral deposit in each separate tract or parcel of land. Separate tracts or parcels of land exist not only when areas of land are separated geographically, but also when areas of land are separated by means of the execution of conveyances or leases. If the taxpayer treats any property or properties under this section, the taxpayer must treat each such property as a separate property except that the taxpayer may treat any two or more properties that are included within the same tract or parcel of land as a single property provided such treatment is consistently followed. If the taxpayer treats two or more properties as a single property under this section, such properties shall be considered as a single property for all purposes of subtitle A of the Internal Revenue Code of 1954. The taxpayer may not make more than one combination of properties within the same tract or parcel of land. Thus, if the taxpayer treats two or more properties that are included within the same tract or parcel of land as a single property, each of the remaining properties included within such tract or parcel of land shall be treated as a separate property. If the taxpayer has treated two or more properties that are included within the same tract or parcel of land as a single property and subsequently discovers or acquires an additional mineral deposit within the same tract or parcel of land, he may include his interest in such deposit with the two or more properties which are being treated as a single property or he may treat his interest in such deposit as a separate property. If the taxpayer has treated each property included within a tract or parcel of land as a separate property and subsequently discovers or acquires an additional mineral deposit within the same tract or parcel of land, he may combine his interest in such deposit with any one of the separate properties included within the tract or parcel of land, but not with more than one of them since they cannot be validly combined with each other. The taxpayer may not combine properties which are included within different tracts or parcels of land under this section irrespective of whether such tracts or parcels of land are contiguous. The treatment of a property as a separate property or the treatment of two or more properties included within a single tract or parcel of land as a single property under this section shall be binding upon the taxpayer for the first taxable year for which such treatment is effective and for all subsequent taxable years beginning before January 1, 1964. For the continuation of such treatment under § 1.614–8 for taxable years beginning

after December 31, 1963, see paragraph (d) of § 1.614–8. For provisions relating to the first taxable year for which treatment under this section becomes effective, see paragraph (d) of this section.

(b) Treatment consistent with treatment for taxable years prior to 1954. If the taxpayer has treated properties in a manner consistent with the rules contained in paragraph (a) of this section for taxable years to which the Internal Revenue Code of 1939 applies and if the taxpayer desires to treat such properties under section 614(d), then such properties must continue to be treated in the same manner. The provisions of this paragraph may be illustrated by the following examples:

Example (1). In 1950, taxpayer A owned two separate tracts of land designated No. 1 and No. 2. Each tract contained three mineral deposits. In the case of tract No. 1, taxpayer A treated the three mineral deposits as a single property. In the case of tract No. 2, taxpayer A treated the first mineral deposit as a separate property and treated the second and third mineral deposits as a single property. This treatment was consistently followed for the taxable years 1950, 1951, 1952, and 1953. Taxpayer A desires, for 1954 and subsequent taxable years, to treat the properties in tracts Nos. 1 and 2 as if section 614(a) and (b) had not been enacted. For 1954 and subsequent taxable years, the three deposits in tract No. 1 must be treated as a single property; the first deposit in tract No. 2 must be treated as a separate property; and the second and third deposits in tract No. 2 must be treated as a single property.

Example (2). Assume the same facts as in example (1) except that, at the time the treatment under this section is adopted, assessment of any deficiency or credit or refund of any overpayment for the taxable years 1954 and 1955 resulting from the treatment of properties under this section is prevented by the operation of the statute of limitations. For 1956 and subsequent taxable years, the three deposits in tract No. 1 must be treated as a single property; the first deposit in tract No. 2 must be treated as a separate property; and the second and third deposits in tract No. 2 must be treated as a single property.

(c) Bases of separate properties previously included in an aggregation under section 614(b). If the taxpayer has made an election under section 614(b) to form an aggregation of operating mineral interests and if such taxpayer subsequently revokes such election for all taxable years for which it was made and treats the properties that are included within such aggregation under section 614(d) and this section by filing the statement required by paragraph (e) of this section, then the adjusted basis of each separate property (as defined in paragraph (a) of this section) that is a part of such aggregation shall be determined as if the taxpayer had made no election under section 614(b). However, if, at the time of the filing of the statement revoking the election under section 614(b), assessment of any deficiency or credit or refund of any overpayment, as the case may be, resulting from such revocation is prevented by the operation of any law or rule of law for any taxable year or years for which the election under section 614(b) was made, then the adjusted basis of each separate property that is a part of the aggregation shall be determined in accordance with the provisions contained in paragraph (a)(2) of § 1.614–6 as of the first day of the first taxable year for which the revocation is effective. After determining the adjusted basis of each separate property included within the aggregation, the taxpayer may treat such properties in any manner which is in accordance with paragraph (a) of this section. See, however, paragraph (b) of this section. The provisions of this paragraph may be illustrated by the following examples:

Example (1). Taxpayer A owns two separate tracts of land, designated No. 1 and No. 2, each of which contains three mineral deposits. The interests in the two tracts of land constitute an operating unit as defined in paragraph (c) of § 1.614–2. Taxpayer A elects under section 614(b) to form an aggregation of all the interests in the operating unit for 1954 and all subsequent taxable years. Subsequently, taxpayer A revokes such election by filing a statement in accordance with paragraph (e) of this section. Such revocation is effective for 1956 and subsequent taxable years because, at the time of the filing of the statement of revocation, assessment of any deficiency or credit or refund of any overpayment for the taxable years 1954 and 1955 resulting from such revocation is prevented by the operation of the statute of limitations. The adjusted bases of the six properties that are included within the aggregation shall be determined in accordance with paragraph (a)(2) of § 1.614–6 as of the beginning of the taxable year 1956.

Example (2). Assume the same facts as in example (1) and, in addition, assume that for taxable years to which the Internal Revenue Code of 1939 is applicable, taxpayer A treated the three deposits in tract No. 1 as a single property and the three deposits in tract No. 2 as a single property. After determining the adjusted basis of each of the six properties as illustrated in example (1), the adjusted basis of the three properties in tract No. 1 must be combined and the adjusted bases of the three properties in tract No. 2 must be combined since the manner in which such properties were treated for taxable years to which the Internal Revenue Code of 1939 is applicable is consistent with the rules contained in paragraph (a) of this section.

(d) Treatment; when effective. If a taxpayer treats any property in accordance with this section, then such treatment shall be effective for whichever of the following taxable years is the later:

(1) The latest taxable year for which an election could have been made with respect to such property under section 614(b); or

(2) The first taxable year beginning after December 31, 1953, and ending after August 16, 1954, in respect of which assessment of a deficiency or credit or refund of an overpayment, as the case may be, resulting from the treatment of such property under this section, is not prevented by

the operation of any law or rule of law on the date such treatment is adopted.

(e) Manner of adopting the treatment of properties under this section. If the taxpayer does not make an election under section 614(b) with respect to a property within the time prescribed for making such an election, then the taxpayer shall be deemed to have treated such property under this section. In such case, the manner in which such property is treated in filing the taxpayer's income tax return for the first taxable year for which the treatment of such property is effective under paragraph (d) of this section shall establish the treatment which must be consistently followed with respect to such property for subsequent taxable years. However, if the income tax return for such first taxable year is filed prior to May 1, 1961, then the taxpayer may adopt the treatment provided for under this section with respect to the property by filing a statement at any time on or before May 1, 1961, with the district director for the district in which the taxpayer's income tax return was filed for the first taxable year for which the treatment of such property is effective under paragraph (d) of this section. Such statement shall set forth the first taxable year for which the treatment of the property under this section is effective, shall revoke any previous elections made with respect to such property under section 614(b), shall state the manner in which such property was treated for taxable years subject to the Internal Revenue Code of 1939, shall state the manner in which such property is to be treated under this section, and shall be accompanied by an amended return or returns if necessary.

(f) Certain treatment under this section precludes election to aggregate under section 614(b) with respect to the same operating unit. If the taxpayer's treatment of any properties that are included within an operating unit (as defined in paragraph (c) of § 1.614–2) under section 614(d) and this section would constitute an aggregation under section 614(b) and if such taxpayer elects, or has elected, to form an aggregation within the same operating unit under section 614(b) for any taxable year for which the treatment under section 614(d) is effective, then the election made under section 614(b) shall not apply for any such taxable year.

[T.D. 6524, 26 FR 157, Jan. 10, 1961, as amended by T.D. 6859, 30 FR 13700, Oct. 28, 1965]

§ 1.614–5 Special rules as to aggregating nonoperating mineral interests.

(a) Aggregating nonoperating mineral interests for taxable years beginning before January 1, 1958. Upon proper showing to the Commissioner, a taxpayer who owns two or more separate nonoperating mineral interests in a single tract or parcel of land, or in two or more contiguous tracts or parcels of land, shall be permitted to aggregate all such interests in each separate kind of mineral deposit and treat them as one property. Permission will be granted by the Commissioner only if the taxpayer establishes that he will sustain an undue hardship if such nonoperating mineral interests are not treated as one property. Such hardship may exist, for example, if it is impossible for the taxpayer to determine the boundaries, source, or costs of the separate interests, or if a taxpayer who owns a single royalty interest, production payment, or net profits interest cannot determine the separate deposits from which his payments will be derived. In no event shall undue hardship be deemed to exist solely by reason of tax disadvantage. The treatment of such interests as one property shall be applicable for all purposes of subtitle A of the Internal Revenue Code of 1954. In no event may nonoperating mineral interests in tracts or parcels of land which are not contiguous be treated as one property. The term "two or more contiguous tracts or parcels of land" means tracts or parcels of land which have common boundaries. Common boundaries include survey lines, public roads, or similar easements for the use of land without the existence of an intervening mineral right between the tracts or parcels of land. Tracts or parcels of land which touch only at a common corner are not contiguous. For the definition of "nonoperating mineral interests", see paragraph (g) of this section.

(b) Manner and scope of election—(1) Time for filing application for permission to aggregate separate nonoperating mineral interests under paragraph (a) of this section. The application for permission to aggregate separate nonoperating mineral interests under paragraph (a) of this section shall be filed at any time on or before May 1, 1961. Such application shall indicate the first taxable year for which the aggregation is to be formed. If, prior to January 10, 1961, an application has been filed, the taxpayer need file only a supplemental application containing such additional information as is necessary to comply with the requirements of subparagraph (2) of this paragraph.

(2) Contents of application and returns under permission. The application for permission to aggregate nonoperating mineral interests under paragraph (a) of this section shall include a com-

plete statement of the facts upon which the taxpayer relies to show the undue hardship which would result if such an aggregation was not permitted. Such application shall also include a description of the nonoperating mineral interests owned by the taxpayer within the tract or tracts of land involved. A general description, accompanied by maps appropriately marked, which accurately circumscribes the scope of the aggregation and shows that the taxpayer is aggregating all the nonoperating mineral interests in a particular kind of mineral deposit within the tract or tracts of land involved will be sufficient. If the Commissioner grants permission, a copy of the letter granting such permission shall be filed with the district director for the district in which the taxpayer's income tax return was filed for the first taxable year for which such permission applies, and shall be accompanied by an amended return or returns if necessary.

(3) Election; binding effect. The election to aggregate separate nonoperating mineral interests under paragraph (a) of this section shall be binding upon the taxpayer for the first taxable year for which made and all subsequent taxable years beginning before January 1, 1958, unless consent to make a change is obtained from the Commissioner. The application for consent to make a change must set forth in detail the reason or reasons for such change. Consent to a different treatment shall not be granted where the principal purpose for such change is due to tax consequences. For rules relating to the binding effect of an election where the basis of an aggregated property in the hands of the transferee is determined by reference to the basis in the hands of the transferor, see paragraph (c) of § 1.614–6.

(4) Aggregations under the Internal Revenue Code of 1939. An application for permission to aggregate nonoperating mineral interests under paragraph (a) of this section shall be submitted in accordance with the requirements of this paragraph notwithstanding the fact that the taxpayer may have aggregated such interests for taxable years to which the Internal Revenue Code of 1939 is applicable. If such interests were aggregated for taxable years to which the Internal Revenue Code of 1939 applies and the aggregation was approved by the Internal Revenue Service for such years after full consideration thereof on its merits, such approval will generally be accepted as evidence that undue hardship would result if the aggregation were not permitted.

(c) Termination of aggregation of nonoperating mineral interests—(1) General rule. Any aggregation of nonoperating mineral interests formed under paragraphs (a) and (b) of this section shall not apply with respect to any taxable year beginning after December 31, 1957. Thus, if a taxpayer makes a binding election to form such an aggregation for taxable years beginning before January 1, 1958, then in order to form an aggregation with respect to any taxable year beginning after December 31, 1957, he must obtain permission in accordance with the rules prescribed in paragraphs (d) and (e) of this section.

(2) Bases of separate nonoperating mineral interests. If a taxpayer forms an aggregation of nonoperating mineral interests under paragraphs (a) and (b) of this section which is terminated under subparagraph (1) of this paragraph, the adjusted bases of the separate nonoperating mineral interests included in such aggregation shall be determined in accordance with paragraph (a)(2) of § 1.614–6.

(d) Aggregating nonoperating mineral interests for taxable years beginning after December 31, 1957, or for earlier taxable years. Upon proper showing to the Commissioner, a taxpayer who owns two or more separate nonoperating mineral interests in a single tract or parcel of land, or in two or more adjacent tracts or parcels of land, shall be permitted, under section 614(e), to form an aggregation of all of such interests in each separate kind of mineral deposit and treat such aggregation as one property. Permission shall be granted by the Commissioner only if the taxpayer establishes that a principal purpose in forming the aggregation is not the avoidance of tax. The fact that the aggregation of nonoperating mineral interests will result in a substantial reduction in tax is evidence that avoidance of tax is a principal purpose of the taxpayer. An aggregation formed under the provisions of this paragraph shall be considered as one property for all purposes of the Code. In no event may nonoperating mineral interests in tracts or parcels of land which are not adjacent be aggregated and treated as one property. The term "two or more adjacent tracts or parcels of land" means tracts or parcels of land that are in reasonably close proximity to each other depending on the facts and circumstances of each case. Adjacent tracts or parcels of land do not necessarily have any common boundaries, and may be separated by intervening mineral rights. For the definition of "nonoperating mineral interests", see paragraph (g) of this section.

(e) Manner and scope of election—(1) Time for filing application for permission to aggregate separate nonoperating mineral interests under section

614(e). The application for permission to aggregate separate nonoperating mineral interests under section 614(e) and paragraph (d) of this section shall be made in writing to the Commissioner of Internal Revenue, Washington, D.C. 20224. Such application shall be filed within 90 days after the beginning of the first taxable year beginning after December 31, 1957, for which aggregation is desired or within 90 days after the acquisition of one of the nonoperating mineral interests which is to be included in the aggregation, whichever is later. However, if the last day on which the application may be filed under this paragraph falls before May 1, 1961, such application may be filed at any time on or before May 1, 1961. If, prior to January 10, 1961, an application has been filed, the taxpayer need file only a supplemental application containing such additional information as is necessary to comply with subparagraph (4) of this paragraph.

(2) Election to apply section 614(e) retroactively. The application for permission to aggregate separate nonoperating mineral interests under section 614(e) and paragraph (d) of this section may be filed, at the election of the taxpayer, for any taxable year beginning before January 1, 1958, to which the Internal Revenue Code of 1954 is applicable. In such case, the application may be filed at any time on or before May 1, 1961. Such application shall designate the first taxable year for which the aggregation is to be formed. If, prior to January 10, 1961, an application has been filed, the taxpayer need file only a supplemental application containing such additional information as is necessary to comply with the requirements of subparagraph (4) of this paragraph.

(3) Limitation. If the taxpayer forms any aggregation of nonoperating mineral interests under subparagraph (2) of this paragraph, then any aggregation of nonoperating mineral interests formed under paragraphs (a) and (b) of this section shall not apply for any taxable year. The provisions of this subparagraph may be illustrated by the following example:

Example. In 1954, taxpayer A owns six separate nonoperating mineral interests designated No. 1 through No. 6. Interests Nos. 1 through 3 are royalty interests in contiguous tracts of land. Interests Nos. 4 through 6, which are located in an entirely different area from interests Nos. 1 through 3, are royalty interests in tracts of land which are not contiguous but which are adjacent to each other. In 1959 taxpayer A obtains permission and elects under section 614(e) and subparagraph (2) of this paragraph to form an aggregation of interests Nos. 4 through 6 for 1956 and all subsequent taxable years. Taxpayer A may not elect to form an aggregation of interests Nos. 1 through 3 under paragraphs (a) and (b) of this section for 1954 or any subsequent taxable year. If taxpayer A wishes to form an aggregation of interests Nos. 1 through 3, he must obtain permission under paragraph (d) of this section and this paragraph.

(4) Contents of application and returns under permission. The application for permission to aggregate nonoperating mineral interests under section 614(e) and paragraph (d) of this section shall include a complete statement of the facts upon which the taxpayer relies to show that avoidance of tax is not a principal purpose of forming the aggregation. Such application shall also include a description of the nonoperating mineral interests within the tract or tracts of land involved. A general description, accompanied by maps appropriately marked, which accurately circumscribes the scope of the aggregation and shows that the taxpayer is aggregating all the nonoperating mineral interests in a particular kind of mineral deposit within the tract or tracts of land involved will be sufficient. If the Commissioner grants permission, a copy of the letter granting such permission shall be attached to the taxpayer's income tax return for the first taxable year for which such permission applies. If the taxpayer has already filed such return, a copy of the letter of permission shall be filed with the district director for the district in which such return was filed and shall be accompanied by an amended return or returns if necessary or, if appropriate, a claim for credit or refund.

(5) Election; binding effect. The election to aggregate separate nonoperating mineral interests under section 614(e) and paragraph (d) of this section shall be binding upon the taxpayer for the first taxable year for which made and for all subsequent taxable years unless consent to make a change is obtained from the Commissioner. The application for consent to make a change must set forth in detail the reason or reasons for such change. Consent to a different treatment shall not be granted where the principal purpose for such change is due to tax consequences. For rules relating to the binding effect of an election where the basis of an aggregated property in the hands of the transferee is determined by reference to the basis in the hands of the transferor, see paragraph (c) of § 1.614–6.

(6) Aggregations under the Internal Revenue Code of 1939. An application for permission to aggregate nonoperating mineral interests under section 614(e) and paragraph (d) of this section shall be submitted in accordance with the requirements of this paragraph notwithstanding the fact that the taxpayer may have aggregated such interests for taxable years to which the Internal Revenue Code of 1939 is applicable. If such interests were aggregated for taxable years to which the

Internal Revenue Code of 1939 applies and the aggregation was approved by the Internal Revenue Service for such years after full consideration thereof on its merits, such approval will generally be accepted as evidence that avoidance of tax is not a principal purpose of forming the aggregation.

(f) **Elections; when effective.** If the taxpayer has elected to form an aggregation under either paragraph (a) or paragraph (d) of this section, the date on which the aggregation becomes effective is the first day of the first taxable year for which the election is made; except that if any separate nonoperating mineral interest included in such aggregation was acquired after such first day, the date on which the inclusion of such interest in such aggregation becomes effective is the date of its acquisition.

(g) **Definition of nonoperating mineral interests.** For purposes of this section, "nonoperating mineral interests" includes only those interests described in section 614(a) which are not operating mineral interests within the meaning of paragraph (b) of § 1.614–2. The taxpayer who holds the operating or working rights in a mineral deposit, but is not actually conducting operations with respect to such deposit, does not have a nonoperating mineral interest in such deposit notwithstanding the fact that he intends to transfer such operating rights at a later time.

[T.D. 6524, 26 FR 158, Jan. 10, 1961]

§ 1.614–6 Rules applicable to basis, holding period, and abandonment losses where mineral interests have been aggregated or combined.

(a) **Basis of property resulting from aggregation or combination—(1) General rule.** (i) When a taxpayer has aggregated as one property two or more interests under section 614(b) (prior to its amendment by section 226(a) of the Revenue Act of 1964), (c), or (e), the unadjusted basis of such aggregated property shall be the sum of the unadjusted basis of the various mineral interests aggregated. The adjusted basis of the aggregated property on the effective date of the aggregation shall be the unadjusted basis of the aggregated property, adjusted by the total of all adjustments to the bases of the several mineral interests aggregated as required by section 1016 to the effective date of aggregation. Thereafter, the adjustments to basis required by section 1016 shall apply to the total adjusted basis of the aggregated property for all purposes of subtitle A of the Code.

(ii) When a taxpayer has combined as one property two or more interests under section 614(b) (as amended by section 226(a) of the Revenue Act of 1964), the adjusted basis of such combined property shall be the sum of—

(a) The unadjusted bases of all such interests which have never been included in an aggregation; and

(b) The adjusted bases of all such interests which at some time have been included in an aggregation, as of the date on which they ceased to participate in an aggregation;

adjusted by the total of all adjustments to the bases of the several mineral interests combined, as required by section 1016,

(c) In the case of interests described in (a), for the entire period of the taxpayer's ownership of such interest; and

(d) In the case of interests described in (b), for the period, if any, between the time of deaggregation and the time of combination.

Thereafter, the adjustments to basis required by section 1016 shall apply to the total adjusted basis of the combined property for all purposes of subtitle A of the Code.

(2) **Bases upon disposition of part of, or termination of, or change in, an aggregated or combined property—(i) In general.** (a) When a taxpayer has aggregated or combined two or more separate mineral interests as one property under section 614(b) (either before or after its amendment by section 226(a) of the Revenue Act of 1964), (c), or (e) and thereafter sells, exchanges, or otherwise disposes of part of such property, the total adjusted basis of the property as of the date of sale, exchange, or other disposition shall be apportioned to determine the adjusted basis of the part disposed of and the part retained for purposes of computing gain or loss, depletion and for all other purposes of subtitle A of the Code. Such adjusted basis shall be determined by apportioning the total adjusted basis of the property between the part of the property disposed of and the part retained in the same proportion as the fair market value of each part (as of the date of sale, exchange, or other disposition) bears to the total fair market value of the property as of such date. For determining gain or loss on the sale or exchange of any part of the aggregated or combined property, the adjusted basis of the aggregated or combined property (from which the adjusted basis of the part is determined) shall not be reduced below zero.

(b) If, for any taxable year after the first taxable year for which an aggregation under section 614(b) (prior to its amendment by section 226(a) of the Revenue Act of 1964), (c), or (e) is effective—

(1) Any such aggregation is terminated for any reason other than the expiration of an aggregation by reason of section 614(b) as amended by section 226(a) of the Revenue Act of 1964 (see subdivision (ii) of this subparagraph), or

(2) The treatment of any mineral interests in any such aggregation is changed after obtaining the consent of the Commissioner,

then the adjusted basis of the aggregated property as of the first day of the first taxable year for which such termination or change is effective shall be apportioned to determine the adjusted bases of the resultant separate mineral interests, as of such first day, for purposes of computing gain or loss, depletion, and for all other purposes of subtitle A of the Code. The adjusted bases of such separate mineral interests shall be determined by apportioning the adjusted basis of the aggregated property (as of the first day of the first taxable year for which such termination or change is effective) between or among such interests in the same proportion as the fair market value of each such interest (as of such first day) bears to the total fair market value of the aggregated property as of such first day. For the purpose of determining the adjusted bases of the separate mineral interests, the adjusted basis of the aggregated property (from which the adjusted basis of each separate mineral interest is determined) shall not be reduced below zero.

(ii) Allocation of basis of aggregation of operating mineral interests in oil and gas wells as of the first day of the first taxable year beginning after December 31, 1963—(a) Fair market value method. Unless the taxpayer elects to use the allocation of adjustments method of determining basis provided in (b) of this subdivision (ii), the adjusted basis as of the first day of the first taxable year beginning after December 31, 1963, of each interest which was participating in an aggregation of operating mineral interests on the day preceding such first day shall be determined by multiplying the adjusted basis of the aggregation by a fraction the numerator of which is the fair market value of such interest and the denominator of which is the fair market value of such aggregation. For purposes of this subdivision (a), the adjusted basis and the fair market value of the aggregation, and the fair market value of such interest, shall be determined as of the day preceding the first day of the first taxable year which begins after December 31, 1963. Unless the taxpayer elects to use the allocation of adjustments method, he shall obtain accurate and reliable information, and keep records with respect thereto, establishing all facts necessary for making the computation prescribed in this subdivision (a). See example (5) of subparagraph (3) of this paragraph.

(b) Allocation of adjustments method. (i) The taxpayer may elect to determine basis by an allocation of adjustments in lieu of the fair market value method prescribed in (a) of this subdivision (ii). In such a case, the adjusted basis (as of the first day of the first taxable year beginning after December 31, 1963) of each interest which was participating in an aggregation of operating mineral interests on the day preceding such first day is the unadjusted basis of such interest immediately after its acquisition by the taxpayer, adjusted by the total of all adjustments to its basis as required by section 1016 to the effective date of aggregation, and by that portion of those section 1016 adjustments to the basis of the aggregation which is reasonably attributable to such interest. For this purpose, two or more interests which are being combined upon deaggregation shall be treated as one interest. An adjustment to the basis of the aggregation is reasonably attributable to such interest to the extent that the adjustment thereto resulted from inclusion of the interest in the aggregation, even though such interest would not have been entitled to the adjustment to the same extent if such interest had been treated separately because of the 50 percent of taxable income limitation or for any other reason. In a case in which the amount of a percentage depletion deduction which was allowed with respect to an aggregation was limited by the 50 percent of taxable income limitation of section 613(a), the portion of such amount which is attributable to each of the interests in the aggregation shall be determined by multiplying such amount by a fraction, the numerator of which is the gross income from such interest and the denominator of which is the gross income from the aggregation. The determination as to which property a particular adjustment is attributable may be based upon records of production or any other facts which establish the reasonableness of the determination. See example (6) of subparagraph (3) of this paragraph.

(ii) If, under the adjustment described in (i) of this subdivision (b), the total of the adjusted bases of the interests which were included in the aggregation exceeds the adjusted basis of the aggregation, the adjusted bases of the interests shall be further adjusted so that the total of the adjusted

bases of the interests equals the adjusted basis of the aggregation. This further adjustment shall be made by reducing the basis of each interest (other than an interest having a basis of zero) by an amount which is determined by multiplying such excess by a fraction, the numerator of which is the adjusted basis of such interest after making the adjustment described in (i) of this subdivision (b) and the denominator of which is the total of the adjusted bases of all such interests after making the adjustment described in (i) of this subdivision (b). See example (6) of subparagraph (3) of this paragraph.

(iii) The election provided for in this subdivision (b) shall be made not later than the time prescribed by law for filing the taxpayer's income tax return (including extensions thereof) for the first taxable year beginning after December 31, 1963, and shall be made in a statement attached to such return.

(3) The application of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example (1). A taxpayer owning three operating mineral interests, designated Nos. 1, 2, and 3, within a single operating unit, properly elects to aggregate such properties under section 614(b) for the calendar year 1954 in his income tax return filed on April 15, 1955. The unadjusted bases and adjustments under section 1016 for depletion through December 31, 1953, in respect of such properties are as follows:

	Unadjusted basis	Adjustments under section 1016
No. 1	$25,000	$27,000
No. 2	18,000	10,000
No. 3	15,000	4,000
Total	58,000	41,000

The adjusted basis of the aggregated property as of January 1, 1954, is $17,000 ($58,000–$41,000).

Example (2). Assume the same facts as in example (1), except that a portion of the aggregated property is sold on June 1, 1956, for $15,000 which is also the fair market value of such portion on the date of sale. In order to determine the gain or loss from this sale as well as the adjusted basis of the retained property, an apportionment must be made. The aggregated property had a fair market value of $25,000 on the date of sale. From January 1, 1954, through May 31, 1956, $10,000 of depletion has been allowed with respect to the aggregated property. The adjusted basis of the portion sold is determined as follows:

$7,000 (adjusted basis of aggregated property)×$15,000÷$25,000=$4,200 (adjusted basis of portion sold)

Therefore, the gain on this sale of the portion sold is $10,800 ($15,000–$4,200). The adjusted basis of the property retained is $2,800 ($7,000–$4,200).

Example (3). Assume the same facts as in example (2), except that instead of selling, the taxpayer subleases one of the leases making up the aggregated property, retaining a one-eighth royalty interest therein. The fair market value of such lease is $15,000 on the date of the sublease. The adjusted basis of such royalty interest is $4,200 which is computed as follows:

$7,000 (adjusted basis of aggregated property)×$15,000 (FMV of portion transferred)÷$25,000 (FMV of aggregated property)

Example (4). In 1953, a taxpayer owned mineral interests Nos. 1, 2, and 3 which he operated as a unit. He owned no other operating interests during that year. The unadjusted bases of these properties were $10,000, $15,000, and $20,000, respectively, and depletion allowed through December 31, 1953, was $5,000 with respect to each property. The taxpayer operated these properties during the year 1954 and, in addition, operated as part of the unit mineral interest No. 4 which he acquired on July 1, 1954, on which date he made the first exploration expenditure with respect thereto. He paid $20,000 for No. 4. In his return for the calendar year 1954, the taxpayer elected under section 614(b) to aggregate all of these mineral interests. The taxpayer must compute cost depletion for the calendar year 1954 on the basis of an aggregated property with an adjusted basis of $30,000 ($45,000–$15,000) for the period from January 1 to June 30, and with an adjusted basis of $50,000 (less depletion for the first six months) for the period from July 1 to December 31. If applicable, the taxpayer must compute percentage depletion on the basis of gross income and taxable income from the aggregated property for the entire year, including the gross income and deductions with respect to operating mineral interest No. 4 for the period from July 1 to December 31. If a portion of the aggregated property is sold during the first six months, its adjusted basis must be determined at the time of sale with an adjustment for depletion to the date of sale. If percentage depletion is applicable, it must be allocated on an equitable basis to the periods prior and subsequent to the date of sale in order to determine the adjustment for depletion to the date of sale.

Example (5). A taxpayer owns two operating mineral interests in oil wells, designated Nos. 1 and 2, in tract A, and another such interest, designated No. 3, in tract B. All three interests are in the same operating unit (as defined in paragraph (c) of § 1.614–2). The taxpayer, who is on a calendar year basis, has properly elected under § 1.614–2 to aggregate such interests for the calendar years 1954 through 1963. The unadjusted bases and adjustments under section 1016 for depletion through December 31, 1953, in respect of such interests are as follows:

	Unadjusted basis	Adjustments under section 1016
No. 1	$42,000	$11,000
No. 2	37,000	4,000
No. 3	19,000	23,000
Total	98,000	38,000

The adjusted basis of the aggregated property as of January 1, 1954, is therefore $60,000 ($98,000 minus $38,000). The taxpayer properly elects under section 614(b) and § 1.614–8 to treat Nos. 1 and 2 as separate properties for the calendar year 1964 and thereafter and does not elect to use the allocation of adjustments method of determining basis provided in subparagraph (2)(ii)(b) of this paragraph. No. 3 will be treated as a separate property, also, because it is in a different tract than the taxpayer's other interests. From January 1, 1954, through December 31, 1963, $50,000 of depletion has been allowed with

respect to the aggregated property, leaving an adjusted basis of $10,000 ($60,000 minus $50,000) on January 1, 1964. On December 31, 1963, the aggregated property has a fair market value of $40,000. Nos. 1, 2, and 3 have fair market values of $16,000, $22,000, and $2,000, respectively. Accordingly, the adjusted bases of Nos. 1, 2, and 3 on January 1, 1964, are $4,000:

$10,000 (adjusted basis of aggregated property) × 16,000 ÷ 40,000; $5,500 ($10,000 × 22,000/40,000); and $500 ($10,000 × 2,000/40,000, respectively)

Example (6). A taxpayer owns four operating mineral interests in oil wells, designated Nos. 1, 2, 3, and 4. All four interests are in the same operating unit and the same tract or parcel of land. The taxpayer, who is on a calendar year basis, has properly elected under § 1.614–2 to aggregate such interests for the calendar years 1954 through 1963. The taxpayer properly elects under section 614(b) and paragraph (a) of § 1.614–8 to treat Nos. 1 and 2 as separate properties for the calendar year 1964 and thereafter. The taxpayer also properly elects to use the allocation of adjustments method of determining basis as provided in subparagraph (2)(ii)(b) of this paragraph. The unadjusted bases of Nos. 1, 2, and combined 3 and 4, the adjustments attributable to each, and the deaggregated basis of each (prior to further adjustment as provided in subparagraph (2)(ii)(b)(ii) of this paragraph) are as follows:

	Basis upon acquisition	Adjustments to time of aggregation	Attributable adjustments during aggregation	Basis upon deaggregation after first adjustment
No. 1	$35,000	$1,000	$16,000	$18,000
No. 2	30,000	11,000	23,000	0
No. 3	25,000	3,000	5,000	......
No. 4	10,000	12,000	9,000	6,000
Total	100,000	27,000	53,000	24,000

The total of the adjusted bases (prior to further adjustment) of the interests which were included in the aggregation is $24,000 while the adjusted basis of the aggregation is $20,000 ($100,000 minus the sum of $27,000 and $53,000). Therefore, the adjusted bases of the interests are further reduced by $4,000 ($24,000 minus $20,000). The adjusted basis of No. 1 of $18,000 is further reduced by $3,000 [$4,000 × (18,000 ÷ 24,000)] to $15,000. Similarly, the adjusted basis of combined Nos. 3 and 4 of $6,000 is further reduced by $1,000 [$4,000 × (6,000 ÷ 24,000)] to $5,000. Assume further that the taxpayer also owns interest No. 5 in the same tract or parcel of land, that such interest was not a part of any aggregation, that such interest had a basis of $15,000 upon acquisition and had subsequent adjustments in reduction of basis totalling $17,000, and that the taxpayer does not elect to treat such interest as a separate property. In such case, Nos. 3, 4, and 5 will be combined. The combination will have an adjusted basis of $3,000, determined by adding the unadjusted basis of No. 5 ($15,000) and the adjusted bases of combined Nos. 3 and 4 upon deaggregation ($5,000), and subtracting from the total thereof ($20,000) the adjustments to No. 5 ($17,000).

(4) Basis for gain and loss where mineral interests acquired before March 1, 1913, are included in an aggregation. Where mineral interests acquired before March 1, 1913, are included in an aggregation under section 614(b), (c), or (e), the aggregated property has two bases, one for the determination of gain and another for the determination of loss upon the disposition of the whole or a part of the aggregated property. For the purpose of determining gain, the adjusted basis of the aggregated property on the effective date of aggregation shall be the sum of—

(i) The unadjusted bases of those mineral interests acquired on or after March 1, 1913, plus

(ii) The cost of any interest acquired before March 1, 1913 (adjusted for the period before March 1, 1913), or the fair market value of such interest as of March 1, 1913, whichever is greater,

and such sum shall be adjusted by the total of all adjustments to the bases of the several mineral interests aggregated as required by section 1016 to the effective date of aggregation. For the purpose of determining loss, the adjusted basis of the aggregated property on the effective date of aggregation shall be the sum of—

(iii) The unadjusted bases of those mineral interests acquired on or after March 1, 1913, plus

(iv) The cost of those interests acquired before March 1, 1913, adjusted for the period before March 1, 1913,

and such sum shall be adjusted by the total of all adjustments to the bases of the several mineral interests aggregated as required by section 1016 to the effective date of aggregation. Thereafter, the adjustments to basis required by section 1016 shall apply to the total adjusted basis of the aggregated property for all purposes of the Code. Upon disposition of a part of the aggregated property, or upon termination of the aggregation for any reason, or upon change in the treatment of any mineral interests in the aggregation with consent of the Commissioner, the adjusted basis for determining gain and the adjusted basis for determining loss with respect to each resultant part of the aggregated property shall be determined in accordance with subparagraph (2) of this paragraph.

The provisions of this subparagraph may be illustrated by the following examples:

Example (1). At the close of 1953 a taxpayer owned two operating mineral interests designated as Nos. 1 and 2 in the same operating unit. Operating mineral interest No. 1 was acquired by the taxpayer before March 1, 1913, and on such date its basis with reference to its fair market value was $50,000 and its adjusted basis with reference to its cost was $44,000. The unadjusted basis of operating mineral interest No. 2, acquired after March 1, 1913, was $30,000. Adjustments under section 1016 for depletion from March 1, 1913, through December 31, 1953, were $37,000 for operating mineral interest No. 1 and $20,000 for operating mineral interest No. 2. Assume that the taxpayer elected for the taxable year 1954 to aggregate operating mineral interests Nos. 1 and 2. The adjusted basis of the aggregated property as of January 1, 1954, for the purpose of determining gain would be $23,000 ($50,000 plus $30,000) minus ($37,000 plus $20,000). For the purpose of determining loss, the adjusted basis would be $17,000 ($44,000 plus $30,000) minus ($37,000 plus $20,000).

Example (2). Assume the same facts as in example (1) and further assume that for the taxable years 1954 and 1955, the taxpayer was allowed $5,000 of depletion on the aggregated property, that on January 1, 1956, he sold a portion of the aggregated property for $20,000, and that, as of January 1, 1956, the aggregated property had a fair market value of $24,000. At the time of sale, the adjusted basis of the aggregated property for the purpose of determining gain was $18,000 ($23,000–$5,000); and the adjusted basis for the purpose of determining loss was $12,000 ($17,000–$5,000). The adjusted basis of the portion sold would be computed as follows:

[$20,000 (FMV of portion sold) ÷ $24,000 (FMV of aggregated property)] × $18,000 (adjusted basis for gain) = $15,000 (adjusted basis of portion sold)

Taxpayer's gain would then be computed as follows: $20,000 (amount received for portion sold), less $15,000 (adjusted basis of portion sold) = $5,000 (gain on portion sold).

The adjusted basis of the portion retained as of January 1, 1956, for the purpose of determining gain is $3,000 ($18,000–$15,000). For the purpose of determining loss, the adjusted basis is $2,000 ($12,000–$10,000).

Example (3). Assume the same facts as in example (2), except that a portion of the aggregated property was sold for $5,000 and that the fair market value of the aggregated property at the time of sale was $10,000. The adjusted basis of the portion sold would be computed as follows:

[$5,000 (FMV of portion sold) ÷ $10,000 (FMV of aggregated property)] × $12,000 (adjusted basis for loss) = $6,000 (adjusted basis of portion sold)

Taxpayer's loss would then be computed as follows: $5,000 (amount received for portion sold), less: $6,000 (adjusted basis of portion sold) = ($1,000) loss on portion sold.

(5) **Basis for gain and loss where mineral interests acquired before March 1, 1913, are included in a combination and one or more of such interests have not previously been included in an aggregation.** Where mineral interests acquired before March 1, 1913, are included in a combination under section 614(b) and § 1.614–8 and one or more of such interests have not previously been included in an aggregation, the combined property has two bases, one for the determination of gain and another for the determination of loss upon the disposition of the whole or a part of the combined property. For the purpose of determining gain, the adjusted basis of the combined property on the effective date of combination shall be the sum of—

(i) The adjusted bases at the time of deaggregation, as determined under subparagraph (2) of this paragraph, of all interests which have previously been included in an aggregation,

(ii) The unadjusted bases of other mineral interests acquired on or after March 1, 1913, and

(iii) The cost of each other interest acquired before March 1, 1913 (adjusted for the period before March 1, 1913), or the fair market value of such interest as of March 1, 1913, whichever is greater,

and such sum shall be adjusted by the total of all adjustments to the bases of the mineral interests as required by section 1016 to the effective date of combination. For the purpose of determining loss, the adjusted basis of the combined property on the effective date of combination shall be the sum of—

(iv) The adjusted bases at the time of deaggregation, as determined under subparagraph (2) of this paragraph, of all interests which have previously been included in an aggregation,

(v) The unadjusted bases of other mineral interests acquired on or after March 1, 1913, and

(vi) The cost of other mineral interests acquired before March 1, 1913, adjusted for the period before March 1, 1913,

and such sum shall be adjusted by the total of all adjustments to the bases of the mineral interests as required by section 1016 to the effective date of combination. Thereafter, the adjustments to basis required by section 1016 shall apply to the total adjusted basis of the combined property for all purposes of the Code. Upon disposition of a part of the combined property, the adjusted basis for determining gain and the adjusted basis for determining loss with respect to each resultant part of the combined property shall be determined in accordance with subparagraph (2) of this paragraph.

(b) **Holding period of aggregated or combined properties.** Where a taxpayer sells or exchanges either a part or all of an aggregated or combined property which includes part or all of a mineral interest which the taxpayer has held for (1 year 6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less, the sales price and adjusted basis attributable

to the interest sold must be apportioned in proportion to the relative fair market values as of the date of sale to determine the amount of income represented by the sale of property held for (1 year 6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less. The application of this rule may be illustrated by the following example:

Example. Taxpayer A owns operating mineral interests Nos. 1, 2, and 3. He acquired interests Nos. 1 and 2 in 1953 but purchased and made development expenditures on interest No. 3 on December 1, 1954. In his return for the taxable year 1954, taxpayer A elects to aggregate interests Nos. 1, 2, and 3 which are operated as a unit. On May 1, 1955, taxpayer A sells the north half of the aggregated property which includes portions of interests Nos. 1, 2, and 3. The sales price of the north half was $80,000; the adjusted basis of the aggregated property as of the date of sale was $20,000; and the fair market value of the aggregated property as of the date of sale was $100,000. The adjusted basis applicable to the north half is computed as follows:

[$80,000 (FMV of portion sold) ÷ $100,000 (FMV of aggregated property)] × $20,000 (adjusted basis of aggregated property) = $16,000 (adjusted basis of portion sold).

The total gain on the sale is $64,000 ($80,000–$16,000).

The gain attributable to the sale of the portion held for six months or less is computed as follows (assuming that the fair market value of the portion of No. 3 included in the sale as of the date of sale was $30,000):

[$30,000 (FMV of portion of No. 3 sold) ÷ $80,000 (FMV of north half)] × $16,000 (adjusted basis of north half) = $6,000 (adjusted basis of portion of No. 3 sold).

The gain on the portion of No. 3 sold is $24,000 ($30,000–$6,000).

(c) **Acquisition of property with transferor's basis.** If a separate property or an aggregated or combined property is acquired in a transaction in which the basis of such property in the hands of the taxpayer is determined by reference to the basis of such property in the hands of a transferor, then the election of such transferor as to the treatment of such separate, aggregated, or combined property shall be binding upon the taxpayer for all taxable years ending after the transfer unless, in the case of an aggregation, the aggregation terminates or consent to make a change is obtained under paragraph (d)(4) of § 1.614–2, paragraph (f)(7) of § 1.614–3, or paragraph (b)(3) or (e)(5) of § 1.614–5, whichever is applicable.

(d) **Abandonment and casualty losses.** In the case of mineral interests which are aggregated or combined as one property, no losses resulting from worthlessness or abandonment are allowable until all the mineral rights in the entire aggregated or combined property are proven to be worthless or until the entire aggregated or combined property is disposed of or abandoned. Casualty losses are allowable in accordance with the rules applicable to casualty losses in general. For rules applicable to losses in general, see section 165 and the regulations thereunder.

[T.D. 6524, 26 FR 159, Jan. 10, 1961, as amended by T.D. 6859, 30 FR 13701, Oct. 28, 1965; T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 7730, 45 FR 72650, Nov. 3, 1980]

§ 1.614–7 Extension of time for performing certain acts.

Sections 1.614–2 to 1.614–5, inclusive, require certain acts to be performed on or before May 1, 1961 (the first day of the first month which begins more than 90 days after the regulations under section 614 were published in the FEDERAL REGISTER as a Treasury decision). The district director may, upon good cause shown, extend for a period not exceeding 6 months the period within which such acts are to be performed, and shall, if the interests of the Government would otherwise be jeopardized thereby, grant such an extension only if the taxpayer and the district director agree in writing to a corresponding or greater extension of the period prescribed for the assessment of the tax, or in the case of taxable years described in section 614(c)(3)(E), the assessment of the tax resulting from the exercise or change in an election.

[T.D. 6561, 26 FR 3523, April 25, 1961]

§ 1.614–8 Elections with respect to separate operating mineral interests for taxable years beginning after December 31, 1963, in the case of oil and gas wells.

(a) **Election to treat separate operating mineral interests as separate properties—(1) General rule.** If a taxpayer has more than one operating mineral interest in oil and gas wells in one tract or parcel of land, he may elect to treat one or more of such interests as separate properties for taxable years beginning after December 31, 1963. Any such interests with respect to which the taxpayer does not so elect shall be combined and treated as one property. Nonoperating mineral interests may not be included in such combination. There may be only one such combination in one tract or parcel. Any such combination of interests shall be considered as one property for all purposes of subtitle A of the Code for the period to which the election applies. The preceding sentence does not preclude the use of more than one account under a single method of computing depreciation or the use of more than one method of computing depreciation under section 167, if otherwise proper. Any reasonable and consistently applied method or methods of computing depreciation of the improve-

ments made with respect to the separate interests which are combined may be continued in accordance with section 167 and the regulations thereunder. Except as provided in paragraph (b) of this section, such an interest in one tract or parcel may not be combined with such an interest in another tract or parcel. For rules with respect to the allocation of the basis of an aggregation of separate operating mineral interests under this section among such interests as of the first day of the first taxable year beginning after December 31, 1963, see paragraph (a)(2)(ii) of § 1.614–6. For the definition of "operating mineral interest" see paragraph (b) of § 1.614–2.

(2) **Election in respect of newly discovered or acquired interest or interest ceasing to participate in cooperative or unit plan of operation.** (i) If the taxpayer makes an election under this paragraph in respect of an operating mineral interest in a tract or parcel of land and, after the taxable year for which such election is made, an additional operating mineral interest in the same tract or parcel is discovered or acquired by the taxpayer or is the subject of an election under this paragraph because it ceases to participate in a cooperative or unit plan of operation to which paragraph (b) of this section applies, the additional operating mineral interest shall be treated—

(a) If there is no combination of interests in such tract or parcel, as a separate property unless the taxpayer elects to combine it with another interest, or

(b) If there is a combination of interests in such tract or parcel, as part of such combination unless the taxpayer elects to treat it as a separate property.

(ii) The application of this subparagraph may be illustrated by the following example:

Example. Prior to 1964 a taxpayer acquired, and incurred development expenditures with respect to, three operating mineral interests in oil, designated Nos. 1, 2, and 3. All three interests are in the same tract or parcel of land. For the taxable year 1964, the taxpayer elects to treat such interests as three separate properties. During the taxable year 1965, the taxpayer discovers and incurs development costs with respect to a fourth operating mineral interest, No. 4, in the same tract of land. During the taxable year 1966, the taxpayer discovers and incurs development costs with respect to a fifth operating mineral interest, No. 5, in the same tract of land. If the taxpayer makes no election relative to No. 4 for 1965, such interest will thereafter be treated as a separate property. Alternatively, the taxpayer may make an election for 1965 to combine No. 4 with any one (and only one) of the three other interests and to treat such combination as one property. If, for example, he elects to combine No. 4 with No. 3, then in 1966, No. 5 will automatically become part of the combination of Nos. 3 and 4 if no election is made to treat it as a separate property. After the combination of Nos. 3 and 4 is formed, Nos. 1 and 2, which were acquired or discovered prior to the formation of the combination and which were not included in such combination within the time prescribed, may not be included in that or any other combination. However, see subparagraph (3)(iv) of this paragraph.

(3) **Manner and scope of election—(i) Election; when made.** Except as provided hereafter in this subdivision (i), any election under subparagraph (1) or (2) of this paragraph shall be made for each operating mineral interest not later than the time prescribed by law for filing the income tax return (including extensions thereof) for whichever of the following taxable years is later:

(a) The first taxable year beginning after December 31, 1963; or

(b) The first taxable year in which any expenditure for development or operation in respect of such operating mineral interest is made by the taxpayer after his acquisition of such interest.

Notwithstanding the provisions of (a) and (b), if it is determined that the operating mineral interest in respect of which the election is to be made was, during what would otherwise be the entire effective period of the election insofar as it would apply to the appropriate taxable year determined under (a) and (b), participating in a cooperative or unit plan of operation to which section 614(b)(3) applies, the election shall be made not later than the time prescribed by law for filing the income tax return (including extensions thereof) for the taxable year in which the interest ceases to participate in the cooperative or unit plan. See subdivision (iii) of this subparagraph for provisions relating to the effective date of an election and paragraph (b) of this section for provisions relating to certain unitization or pooling arrangements. For purposes of this subparagraph, expenditures for development include any intangible drilling or development costs within the purview of section 263(c). Delay rentals are not considered as expenditures for development. For purposes of this subparagraph, the acquisition of an option to acquire an economic interest in minerals in place does not constitute the acquisition of a mineral interest.

(ii) **Election; how made.** Any election under this paragraph shall be made by a statement attached to the income tax return of the taxpayer for the first taxable year for which the election is made. This statement shall identify by name, code number, or other means the operating mineral interests within the same tract or parcel of land which the taxpayer is electing to treat as separate properties or in combination, as the case may be. The statement shall also identify by name, code number, or other means the tract or parcel and

shall set forth the facts upon which its treatment as a single and entire tract or parcel is based. See paragraph (a)(3) of § 1.614–1. However, if the taxpayer is electing to treat all of his operating mineral interests in a tract or parcel as separate properties, a blanket election with respect to all of such interests in that tract or parcel which are owned by the taxpayer at the time the election is made will suffice and only the tract or parcel itself need be so identified. The taxpayer shall maintain and have available records and maps sufficient to clearly define the tract or parcel and all of the taxpayer's operating mineral interests therein.

(iii) Election; when combination effective. (a) If, by reason of the exercise or nonexercise of an election under this paragraph, a combination is formed of two or more operating mineral interests, all of which are owned and operated by a taxpayer on the first day of the first taxable year beginning after December 31, 1963, and are not participating in a cooperative or unit plan of operation to which paragraph (b) of this section applies on such first day, the combination is effective on such first day.

(b) If, by reason of the exercise or nonexercise of an election under this paragraph, a combination of operating mineral interests not described in (a) of this subdivision (including a combination described in (a) to which another operating mineral interest is added) is formed, the date on which each operating mineral interest which is being combined by the taxpayer for the first time enters into the combination is the later of (1) the earliest date within the taxable year affected on which the taxpayer incurred any expenditure for development or operation of such interest at a time when such interest was not participating in a cooperative or unit plan of operation to which paragraph (b) of this section applies, or (2) the earliest date on which the taxpayer incurred any expenditure for development or operation of any other interest with which such interest is to be combined at a time when such other interest was not participating in a cooperative or unit plan of operation to which paragraph (b) of this section applies.

(c) The application of these provisions may be illustrated by the following examples:

Example (1). In 1963, a taxpayer owned and operated mineral interests Nos. 1 and 2, both of which are in the same tract or parcel of land. Neither No. 1 nor No. 2 participates in a cooperative or unit plan of operation. The taxpayer, who is on a calendar year basis, continued to own and operate these interests during the year 1964, and made no election with respect to such interests in his income tax return for that year. As a result, Nos. 1 and 2 are combined as of January 1, 1964.

Example (2). Assume that the taxpayer described in example (1) discovered operating mineral interests Nos. 3 and 4 in the same tract or parcel of land as Nos. 1 and 2, that he made his first expenditures for the development of No. 3 on June 1, 1964, and of No. 4 on September 1, 1964, and that, in a timely return for 1964, he elected to treat No. 3 as a separate property and made no election with respect to No. 4. As a result, No. 3 is treated as a separate property and No. 4 joins the combination of Nos. 1 and 2 as of September 1, 1964.

Example (3). On March 1, 1964, a taxpayer acquired a tract or parcel of land containing operating mineral interests Nos. 1 and 2. The taxpayer made his first operating expenditures on No. 1 on April 1, 1964. On October 1, 1964, the taxpayer made his first development expenditures with respect to operating mineral interest No. 2. The taxpayer made no election with respect to these interests. As a result, Nos. 1 and 2 enter into a combination as of October 1, 1964.

(iv) Election; binding effect. A valid election made under section 614(b) and this subparagraph shall be binding upon the taxpayer for the first taxable year for which made and for all subsequent taxable years. However, notwithstanding the preceding sentence, an election to treat one or more operating mineral interests as separate properties shall not prevent the making of a later election to combine a newly discovered or acquired operating mineral interest with one of such interests, if no other combination exists in the tract or parcel of land on the date when the later election would become effective under subdivision (iii) of this subparagraph. Nor will an election to treat an operating mineral interest as a separate property prevent its treatment with another interest as a single property under paragraph (b) of this section if such interest later participates in a cooperative or unit plan of operation to which paragraph (b) applies. For rules relating to the binding effect of an election in certain cases in which the basis of a separate or combined property in the hands of the transferee is determined by reference to the basis in the hands of the transferor, see paragraph (c) of § 1.614–6.

(b) Certain unitization or pooling arrangements. (1) Except as provided in this paragraph, if one or more of the taxpayer's operating mineral interests, or a part or parts thereof, participate, under a voluntary or compulsory unitization or pooling agreement as defined in subparagraph (6) of this paragraph, in a single cooperative or unit plan of operation, then for the period of such participation in taxable years beginning after December 31, 1963, such interest or interests, and part or parts thereof, included in such unit, shall be treated for purposes of subtitle A of the Code as one property, separate from the interest or interests, or part or parts thereof, not included in such unit.

(2) Subparagraph (1) of this paragraph shall apply to a voluntary agreement only if all the operating mineral interests covered by the agree-

ment are in the same deposit or are in two or more deposits, the joint development or production of which is logical, without taking tax benefits into account, from the standpoint of geology, convenience, economy, or conservation, and which are in tracts or parcels of land which are contiguous or in close proximity. Operating mineral interests under a voluntary agreement to which subparagraph (1) does not apply are subject to the rules contained in paragraph (a) of this section. For purposes of this paragraph an agreement is voluntary unless required by the laws or rulings of any State or any agency of any State.

(3) Notwithstanding the provisions of subparagraph (1) of this paragraph, if the taxpayer, for the last taxable year beginning before January 1, 1964, treated as separate properties two or more operating mineral interests which participate, under a voluntary or compulsory unitization or pooling agreement entered into in any taxable year beginning before January 1, 1964, in a single cooperative or unit plan of operation, and if it is determined that such treatment was proper under the law applicable to such taxable year, the taxpayer may continue to treat all such interests in a consistent manner for the period of such participation. If it is determined that such treatment was not proper under the law applicable to such taxable year, or if the taxpayer does not continue to treat all such interests in a manner consistent with the treatment of them for the last taxable year beginning before January 1, 1964, the treatment of the interests shall be in accordance with the provisions of subparagraph (1).

(4) If only a part of an operating mineral interest, which interest is not being treated under paragraph (a) of this section as part of a combination of interests, participates in a unit or pool, such part shall, for the period of its participation in the unit or pool, be treated for purposes of this section as being separate from the nonparticipating portion of the operating mineral interest of which it is a part. A portion of the adjusted basis and of the units of mineral of such operating mineral interest remaining at the beginning of the period described in the preceding sentence shall be allocated to the participating part in accordance with the principles contained in paragraph (a)(2)(i)(a) of § 1.614–6 as if such participating part had been sold. If participation in the unit or pool ends, the separate status of the participating part shall immediately terminate. At such time the adjusted basis of such part and the units of mineral with respect to such part remaining at the time of termination shall be added to the adjusted basis and to the remaining units of mineral of the nonparticipating portion of the operating mineral interest. During the period of participation in the unit or pool such participating part shall not be treated separately from the nonparticipating portion of the operating mineral interest in applying section 165.

(5) Where an operating mineral interest which is being treated under paragraph (a) of this section as part of a combination of interests begins participation in a unit or pool, the combination shall remain in force but the treatment of such participating interest as a part of the combination shall be suspended for the period of its participation in the unit or pool. If, for example, a taxpayer owns operating mineral interests Nos. 1, 2, and 3 in a single tract or parcel of land, elects to treat No. 1 as a separate property (with mineral interests Nos. 2 and 3 thus being combined), is later required by an agency of a State to place No. 2 in a unit, and subsequently discovers operating mineral interest No. 4 in the same tract or parcel of land, then under paragraph (a)(2)(i)(b) of this section No. 4 will automatically be combined with No. 3 unless the taxpayer elects to treat it as a separate property. Under this subparagraph, an interest may be treated as part of a combination for a portion of a taxable year and as part of a unit or pool for a portion of a taxable year. At the commencement of participation in the unit or pool, a portion of the adjusted basis of the combination and a portion of the units of mineral with respect to the combination remaining at that time shall be allocated to such participating interest in accordance with the principles contained in paragraph (a)(2)(i)(a) of § 1.614–6 as if such interest had been sold. During the period of participation in the unit or pool such participating interest is nevertheless treated as a part of the combination for purposes of paragraph (d) of § 1.614–6. If participation in the unit or pool ends, the treatment of such interest as participating in the unit or pool shall immediately terminate. At such time, the adjusted basis of the participating interest and the units of mineral with respect to such interest remaining at the time of termination shall be added to the adjusted basis and to the remaining units of mineral of the nonparticipating portion of the combination. In determining the adjusted basis of the participating interest at the time of termination there shall be taken into account any section 1016 adjustments attributable to such interest for the period of its participation in the unit or pool. If two or more operating mineral interests of the taxpayer participate in a unit or pool and are treated as one property under subpara-

graph (1) of this paragraph, and if participation by such interests in the unit or pool terminates, the adjusted basis of each such interest at the time of termination shall be separately determined. If the total of the adjusted bases of such interests upon termination of their participation in the unit or pool exceeds the adjusted basis of such one property, then the adjusted bases of such interests shall be further adjusted by applying the principles contained in paragraph (a)(2)(ii)(b)(ii) of § 1.614–6 so that the total of the adjusted bases of such interests equals the adjusted basis of such one property. In addition, the units of oil and gas estimated to be attributable to a participating interest at the time of termination of participation shall be restored to the units of oil and gas of the combination of which it is a part. The rules stated in this subparagraph with respect to an operating mineral interest which is being treated under paragraph (a) of this section as part of a combination and which begins participation in a unit or pool shall also apply to a portion of an operating mineral interest which is being treated under paragraph (a) as part of a combination if such portion begins participation in a unit or pool.

(6) As used in this paragraph, the term "unitization or pooling agreement" means an agreement under which two or more persons owning operating mineral interests agree to have the interests operated on a unified basis and further agree to share in production on a stipulated percentage or fractional basis regardless of from which interest or interests the oil or gas is produced. In addition, in a situation in which one person owns operating mineral interests in several leases, an agreement of such person with his several royalty owners to determine the royalties payable to each on a stipulated percentage basis regardless of from which lease or leases oil or gas is obtained is also considered to be a unitizaiion or pooling agreement. No formal cross-conveyance of properties is necessary. An agreement between co-owners of a tract or parcel of land or a part thereof for the development of the property by one of such co-owners for the account of all is not a unitization or pooling agreement, provided that the agreement does not affect ownership of minerals or entitle any such co-owner to share in production from any operating mineral interests other than his own.

(c) **Operating mineral interest defined.** For the definition of the term "operating mineral interest" as used in this section, see paragraph (b) of § 1.614–2.

(d) **Alternative treatment under Internal Revenue Code of 1939.** If, on the day preceding the first day of the first taxable year beginning after December 31, 1963, the taxpayer has any operating mineral interests which he treats under section 614(d) (as in effect before the amendments made by the Revenue Act of 1964) and § 1.614–4, such treatment shall be continued and shall be deemed to have been adopted pursuant to the provisions of section 614(b) and paragraph (a) of this section. Accordingly, a taxpayer, who has four operating mineral interests in a single tract or parcel of land, and who has treated two of such interests as one property and two of such interests as separate properties under section 614(d) prior to the first day of the first taxable year beginning after December 31, 1963, is deemed to have adopted such treatment pursuant to the provisions of section 614(b) and paragraph (a) of this section. Hence, in the absence of an election to the contrary, a fifth operating mineral interest in the same tract or parcel acquired by the taxpayer in a taxable year beginning after December 31, 1963, will, after an expenditure for development or operation, be combined with the combination of two interests made under section 614(d). Furthermore, an election which was made for a taxable year beginning before January 1, 1964, under section 614(d) as then in effect will be binding for all taxable years beginning after December 31, 1963, even though the time for making an election under section 614(b) and paragraph (a) of this section has not elapsed.

[T.D. 6859, 30 FR 13703, Oct. 28, 1965]

§ 1.615–1 Pre-1970 exploration expenditures.

(a) **General rule.** Section 615 prescribes rules for the treatment of expenditures (paid or incurred before January 1, 1970) for ascertaining the existence, location, extent, or quality of any deposit of ore or other mineral (other than oil or gas) paid or incurred by the taxpayer before the beginning of the development stage of the mine or other natural deposit. Such expenditures hereinafter in the regulations under section 615 will be referred to as exploration expenditures. The development stage of the mine or other natural deposit will be deemed to begin at the time when, in consideration of all the facts and circumstances (including the actions of the taxpayer), deposits of ore or other mineral are shown to exist in sufficient quantity and quality to reasonably justify commercial exploitation by the taxpayer. A taxpayer who elects under section (e) may treat exploration expenditures under either section 615(a) or section 615(b). See § 1.615–6 for the method of making the election to treat exploration expenditures under sec-

tion 615. Under section 615(a), a taxpayer may, at his option, deduct exploration expenditures paid or incurred in an amount not to exceed $100,000 for any taxable year. Under section 615(b) and § 1.615–2, he may elect to defer any part of such amount and deduct such part on a ratable basis as the units of produced minerals benefited by such expenditures are sold. If the taxpayer does not treat exploration expenditures under either section 615(a) or (b) in any year for which his election under section 615(e) is effective, the expenditures for such year will be charged to depletable capital account. The option to deduct under section 615(a) and the election to defer under section 615(b), however, are subject to the limitation provided in section 615(c) and § 1.615–4. In the case of certain corporations which are members of an affiliated group which has elected the 100 percent dividends received deduction under section 243(b), see section 243(b)(3) and § 1.243–5 for limitations on the option to deduct under section 615(a) and the election to defer under section 615(b).

(b) **Expenditures to which section 615 is not applicable.** (1) Section 615 is not applicable to expenditures which would be allowed as a deduction for the taxable year without regard to such section.

(2) Section 615 is not applicable to expenditures which are reflected in improvements subject to allowances for depreciation under sections 167 and 611. However, allowances for depreciation of such improvements which are used in the exploration of ores or minerals are considered exploration expenditures under section 615. If such improvements are used only in part for exploration during a taxable year, an allocable portion of the allowance for depreciation shall be treated as an exploration expenditure.

(3) Section 615 is applicable to exploration expenditures paid or incurred by a taxpayer in connection with the acquisition of a fractional share of the working or operating interest to the extent of the fractional interest so acquired by the taxpayer. The expenditures attributable to the remaining fractional share shall be considered as the cost of his acquired interest and shall be recovered through depletion allowances. For example, taxpayer A owns mineral leases on unexplored mineral lands and agrees to convey an undivided three-fourths (¾) interest in such leases to taxpayer B provided B will pay all of the exploration expenditures for ascertaining the existence, location, extent, or quality of any deposit of ore or other mineral which will be incurred before the beginning of the development stage. B shall treat three-fourths of such amount under section 615, and shall treat one-fourth of such amount as part of the cost of his interest, recoverable through depletion.

(4) The provisions of section 615 do not apply to costs of exploration which are reflected in the amount which the taxpayer paid or incurred to acquire the property. Such provisions apply only to costs paid or incurred by the taxpayer for exploration undertaken directly or through a contract by the taxpayer. See, however, sections 381(a) and 381(c)(10) for special rules with respect to deferred exploration expenditures in certain corporate acquisitions.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6685, 28 FR 11405, Oct. 24, 1963; T.D. 6992, 34 FR 826, Jan. 18, 1969; T.D. 7192, 37 FR 12938, June 30, 1972]

§ 1.615–2 Deduction of pre-1970 exploration expenditures in the year paid or incurred.

(a) *In general.* (1) If the election to treat exploration expenditures under section 615 has been made or is deemed made under § 1.615–6(b) subject to the total limitation of $100,000, a taxpayer who has made exploration expenditures prior to January 1, 1970, with respect to more than one mine or other natural deposit may deduct for a taxable year for which such election is effective any portion of such expenditures attributable to each mine or deposit. With respect to a particular mine or other natural deposit, a taxpayer who has made the election described in the preceding sentence may deduct under section 615(a) a portion of the exploration expenditures and may defer and deduct under section 615(b) the balance of such expenditures. For any taxable year for which the election to treat exploration expenditures under section 615 is effective, the taxpayer must charge any amount of exploration expenditures in excess of $100,000 to capital account and must charge to capital account whatever amount has not been deducted currently or deferred. For example, taxpayer A who has elected under section 615(e) has three mines, X, Y, and Z. In the taxable year 1967, A makes exploration expenditures of $75,000 with respect to each mine. The total allowable deduction for exploration expenditures is $100,000. A deducts $50,000 and defers $25,000 with respect to X. He deducts $25,000, and charges to capital account $50,000 with respect to Y, and charges to capital account the entire $75,000 paid with respect to Z. Thus, A has deducted or deferred $100,000 and capitalized the excess.

(2) Except as provided in section 615(e) and § 1.615–6, a taxpayer cannot change his treatment of exploration expenditures for a taxable year after the due date (including extensions of time) for filing the return for the taxable year except where it is subsequently determined that any part of such exploration expenditures deducted under section 615(a) or deferred under section 615(b) are not exploration expenditures for the taxable year. Where the taxpayer has made the election to treat exploration expenditures under section 615 and it is subsequently determined that part of the expenditures deducted under section 615(a) or deferred under section 615(b), for a taxable year, were not exploration expenditures for such taxable year, the exploration expenditures required to be charged to capital account for such taxable year by reason of the limitation may be deducted or deferred (to the extent of the subsequent determination) and proper adjustment made to capital account. A taxpayer claiming a deduction under section 615(a) shall indicate clearly on his income tax return the amount of the deduction claimed under such section with respect to each mine or other natural deposit. Such mine or deposit shall be identified by an adequate description.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7192, 37 FR 12938, June 30, 1972]

§ 1.615–3 Election to defer pre-1970 exploration expenditures.

(a) General rule. A taxpayer who makes the election provided in section 615(e) may defer any portion of the exploration expenditures made before January 1, 1970, with respect to each mine or other natural deposit, subject to the limitations described in section 615(c) and § 1.615–4. The amounts so deferred shall be deducted ratably as the units of produced ores or minerals discovered or explored by reason of such expenditures are sold.

(b) Effect and manner of making election. (1) The election to defer exploration expenditures shall apply only to expenditures for the taxable year for which made. However, once made, the election shall be binding with respect to the expenditures for that taxable year. Thus, a taxpayer cannot revoke his election for any reason whatsoever.

(2) The election shall be made for each mine or other natural deposit by a clear indication on the return or by a statement filed with the district director with whom the return was filed, not later than the time prescribed by law for filing such return (including extensions thereof) for the taxable year to which such election is applicable.

(c) Expenditures made by the owner who retains a non-operating mineral interest. (1) A taxpayer who elects to defer exploration expenditures and thereafter transfers his interest in the mine or other natural deposit, retaining an economic interest therein, shall deduct an amount attributable to such interest on a pro rata basis as the interest pays out. For example, a taxpayer who defers exploration expenditures and then leases his deposit, retaining a royalty interest therein, shall deduct the deferred expenditures ratably as he receives royalties. If the taxpayer receives a bonus or advanced royalties in connection with the transfer of his interest, he shall deduct deferred expenditures allocable to such bonus or advanced royalties in an amount which is in the same proportion to the total of such costs as the bonus or advanced royalties bears to the bonus and total royalties expected to be received. Also, in the case of a transfer of a mine or other natural deposit by a taxpayer who retains a production payment therein, he shall deduct the exploration expenditures ratably over the payments expected to be received.

(2) Where a taxpayer receives an amount, in addition to retaining an economic interest, which amount is treated as from the sale or exchange of a capital asset or property treated under section 1231 (except coal or iron ore to which section 631(c) applies), the deferred exploration expenditures shall be allocated between the interest sold and the interest retained in proportion to the fair market values of each interest as of the date of sale. The amount allocated to the interest sold may not be deducted, but shall be a part of the basis of such interest.

(d) Losses from abandonment. Section 165 and the regulations thereunder contain general rules relating to the treatment of losses resulting from abandonment.

(e) Computation of amount of deduction. The amount of the deduction allowable during the taxable year is an amount A, which bears the same ratio to B (the total deferred exploration expenditures for a particular mine or other natural deposit reduced by the amount of such expenditures deducted in prior taxable years) as C (the number of units of the ore or mineral benefited by such expenditures sold during the taxable year) bears to D (the number of units of ore or mineral benefited by such expenditures remaining as of the taxable year). For the purposes of this proportion, the "number of units of ore or mineral benefited by

such expenditures remaining as of the taxable year" is the number of units of ore or mineral benefited by the deferred exploration expenditures remaining at the end of the year to be recovered from the mine or other natural deposit (including units benefited by such expenditures recovered but not sold) plus the number of units benefited by such expenditures sold within the taxable year. The principles outlined in § 1.611-2 are applicable in estimating the number of units remaining as of the taxable year and the number of units sold during the taxable year. The estimate is subject to revision in accordance with that section in the event it is ascertained from any source, such as operations or development work, that the remaining units are materially greater or less than the number of units remaining from a prior estimate.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6685, 28 FR 11405, Oct. 24, 1963; T.D. 6841, 30 FR 9306, July 27, 1965; T.D. 7192, 37 FR 12939, June 30, 1972]

§ 1.615-4 Limitation of amount deductible.

(a) Taxable years beginning before July 7, 1960. For any taxable year beginning before July 7, 1960 (including taxable years of less than 12 months), a taxpayer may deduct or defer exploration expenditures paid or incurred in the taxable year in an amount not in excess of $100,000. However, for such taxable years, the taxpayer may not avail himself of the provisions of section 615 for more than four taxable years (including taxable years of less than 12 months and taxable years subject to the Internal Revenue Code of 1939). Such four taxable years need not be consecutive. In determining the number of years in which a taxpayer has availed himself of section 615, a year for which he makes an election to defer exploration expenditures shall count as one year. Any subsequent taxable year in which such deferred expenditures are deducted shall not be taken into account as one of the four years. For purposes of the 4-year limitation, a year in which both a deduction and an election to defer are availed of by the taxpayer shall be taken into account as only one year.

(b) Taxable years beginning after July 6, 1960. For any taxable year beginning after July 6, 1960 (including taxable years of less than 12 months), a taxpayer who is otherwise eligible may deduct or defer exploration expenditures paid or incurred before January 1, 1970, in the lesser of the following amounts:

(1) The amount paid or incurred in the taxable year,

(2) $100,000, or

(3) $400,000 minus all amounts deducted or deferred for taxable years ending after December 31, 1950.

For purposes of this paragraph, the number of taxable years for which the taxpayer availed himself of the provisions of section 615 or the corresponding provisions of prior law is immaterial.

(c) Special rules for previously deferred expenditures. In determining whether an election to defer was availed of in applying the limitations of paragraphs (a) and (b) of this section, there shall be taken into account any year with respect to which amounts were deferred but not fully deducted because of a sale or other disposition of the mineral property, even though the balance of the deferred amounts was treated as part of the basis of the mineral property in determining gain or loss from the sale.

(d) Example of application of provisions. The application of the provisions of subparagraphs (a) and (b) of this section may be illustrated by the following example:

Example. A taxpayer on the calendar year basis, who has never claimed the benefits of section 615, or section 23(ff) of the 1939 Code, expended $200,000 for exploration expenditures during the year 1956. For each of the years 1957, 1958, 1959, and 1960 the taxpayer had exploration costs of $80,000. The taxpayer deducted or deferred the maximum amounts allowed for each of the years 1956, 1957, 1958, and 1959. None of the $80,000 expenditures for 1960 could be deducted or deferred by the taxpayer because he had already deducted or deferred exploration expenditures for 4 prior years. In 1961 the taxpayer expended $200,000 for exploration expenditures. The maximum amount the taxpayer may deduct or defer for the taxable year 1961 is $60,000 computed as follows:

(1) Add all yearly amounts deducted or deferred for exploration expenditures by the taxpayer for prior years.

Year	Expenditures	Deducted or deferred
1956	$200,000	$100,000
1957	80,000	80,000
1958	80,000	80,000
1959	80,000	80,000
1960	80,000	0
Total		340,000

(2) Subtract the sum of the amounts obtained in (1), $340,000, from $400,000, the maximum amount allowable to the taxpayer for deductions or deferrals of exploration expenditures.

Maximum amount allowable to taxpayer	$400,000
Sum of amounts obtained in (1)	340,000
	60,000

(e) **Transferee of mineral property.** (1) Where an individual or corporation transfers any property to the taxpayer and the transfer is one to which any of the subdivisions of this subparagraph apply, the taxpayer shall take into account for purposes of the 4-year limitation described in paragraph (a) of this section, all years that the transferor deducted or deferred exploration expenditures, and for purposes of the $400,000 limitation described in paragraph (b) of this section, all amounts that the transferor deducted or deferred.

(i) The taxpayer acquired any mineral property in a transaction described in section 23(ff)(3) of the Internal Revenue Code of 1939, excluding the reference therein to section 113(a)(13).

(ii) The taxpayer would be entitled under section 381(c)(10) to deduct exploration expenditures if the transferor (or distributor) corporation had elected to defer such expenditures. For example, if the taxpayer acquired any mineral property in a transaction described in section 381(a) (relating to the acquisition of assets through certain corporate liquidations and reorganizations), there shall be taken into account in applying the limitations of paragraph (a) of this section the years in which the transferor exercised the election to defer or deduct exploration expenditures, and there shall be taken into account in applying the limitations of paragraph (b) of this section any amount so deducted or deferred. See also section 381(c)(10) and the regulations thereunder.

(iii) The taxpayer acquired any mineral property under circumstances which make applicable the following sections of the Internal Revenue Code:

(a) Section 334(b)(1), relating to the liquidation of a subsidiary where the basis of the property in the hands of the distributee is the same as it would be in the hands of the transferor.

(b) Section 362(a) and (b), relating to property acquired by a corporation as paid-in surplus or as a contribution to capital, or in connection with a transaction to which section 351 applies.

(c) Section 372(a), relating to reorganization in certain receiverships and bankruptcy proceedings.

(d) Section 373(b)(1), relating to property of a railroad corporation acquired in certain bankruptcy or receivership proceedings.

(e) Section 1051, relating to property acquired by a corporation that is a member of an affiliated group.

(f) Section 1082, relating to property acquired pursuant to a Securities Exchange Commission order.

(2) For purposes of subparagraph (1) of this paragraph, it is immaterial whether a deduction has been allowed or an election has been made by the transferor with respect to the specific mineral property transferred.

(3) Where a mineral property is acquired under any circumstance except those described in subparagraph (1) of this paragraph, the taxpayer is not required to take into account the election exercised by or deduction allowed to his transferor.

(4) For purposes of applying the limitations imposed by section 615(c): (i) the partner, and not the partnership, shall be considered as the taxpayer (see paragraph (a)(8)(iii) of § 1.702–1), and (ii) an electing small business corporation, as defined in section 1371(b), and not its shareholders, shall be considered as the taxpayer.

(5) For purposes of subparagraph (1)(iii)(b) of this paragraph: (i) if mineral property is acquired from a partnership, the transfer shall be considered as having been made by the individual partners, so that the number of years for which section 615 has been availed of by each partner and the amounts which each partner has deducted or deferred under section 615 shall be taken into account, or (ii) if on interest in a partnership having mineral property is transferred, the transfer shall be considered as a transfer of mineral property by the partner or partners relinquishing an interest, so that the number of years for which section 615 has been availed of by each such partner and the amounts which each such partner has deducted or deferred under section 615 shall be taken into account.

(f) **Examples.** The application of the provisions of this section may be illustrated by the following examples:

Example (1). A calendar year taxpayer who has never claimed the benefits of section 615 received in 1956 a mineral deposit from X Corporation upon a distribution in complete liquidation of the latter under conditions which would make the provisions of section 334(b)(1) applicable in determining the basis of the property in the hands of the taxpayer. During the year 1955 X Corporation expended $60,000 for exploration expenditures which it elected to treat as deferred expenses. Assume further that the taxpayer made similar expenditures of $150,000, $125,000, $100,000, $60,000, and $180,000 for the years 1956, 1957, 1958, 1959, and 1961, respectively, which the taxpayer elected to deduct for each of those years to the extent allowable. No such expenditures were made for 1960. On the basis of these facts, the taxpayer may deduct or defer $100,000 for each of the years 1956, 1957, and 1958. No deduction or deferral is allowable for 1959 since the 4-year limitation of paragraph (a) of this section applies. The taxpayer may deduct

or defer a maximum of $40,000 for 1961 since the $400,000 limitation of paragraph (b) of this section applies, but the 4-year limitation of paragraph (a) does not apply.

Example (2). Assume the same facts stated in example (1) except that, prior to acquisition by the taxpayer of the deposit from X Corporation in 1956, X Corporation had acquired the deposit in 1954 in a similar distribution from Y Corporation which, in the years 1952 and 1953, deducted exploration costs paid in respect of an entirely different deposit in the amounts of $30,000 and $50,000, respectively. Under these circumstances, the taxpayer may deduct or defer exploration expenditures paid or incurred in the amount of $100,000 for 1956. No deduction or deferral is allowable to the taxpayer for expenditures made in 1957, 1958, and 1959 since the 4-year limitation of paragraph (a) applies. The taxpayer may deduct or defer a maximum of $100,000 for 1961 since the 4-year limitation of paragraph (a) of this section no longer applies. If the taxpayer deducted or deferred $100,000 for each of the years 1956 and 1961 and also made exploration expenditures in 1962, the taxpayer may deduct or defer a maximum of $60,000 for that year under the $400,000 limitation of paragraph (b) of this section.

Example (3). In 1957, A and B transfer assets to a corporation under circumstances making section 351 applicable to such a transfer. Among the assets transferred by A is a mineral lease with respect to certain coal lands. A has deducted exploration expenditures under section 615 for the years 1954 and 1956 in the amounts of $50,000 and $100,000, respectively, made with respect to other deposits not included in the transfer to the corporation. The corporation shall be required to take into account the deductions previously made by A for purposes of applying the limitations of paragraphs (a) and (b) of this section.

Example (4). In 1956, A, B, and C form a partnership for the purpose of exploring for, developing, and producing uranium. A contributes a uranium lease to the partnership. A had individually made exploration expenses in the amount of $50,000 and $100,000 with respect to other mineral properties not contributed to the partnership and which he has deducted under section 615(a) for the years 1954 and 1955, respectively. B contributes a uranium lease to the partnership on which he made exploration expenditures in the amount of $100,000 in 1955 which he elected to defer under section 615(b). This is the only year in which B has used section 615. C contributes only cash to the partnership and has not previously used section 615. Subject to the limitations of section 615, for taxable years beginning before July 7, 1960, A may deduct or defer exploration expenses for two more taxable years (either as to expenditures incurred by him individually or with respect to his distributive share of partnership exploration expenses). B may deduct or defer exploration expenditures for three more years, and C may deduct or defer exploration expenditures for four years. For taxable years beginning after July 6, 1960, subject in each case to the $100,000 limitation per year, A may deduct or defer exploration expenditures in an amount not in excess of $250,000 ($400,000–$150,000), either as to expenditures incurred by him individually or with respect to his distributive share of partnership exploration expenditures. B may similarly deduct or defer exploration expenditures in an amount not in excess of $300,000 ($400,000–$100,000), and C may deduct or defer exploration expenditures in an amount not in excess of $400,000.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6685, 28 FR 11405, Oct. 24, 1963, as amended by T.D. 7192, 37 FR 12939, June 30, 1972]

§ 1.615-5 Time for making election with respect to returns due on or before May 2, 1960.

In the case of any taxable year beginning after December 31, 1953, and ending after August 16, 1954, the income tax return for which is due not later than May 2, 1960, the time for exercising any option or making any election under section 615 shall expire on May 2, 1960.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.615-6 Election to deduct under section 615.

(a) **General rule.** The election to deduct or defer exploration expenditures under section 615 shall be made in a statement filed with the director of the Internal Revenue service center with whom the taxpayer's income tax return is required to be filed. If the election is made within the time period prescribed for filing an income tax return (including extensions thereof) for the first taxable year ending after September 12, 1966, during which the taxpayer pays or incurs expenditures which are within the scope of section 615 and which are paid or incurred by him after September 12, 1966, this statement shall be attached to the taxpayer's income tax return for such taxable year. If the election is made after the time prescribed for filing such return but before the expiration of the period (described in paragraph (e) of this section) for making the election under section 615(e), the statement must be signed by the taxpayer or his authorized representative. The statement shall be filed even though the taxpayer charges to capital account all such expenditures paid or incurred by him during such taxable year after such date. The statement shall clearly indicate that the taxpayer elects to have section 615 apply to all amounts deducted or deferred by him with respect to exploration expenditures paid or incurred after September 12, 1966, and before January 1, 1970. If the taxpayer desires, he may file this statement by attaching it to his return for a taxable year prior to the first taxable year ending after September 12, 1966, in which he pays or incurs exploration expenditures. Except as provided in paragraph (b) of this section, if the taxpayer does not file such a statement within the period prescribed by section 615(e) and paragraph (e) of this section, any amounts deducted by him with respect to exploration expenditures paid or incurred after September 12, 1966, will be deemed to have been deducted pursuant to an election under section 617(a).

(b) Exception. The last sentence of paragraph (a) of this section shall not apply if all exploration expenditures paid or incurred by the taxpayer after September 12, 1966, and before January 1, 1970, and deducted by him on his income tax return for the first taxable year ending after September 12, 1966, during which he pays or incurs such expenditures are outside the scope of section 617(a) (as it existed before its amendment by section 504(b) of the Tax Reform Act of 1969). For example, assume that, in his return for his taxable year ending December 31, 1966, a calendar-year taxpayer deducts exploration expenditures paid or incurred after September 12, 1966, and does not attach to his return the statement described in paragraph (a) of this section. However, all of the exploration expenditures paid or incurred by the taxpayer after September 12, 1966, and before the end of the taxable year were paid or incurred with respect to minerals located neither in the United States nor on the Outer Continental Shelf. The taxpayer will be deemed to have made an election under section 615(e) by deducting all or part of those expenditures as expenses in his income tax return.

(c) Information to be furnished. A taxpayer who makes or has made an election under section 615(e) with respect to expenditures paid or incurred after September 12, 1966, and before January 1, 1970, shall indicate clearly on his income tax return for each taxable year for which he deducts any such expenditures the amount of the deduction claimed under section 615(a) or (b) with respect to each property or mine. The property or mine shall be identified by a description adequate to permit application of the rules of section 615(g) (relating to effect of transfer of mineral property).

(d) Effect of election—(1) In general. A taxpayer who has made or is deemed to have made an election under section 615(e) may not make an election under section 617(a) with respect to expenditures made before January 1, 1970, unless, within the period set forth in section 615(e), he revokes his election under section 615(e). Except as provided in paragraph (a)(2) of § 1.615–2, a taxpayer who makes an election under section 615(e) may not change his treatment of exploration expenditures deducted, deferred, or capitalized pursuant to such election unless he revokes the election made under section 615(e).

(2) Transfer of mineral property. The binding effect of a taxpayer's election under section 615(e) shall not be affected by his receiving property with respect to which deductions have been allowed under section 617(a). However, see section 615(g)(2) and § 1.615–7 for rules under which amounts deducted under section 615 by a transferor may be subject to recapture in the hands of a transferee who has made an election under section 617(a). See § 1.617–3(d)(2)(ii) for rules under which amounts deducted under section 617(a) by a transferor may be subject to recapture in the hands of a transferee who has made an election under section 615(e).

(e) Time for making election under section 615(e). A taxpayer may not make an election under section 615(e) after the expiration of the 3-year period beginning with the date prescribed by section 6072 or other provision of law for filing the taxpayer's income tax return for the first taxable year ending after September 12, 1966, in which the taxpayer pays or incurs expenditures to which section 615(a) would apply if an election were made under section 615(e). This 3-year period shall be determined without regard to any extension of time for filing the taxpayer's income tax return for such year. An election under section 615(e) may not be made after the expiration of the 3-year period even though the taxpayer charged to capital account, or erroneously deducted as development expenditures under section 616, all exploration expenditures paid or incurred by him after September 12, 1966, and before the end of his first taxable year ending after September 12, 1966, in which he paid or incurred such expenditures.

(f) Revocation of section 615(e) election—(1) Manner of revoking election. A taxpayer may revoke an election made by him under section 615(e) by filing with the director of the Internal Revenue service center with whom the taxpayer's income tax return is required to be filed, within the period set forth in subparagraph (2) of this paragraph, a statement, signed by the taxpayer or his authorized representative, which sets forth that the taxpayer is revoking the election previously made by him with respect to exploration expenditures paid or incurred after September 12, 1966, and states with whom and where the document making the election was filed. Such revocation shall be a revocation for all taxable years for which the taxpayer's election was in effect and the taxpayer revoking such an election shall file amended income tax returns, reflecting any increase or decrease in tax attributable to the revocation of election. In applying the revocation of election to the years affected there shall be taken into account the effect that any adjustments resulting from the revocation of election shall have on other items affected thereby (such as the deduction

for charitable contributions, the foreign tax credit, net operating loss, and other deductions or credits the amount of which is limited by the taxpayer's income) and the effect that adjustments of any such items have on items in other taxable years.

(2) **Time for revoking election under section 615(e).** An election under section 615(e) may be revoked at any time before the expiration of the 3-year period described in paragraph (e) of this section. Such an election may not be revoked after the expiration of the 3-year period.

(3) **Additional information to be furnished by a transferor of mineral property.** If, before revoking his election, the taxpayer has transferred any mineral property with respect to which he deducted exploration expenditures paid or incurred after September 12, 1966, and before January 1, 1970, to another person in a transaction as a result of which the basis of such property in the hands of the transferee is determined by reference to the basis in the hands of the transferor, the statement submitted pursuant to subparagraph (1) of this paragraph shall state that such property has been so transferred and shall identify the transferee, the property transferred, and the date of the transfer. The preceding sentence shall not apply in the case of any mineral property transferred after December 31, 1969.

(g) **Taxable years beginning before September 13, 1966, and ending after September 12, 1966—(1) In general.** An election made under section 615(e) applies only to expenditures paid or incurred after September 12, 1966. The income tax treatment of exploration expenditures paid or incurred before September 13, 1966, will be determined in accordance with the provisions of section 615 prior to its amendment by the Act of September 12, 1966 (Public Law 89–570, 80 Stat. 759). If a taxpayer makes an election under section 615(e) in his income tax return for a taxable year which begins before September 13, 1966, and which ends after September 12, 1966, amounts deducted and amounts deferred under section 615 with respect to expenditures paid or incurred during such taxable year but before September 13, 1966, will be taken into account in determining whether the $100,000 limitation set forth in section 615(a) is reached during the taxable year. Similarly, a taxpayer who makes an election under section 615(e) shall take into account expenditures deducted or deferred under section 615 for the period prior to September 13, 1966, in determining when the $400,000 overall limitation set forth in section 615(c) is reached. The fact that a taxpayer deducts or defers under section 615 exploration expenditures paid or incurred prior to September 13, 1966, shall not affect his right to make an election under section 617(a) to deduct under section 617 expenditures paid or incurred after September 12, 1966.

(2) **Allocation in case of inadequate records.** If a taxpayer pays or incurs exploration expenditures during a taxable year beginning before September 13, 1966, and ending after September 12, 1966, but his records as to any mine or property are inadequate to permit a determination of the amount paid or incurred during the portion of the year ending after September 12, 1966, and the amount paid or incurred on or before such date, the exploration expenditures, as to which the records are inadequate, paid or incurred with respect to the mine or property during the taxable year shall be allocated to each part year (that is, the part occurring before September 13, 1966, and the part occurring after September 12, 1966) in the same ratio which the number of days in each such part year bears to the number of days in the entire taxable year. For example, if the records of a calendar year taxpayer for 1966 are inadequate to permit a determination of the amount of exploration expenditures paid or incurred with respect to a certain mine or property after September 12, 1966, and the amount paid or incurred before September 13, 1966, 255/365 of the total exploration expenditures paid or incurred by the taxpayer with respect to the mine or property during 1966 shall be allocated to the period beginning January 1, 1966, and ending September 12, 1966, and 110/365 of the total exploration expenditures paid or incurred with respect to the mine or property during 1966 shall be allocated to the period beginning September 13, 1966, and ending December 31, 1966.

(3) **Partnership elections.** With respect to exploration expenditures paid or incurred by a partnership before September 13, 1966, the option to deduct under section 615(a) and the election to defer under section 615(b) shall be made by the partnership, rather than by the individual partners. With respect to exploration expenditures paid or incurred by a partnership after September 12, 1966, all elections under sections 615 and 617 as to the tax treatment of a partner's distributive share of exploration expenditures paid or incurred by a partnership of which he is a member shall be made by the individual partner, rather than by the partnership. See section 703(b) and the regulations thereunder.

[T.D. 7192, 37 FR 12939, June 30, 1972]

§ 1.615–7 Effect of transfer of mineral property.

(a) Transfer before election by transferor. **(1)** If mineral property is transferred in a transaction as a result of which the basis of the property in the hands of the transferee is determined in whole or in part by reference to the basis in the hands of the transferor and the transferor had not made an election under either section 615(e) or 617(a) at the time of the transfer, no election made by the transferor after the transfer shall apply with respect to expenditures properly chargeable to the transferred property which were paid or incurred before the date of the transfer.

(2) For purposes of subparagraph (1) of this paragraph, a transferor of mineral property who made an election under section 617(a) or section 615(e) before the transfer but who revokes such election after such transfer and does not make an election under either section before the expiration of the 3-year period prescribed by section 6072 or other provision of law for filing his income tax return for the taxable year in which such transfer occurred shall be treated with respect to such property as not having made an election under either section.

(b) Transfer after election by transferor. If a transferee who at the time of the transfer of a mineral property has not made an election under section 617(a) receives property in a transaction in which the basis of such property in his hands is determined in whole or in part by reference to its basis in the hands of the transferor and with respect to such property the transferor has deducted expenditures under section 617(a), the adjusted exploration expenditures properly chargeable to the property immediately after the transfer shall be treated as expenditures allowed as deductions under section 617(a) to the transferee. See section 617 and the regulations thereunder.

(c) Transfer after election by transferee. **(1)** If a transferee who makes an election under section 617(a) receives before January 1, 1970, mineral property in a transaction in which the basis of such property in his hands is determined in whole or in part by reference to the basis of the property in the hands of the transferor and the transferor had in effect at the time of the transfer an election under section 615(e), an amount equal to the total of the amounts allowed as deductions to the transferor under section 615 with respect to the transferred mineral property shall be treated as expenditures allowed as deductions under section 617(a) to the transferee. The preceding sentence shall not apply to expenditures which would not have been reflected in the basis of the property in the hands of the transferor had the transferor not made the section 615(e) election.

(2) Any expenditures with respect to the transferred property deferred by the transferor under section 615(b) which are not allowed as deductions to him prior to transfer of the property may not be deducted by the transferee and in his hands shall be charged to capital account.

[T.D. 7192, 37 FR 12940, June 30, 1972]

§ 1.615–8 Termination of section 615.

(a) In general. The provisions of section 615 shall not apply to exploration expenditures paid or incurred after December 31, 1969. Expenditures paid or incurred before January 1, 1970, which were deferred under section 615(b) will be deductible under such section after such date as the units of ore or mineral discovered or explored by reason of such expenditures are sold. An election under section 615(e) with respect to expenditures paid or incurred prior to January 1, 1970, shall remain in effect with respect to such expenditures unless it is revoked under section 615(e) and § 1.615–6. See § 1.615–9 for treatment of a section 615(e) election with respect to expenditures paid or incurred after December 31, 1969.

(b) Taxable years beginning before January 1, 1970, and ending after December 31, 1969—(1) In general. The termination of section 615 applies to expenditures paid or incurred after December 31, 1969. The income tax treatment of exploration expenditures paid or incurred before January 1, 1970, will be determined in accordance with the provisions of sections 615 and 617 prior to their amendment by the Tax Reform Act of 1969 (83 Stat. 487). The fact that on his income tax return for a taxable year beginning before January 1, 1970, and ending after December 31, 1969, a taxpayer deducts under section 615 expenditures paid or incurred before January 1, 1970, shall not affect his right to deduct under section 617(a) expenditures paid or incurred during such taxable year after December 31, 1969.

(2) Allocation in case of inadequate records. If a taxpayer pays or incurs exploration expenditures during a taxable year beginning before January 1, 1970, and ending after December 31, 1969, but his records are inadequate to permit a determination of the amount paid or incurred during the portion of the year ending after December 31, 1969, and the amount paid or incurred on or before such date, the exploration expenditures as to which the

records are inadequate paid or incurred with respect to the mine or property during the taxable year shall be allocated to each part of the year (that is, the part before January 1, 1970, and the part occurring after December 31, 1969) in the same ratio which the number of days in each such part year bears to the number of days in the entire taxable year.

[T.D. 7192, 37 FR 12941, June 30, 1972]

§ 1.615–9 Notification under Tax Reform Act of 1969.

(a) **In general.** An election under section 615(e) with respect to exploration expenditures paid or incurred prior to January 1, 1970, shall be treated as an election under section 617(a) with respect to exploration expenditures paid or incurred after December 31, 1969.

(b) **Exception.** Paragraph (a) of this section shall not apply to an election under section 615(e) if the taxpayer files the notice described in paragraph (c) of this section or the taxpayer revokes his election under section 615(e) before the date prescribed for the filing of notice under paragraph (c)(2) of this section.

(c) **Filing of notice—(1) In general.** The notice not to have a section 615(e) election treated as a section 617(a) election shall be made in a statement filed with the Director of the Internal Revenue service center with whom the taxpayer's income tax return is required to be filed. If the election is made within the time period prescribed for filing an income tax return (including extensions thereof) for the first taxable year during which the taxpayer pays or incurs, after December 31, 1969, expenditures which would be deductible by the taxpayer under section 617(a) if he made a valid election to deduct exploration expenditures under such section, the statement shall be attached to the taxpayer's income tax return for such year. If the statement is filed after the time prescribed for filing such return but before the expiration of the period (described in paragraph (e) of this section) for filing the notice, the statement must be signed by the taxpayer or his authorized representative. The statement shall be filed even though the taxpayer charges to capital account all such expenditures paid or incurred by him after December 31, 1969. If the taxpayer desires, he may file this statement by attaching it to his return for a taxable year prior to the first taxable year in which he pays or incurs after December 31, 1969, expenditures which would be deductible by him under section 617(a) if at such time he had in effect a valid election under such section.

(2) **Information to be furnished.** The notice shall clearly state that the taxpayer elects not to have his section 615(e) election treated as an election under section 617(a). The notice shall state the first taxable year for which the section 615(e) election was effective and with whom and where the election was filed.

(d) **Effect of notification.** A taxpayer who has filed notice pursuant to this section may make an election under section 617(a) with respect to exploration expenditures paid or incurred after December 31, 1969, without revoking either his section 615(e) election or his notice under this section.

(e) **Time for filing notice.** A taxpayer may not file the notice described in paragraph (c)(1) of this section after the expiration of the 3-year period beginning with the date prescribed by section 6072 or other provision of law for filing the taxpayer's income tax return for the first taxable year in which the taxpayer pays or incurs after December 31, 1969, expenditures which would be deductible by him if he made the election under section 617(a). This 3-year period shall be determined without regard to any extension of time for filing the taxpayer's income tax return.

[T.D. 7192, 37 FR 12941, June 30, 1972]

§ 1.616–1 Development expenditures.

(a) **General rule.** Section 616 prescribes rules for treating expenditures paid or incurred during the taxable year by the taxpayer for the development of a mine or other natural deposit (other than an oil or gas well). Development expenditures under section 616 are those which are made after such time when, in consideration of all the facts and circumstances (including actions of the taxpayer), deposits of ore or other mineral are shown to exist in sufficient quantity and quality to reasonably justify commercial exploitation by the taxpayer. Under section 616(a), a taxpayer is allowed a deduction for development expenditures whether or not such expenditures are made in the development or production state of the mine or other natural deposit. Under section 616(b), the taxpayer may elect to defer development expenditures made in the development or producing stage and to deduct such expenditures ratably as the minerals or ores benefited are sold. While the mine or other natural deposit is in the development stage, the election applies only to that portion of the development expenditures which is in excess of net receipts from the mine or other natural deposit. See § 1.616–2 for rules with respect to the election to defer. It is not necessary

that the taxpayer incur the development costs directly. He may engage a contractor to make the expenditures on his behalf.

(b) **Expenditures to which section 616 is not applicable.** (1) Section 616 is not applicable to development expenditures which are deductible for the taxable year under any other provision of the internal revenue laws.

(2) Section 616 is not applicable to expenditures which are reflected in improvements subject to allowances for depreciation under sections 167 and 611. However, allowance for depreciation of such improvements which are used in the development of ores or minerals are considered development expenditures under section 616. If such improvements are used only in part for development during a taxable year, an allocable portion of the allowance for depreciation shall be treated as a development expenditure.

(3) Section 616 is applicable to development expenditures paid or incurred by a taxpayer in connection with the acquisition of a fractional share of the working or operating interest to the extent of the fractional interest so acquired. The expenditure attributable to the remaining fractional share shall be considered as part of the cost of his acquired interest and shall be capitalized and recovered through depletion allowances. For example, taxpayer A owns mineral leases on undeveloped mineral lands. A agrees to convey an undivided three-fourths (¾) interest in such leases to B, provided B will pay all of the expenditures incurred during the development stage of the deposits on these leases. B may deduct three-fourths (¾) of such amount under section 616, but shall treat one-fourth of such amount as part of the cost of his interest, recoverable through depletion.

(4) The provisions of section 616 do not apply to costs of development paid or incurred by a prior owner which are reflected in the amount which the taxpayer paid or incurred to acquire the property. Such provisions apply only to costs paid or incurred by the taxpayer for development undertaken directly or through contract by the taxpayer. See, however, sections 381(a) and 381(c)(10) for special rules with respect to deferred development expenditures in certain corporate acquisitions.

(c) **Mine or other natural deposit.** Section 616 has reference to expenditures made for the development of a mine or other natural deposit. Within an aggregated property, as that term is defined in section 614(b) and (c), or within a single tract or parcel of land, there may be more than one mine or other natural deposit. Where a property, as determined under section 614, contains more than one mine or other natural deposit, the taxpayer may deduct under section 616(a) the development expenditures made with respect to one of such mines or deposits, and may defer under section 616(b) the development expenditures made with respect to another of such mines or deposits. Where there is more than one mine with respect to a single underlying deposit, the taxpayer may deduct under section 616(a) the development expenditures made with respect to one of such mines, and may defer under section 616(b) the development expenditures made with respect to another of such mines. The taxpayer must treat consistently all development expenditures with respect to each such mine or other natural deposit in a taxable year. The taxpayer must make a separate determination of the units of minerals or ores benefited in a mine or other natural deposit (regardless of the computation of the depletion allowance) in order that deferred expenditures with respect to such mine or deposit may be deducted on a ratable basis. See paragraph (f) of § 1.616–2.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.616–2 Election to defer.

(a) **General rule.** In lieu of taking a deduction under section 616(a), in the taxable year when the development expenditures are paid or incurred, a taxpayer may elect under section 616(b) to treat such expenditures with respect to each mine or other natural deposit as deferred expenses to be deducted ratably as the units of the produced ore or minerals benefited by such expenditures are sold. Section 616(b) is applicable to development expenditures paid or incurred both in the development and producing stage of the mine or other natural deposit. However, in the case of such expenditures made in the development stage, this election is applicable only to the excess of the amount of such expenditures over the net receipts from the ore or minerals from such mine or deposit received or accrued during the development stage and in the same taxable year as the expenditures were paid or incurred. Such development expenditures not in excess of such net receipts shall be subject to the provisions of section 616(a).

(b) **Producing stage; definition of.** The mine or other natural deposit will be considered to be in a producing stage when the major portion of the mineral production is obtained from workings other than those opened for the purpose of development, or when the principal activity of the mine or other natural deposit is the production of devel-

oped ores or minerals rather than the development of additional ores or minerals for mining.

(c) **Expenditures made by the owner who retains a nonoperating interest.** (1) A taxpayer who elects to defer development expenditures and thereafter transfers his interest in the mine or other natural deposit, retaining an economic interest therein, shall deduct an amount attributable to such interest on a pro rata basis as the interest pays out. For example, a taxpayer who defers development expenditures and then leases his deposit, retaining a royalty interest therein, shall deduct the deferred expenditures ratably as he receives the royalties. If the taxpayer receives a bonus or advanced royalties in connection with the transfer of his interest, he shall deduct the deferred expenditures allocable to such bonus or advanced royalties in an amount which is in the same proportion to the total of such costs as the bonus or advanced royalties bears to the bonus and total royalties expected to be received. Also, in the case of a transfer of a mine or other natural deposit by a taxpayer who retains a production payment therein, he may deduct the development expenditures ratably over the payments expected to be received.

(2) Where a taxpayer receives an amount, in addition to retaining an economic interest, which amount is treated as from the sale or exchange of a capital asset or property treated under section 1231 (except coal or iron ore to which section 631(c) applies), the deferred development expenditures shall be allocated between the interest sold and the interest retained in proportion to the fair market value of each interest as of the date of sale. The amount allocated to the interest sold may not be deducted, but shall be a part of the basis of such interest for the purpose of determining gain or loss upon the sale thereof.

(d) **Losses from abandonment.** Section 165 and the regulations thereunder contain general rules relating to the treatment of losses resulting from abandonment.

(e) **Effect of election.** (1) The election to defer development expenditures shall apply only to expenditures for the taxable year for which made. However, once made, the election shall be binding with respect to the expenditures for that taxable year. Thus, a taxpayer cannot revoke his election for any reason whatsoever.

(2) The election shall be made for each mine or other natural deposit by a clear indication on the return or by a statement filed with the district director with whom the return was filed, not later than the time prescribed by law for filing such return (including extensions thereof) for the taxable year to which such election is applicable.

(f) **Computation of amount of deduction.** The amount of the deduction allowable during the taxable year is an amount A, which bears the same ratio to B (the total deferred development expenditures for a particular mine or other natural deposit reduced by the amount of such expenditures deducted in prior taxable years) as C (the number of units of the ore or mineral benefited by such expenditures sold during the taxable year) bears to D (the number of units of ore or mineral benefited by such expenditures remaining as of the taxable year). For the purposes of this proportion, the "number of units of ore or mineral benefited by such expenditures remaining as of the taxable year" is the number of units of ore or mineral benefited by the deferred development expenditures remaining at the end of the year to be recovered from the mine or other natural deposit (including units benefited by such expenditures recovered but not sold) plus the number of units benefited by such expenditures sold within the taxable year. The principles outlined in § 1.611–2 are applicable in estimating the number of units remaining as of the taxable year and the number of units sold during the taxable year. The estimate is subject to revision in accordance with that section in the event it is ascertained, from any source, such as operations or development work, that the remaining units are materially greater or less than the number of units remaining from a prior estimate.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6841, 30 FR 9307, July 27, 1965]

§ 1.616–3 Time for making election with respect to returns due on or before May 2, 1960.

In the case of any taxable year beginning after December 31, 1953, and ending after August 16, 1954, the income tax return for which is due not later than May 2, 1960, the time to deduct or defer development expenditures for such a year under section 616(a) or (b) shall expire on May 2, 1960.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.617–1 Exploration expenditures.

(a) **General rule.** Section 617 prescribes rules for the treatment of expenditures paid or incurred after September 12, 1966, for ascertaining the existence, location, extent, or quality of any deposit of ore or other mineral for which a deduction for

depletion is allowable under section 613 (other than oil or gas) paid or incurred by the taxpayer before the beginning of the development stage of the mine or other natural deposit. Such expenditures hereinafter in the regulations under section 617 will be referred to as exploration expenditures. The development stage of the mine or other natural deposit will be deemed to begin at the time when, in consideration of all the facts and circumstances (including the actions of the taxpayer), deposits of ore or other mineral are disclosed in sufficient quantity and quality to reasonably justify commercial exploitation by the taxpayer. For example, core drilling expenditures paid or incurred by the taxpayer to ascertain the existence of commercially marketable ore are exploration expenditures within the meaning of this section. Also, expenditures for exploratory drilling from within a producing mine to ascertain the existence of what appears (on the basis of all of the facts and circumstances known at the time of the expenditures) to be a different ore deposit are exploration expenditures within the meaning of this section. Expenditures paid or incurred in connection with core drilling to further delineate the extent and location of an existing commercially marketable deposit to facilitate its development are development expenditures. Under section 617(a), a taxpayer may deduct exploration expenditures paid or incurred for the exploration of any deposit of ore or other mineral subject to the limitation of section 617(h). Under section 617(b), a taxpayer shall recapture the exploration expenditures previously deducted under section 617(a) either through including in income an amount equal to the amount of the adjusted exploration expenditures (as defined in section 617(f)) or through disallowance of the deduction for depletion under section 611. Certain rules are provided in section 617(c) for recapture of exploration expenditures made with respect to property for which the taxpayer later receives a bonus or royalty. Under section 617(d), gain from dispositions of mining property, with respect to which exploration expenditures have been previously deducted, is to be recognized notwithstanding certain other provisions of the Code.

(b) Expenditures to which section 617 is not applicable. **(1)** Section 617 is not applicable to expenditures which would be allowed as deductions for the taxable year without regard to section 617.

(2) Section 617 is not applicable to expenditures which are reflected in improvements subject to allowances for depreciation under sections 167 and 611. However, allowances for depreciation of such improvements which are used in the exploration of ores or minerals are considered exploration expenditures under section 617. If such improvements are used only in part for exploration during the taxable year, an allocable portion of the allowance for depreciation shall be treated as an exploration expenditure.

(3) Section 617 is applicable to exploration expenditures paid or incurred by a taxpayer in connection with the acquisition of a fractional share of the working or operating interest to the extent of the fractional interest so acquired by the taxpayer. The expenditures attributable to the remaining fractional share shall be considered as the cost of his acquired interest and shall be recovered through depletion allowances. For example, taxpayer A owns mineral leases on unexplored mineral lands and agrees to convey an undivided three-fourths (¾) interest in such leases to taxpayer B provided B will pay all of the expenses for ascertaining the existence, location, extent, or quality of any deposit of ore or other mineral which will be incurred before the beginning of the development stage. B may elect to treat three-fourths of such amount under section 617. B must treat one-fourth of such amount as part of the cost of his interest, recoverable through depletion.

(4) Section 617 is not applicable to costs of exploration which are reflected in the amount which the taxpayer paid or incurred to acquire the property. Section 617 applies only to costs paid or incurred by the taxpayer for exploration undertaken directly or through a contract by the taxpayer. See, however, sections 381(a) and 381(c)(10) for special rules with respect to deferred exploration expenditures in certain corporate acquisitions.

(5) Section 617 is not applicable to amounts paid or incurred for the purpose of ascertaining the existence, location, extent, or quality of any deposit of oil or gas or of any mineral with respect to which a deduction for percentage depletion is not allowable under section 613. The purpose of the expenditure shall be determined by reference to the facts and circumstances at the time the expenditure is paid or incurred.

(c) Elections—**(1) Election to deduct under section 617(a).** (i) The election to deduct exploration expenditures under section 617(a) may be made by deducting such expenditures in the taxpayer's income tax return for his first taxable year ending after September 12, 1966, for which the taxpayer desires to deduct exploration expenditures which are paid or incurred by him during such taxable year and after September 12, 1966. This election may be exercised by deducting such exploration

expenditures either in the taxpayer's return for such taxable year or in an amended return filed before the expiration of the period for filing a claim for credit or refund of income tax for such taxable year. Where the election is made in an amended return for a taxable year prior to the most recent year for which the taxpayer has filed a return, the taxpayer shall file amended income tax returns, reflecting any increase or decrease in tax attributable to the election, for all subsequent taxable years affected by the election for which he has filed income tax returns before making the election. See section 617(a)(2)(C) and subparagraph (4) of this paragraph for provisions relating to extension of the period of limitations for the assessment of any deficiency for any taxable year to the extent the deficiency is attributable to an election or revocation of an election under section 617(a). In applying the election to the years affected, there shall be taken into account the effect that any adjustments resulting from the election shall have on other items affected thereby (such as the deduction for charitable contributions, the foreign tax credit, net operating loss, and other deductions or credits the amount of which is limited by the taxpayer's income) and the effect that adjustments of any such items have on items of other taxable years. Amended returns filed for taxable years subsequent to the taxable year for which the election under section 617(a) is made by amended return shall, where appropriate, apply the recapture rules of subsections (b), (c), and (d) of section 617. See §§ 1.617–3 and 1.617–4.

(ii) A taxpayer who makes or has made an election under section 617(a) shall state clearly on his income tax return for each taxable year for which he deducts exploration expenditures the amount of the deduction claimed under section 617(a) with respect to each property or mine. Such property or mine shall be identified by a description adequate to permit application of the recapture rules of section 617(b), (c), and (d).

(iii) A taxpayer who has made an election under section 617(a) may not make an election under section 615(e) unless, within the period set forth in section 615(e), he revokes his election under section 617(a). A taxpayer who has made and has not revoked an election under section 617(a) may not, in his return for the taxable year for which the election is made or for any subsequent taxable year, charge to capital account any exploration expenditures which are deductible by him under section 617(a); and he must deduct all such expenditures as expenses in computing adjusted gross income. Any exploration expenditures paid or incurred after December 31, 1969, which are not deductible by the taxpayer under section 617(a) solely because of the application of section 617(h) shall be charged to capital account.

(2) Time for making elections. The election under section 617(a) may be made at any time before the expiration of the period prescribed for filing a claim for credit or refund of the tax imposed by chapter 1 for the first taxable year for which the taxpayer desires to deduct exploration expenditures under section 617(a).

(3) Revocation of election to deduct. (i) A taxpayer may revoke an election made by him under section 617(a) by filing with the Internal Revenue service center with which the taxpayer's income tax return is required to be filed, within the period set forth in subdivision (ii) of this subparagraph, a statement, signed by the taxpayer or his authorized representative, which sets forth that the taxpayer is revoking the section 617(a) election previously made by him and states with whom and where the document making the election was filed. A taxpayer revoking a section 617(a) election shall file amended income tax returns which reflect any increase or decrease in tax attributable to the revocation of election for all taxable years affected by the revocation of election for which he has filed income tax returns before revoking the election. See section 617(a)(2)(C) and subparagraph (4) of this paragraph for provisions relating to extension of the period of limitations for the assessment of any deficiency attributable to an election or revocation of an election under section 617(a). In applying the revocation of election to the years affected, there shall be taken into account the effect that any adjustments resulting from the revocation of election shall have on other items affected thereby (such as the deduction for charitable contributions, the foreign tax credit, net operating loss, and other deductions or credits the amount of which is limited by the taxpayer's income) and the effect that adjustments of any such items have on items of other taxable years.

(ii) An election under section 617(a) may be revoked before the expiration of the last day of the third month following the month in which the final regulations under section 617(a) are published in the Federal Register. After the expiration of this period, a taxpayer who has made an election under section 617(a) may not revoke that election unless he obtains the prior consent of the Commissioner of Internal Revenue. Consent will not be granted where a principal purpose for the revocation of the election is to circumvent the recapture

provisions of section 517(b), (c), or (d). The request for consent shall be made in writing to the Commissioner of Internal Revenue, Attention T:I:E, Washington, D.C. 20224. The request shall include in detail:

(a) The reason or reasons for the revocation of election under section 617(a);

(b) An itemization of the taxpayer's deductions under section 617(a);

(c) A description of all properties and detailed information of the exploration activities with respect to which the taxpayer has taken deductions under section 617(a);

(d) A description of any development or production activities on all properties with respect to which exploration expenditures were deducted under section 617(a); and

(e) A recomputation of the tax for each prior taxable year affected by the revocation. A letter setting forth the Commissioner's determination will be mailed to the taxpayer. If consent is granted, a copy of the letter granting such consent shall be filed with the director of the Internal Revenue service center with which the taxpayer's income tax return is required to be filed and shall be accompanied by an amended return or returns, if necessary.

(iii) If, before revoking his election, the taxpayer has transferred any mineral property with respect to which he deducted exploration expenditures under section 617(a), to another person in a transaction as a result of which the basis of such property in the hands of the transferee is determined in whole or in part by reference to the basis in the hands of the transferor, the statement submitted pursuant to subdivision (i) of this paragraph shall state that such property has been so transferred, shall identify the transferee, the property transferred, the date of the transfer, and shall indicate the amount of the adjusted exploration expenditures with respect to such property on such date.

(4) Deficiency attributable to election or revocation of election. The statutory period for the assessment of any deficiency for any taxable year, to the extent such deficiency is attributable to an election or revocation of an election under section 617(a), shall not expire before the last day of the 2-year period which begins on the day after the date on which such election or revocation of election is made; and such deficiency may be assessed at any time before the expiration of such 2-year period, notwithstanding any law or rule which would otherwise prevent such assessment.

[T.D. 7192, 37 FR 12942, June 30, 1972]

§ 1.617–2 Limitation on amount deductible.

(a) Expenditures paid or incurred before January 1, 1970. In the case of expenditures paid or incurred before January 1, 1970, a taxpayer may deduct exploration expenditures paid or incurred during the taxable year with respect to any deposit of ore or other mineral for which a deduction for percentage depletion is allowable under section 613 (other than oil or gas) in the United States or on the Outer Continental Shelf (within the meaning of section 2 of the Outer Continental Shelf Lands Act, as amended and supplemented; 43 U.S.C. 1331).

(b) Expenditures paid or incurred after December 31, 1969. In the case of exploration expenditures paid or incurred after December 31, 1969, with respect to any deposit of ore or other mineral for which a deduction for percentage depletion is allowable under section 613 (other than oil or gas), a taxpayer may deduct—

(1) The amount of such expenditures paid or incurred during the taxable year with respect to any such deposit in the United States (as defined in section 638 and the regulations thereunder), and

(2) With respect to any such deposit located outside the United States (as defined in section 638 and the regulations thereunder) the lesser of:

(i) The amount of the exploration expenditures paid or incurred with respect to such deposits during the taxable year, or

(ii) $400,000 minus the sum of the amount to be deducted under subparagraph (1) of this paragraph for the taxable year and all amounts deducted or treated as deferred expenses during all preceding taxable years under section 617 and section 615 of the Internal Revenue Code of 1954 and section 23(ff) of the Internal Revenue Code of 1939. See paragraph (d) of this section for application of the limitation in the case of a transferee of a mining property.

(c) Examples. The application of the provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). A, a calendar-year taxpayer who has claimed the benefits of section 615, expended $100,000 for exploration expenditures during the year 1966. For each of the years 1967, 1968, 1969, and 1970 A had exploration costs of $80,000 all with respect to coal deposits located within the United States.

A deducted or deferred the maximum amounts allowable for each of the years 1966 ($100,000), 1967 ($80,000), 1968 ($80,000), and 1969 ($80,000). The $80,000 of exploration expenditures for 1970 may be deducted under section 617 by A.

Example (2). B, a calendar-year taxpayer claimed deductions of $100,000 per year under section 615 for the years 1968 and 1969. In 1970, B deducted $150,000 under section 617 for exploration conducted with respect to coal deposits in the United States. In 1971, B paid $150,000 with respect to exploration of tin deposits outside the United States. The maximum amount B may deduct with respect to the foreign exploration in 1971 is $50,000 computed as follows:

(a) Add all amounts deducted or deferred for exploration expenditures by B for all years:

Year	Expenditures	Deducted or deferred
1968	$100,000	$100,000
1969	100,000	100,000
1970	150,000	150,000
Total		350,000

(b) Subtract from $400,000 (the maximum amount allowable to B for deduction of foreign exploration expenditures) the sum of the amounts obtained in (a) $350,000:

Maximum amount allowable to taxpayer	$400,000
Sum of amounts obtained in (a)	350,000
	50,000

Example (3). Assume the same facts as in example (2) except that in 1971 in addition to the $150,000 paid with respect to exploration outside the United States, B paid $100,000 with respect to exploration within the United States. As the following computation indicates, B may not deduct any amount with respect to the foreign exploration:

(a) Add all amounts deducted or deferred for exploration expenditures in prior years and the exploration expenditures with respect to exploration in the United States to be deducted in 1971:

Year	Expenditures	Deducted or deferred
1968	$100,000	$100,000
1969	100,000	100,000
1970	150,000	150,000
1971	250,000	[1] 100,000
Total		450,000

[1] Domestic.

(b) Because the sum of the amounts obtained in (a), $450,000, exceeds $400,000 no deduction would be allowable to B with respect to foreign exploration expenditures for 1971.

(d) Transferee of mineral property. (1) Where an individual or corporation transfers any mining property to the taxpayer, the taxpayer shall take into account for purposes of the $400,000 limitation described in paragraph (b)(ii) of this section all amounts deducted and amounts treated as deferred expenses by the transferor if—

(i) The taxpayer acquired any mineral property from the transferor in a transaction described in section 23(ff)(3) of the Internal Revenue Code of 1939, excluding the reference therein to section 113(a)(13),

(ii) The taxpayer acquired any mineral property by reason of the acquisition of assets of a corporation in a transaction described in section 381(a) as a result of which the taxpayer succeeds to and takes into account the items described in section 381(c),

(iii) The taxpayer acquired any mineral property under circumstances which make applicable any of the following sections of the Internal Revenue Code:

(a) Section 334(b)(1), relating to the liquidation of a subsidiary where the basis of the property in the hands of the distributee is the same as it would be in the hands of the transferor.

(b) Section 362(a) and (b), relating to property acquired by a corporation as paid-in surplus or as a contribution to capital, or in connection with a transaction to which section 351 applies.

(c) Section 372(a), relating to reorganization in certain receiverships and bankruptcy proceedings.

(d) Section 373(b)(1), relating to property of a railroad corporation acquired in certain bankruptcy or receivership proceedings.

(e) Section 1051, relating to property acquired by a corporation that is a member of an affiliated group.

(f) Section 1082, relating to property acquired pursuant to a Securities Exchange Commission order.

(2) For purposes of applying the limitations imposed by section 617(h):

(i) The partner, and not the partnership, shall be considered as the taxpayer (see paragraph (a)(8)(iii) of § 1.702–1), and

(ii) An electing small business corporation, as defined in section 1371(b), and not its shareholders, shall be considered as the taxpayer.

(3) For purposes of subparagraph (1)(iii)(b) of this paragraph, relating to a transaction to which section 362(a) and (b) applies or to which section 351 applies:

(i) If mineral property is acquired from a partnership, the transfer shall be considered as having been made by the individual partners, so that the amounts which each partner has deducted or de-

ferred under sections 615 and 617 of the Internal Revenue Code of 1954 and section 23(ff) of the Internal Revenue Code of 1939 shall be taken into account, or

(ii) If an interest in a partnership having mineral property is transferred, the transfer shall be considered as a transfer of mineral property by the partner or partners relinquishing an interest, so that the amounts which each such partner has deducted or deferred under sections 615 and 617 of the Internal Revenue Code of 1954 and section 23(ff) of the Internal Revenue Code of 1939 shall be taken into account.

(e) Examples. The application of the provisions of this section may be illustrated by the following examples:

Example (1). A calendar year taxpayer (who has never claimed the benefits of section 617) received in 1970 a mineral deposit from X Corporation upon a distribution in complete liquidation of the latter under conditions which make the provisions of section 334(b)(1) applicable in determining the basis of the property in the hands of the taxpayer. During the year 1969, X Corporation expended $60,000 for exploration expenditures which it elected to treat under section 615(b) as deferred expenses. Subsequent to the transfer the taxpayer made similar expenditures for domestic exploration of $250,000 and $140,000, for the years 1970, and 1971, respectively, which the taxpayer elected to deduct. In 1972, the taxpayer made expenditures for domestic exploration of $100,000 and for foreign exploration of $50,000. The taxpayer may deduct the $100,000 domestic exploration expenditures but may not deduct any portion of the $50,000 of foreign exploration expenditures because the $400,000 limitation of section 617(h) applies.

Example (2). In 1971, A and B transfer assets to a corporation in a transfer to which section 351 applied. Among the assets transferred by A is a mineral lease with respect to certain coal lands. A has deducted exploration expenditures under section 615 for the years 1968 and 1969 in the amounts of $50,000 and $100,000, respectively, made with respect to other deposits not included in the transfer to the corporation. The corporation is required to take into account the deductions previously made by A for purpose of applying the $400,000 limitation on deduction of foreign exploration expenditures. Thus, if in 1970 the corporation incurred $400,000 of foreign exploration expenditures, the maximum which it could deduct under section 617(a) is $250,000.

[T.D. 7192, 37 FR 12944, June 30, 1972]

§ 1.617–3 Recapture of exploration expenditures.

(a) In general. (1)(i) Except as provided in subparagraphs (2) and (3) of this paragraph, if in any taxable year any mine (as defined in paragraph (c) of this section) with respect to which deductions have been allowed under section 617(a) reaches the producing stage (as defined in paragraph (c) of this section) the deduction for depletion under section 611 (whether determined under § 1.611–2 or under section 613) with respect to the property shall be disallowed for the taxable year and each subsequent taxable year until the aggregate amount of depletion which would be allowable but for section 617(b)(1)(B) and this subparagraph equals the amount of the adjusted exploration expenditures (determined under section 617(f)(1) and paragraph (d) of this section) attributable to the mine. The preceding sentence shall apply notwithstanding the fact that such mine is not in the producing stage at the close of such taxable year. In the case of a taxpayer who owns more than one property in a mine with respect to which he has been allowed deductions under section 617(a), the depletion deduction described in the second preceding sentence shall be disallowed with respect to all of the properties until the aggregate amount of depletion disallowed under section 617(b)(1)(B) is equal to the adjusted exploration expenditures with respect to the mine. In the case of a taxpayer who elects under section 614(c)(1) to aggregate a mine, with respect to which he has been allowed deductions under section 617(a), with another mine, no deduction for depletion will be allowable under section 611 with respect to the aggregated property until the amount of depletion disallowed under section 617(b)(1)(B) equals the adjusted exploration expenditures attributable to all of the producing mines included in the aggregated property.

(ii) If a taxpayer who has made an election under section 617(a) receives or accrues a bonus or royalty with respect to a mining property with respect to which deductions have been allowed under section 617(a), the deduction for depletion under section 611 with respect to such bonus or royalty (whether determined under § 1.611–2 or under section 613) shall be disallowed for the taxable year of receipt or accrual and each subsequent taxable year until the aggregate amount of the depletion disallowed under section 617(c) and this section equals the amount of the adjusted exploration expenditures with respect to the property to which the bonus or royalty relates. The preceding sentence shall not apply if the bonus or royalty is paid with respect to a mineral for which a deduction is not allowable under section 617(a). In the case of the disposal of coal or domestic iron ore with a retained economic interest, see paragraph (a)(2) of § 1.617–4.

(2) If the taxpayer so elects with respect to all mines as to which deductions have been allowed under section 617(a) and which reach the producing stage during the taxable year, he shall include in gross income (but not "gross income from the property" for purposes of section 613) for such taxable year an amount equal to the adjusted

exploration expenditures (determined under section 617(f)(1) and paragraph (d) of this section) with respect to all of such mines. The amount so included in income shall be treated for purposes of subtitle A of the Internal Revenue Code as expenditures which are paid or incurred on the respective dates on which the mines reach the producing stage and which are properly chargeable to capital account. The fact that a taxpayer does not make the election described in this subparagraph for a taxable year during which mines with respect to which deductions have been allowed under section 617(a) reach the producing stage shall not preclude the taxpayer from making the election with respect to other mines which reach the producing stage during subsequent taxable years. However, the election described in this subparagraph may not be made for any taxable year with respect to any mines which reached the producing stage during a preceding taxable year.

(3) The provisions of section 617(b)(1) and subparagraphs (1) and (2) of this paragraph do not apply in the case of any deposit of oil or gas. For example, A in exploring for sulphur incurred $500,000 of exploration expenditures which he deducted under section 617(a). In the following year, A did not find sulphur but on the same mineral property located commercially marketable quantities of oil and gas. In computing the depletion allowance with respect to the oil and gas, no depletion would be disallowed because of section 617(b)(1).

(4) In the case of exploration expenditures which are paid or incurred with respect to a mining property which contains more than one mine, the provisions of subparagraphs (1) and (2) of this paragraph shall apply only to the amount of the adjusted exploration expenditures properly chargeable to the mine or mines which reach the producing stage during the taxable year. For example, A owns a mining property which contains mines X, Y, and Z. For 1970, A deducted under section 617(a), $250,000 with respect to X, $100,000 with respect to Y and $70,000 with respect to Z. In 1971, mine X reaches the producing stage. At that time, A will only have to recapture the $250,000 attributable to mine X.

(b) Manner and time for making election. **(1)** A taxpayer will be deemed not to have elected pursuant to section 617(b)(1)(A) and paragraph (a)(2) of this section unless he clearly indicates such election on his income tax return for the taxable year in which the mine with respect to which deductions were allowed under section 617(a) reaches the producing stage.

(2) The election described in paragraph (a)(2) of this section may be made (or changed) not later than the time prescribed by law for filing the return (including extensions thereof) for the taxable year in which the mine with respect to which deductions were allowed under section 617(a) reaches the producing stage.

(c) Definitions—(1) Mine. The term "mine" includes all quarries, pits, shafts, and wells, and any other excavations or workings for the purpose of extracting any known deposit of ore or other mineral.

(2) Producing stage. A mine will be considered to have reached the producing stage when (i) the major portion of the mineral production is obtained from workings other than those opened for the purpose of development, or (ii) the principal activity of the mine is the production of developed ores or minerals rather than the development of additional ores or minerals for mining.

(3) Mining property. The term "mining property" means any property (as the term is defined in section 614(a) after the application of subsections (c) and (e) thereof) with respect to which any expenditures allowed as deductions under section 617(a) are properly chargeable.

(d) Adjusted exploration expenditures—(1) In general. The term "adjusted exploration expenditures" means, with respect to any property or mine—

(i) The aggregate amount of the expenditures allowed as deductions under section 617(a) for the taxable year and all preceding taxable years to the taxpayer or any other person which are properly chargeable to such property or mine and which (but for the election under section 617(a)) would be reflected in the adjusted basis of such property or mine, reduced by

(ii) The excess, if any, of the amount which would have been allowable for all taxable years under section 613 but for the deduction of such expenditures over the amount allowable for depletion under section 611 (determined without regard to section 617(b)(1)(B)). The amount determined under the preceding sentence shall be reduced by the aggregate of the amounts included in gross income for the taxable year and all preceding taxable years under section 617(b) or (c) and the amount treated under section 617(d) as gain from the sale or exchange of the property which is neither a capital asset nor property described in section 1231.

(iii) If a taxpayer pays or incurs exploration expenditures on a property which contains a producing mine and if such taxpayer deducts any portion of such expenditures under section 617(a), an amount equal to the amount so deducted shall be taken into account in computing the taxpayer's "taxable income from the property" for the purposes of the limitation on the percentage depletion deduction under section 613(a) and the regulations thereunder. The amount of the adjusted exploration expenditures with respect to the producing mine shall be reduced by an amount equal to the amount by which the taxpayer's deduction under 617(a) (described in the preceding sentence) reduces the taxpayer's deduction for depletion for the taxable year. See example (1) in subparagraph (6) of this paragraph.

(iv) For purposes of § 1.617-4, the aggregate amount of adjusted exploration expenditures with respect to a mining property includes the aggregate amount of adjusted exploration expenditures properly allocable to all mines on such property.

(v)(a) For purposes of paragraph (a)(1) of this section, the aggregate amount of the adjusted exploration expenditures is determined as of the close of the taxpayer's taxable year.

(b) For purposes of § 1.617-4, the aggregate amount of the adjusted exploration expenditures is determined as of the date of the disposition of the mining property or portion thereof.

(2) Adjustments for certain expenditures of other taxpayers or in respect of other property. (i) For purposes of subparagraph (1) of this paragraph, the exploration expenditures which must be taken into account in determining the adjusted exploration expenditures with respect to any property or mine are not limited to those expenditures with respect to the property disposed of or which entered the production stage nor are such expenditures limited to those deducted by the taxpayer. For the manner of determining the amount of adjusted exploration expenditures immediately after certain dispositions, see subparagraph (4) of this paragraph.

(ii) If a transferee who at the time of the transfer has not made an election under section 617(a) (including a transferee who has made an election under section 615(e)) receives mineral property in a transaction in which the basis of such property in his hands is determined in whole or in part by reference to its basis in the hands of the transferor and with respect to such property the transferor has deducted exploration expenditures under section 617(a), the adjusted exploration expenditures immediately after such transfer shall be treated as exploration expenditures allowed as deductions under section 617(a) to the transferee.

(iii) If a transferee who makes an election under section 617(a) receives mineral property in a transaction in which the basis of such property in his hands is determined in whole or in part by reference to the basis of such property in the hands of the transferor and the transferor had in effect at the time of the transfer an election under section 615(e), an amount equal to the total of the amounts allowed as deductions to the transferor under section 615 with respect to the transferred property shall be treated as expenditures allowed as deductions under section 617(a) to the transferee. The preceding sentence shall not apply to expenditures which could not have been reflected in the basis of the property in the hands of the transferee had the transferor not made the section 615(e) election.

(iv) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). On July 14, 1969, A purchased mineral property Z for $10,000. After deducting exploration expenditures of $20,000 under section 617(a), A transferred the property to his son as a gift on July 9, 1970. Since the exception for gifts in section 617(d)(3) (by incorporation by reference of the provisions of section 1245(b)(1)) applies, A does not recognize gain under section 617(d). On September 30, 1972 after deducting exploration expenditures of $150,000 under section 617(a), the son transfers the mineral property to corporation X in a transaction under which no gain is recognized by the son under section 351. Since the exception of section 617(d)(3) (by incorporation by reference of the provisions of section 1245(b)(3)) applies, the son does not recognize gain under section 617(d). On November 14, 1972, corporation X sells the mineral property. No deductions for exploration expenditures were taken by corporation X. The amount of the adjusted exploration expenditures with respect to mineral property Z to be recaptured by corporation X upon such sale is $170,000 (the total amount deducted by A and the son).

Example (2). Assume the same facts as in example (1) except that A deducted the $20,000 of exploration expenditures under section 615(a). The amount of the adjusted exploration expenditures with respect to mineral property Z in corporation X's hands is $170,000 (the $20,000 deducted under section 615(a) by A plus the $150,000 deducted under section 617(a) by the son).

(3) Allocation of certain expenditures. A project area consists of that territory which the taxpayer has determined by analysis of certain variables (the size and topography of the area to be explored, existing information with respect to that area and nearby areas, and the quantity of equipment, men, and money available) can be explored advantageously as a single integrated operation. If exploration expenditures are paid or incurred with respect to a project area and one or more areas of interest are identified within such

project area, the entire amount of such expenditures shall be allocated equally to each such area of interest. If an area of interest contains one or more mines or deposits the expenditures allocable to such area of interest shall be allocated (i) if only one mine or deposit is located or identified, entirely to such mine or deposit, or (ii) if more than one mine or deposit is located or identified, equally among the various mines or deposits located. For purposes of this subparagraph, the term "area of interest" means each separable, noncontiguous portion of the project area which is identified as possessing sufficient mineral-producing potential to merit further exploration. The provisions of this subparagraph may be illustrated by the following example: A pays $100,000 for the exploration of a project area which results in the identification of two areas of interest. A pays an additional $60,000 for the exploration of one of the areas of interest in which he locates mineral deposit X and mineral deposit Y. With respect to the exploration of deposit X he incurs an additional $100,000 of expenses and with respect to deposit Y he incurs an additional $200,000 of expenses. The exploration expenditures properly attributable to deposit X would be $155,000 ($100,000 plus one-half of $50,000 plus one-half of $60,000) and the exploration expenditures properly attributable to deposit Y would be $255,000 ($200,000 plus one-half of $50,000 plus one-half of $60,000).

(4) Partnership distributions. The adjusted exploration expenditures with respect to any property or mine received by a taxpayer in a distribution with respect to all or part of his interest in a partnership (i) include the adjusted exploration expenditures (not otherwise included under section 617(f)(1)) with respect to such property or mine immediately prior to such distribution and (ii) shall be reduced by the amount of gain to which section 751(b) applies realized by the partnership (as constituted after the distribution) on the distribution of such property or mine. In the case of any property or mine held by a partnership after a distribution to a partner to which section 751(b) applies, the adjusted exploration expenditures with respect to such property or mine shall be reduced by the amount of gain (if any) to which section 751(b) applies realized by such partner with respect to such distribution on account of such property or mine.

(5) Amount of transferee's adjusted exploration expenditures immediately after certain acquisitions—(i) Transactions in which basis is determined by reference to the cost or fair market value of the property transferred. (a) If on the date a person acquires mining property his basis for the property is determined solely by reference to its cost (within the meaning of section 1012), then on such date the amount of the adjusted exploration expenditures for the mining property in such person's hands is zero.

(b) If on the date a person acquires mining property his basis for the property is determined solely by reason of the application of section 301(d) (relating to basis of property received in corporate distribution) or section 334(a) (relating to basis of property received in a liquidation in which gain or loss is recognized), then on such date the amount of the adjusted exploration expenditures for the mining property in such person's hands is zero.

(c) If on the date a person acquires mining property his basis for the property is determined solely under the provisions of section 334(b)(2) or (c) (relating to basis of property received in certain corporate liquidations), then on such date the amount of the adjusted exploration expenditures for the mining property in such person's hands is zero.

(d) If on the date a person acquires mining property from a decedent such person's basis is determined, by reason of the application of section 1014(a), solely by reference to the fair market value of the property on the date of the decedent's death or on the applicable date provided in section 2032 (relating to alternate valuation date), then on the date of acquisition the amount of the adjusted exploration expenditures for the mining property in such person's hands is zero.

(ii) Gifts and certain tax-free transactions. (a) If mining property is disposed of in a transaction described in (b) of this subdivision (ii), then the amount of the adjusted exploration expenditures for the mining property in the hands of a transferee immediately after the disposition shall be an amount equal to—

(1) The amount of the adjusted exploration expenditures with respect to the mining property in the hands of the transferor immediately before the disposition, minus

(2) The amount of any gain taken into account under section 617(d) by the transferor upon the disposition.

(b) The transactions referred to in (a) of this subdivision (ii) are—

(1) A disposition which is in part a sale or exchange and in part a gift, or

(2) A disposition which is described in section 617(d) through the incorporation by reference of the provisions of section 1245(b)(3) (relating to certain tax free transactions).

(iii) Property acquired from a decedent. If mining property is acquired in a transfer at death to which section 617(d) applies through incorporation by reference of the provisions of section 1245(b)(2), the amount of the adjusted exploration expenditures with respect to the mining property in the hands of the transferee immediately after the transfer shall include the amount, if any, of the exploration expenditures deducted by the transferee before the decedent's death, to the extent that the basis of the mining property (determined under section 1014(a)) is required to be reduced under the second sentence of section 1014(b)(9) (relating to adjustments to basis where the property is acquired from a decedent prior to his death).

(6) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). A owns the working interest in a large tract of land located in the United States. A's interest in the entire tract of land constitutes one property for purposes of section 614. In the northwest corner of this tract is an operating mine, X, producing an ore of beryllium, which is entitled to a percentage depletion rate of 22 percent under section 613(b)(2)(B). During 1971, A conducts an exploration program in the southeast corner of this same tract of land, and he incurs $400,000 of expenditures to which section 617(a)(1) applies in connection with this exploration program. A elects to deduct this amount as expenses under section 617(a). During 1971, A's "gross income from the property" computed under section 613 was $1 million, with respect to the property encompassing mine X and the area in which exploration was conducted. A's "taxable income from the property" computed under section 613, before adjustment to reflect the deductions taken with respect to the property during the year under section 617, was $400,000. The cost depletion deduction allowable and deducted with respect to the property during 1971 was $50,000. The amount of adjusted exploration expenditures chargeable to the exploratory mine (hereinafter referred to as mine Y) at the close of 1971 is $250,000, computed as follows:

Expenditures allowed as deductions under sec. 617(a)		$400,000
Gross income from the property	$1,000,000	
22 percent thereof	220,000	
Taxable income from the property, before adjustment to reflect deductions allowed under sec. 617 during year	400,000	
50 percent thereof—tentative deduction	200,000	
Taxable income from the property after adjustment to reflect deductions allowed under sec. 617 during year ($400,000 minus $400,000)	0	
Cost depletion allowed for year	50,000	
Amount by which allowance for depletion under sec. 611 was reduced on account of deductions under sec. 617 ($200,000 minus $50,000)		150,000
Adjusted exploration expenditures at end of 1971		250,000

Example (2). Assume the same facts as in example 1. Assume further that mine Y, with respect to which exploration expenditures were deducted in 1971, enters the producing stage in 1972, and that no deductions were taken under section 617 with respect to that mine after 1971. A does not make an election under section 617(b)(1)(A) during 1972. Assume that the depletion deduction which would be allowable for 1972 with respect to the property (which includes both mines) but for the application of section 617(b)(1)(B) is $100,000. Pursuant to section 617(b)(1)(B), this depletion deduction is disallowed. Therefore, the amount of adjusted exploration expenditures with respect to mine Y at the end of 1972 is $150,000 ($250,000 less $100,000).

[T.D. 7192, 37 FR 12945, June 30, 1972]

§ 1.617–4 Treatment of gain from disposition of certain mining property.

(a) In general. (1) In general, section 617(d)(1) provides, that, upon a disposition of mining property, the lower of (i) the "adjusted exploration expenditures" (as defined in section 617(f)(1) and paragraph (d) of § 1.617–3) with respect to the property, or (ii) the amount, if any, by which the amount realized on the sale, exchange, or involuntary conversion (or the fair market value of the property on any other disposition, exceeds the adjusted basis of the property, shall be treated as gain from the sale of exchange of property which is neither a capital asset nor property described in section 1231 (that is, shall be recognized as ordinary income). However, any amount recognized under the preceding sentence shall not be included by the taxpayer in his "gross income from the property" for purposes of section 613. Generally, the ordinary income treatment applies even though in the absence of section 617(d) no gain would be recognized under any other provision of the Code. For example, if a corporation distributes mining property as a dividend, gain may be recognized as ordinary income to the corporation even though, in the absence of section 617, section 311(a) would preclude any recognition of gain to the corporation. For an exception to the recognition of gain with respect to dispositions which involve mineral production payments, see section 636 and the regulations thereunder. For the definition of the term "mining property", see section 617(f)(2) and paragraph (c)(3), of § 1.617–3. For exceptions and limitations to the application of section 617(d)(1), see section 617(d)(3) and paragraph (c) of this section.

(2) In the case of a sale, exchange, or involuntary conversion of mining property, the gain to which section 617(d)(1) applies is the lower of the adjusted exploration expenditures with respect to such property or the excess of the amount realized upon the disposition of the property over the adjusted basis of the property. In the case of a disposition of mining property other than by a manner described in the preceding sentence, the gain to which section 617(d)(1) applies is the lower of the adjusted exploration expenditures with respect to such property or the excess of the fair market value of the property on the date of disposition over the adjusted basis of the property. In the case of a disposal of coal or domestic iron ore subject to a retained economic interest to which section 631(c) applies, the excess of the amount realized over the adjusted basis of the mining property shall be treated as equal to the gain, if any, referred to in section 631(c). For determination of the amount realized upon a disposition of mining property and nonmining property, see paragraph (c)(3)(i) of this section.

(3) The provisions of this paragraph may be illustrated by the following examples:

Example (1). On July 14, 1970, A purchased undeveloped mining property for $100,000. During 1970, A incurred with respect to the property, $50,000 of exploration expenditures which he deducts under section 617(a). In 1971, A incurred $150,000 of exploration expenditures with respect to the property which he deducts on his income tax return. On January 2, 1972, A sells the mining property to B for $250,000. A's gain on the sale is $150,000 ($250,000 amount realized minus $100,000 basis). Since the excess of the amount realized over the adjusted basis of the mining property is less than the adjusted exploration expenditures with respect to the property ($200,000), the entire gain is treated as ordinary income under section 617(d)(1).

Example (2). Assume the same facts as in example (1) except that A sells the mining property to B for $400,000, thereby realizing gain of $300,000 ($400,000 minus $100,000 basis). Since the amount of adjusted exploration expenditures with respect to the mining property ($200,000) is less than the amount realized upon its disposition ($300,000), an amount equal to the amount of adjusted exploration expenditures is treated as ordinary income under section 617(d)(1). The remaining $100,000 is treated by A without regard to section 617(d)(1).

(4) Section 617(d) does not apply to losses. Thus, section 617(d) does not apply if a loss is realized upon a sale, exchange, or involuntary conversion of mining property, nor does section 617(d) apply to a disposition of mining property other than by way of sale, exchange, or involuntary conversion if at the time of the disposition the fair market value of such property is not greater than its adjusted basis.

(b) Disposition of portion of mining property. (1) For purposes of section 617(d)(1) and paragraph (a) of this section, except as provided in subparagraph (3) of this paragraph, in the case of the disposition of a portion of a mining property (other than an undivided interest), the entire amount of the adjusted exploration expenditures with respect to such property shall be treated as attributable to such portion to the extent of the amount of the gain to which section 617(d)(1) applies. If the amount of the gain to which section 617(d)(1) applies is less than the amount of the adjusted exploration expenditures with respect to the property, the balance of the adjusted exploration expenditures shall remain subject to recapture in the hands of the taxpayer under the provisions of sections 617(b), (c), and (d). The disposition of a portion of a mining property (other than an undivided interest) includes the disposition of a geographical portion of a mining property. For example, assume that A owns an 80-acre tract of land with respect to which he has deducted exploration expenditures under section 617(a). If A were to sell the north 40 acres, the entire amount of the adjusted exploration expenditures with respect to the 80-acre tract would be treated as attributable to the 40-acre portion sold (to the extent of the amount of the gain to which section 617(d)(1) applies).

(2) For purposes of section 617(d)(1), except as provided in subparagraph (3) of this paragraph, in the case of the disposition of an undivided interest in a mining property (or portion thereof) a proportionate part of the adjusted exploration expenditures with respect to such property shall be treated as attributable to such undivided interest to the extent of the amount of the gain to which section 617(d)(1) applies. For example, assume that A owns an 80-acre tract of land with respect to which he has deducted exploration expenditures under section 617(a). If A were to sell an undivided 40 percent interest in such tract, 40 percent of the adjusted exploration expenditures with respect to the 80-acre tract would be treated as attributable to the 40 percent of the 80-acre tract disposed of (to the extent of the amount of the gain to which section 617(d)(1) applies).

(3) Section 617(d)(2) and subparagraphs (1) and (2) of this paragraph shall not apply to any expenditure to the extent that such expenditure relates neither to the portion (or interest therein) disposed of nor to any mine, in the property held by the taxpayer before the disposition, which has reached the producing stage. In any case where a taxpayer disposes of a mining property (or interest therein) and treats adjusted exploration expenditures with respect to the mining property as if they

relate neither to the portion (or interest therein) disposed of nor to any mine, in the property held by the taxpayer before the disposition, which has reached the producing stage, the taxpayer shall attach to its return for the taxable year in which the disposition occurred, a statement which includes:

(i) A description of the portion (or interest therein) disposed of;

(ii) A description of the mineral property which included the portion (or interest therein) disposed of;

(iii) An itemization of all expenditures deducted under sections 617 and 615 with respect to such mineral property; and

(iv) A description of the location of all producing mines on such mineral property.

(c) Exceptions. (1)(i) Section 617(d)(3) provides, through incorporation by reference of the provisions of section 1245(b)(1), that no gain shall be recognized under section 617(d) upon a disposition by gift of mining property. For purposes of this subparagraph, the term "gift" means, except to the extent that subdivision (ii) of this subparagraph applies, a transfer of mining property which, in the hands of the transferee, has a basis determined under the provisions of section 1015(a) or (d) (relating to basis of property acquired by gift). For reduction in amount of the charitable contribution in case of a gift of section 617 property, see section 170(e) and paragraph (c)(3) of § 1.170–1.

(ii) Where a disposition of mining property is in part a sale or exchange and in part a gift, the gain to which section 617(d) applies is the lower of the adjusted exploration expenditures with respect to such property or the excess of the amount realized upon the disposition of the property over the adjusted basis of such property.

(2) Section 617(d)(3) provides, through incorporation by reference of the provisions of section 1245(b)(2), that, except as provided in section 691 (relating to income in respect to a decedent), no gain shall be recognized under section 617(d) upon a transfer at death. For purposes of this paragraph, the term "transfer at death" means a transfer of mining property which property, in the hands of the transferee, has a basis determined under the provisions of section 1014(a) (relating to basis of property acquired from a decedent) because of the death of the transferor.

(3)(i) Section 617(d) provides, through incorporation by reference of the provisions of section 1245(b)(3), that upon a transfer of property described in subdivision (ii) of this subparagraph, the amount of gain taken into account by the transferor under section 617(d) shall not exceed the amount of gain recognized to the transferor on the transfer (determined without regard to section 617). For purposes of this subdivision, in case of a transfer of mining property and nonmining property in one transaction, the amount realized from the disposition of the mining property shall be deemed to be equal to the amount which bears the same ratio to the total amount realized as the fair market value of the mining property bears to the aggregate fair market value of all of the property transferred. The preceding sentence shall be applied solely for purposes of computing the portion of the total gain (determined without regard to section 617) which shall be recognized as ordinary income under section 617(d). Section 617(d)(3) does not apply to a disposition of mining property to an organization (other than a cooperative described in section 521) which is exempt from the tax imposed by chapter 1 of the Code.

(ii) The transfers referred to in subdivision (i) of this subparagraph are transfers of mining property in which the basis of the mining property in the hands of the transferee is determined by reference to its basis in the hands of the transferor by reason of the application of any of the following provisions:

(a) Section 332 (relating to distributions in complete liquidation of an 80-percent-or-more controlled subsidiary corporation). See subdivision (iii) of this subparagraph.

(b) Section 351 (relating to transfer to a corporation controlled by transferor).

(c) Section 361 (relating to exchanges pursuant to certain corporate reorganizations).

(d) Section 371(a) (relating to exchanges pursuant to certain receivership and bankruptcy proceedings).

(e) Section 374(a) (relating to exchanges pursuant to certain railroad reorganizations).

(f) Section 721 (relating to transfers to a partnership in exchange for a partnership interest).

(g) Section 731 (relating to distributions by a partnership to a partner).

(iii) In the case of a distribution in complete liquidation of an 80-percent-or-more controlled subsidiary to which section 332 applies, the limitation provided in section 617(d)(3), through incorporation by reference of the provisions of section

1245(b)(3), is confined to instances in which the basis of the mining property in the hands of the transferee is determined under section 334(b)(1), by reference to its basis in the hands of the transferor. Thus, for example, the limitation may apply in respect of a liquidating distribution of mining property by an 80-percent-or-more controlled corporation to the parent corporation, but does not apply in respect of a liquidating distribution of mining property to a minority shareholder. Section 617(d)(3) does not apply to a liquidating distribution of property by an 80-percent-or-more controlled subsidiary to its parent if the parent's basis for the property is determined, under section 334(b)(2), by reference to its basis in the stock of the subsidiary.

[T.D. 7192, 37 FR 12947, June 30, 1972]

Exclusions From Gross Income

§ 1.621–1 Payments to encourage exploration, development, and mining for defense purposes.

(a) **General rule.** (1) Under section 621, a taxpayer shall exclude from gross income amounts which are paid to him:

(i) By the United States or by an agency or instrumentality of the United States,

(ii) As a grant, gift, bounty, bonus, premium, incentive, subsidy, loan, or advance,

(iii) For the encouragement of exploration for, or development or mining of, a critical and strategic mineral or metal,

(iv) Pursuant to or in connection with an undertaking by the taxpayer to explore for, or develop or produce, such mineral or metal and to expend or use any amounts so received for the purpose and in accordance with the terms and conditions upon which such amounts are paid, which undertaking has been approved by the United States or by an agency or instrumentality of the United States, and

(v) For which the taxpayer has accounted, or is required to account, to an appropriate agency of the United States Government for the expenditure or use thereof for the purpose and in accordance with the terms and conditions upon which such amounts are paid.

In order for section 621 to apply, such amount must qualify under each of the foregoing subdivisions of this paragraph. Under section 621, there shall also be excluded from gross income any income attributable to the forgiveness or discharge of any indebtedness arising from amounts to which such section applies.

(2) Section 621 is applicable whether or not the payee is obligated to repay to the United States any portion or all of the amount so received. However, such section is not applicable to any loan or advance for the repayment of which the borrower's liability is unconditional and legally enforceable.

(3) Except as provided in paragraph (e) of this section any expenditure attributable to an amount received by a taxpayer to which section 621 applies shall not be deductible by the taxpayer as an expense under subtitle A of the Code, nor shall any such expenditure increase the basis of the taxpayer's property either for determining gain or loss on sale, exchange, or other disposition, or for computing depletion or depreciation (including amortization under section 168).

(b) **Allowance as part of purchase price.** (1) Section 621 is not applicable to any part of the purchase price of a critical and strategic mineral or metal which amount is received, whether before, on, or after delivery from the United States or any agency or instrumentality thereof, and irrespective of whether such purchase price is below, at, or above the currently prevailing market price.

(2) However, a payment of a separate and specific amount for the encouragement of exploration for, or development or mining of, a critical and strategic mineral or metal shall not be considered to be a part of the purchase price of such mineral or metal merely because such payment is added to, or included with, the payment of such purchase price.

(c) **Payments for expenditures previously deducted or capitalized.** (1) Where amounts described in section 621 and this section are paid to a taxpayer in reimbursement for expenditures previously allowed as a deduction, the taxpayer shall include in gross income that portion of such amounts which is equivalent to the deduction for such expenditures allowed to the taxpayer and which deduction resulted in a reduction for any taxable year of the taxpayer's taxes under subtitle A of the Code (other than chapter 2, relating to

tax on self-employment income), or prior income, war-profits, or excess-profits tax laws.

(2) Where amounts described in section 621 and this section are paid to the taxpayer in reimbursement for expenditures which have been deferred under sections 615 and 616 (relating to exploration and development expenditures) the taxpayer shall include in gross income that portion of such amounts which is equivalent to any deduction for such expenditures allowed to the taxpayer and which deduction resulted in a reduction for any taxable year of the taxpayer's taxes under subtitle A of the Code (other than chapter 2, relating to tax on self-employment income), or prior income, war-profits, or excess-profits tax laws. The portion of such amounts, equivalent to expenditures which are reflected in the adjusted basis of the assets to which charged, shall be excluded from gross income, and such adjusted basis shall be decreased by the amount of such exclusion.

(3) Where amounts described in section 621 and this section are paid to the taxpayer in reimbursement for expenditures which have been charged to capital account (either to a depletable or depreciable account), there shall be included in the taxpayer's gross income that portion of such amounts which is equivalent to such capital expenditures that have been recovered through cost depletion or depreciation deductions and which deductions have resulted in a reduction of the taxpayer's taxes for any taxable year under subtitle A of the Code (other than chapter 2, relating to tax on self-employment income), or prior income, war-profits, or excess-profits tax laws. The portion of such amounts which is equivalent to the expenditures which are reflected in the adjusted basis of the asset to which charged shall be excluded from gross income. The adjusted basis of such assets shall be reduced by the amount of such exclusion from gross income.

(4) Where amounts described in section 621 and this section are paid to the taxpayer in reimbursement for expenditures which have been charged to a depletable capital account, such amounts shall be excluded to the extent such expenditures are recovered through depletion deductions computed under section 613 (relating to percentage depletion).

(5) The amount of reimbursed expenditures charged to an account (depletable or depreciable) and recovered through depletion or depreciation deductions for any taxable year shall be that proportion of the total deductions allowed with respect to such account that such reimbursed expenditures bear to the total amount in the account. For example, in 1956 A incurs exploration expenditures of $12,000 which he charges to a depletable capital account. This brings the total amount in this account to $36,000 which is the adjusted basis of the property on January 1, 1957. In 1957, A is allowed a deduction for cost depletion of $9,000 which resulted in a reduction of A's income taxes. One-third of this deduction is attributable to the $12,000 of exploration expenditures since they were a third of the total in the capital account on January 1, 1957. Therefore, on January 1, 1958, these exploration expenditures make up $9,000 of the remaining $27,000 in the account. If on January 1, 1958, A receives $12,000, which qualifies under section 621, in reimbursement for these exploration expenditures, he must report $3,000 as income and reduce the capital account by $9,000.

(d) **Definition.** As used in section 621 and this section, the term "critical and strategic minerals or metals" means minerals and metals which are considered by those departments, agencies, and instrumentalities of the United States charged with the encouragement of exploration for, and development and mining of, critical and strategic minerals and metals, to constitute critical and strategic minerals and metals for defense purposes. See, for example, 30 CFR 301.3 (Regulations for Obtaining Federal Assistance in Financing Explorations for Mineral Reserves, Excluding Organic Fuels, in the United States, its Territories and Possessions).

(e) **Repayments of amounts excluded under section 621.** Upon the repayment by the taxpayer of any portion of any amount to which section 621 applies and which portion has been expended for the purpose and in accordance with the terms and conditions upon which it was paid to the taxpayer, any expenditures attributable to such amount made by the taxpayer shall be treated as if such expenditures had been made at the time of such repayment. Such expenditures shall to the extent of the repayment be expensed or capitalized, as the case may be, in the order in which they were actually made or in such other manner as may be adopted by the taxpayer with the approval of the Commissioner.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

Sales And Exchanges

§ 1.631-1 Election to consider cutting as sale or exchange.

(a) **Effect of election.** (1) Section 631(a) provides an election to certain taxpayers to treat the difference between the actual cost or other basis of certain timber cut during the taxable year and its fair market value as standing timber on the first day of such year as gain or loss from a sale or exchange under section 1231. Thereafter, any subsequent gain or loss shall be determined in accordance with paragraph (e) of this section.

(2) For the purposes of section 631(a) and this section, timber shall be considered cut at the time when in the ordinary course of business the quantity of timber felled is first definitely determined.

(3) The election may be made with respect to any taxable year even though such election was not made with respect to a previous taxable year. If an election has been made under the provisions of section 631(a), or corresponding provisions of prior internal revenue laws, such election shall be binding upon the taxpayer not only for the taxable year for which the election is made but also for all subsequent taxable years, unless the Commissioner on showing by the taxpayer of undue hardship permits the taxpayer to revoke his election for such subsequent taxable years. If the taxpayer has revoked a previous election, such revocation shall preclude any further elections unless the taxpayer obtains the consent of the Commissioner.

(4) Such election shall apply with respect to all timber which the taxpayer has owned, or has had a contract right to cut, for a period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) prior to when such timber is cut for sale or for use in the taxpayer's trade or business, irrespective of whether such timber or contract right was acquired before or after the election. (For purposes of the preceding sentence, the rules with respect to the holding period of property contained in section 1223 shall be applicable.) However, timber which is not cut for sale or for use in the taxpayer's trade or business (for example, firewood cut for the taxpayer's own household consumption) shall not be considered to have been sold or exchanged upon the cutting thereof.

(b) **Who may make election.** (1) A taxpayer who has owned, or has held a contract right to cut, timber for a period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) prior to when the timber is cut may elect under section 631(a) to consider the cutting of such timber during such year for sale or for use in the taxpayer's trade or business as a sale or exchange of the timber so cut. In order to have a "contract right to cut timber" within the meaning of section 631(a) and this section, a taxpayer must have a right to sell the timber cut under the contract on his own account or to use such cut timber in his trade or business.

(2) For purposes of section 631(a) and this section, the term "timber" includes evergreen trees which are more than six years old at the time severed from their roots and are sold for ornamental purposes, such as Christmas decorations. Section 631(a) is not applicable to evergreen trees which are sold in a live state, whether or not for ornamental purposes. Tops and other parts of standing timber are not considered as evergreen trees within the meaning of section 631(a). The term "evergreen trees" is used in its commonly accepted sense and includes pine, spruce, fir, hemlock, cedar, and other coniferous trees.

(c) **Manner of making election.** The election under section 631(a) must be made by the taxpayer in his income tax return for the taxable year for which the election is applicable, and such election cannot be made in an amended return for such year. The election in the return shall take the form of a computation under the provisions of section 631(a) and section 1231.

(d) **Computation of gain or loss under the election.** (1) If the cutting of timber is considered as a sale or exchange pursuant to an election made under section 631(a), gain or loss shall be recognized to the taxpayer in an amount equal to the difference between the adjusted basis for depletion in the hands of the taxpayer of the timber which has been cut during the taxable year and the fair market value of such timber as of the first day of the taxable year in which such timber is cut. The adjusted basis for depletion of the cut timber shall be based upon the number of units of timber cut during the taxable year which are considered to be sold or exchanged and upon the depletion unit of the timber in the timber account or accounts pertaining to the timber cut, and shall be computed in the same manner as is provided in section 611 and the regulations thereunder with respect to the computation of the allowance for depletion.

(2) The fair market value of the timber as of the first day of the taxable year in which such timber is cut shall be determined, subject to approval or revision by the district director upon examination of the taxpayer's return, by the taxpayer in the light of the most reliable and accurate information available with reference to the condition of the property as it existed at that date, regardless of all subsequent changes, such as changes in surrounding circumstances, methods of exploitation, degree of utilization, etc. The value sought will be the selling price, assuming a transfer between a willing seller and a willing buyer as of that particular day. Due consideration will be given to the factors and the principles involved in the determination of the fair market value of timber as described in the regulations under section 611.

(3) The fair market value as of the beginning of the taxable year of the standing timber cut during the year shall be considered to be the cost of such timber, in lieu of the actual cost or other basis of such timber, for all purposes for which such cost is a necessary factor. See paragraph (e) of this section.

(4) For any taxable year for which the cutting of timber is considered to be a sale or exchange of such timber under section 631(a), the timber so cut shall be considered as property used in the trade or business for the purposes of section 1231, along with other property of the taxpayer used in the trade or business as defined in section 1231(b), regardless of whether such timber is property of a kind which would properly be includible in the inventory of the taxpayer if on hand at the close of the taxable year or property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business. Whether the gain or loss considered to have resulted from the cutting of the timber will be considered to be gain or loss resulting from the sale or exchange of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) depends upon the application of section 1231 to the taxpayer for the taxable year. See section 1231 and the regulations thereunder.

(e) Computation of subsequent gain or loss. **(1)** In case the products of the timber are sold after cutting, either in the form of logs or lumber or in the form of manufactured products, the income from such actual sales shall be considered ordinary income. When the election under section 631(a) is in effect, the cost of standing timber cut during the taxable year is determined as if the taxpayer had purchased such timber on the first day of the taxable year. Thus, in determining the cost of the products so sold, the cost of the timber shall be the fair market value on the first day of the taxable year in which the standing timber was cut, in lieu of the actual cost or other basis of such timber.

(2) This is also the rule in case the products of the timber cut during one taxable year, with respect to which an election has been made under section 631(a), are sold during a subsequent taxable year, whether or not the election provided in section 631(a) is applicable with respect to such subsequent year. If the products of the timber cut during a taxable year with respect to which an election under section 631(a) was made were not sold during such year and are included in inventory at the close of such year, the fair market value as of the beginning of the year of the timber cut during the year shall be used in lieu of the actual cost of such timber in computing the closing inventory for such year and the opening inventory for the succeeding year. With respect to the costs applicable in the determination of the amount of such inventories, there shall be included the fair market value of the timber cut, the costs of cutting, logging, and all other expenses incident to the cost of converting the standing timber into the products in inventory. See section 471 and the regulations thereunder. The fact that the fair market value as of the first day of the taxable year in which the timber is cut is deemed to be the cost of such timber shall not preclude the taxpayer from computing its inventories upon the basis of cost or market, whichever is lower, if such is the method used by the taxpayer. Nor shall it preclude the taxpayer from computing its inventories under the last-in, first-out inventory method provided by section 472 if such section is applicable to, and has been elected by, the taxpayer.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7730, 45 FR 72650, Nov. 3, 1980]

§ 1.631–2 Gain or loss upon the disposal of timber under cutting contract.

(a) In general. **(1)** If an owner disposes of timber held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) before such disposal, under any form or type of contract whereby he retains an economic interest in such timber, the disposal shall be considered to be a sale of such timber. The difference between the amounts realized from disposal of such timber in any taxable year and the adjusted basis for depletion thereof shall be considered to be a gain or loss upon the

sale of such timber for such year. Such adjusted basis shall be computed in the same manner as provided in section 611 and the regulations thereunder with respect to the allowance for depletion. See paragraph (e)(2) of this section for definition of "owner". For the purpose of determining whether or not the timber disposed of was held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) before such disposal the rules with respect to the holding period of property contained in section 1223 shall be applicable.

(2) In the case of such a disposal, the provisions of section 1231 apply and such timber shall be considered to be property used in the trade or business for the taxable year in which it is considered to have been sold, along with other property of the taxpayer used in the trade or business as defined in section 1231(b), regardless of whether such timber is property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business. Whether gain or loss resulting from the disposition of the timber which is considered to have been sold will be deemed to be gain or loss resulting from a sale of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) will depend upon the application of section 1231 to the taxpayer for the taxable year.

(b) Determination of date of disposal. (1) For purposes of section 631(b) and this section, the date of disposal of timber shall be deemed to be the date such timber is cut. However, if payment is made to the owner under the contract for timber before such timber is cut the owner may elect to treat the date of payment as the date of disposal of such timber. Such election shall be effective only for purposes of determining the holding period of such timber. Neither section 631(b) nor the election thereunder has any effect on the time of reporting gain or loss. See subchapter E, chapter 1 of the Code and the regulations thereunder. See paragraph (c)(2) of this section for the effect of exercising the election with respect to the payment for timber held for 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less. See paragraph (d) of this section for the treatment of payments received in advance of cutting.

(2) For purposes of section 631(b) and this section, the "date such timber is cut" means the date when in the ordinary course of business the quantity of timber felled is first definitely determined.

(c) Manner and effect of election to treat date of payment as the date of disposal. (1) The election to treat the date of payment as the date of disposal of timber shall be evidenced by a statement attached to the taxpayer's income tax return filed on or before the due date (including extensions thereof) for the taxable year in which the payment is received. The statement shall specify the advance payments which are subject to the election and shall identify the contract under which the payments are made. However, in no case shall the time for making the election under section 631(b) expire before the close of March 21, 1958.

(2) Where the election to treat the date of payment as the date of disposal is made with respect to a payment made in advance of cutting, and such payment is made 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less from the date the timber disposed of was acquired, section 631(b) shall not apply to such payment irrespective of the date such timber is cut, since the timber was not held for more than six months prior to disposal.

(d) Payments received in advance of cutting. (1) Where the conditions of paragraph (a) of this section are met, amounts received or accrued prior to cutting (such as advance royalty payments or minimum royalty payments) shall be treated under section 631(b) as realized from the sale of timber if the contract of disposal provides that such amounts are to be applied as payment for timber subsequently cut. Such amounts will be so treated irrespective of whether or not an election has been made under paragraph (c) of this section to treat the date of payment as the date of disposal. For example, if no election has been made under paragraph (c) of this section, amounts received or accrued prior to cutting will be treated as realized from the sale of timber, provided the timber paid for is cut more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) after the date of acquisition of such timber.

(2) However, if the right to cut timber under the contract expires, terminates, or is abandoned before the timber which has been paid for is cut, the taxpayer shall treat payments attributable to the uncut timber as ordinary income and not as received from the sale of timber under section 631(b). Accordingly, the taxpayer shall recompute his tax liability for the taxable year in which such payments were received or accrued. The recomputation shall be made in the form of an amended return where necessary.

(3)(i) Bonuses received or accrued by an owner in connection with the grant of a contract of disposal shall be treated under section 631(b) as amounts realized from the sale of timber to the extent attributable to timber held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(ii) The adjusted depletion basis attributable to the bonus shall be determined under the provisions of section 612 and the regulations thereunder. This subdivision may be illustrated as follows:

Example. Taxpayer A has held timber having a depletion basis of $90,000 for two months when he enters into a contract of disposal with B. B pays A a bonus of $5,000 upon the execution of the contract and agrees to pay X dollars per unit of timber to A as the timber is cut. A does not exercise the election to treat the date of payment as the date of disposal. It is estimated that there are 50,000 units of timber subject to the contract and that the total estimated royalties to be paid to A will be $95,000. A must report the bonus in the taxable year it is received or accrued by him. The portion of the basis of the timber attributable to the bonus is determined by the following formula:

(Bonus ÷ Bonus + amount of expected royalties) × Basis of timber = Basis attributable to bonus.

[($5,000 ÷ $100,000) × $90,000 = $4,500]

(iii) To the extent attributable to timber not held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), such bonuses shall be treated as ordinary income subject to depletion. In order to determine the amount of the bonus allocable to timber not held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), the bonus shall be apportioned ratably over the estimated number of units of timber covered by the contract of disposal. This subdivision may be illustrated as follows:

Example. Assume under the facts stated in the example in subdivision (ii) of this subparagraph that B cuts 10,000 units of timber that have been held by A for 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less. The amount of the bonus (as well as the royalties) attributable to these units must be reported as ordinary income subject to depletion. The amount of the bonus attributable to these units is determined by the following formula:

(Number of units cut held for six months or less ÷ Total units covered by the contract) × Amount of bonus = Amount of bonus treated as ordinary income subject to depletion.

[($10,000 ÷ $50,000) × $5,000 = $1,000]

The amount of the depletion attributable to the portion of the bonus received for timber held for six months or less is determined by the following formula:

(Amount of bonus attributable to timber held for six months or less ÷ Total bonus) × Adjusted basis for depletion of bonus = Depletion allowance on timber held for six months or less.

[($1,000 ÷ $5,000) × $4,500 = $900]

The amount of the bonus attributable to timber held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), and which is treated under section 631(b) as realized from the sale of timber would be $4,000. The gain on such amount is $400 ($4,000–$3,600).

(iv) If the right to cut timber under the contract of disposal expires, terminates, or is abandoned before any timber is cut, the taxpayer shall treat the bonus received under such contract as ordinary income, not subject to depletion. Accordingly, the taxpayer shall recompute his tax liability for the taxable year in which such bonus was received. The recomputation shall be made in the form of an amended return where necessary.

(e) **Other rules for application of section.** (1) Amounts paid by the lessee for timber or the acquisition of timber cutting rights, whether designated as such or as a rental, royalty, or bonus, shall be treated as the cost of timber and constitute part of the lessee's depletable basis of the timber, irrespective of the treatment accorded such payments in the hands of the lessor.

(2) The provisions of section 631(b) apply only to an owner of timber. An owner of timber means any person who owns an interest in timber, including a sublessor and a holder of a contract to cut timber. Such owner of timber must have a right to cut timber for sale on his own account or for use in his trade or business in order to own an interest in timber within the meaning of section 631(b).

(3) For purposes of section 631(b) and this section, the term "timber" includes evergreen trees which are more than 6 years old at the time severed from their roots and are sold for ornamental purposes such as Christmas decorations. Tops and other parts of standing timber are not considered as evergreen trees within the meaning of section 631(b). The term "evergreen trees" is used in its commonly accepted sense and includes pine, spruce, fir, hemlock, cedar, and other coniferous trees.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.631–3 Gain or loss upon the disposal of coal or domestic iron ore with a retained economic interest.

(a) **In general.** (1) The provisions of section 631(c) apply to an owner who disposes of coal

(including lignite), or iron ore mined in the United States, held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) before such disposal under any form or type of contract whereby he retains an economic interest in such coal or iron ore. The difference between the amount realized from disposal of the coal or iron ore in any taxable year, and the adjusted depletion basis thereof plus the deductions disallowed for the taxable year under section 272, shall be gain or loss upon the sale of the coal or iron ore. See paragraph (b)(4) of this section for the definition of "owner." See paragraph (e) of this section for special rules relating to iron ore.

(2) In the case of such a disposal, the provisions of section 1231 apply, and the coal or iron ore shall be considered to be property used in the trade or business for the taxable year in which it is considered to have been sold, along with other property of the taxpayer used in the trade or business as defined in section 1231(b), regardless of whether the coal or iron ore is property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business. Whether gain or loss resulting from the disposition of the coal or iron ore which is considered to have been sold will be deemed to be gain or loss resulting from a sale of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) will depend on the application of section 1231 to the taxpayer for the taxable year; *i.e.*, if the gains do not exceed the losses, they shall not be considered as gains and losses from sales or exchanges of capital assets but shall be treated as ordinary gains and losses.

(b) Rules for application of section. **(1)** For purposes of section 631(c) and this section, the date of disposal of the coal or iron ore shall be deemed to be the date the coal or iron ore is mined. If the coal or iron ore has been held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) on the date it is mined, it is immaterial that it had not been held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) on the date of the contract. There shall be no allowance for percentage depletion provided in section 613 with respect to amounts which are considered to be realized from the sale of coal or iron ore under section 631(c).

(2) The term "adjusted depletion basis" as used in section 631(c) and this section means the basis for allowance of cost depletion provided in section 612 and the regulations thereunder. Such "adjusted depletion basis" shall include exploration or development expenditures treated as deferred expenses under section 615(b) or 616(b), or corresponding provisions of prior income tax laws, and be reduced by adjustments under section 1016(a)(9) and (10), or corresponding provisions of prior income tax laws, relating to deductions of deferred expenses for exploration or development expenditures in the taxable year or any prior taxable years. The depletion unit of the coal or iron ore disposed of shall be determined under the rules provided in the regulations under section 611, relating to cost depletion.

(3)(i) In determining the gross income, the adjusted gross income, or the taxable income of the lessee, the deductions allowable with respect to rents and royalties (except rents and royalties paid by a lessee with respect to coal or iron ore disposed of by the lessee as an "owner" under section 631(c)) shall be determined without regard to the provisions of section 631(c). Thus, the amounts of rents and royalties paid or incurred by a lessee with respect to coal or iron ore shall be excluded from the lessee's gross income from the property for the purpose of determining his percentage depletion without regard to the treatment of such rents or royalties in the hands of the recipient under this section. See section 613 and the regulations thereunder.

(ii)(*a*) However, a lessee who is also a sublessor may dispose of coal or iron ore as an "owner" under section 631(c). Rents and royalties paid with respect to coal or iron ore disposed of by such a lessee under section 631(c) shall increase the adjusted depletion basis of the coal or iron ore and are not otherwise deductible.

(*b*) The provisions of this subdivision may be illustrated by the following example:

Example. B is a sublessor of a coal lease; A is the lessor; and C is the sublessee. B pays A a royalty of 50 cents per ton. C pays B a royalty of 60 cents per ton. The amount realized by B under section 631(c) is 60 cents per ton and will be reduced by the adjusted depletion basis of 50 cents per ton, leaving a gain of 10 cents per ton taxable under section 631(c).

(4)(i) The provisions of this section applies only to an owner who has disposed of coal or iron ore and retained an economic interest. For the purposes of section 631(c) and this section, the word "owner" means any person who owns an economic interest in coal or iron ore in place, including a sublessor thereof. A person who merely acquires an economic interest and has not disposed of coal or iron ore under a contract retaining an economic

interest does not qualify under section 631(c). A successor to the interest of a person who has disposed of coal or iron ore under a contract by virtue of which he retained an economic interest in such coal or iron ore is also entitled to the benefits of this section. Section 631(c) and this section shall not apply with respect to any income realized by any owner as co-adventurer, partner, or principal in the mining of such coal or iron ore.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). A owns a tract of coal land in fee. A leases to B the right to mine all the coal in this tract in return for a royalty of 30 cents per ton. B subleases his right to mine coal in this tract to C, who agrees to pay A 30 cents per ton and to pay to B an additional royalty of 10 cents per ton. Section 631(c) applies to the royalties of both A and B, if the other requisites of the section have been met.

Example (2). Assume the same facts as in example (1), except that A dies leaving his royalty interest to D. D has an economic interest in the coal in place and qualifies for section 631(c) treatment with respect to his share of the royalties since he is a successor in title to A.

Example (3). Assume the same facts as in example (1), except that E agrees to pay a sum of money to C in return for 10 cents per ton on the coal mined by C. E has an economic interest, since he must look solely to the extraction of the coal for the return of his investment. However, E has not made a disposal of coal under a contract wherein he retains an economic interest, and, therefore does not qualify under section 631(c). E is entitled to depletion on his royalties.

(c) **Payments received in advance of mining.** (1)(i) Where the conditions of paragraph (a) of this section are met, amounts received or accrued prior to mining shall be treated under section 631(c) as received from the sale of coal or iron ore if the contract of disposal provides that such amounts are to be applied as payment for coal or iron ore subsequently mined. For example, advance royalty payments or minimum royalty payments received by an owner of coal or iron ore qualify under section 631(c) where the contract of disposal grants the lessee the right to apply such royalties in payment of coal or iron ore mined at a later time.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. A acquires coal rights on January 1. On January 30, A enters into a contract of disposal providing that mining shall begin July 2, and mining actually begins no earlier. Any advance payments which A receives qualify under section 631(c).

(2) However, if the right to mine coal or iron ore under the contract expires, terminates, or is abandoned before the coal or iron ore which had been paid for is mined, the taxpayer shall treat payments attributable to the unmined coal or iron ore as ordinary income and not as received from the sale of coal or iron ore under section 631(c). Accordingly, the taxpayer shall recompute his tax liability for the taxable year in which such payments were received. The recomputation shall be made in the form of an amended return where necessary.

(3) Bonuses received or accrued by an owner in connection with the grant of a contract of disposal shall be treated under section 631(c) as received from the sale of coal or iron ore to the extent attributable to coal or iron ore held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). The rules contained in paragraph (d) of § 1.631–2 relating to bonuses in the case of contracts for the disposal of timber shall be equally applicable in the case of bonuses received for the grant of a contract of disposal of coal or iron ore under this section.

(d) **Nonapplication of section.** Section 631(c) shall not affect the application of the provisions of subchapter G, chapter 1 of the Code, relating to corporations used to avoid income tax on shareholders. For example, for the purposes of applying section 543 (relating to personal holding companies), the amounts received from a disposal of coal or iron ore subject to section 631(c) shall be considered as mineral royalties. The determination of whether an amount received under a contract to which section 631(c) applies is "personal holding company income" shall be made in accordance with section 543 and the regulations thereunder, without regard to section 631(c) or this section. See also paragraph (e) of § 1.272–1.

(e) **Special rules with regard to iron ore.** (1) With regard to iron ore, section 631(c) and this section apply only to amounts received or accrued in taxable years beginning after December 31, 1963, attributable to iron ore mined in such taxable years.

(2) Section 631(c) and this section apply only to disposals of iron ore mined in the United States.

(3) For the purposes of section 631(c) and this section, iron ore is any ore which is used as a source of iron, including but not limited to taconite and jaspilite.

(4) Section 631(c) shall not apply to any disposal of iron ore to a person whose relationship to the person disposing of such iron ore would result in the disallowance of losses under section 267 or 707(b).

(5) Section 631(c)(2) results in the denial of section 631(c) treatment in the case of a contract

for disposal of iron ore entered into with a person owned or controlled, directly or indirectly, by the same interests which own or control the person disposing of the iron ore, even though section 631(c) treatment would not be denied under the provisions of section 631(c)(1). For example, section 631(c) treatment is denied in the case of a contract for disposal of iron ore entered into between two "brother and sister" corporations, or a parent corporation and its subsidiary. The presence or absence of control shall be determined by applying the same standards as are applied under section 482 (relating to the allocation of income and deductions between taxpayers).

[T.D. 6841, 30 FR 9307, July 27, 1965, as amended by T.D. 7730, 45 FR 72650, Nov. 3, 1980]

§ 1.632–1 Tax on sale of oil or gas properties.

(a) If the taxpayer, by prospecting and locating claims or by exploring or discovering undeveloped claims, has demonstrated the principal value of oil or gas property, which prior to his efforts had a relatively minor value, the portion of the tax (or, in the case of taxable years beginning before Jan. 1, 1971, the surtax) imposed by section 1 attributable to a sale of such property, or of any interest of the taxpayer therein, shall not exceed 33 percent (or, in the case of taxable year beginning before Jan. 1, 1971, 30 percent) of the selling price of such property or such interest. Shares of stock in a corporation owning oil or gas property do not constitute an interest in such property. To determine the application of section 632 to a particular case, the taxpayer should first compute the tax (or surtax) imposed by section 1 upon his entire taxable income, including the taxable income from any sale of such property or interest therein, without regard to section 632. The proportion of the tax (or surtax) so computed, indicated by the ratio which the taxpayer's taxable income from the sale of the property or interest therein, computed as prescribed in this section, bears to his total taxable income is the portion of the tax attributable to such sale and, if it exceeds 33 percent (or 30 percent) of the selling price of such property or interest, such portion of the tax (or surtax) shall be reduced to that amount.

(b) In determining the portion of the taxable income attributable to the sale of such oil or gas property or interest therein, the taxpayer shall allocate to the gross income derived from such sale, and to the gross income derived from all other sources, the expenses, losses, and other deductions properly appertaining thereto and shall apply any general expenses, losses, and deductions (which cannot properly be otherwise allocated) ratably to the gross income from all sources. The gross income derived from the sale of such oil or gas property or interest therein, less the deductions properly appertaining thereto and less its proportion of any general deductions, shall be the taxable income attributable to such sale. The taxpayer shall submit with his return a statement fully explaining the manner in which such expenses, losses, and deductions are allocated or apportioned.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7117, 36 FR 9421, May 25, 1971]

Mineral Production Payments

§ 1.636–1 Treatment of production payments as loans.

(a) In general. (1)(i) For purposes of subtitle A of the Internal Revenue Code of 1954, a production payment (as defined in paragraph (a) of § 1.636–3) to which this section applies shall be treated as a loan on the mineral property (or properties) burdened thereby and not as an economic interest in mineral in place, except to the extent that § 1.636–2 or paragraph (b) of this section applies. See paragraph (b) of § 1.611–1. A production payment carved out of mineral property which remains in the hands of the person carving out the production payment immediately after the transfer of such production payment shall be treated as a mortgage loan on the mineral property burdened thereby. A production payment created and retained upon the transfer of the mineral property burdened by such production payment shall be treated as a purchase money mortgage loan on the mineral property burdened thereby. Such production payments will be referred to hereinafter in the regulations under section 636 as carved-out production payments and retained production payments, respectively. Moreover, in the case of a transaction involving a production payment treated as a loan pursuant to this section, the production payment shall constitute an item of income (not subject to depletion), consideration for a sale or exchange, a contribution to capital, or a gift if in the transaction a debt obligation used in lieu of the production payment would constitute such an item of income, consideration, contribution to capital, or gift, as the case

may be. For the definition of the term "transfer" see paragraph (c) of § 1.636–3.

(ii) The payer of a production payment treated as a loan pursuant to this section shall include the proceeds from (or, if paid in kind, the value of) the mineral produced and applied to the satisfaction of the production payment in his gross income and "gross income from the property" (see section 613(a)) for the taxable year so applied. The payee shall include in his gross income (but not "gross income from the property") amounts received with respect to such production payment to the extent that such amounts would be includible in gross income if such production payment were a loan. The payer and payee shall determine their allowable deductions as if such production payment were a loan. See section 483, relating to interest on certain deferred payments in the case of a production payment created and retained upon the transfer of the mineral property burdened thereby, or in the case of a production payment transferred in exchange for property. See section 1232 in the case of a production payment which is originally transferred by a corporation at a discount and is a capital asset in the hands of the payee. In the case of a carved-out production payment treated as a mortgage loan pursuant to this section, the consideration received for such production payment by the taxpayer who created it is not included in either gross income or "gross income from the property" by such taxpayer.

(2) If a production payment is treated as a loan pursuant to this section, no transfer of such production payment or any property burdened thereby (other than a transfer between the payer and payee of the production payment which, if the production payment were a loan, would extinguish the loan) shall cause it to cease to be so treated. For example, A sells operating mineral interest X to B for $100,000, subject to a $500,000 retained production payment payable out of X. Subsequently, A sells the production payment to C, and B sells X to D. C and D must treat the production payment as a purchase money mortgage loan.

(3) The provisions of this paragraph may be illustrated by the following examples:

Example (1). On December 22, 1972, A, a cash-basis calendar-year taxpayer who owns operating mineral interest X, carves out of X a production payment in favor of B for $300,000 plus interest, payable out of 50 percent of the first oil produced and sold from X. In 1972, A treats the $300,000 received from B for the production payment as the proceeds of a mortgage loan on X. In 1973, A produces and sells 125,000 barrels of oil for $373,500. A pays B $186,750 with respect to the production payment, $168,750 being principal and $18,000 being interest. In computing his gross income and "gross income from the property" for the year 1973, A includes the $373,500 and takes as deductions the allowable expenses paid in production of such mineral. A also takes a deduction under section 163 for the $18,000 interest paid with respect to the production payment. For 1973, B would treat $18,000 as ordinary income not subject to the allowance for depletion under section 611.

Example (2). Assume the same facts as in example (1) except that the principal amount of the production payment is to be increased by the amount of the ad valorem tax on the mineral attributable to the production payment which is paid by B. Under State law, the ad valorem tax with respect to the mineral attributable to the production payment is a liability of the owner of the production payment. For 1973, B includes the amount received with respect to such taxes as income and takes a deduction under section 164 for the taxes paid by him. Since the ad valorem taxes paid by B are his liability under State law, A may not take a deduction under section 164 for such taxes.

Example (3). On December 31, 1974, C, a calendar-year taxpayer and owner of the operating mineral interest Y, sells Y to D for $10,000 cash and retains a $40,000 production payment payable out of Y. At the time D acquires the property, it is estimated that 500,000 tons of mineral are recoverable from the property. In 1975, D produces a total of 50,000 tons from the property. D's cost depletion for 1975 is $5,000 determined as follows:

Basis in property: $50,000

Total recoverable units: 500,000

Rate of depletion per ton: $0.10 ($50,000÷500,000)

Cost depletion for year: $5,000 ($0.10×50,000)

(b) Exception. (1) A production payment carved out of a mineral property (or properties) for exploration or development of such property (or properties) shall not be treated as a mortgage loan under section 636(a) and this section to the extent "gross income from the property" (for purposes of section 613) would not be realized by the taxpayer creating such production payment, under the law existing at the time of the creation of such production payment, in the absence of section 636(a). See section 83 and the regulations thereunder, relating to property transferred in connection with the performance of services. For purposes of section 636(a) and this paragraph, an expenditure is for exploration or development to the extent that it is necessary for ascertaining the existence, location, extent, or quality of any deposit of mineral or is incident to and necessary for the preparation of a deposit for the production of mineral. However, an expenditure which relates primarily to the production of mineral (as, for example, in the case of a pilot water flood program with respect to the secondary recovery of oil) is not for exploration or development as those terms are used in section 636(a) and this paragraph. Whether or not a production payment is carved out for exploration or development shall be determined in light of all relevant facts and circumstances, including any prior production of mineral

from the mineral deposit burdened by the production payment. However, a production payment shall not be treated as carved out for exploration or development to the extent that the consideration for the production payment—

(i) Is not pledged for use in the future exploration or development of the mineral property (or properties) which is burdened by the production payment;

(ii) May be used for the exploration or development of any other property, or for any other purpose than that described in subdivision (i) of this subparagraph;

(iii) Does not consist of a binding obligation of the payee of the production payment to pay expenses of the exploration or development described in subdivision (i) of this subparagraph; or

(iv) Does not consist of a binding obligation of the payee of the production payment to provide services, materials, supplies, or equipment for the exploration or development described in subdivision (i) of this subparagraph.

(2) In the case of a carved-out production payment only a portion of which is subject to the exception provided in this paragraph, the rules contained in paragraph (a) of this section with respect to the treatment of income and deductions where a production payment is treated as a loan shall apply to the portion of the taxpayer's income or expenses attributable to the production payment which bears the same ratio to the total amount of such income or expenses, as the case may be, as the amount of the consideration for the production payment which would have been realized as income in the absence of section 636(a), by the taxpayer creating such production payment, bears to the total consideration to the taxpayer for the production payment. For example, A, owner of a mineral property, carves out a production payment in favor of B for $600,000 plus interest in return for $600,000 cash. A pledges to use $400,000 for the development of the burdened mineral property. In each of the payout years loan treatment applies to one-third of the income and expenses of A and B attributable to the production payment.

(c) Treatment upon disposition or termination of mineral property burdened by production payment. (1)(i) In the case of a sale or other disposition of the mineral property burdened by a production payment treated as a loan pursuant to this section, there shall be included in determining the amount realized upon such disposition an amount equal to the outstanding principal balance of such production payment on the date of such disposition. However, if such a production payment is created in connection with the disposition, the amount to be so included shall be the fair market value of the production payment, rather than its principal amount, if the fair market value is established by clear and convincing evidence to be an amount which differs from the principal amount. See section 1001 and the regulations thereunder. In determining the cost of the transferred mineral property to the transferee for purposes of section 1012, the outstanding principal balance of the production payment shall be included in the cost.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). A, the owner of mineral property X which is burdened by a carved-out production payment to which section 636(a) applies having an outstanding principal balance of $10,000, sells property X to B, an individual, for $100,000 cash. The amount realized by A on the sale of property X is $110,000. B's basis in property X for cost depletion and other purposes is also $110,000.

Example (2). Assume the same facts as in example (1) except that the production payment is retained by A in connection with the sale of property X to B, that section 636(b) applies to the production payment, that the production payment includes, in addition to the $10,000 principal amount, an additional amount equivalent to interest at a rate which precludes application of section 483, and that the fair market value of the production payment is $9,000. The amount realized by A on the sale of property X is $109,000. B's basis in property X for cost depletion and other purposes is $110,000. A's basis in the retained production payment is $9,000. If the production payment is paid in full, A realizes income of $1,000 plus the amount equivalent to interest, which income is includible in A's gross income at the time when such amounts would be so includible if such production payment were a loan.

Example (3). C, the owner of mineral property Y, sells the mineral property to D for $500,000 cash. Property Y is burdened by a carved-out production payment with an outstanding principal balance of $600,000, 40 percent of the consideration for which was pledged for the development of property Y. The amount realized by C on the sale is $860,000 ($500,000 plus $600,000×.60). D's basis in property Y for cost depletion and other purposes is $860,000.

(2) In the case of the expiration, termination, or abandonment of a mineral property burdened by a production payment treated as a loan pursuant to this section, for purposes of determining the amount of any loss under section 165 with respect to the burdened mineral property the adjusted basis of such property shall be reduced (but not below zero) by an amount equal to the outstanding principal balance of such production payment on the date of such expiration, termination, or abandonment. Thus, in example (2) in subparagraph (1)(ii) of this paragraph, if B abandons the mineral property at a time when $5,000 of the principal amount of the production payment remains unsatisfied, B's adjusted basis immediately before the

abandonment would be reduced by $5,000 for determining his loss on abandonment under section 165.

(3) In the case of a transfer of a portion of the mineral property burdened by a production payment treated as a loan pursuant to this section, such production payment shall be apportioned between the transferred portion and the retained portion by allocating to such transferred portion that part of the outstanding principal balance of the production payment which bears the same ratio to such balance as the value of such transferred portion (exclusive of any value not related to the burdened mineral) bears to the total value of the burdened mineral property (exclusive of any value not related to the burdened mineral).

(4) In general, the entire amount of gain or loss realized pursuant to this paragraph shall be recognized in the taxable year of such realization. See section 1211 for limitation on capital losses. This subparagraph shall not affect the applicability of rules providing exceptions to the recognition of gain or loss which has been realized (*e.g.*, a transfer to which section 351 or 1031 applies). However, see section 357(c) with respect to the assumption of liabilities in excess of basis in certain tax-free exchanges. Furthermore, in the case of a transaction which otherwise qualifies, gain realized on a transfer of a mineral property to which section 636(b) applies may be returned on the installment method under section 453.

[T.D. 7261, 38 FR 5463, March 1, 1973]

§ 1.636–2 Production payments retained in leasing transactions.

(a) Treatment by lessee. In the case of a production payment (as defined in paragraph (a) of § 1.636–3) which is retained by the lessor in a leasing transaction (including a sublease or the exercise of an option to acquire a lease or sublease), the lessee (or his successors in interest) shall treat the retained production payment for purposes of subtitle A of the Code as if it were a bonus granted by the lessee to the lessor payable in installments. Accordingly, the lessee shall include the proceeds from (or, if paid in kind, the value of) the mineral produced and applied to the satisfaction of the production payment in his gross income for the taxable year so applied. The lessee shall capitalize each payment (including any interest and any amounts added on to the production payment other than amounts for which the lessee would be liable in the absence of the production payment) paid or incurred with respect to such production payment. See paragraph (c)(5)(ii) of § 1.613–2 for rules relating to computation of percentage depletion with respect to a mineral property burdened by a production payment treated as a bonus under section 636(c) and this section.

(b) Treatment by lessor. The lessor who retains a production payment in a leasing transaction (or his successors in interest) shall treat the production payment without regard to the provisions of section 636 and § 1.636–1. Thus, the production payment will be treated as an economic interest in the mineral in place in the hands of the lessor (or his successors in interest) and the receipts in discharge of the production payment will constitute ordinary income subject to depletion.

(c) Example. The provisions of this section may be illustrated by the following example:

Example. In 1971, A leases a mineral property to B reserving a one-eighth royalty and a production payment (as defined in § 1.636–3(a)) with a principal amount of $300,000 plus an amount equivalent to interest. In 1972, B pays to A $60,000 with respect to the principal amount of the production payment plus $16,350 equivalent to interest. The adjusted basis of the property in the hands of B for cost depletion and other purposes for 1972 and subsequent years will include (subject to proper adjustment under section 1016) the $76,350 paid to A. In 1973, B pays to A $60,000 with respect to the principal amount of the production payment plus $12,750 equivalent to interest. The adjusted basis of the property in the hands of B for cost depletion and other purposes for 1973 and subsequent years will include (subject to proper adjustment under section 1016) the $72,750 paid to A. The $76,350 received by A in 1972, and the $72,750 received by A in 1973, will constitute ordinary income subject to depletion in the hands of A in the years of receipt of such amounts by A.

[T.D. 7261, 38 FR 5465, March 1, 1973]

§ 1.636–3 Definitions.

For purposes of section 636 and the regulations thereunder—

(a) Production payment. **(1)** The term "production payment" means, in general, a right to a specified share of the production from mineral in place (if, as, and when produced), or the proceeds from such production. Such right must be an economic interest in such mineral in place. It may burden more than one mineral property, and the burdened mineral property need not be an operating mineral interest. Such right must have an expected economic life (at the time of its creation) of shorter duration than the economic life of one or more of the mineral properties burdened thereby. A right to mineral in place which can be required to be satisfied by other than the production of mineral from the burdened mineral property is not an economic interest in mineral in place. A production payment may be limited

by a dollar amount, a quantum of mineral, or a period of time. A right to mineral in place has an economic life of shorter duration than the economic life of a mineral property burdened thereby only if such right may not reasonably be expected to extend in substantial amounts over the entire productive life of such mineral property. The term "production payment" includes payments which are commonly referred to as "in-oil payments", "gas payments", or "mineral payments".

(2) A right which is in substance economically equivalent to a production payment shall be treated as a production payment for purposes of section 636 and the regulations thereunder, regardless of the language used to describe such right, the method of creation of such right, or the form in which such right is cast (even though such form is that of an operating mineral interest). Whether or not a right is in substance economically equivalent to a production payment shall be determined from all the facts and circumstances. An example of an interest which is to be treated as a production payment under this subparagraph is that portion of a "royalty" which is attributable to so much of the rate of the royalty which exceeds the lowest possible rate of the royalty at any subsequent time (disregarding any reductions in the rate of the royalty which are based solely upon changes in volume of production within a specified period of no more than 1 year). For example, assume that A creates a royalty with respect to a mineral property owned by A equal to 5 percent for 5 years and thereafter equal to 4 percent for the balance of the life of the property. An amount equal to 1 percent for 5 years shall be treated as a production payment. On the other hand, if A leases a coal mine to B in return for a royalty of 30 cents per ton on the first 500,000 tons of coal produced from the mine in each year and 20 cents per ton on all coal in excess of 500,000 tons produced from the mine in each year, the fact that the royalty may decline to 20 cents per ton on some of the coal in each year does not result in a production payment of 10 cents per ton of coal on the first 500,000 tons in any year. Another example of an interest which is to be treated as a production payment under this subparagraph is the interest in a partnership engaged in operating oil properties of a partner who provides capital for the partnership if such interest is subject to a right of another person or persons to acquire or terminate it upon terms which merely provide for such partner's recovery of his capital investment and a reasonable return thereon.

(b) Property. The term "property" has the meaning assigned to it in section 614(a), without the application of section 614(b), (c), or (e).

(c) Transfer. The term "transfer" means any sale, exchange, gift, bequest, devise, or other disposition (including a distribution by an estate or a contribution to or distribution by a corporation, partnership, or trust).

[T.D. 7261, 38 FR 5465, March 1, 1973]

§ 1.636–4 Effective dates of section 636.

(a) In general. Except as provided hereinafter in this section, section 636 and §§ 1.636–1, 1.636–2, and 1.636–3 apply to production payments created on or after August 7, 1969, other than production payments created before January 1, 1971, pursuant to a binding contract entered into before August 7, 1969.

(b) Election. Under section 503(c)(2) of the Tax Reform Act of 1969, if the taxpayer so elects, section 636(a) of the Code and §§ 1.636–1 and 1.636–3 apply to all production payments carved out by him after the beginning of his last taxable year ending before August 7, 1969, including such production payments created after such date pursuant to a binding contract entered into before such date. No interest shall be allowed on any refund or credit of any overpayment of tax resulting from an election under section 503(c)(2) for any taxable year ending before August 7, 1969. The provisions of this paragraph may be illustrated by the following example:

Example. A, a fiscal-year taxpayer whose taxable year ends on October 31, carved out and sold (from a producing property) production payments on October 1, 1967, and on July 9, 1969. On August 1, 1969, A entered into a binding contract to create another carved-out production payment (from a different producing property) and the production payment was carved out on December 22, 1969. If A elects under section 503(c)(2), the production payments carved out on July 9, 1969, and December 22, 1969, are treated as mortgage loans under section 636(a). The production payment carved out on October 1, 1967, is not treated as a mortgage loan under section 636(a) because it was carved out before the beginning of A's last taxable year ending before August 7, 1969.

(c) Time and manner of making election. (1) Any election under section 503(c)(2) of the Tax Reform Act of 1969 must be made not later than May 30, 1973.

(2) An election under section 503(c)(2) shall be made by a statement attached to the taxpayer's income tax return (or amended return) for the first taxable year in which the taxpayer created a production payment (i) to which the election applies, and (ii) which, in the absence of section 636, would not have been treated as a loan. A state-

ment shall also be attached to an amended return for each subsequent taxable year for which he has filed his income tax return before making the election, but only if his tax liability for such year is affected by the election. Each such statement shall indicate the taxpayer's election under section 503(c)(2), and shall identify by date, amount, parties, and burdened mineral properties all production payments described in subdivisions (i) and (ii) of this subparagraph which have been created by the date on which the statement is filed. However, a taxpayer who, prior to the date on which permanent regulations under this section are published in the Federal Register, made a valid election under section 503(c)(2) pursuant to Part 13 of this chapter (Temporary Income Tax Regulations Under the Tax Reform Act of 1969) is not required to amend statements previously furnished which meet the requirements of paragraph (b)(1)(ii) of § 13.0 of Part 13 unless requested to do so by the district director. In applying the election to the taxable years affected, there shall be taken into account the effect that any adjustments resulting therefrom have on other items affected thereby and the effect that adjustments of any such items have on other taxable years. In the case of a member of a consolidated return group (as defined in paragraph (a) of § 1.1502–1), section 503(c)(2) and paragraphs (b), (c), and (d) of this section shall be applied as if such member filed a separate return.

(d) Revocation of election. A valid election under section 503(c)(2) shall be binding upon the taxpayer unless consent to revoke the election is obtained from the Commissioner. The application to revoke such election must be made in writing to the Commissioner of Internal Revenue, Washington, D.C. 20224, not later than May 30, 1973. Such application must set forth the reasons therefor and a recomputation of the tax reflecting such revocation for each prior taxable year affected by the revocation, whether or not the period of limitations for credit or refund or assessment and collection has expired with respect to such taxable year. Consent shall not be given in any case in which the revocation would result in an increase in the taxpayer's tax liability for a taxable year for which such period of limitations has expired unless the taxpayer waives his right to assert the statute of limitations.

(e) Special rule. **(1)** Except as provided in subparagraph (2) of this paragraph, in the case of a taxpayer who does not make the election provided in section 503(c)(2) of the Tax Reform Act of 1969, section 636 of the Code applies to production payments carved out during the taxable year which includes August 7, 1969, as provided in paragraph (a) of this section, only to the extent that the aggregate amount of such production payments exceeds the lesser of—

(i) The excess of—

(a) The aggregate amount of production payments carved out and sold by the taxpayer during the 12-month period immediately preceding his taxable year which includes August 7, 1969, over

(b) The aggregate amount of production payments carved out and sold before August 7, 1969, by the taxpayer during his taxable year which includes such date, or

(ii) The amount necessary to increase the amount of the taxpayer's gross income within the meaning of chapter 1 of subtitle A of the Code, for his taxable year which includes August 7, 1969, to an amount equal to the amount of his deductions (other than any deduction under section 172) allowable for such year under such chapter.

In applying the preceding sentence, production payments carved out for exploration or development are to be taken into account only to the extent, if any, that "gross income from the property" (for purposes of section 613) would have been realized by the taxpayer creating such production payment under the law existing at the time of the creation of such production payment, in the absence of section 636(a).

(2) Subparagraph (1) of this paragraph shall not apply for any taxable year for purposes of determining the amount of any deduction for cost or percentage depletion allowable under section 611 or the limitation on any foreign tax credit under section 904.

(3) The application of this paragraph may be illustrated by the following examples:

Example (1). (a) A, a calendar-year taxpayer who does not make the election provided in section 503(c)(2) of the Tax Reform Act of 1969, carves out and sells on December 31, 1968, a $500,000 production payment. Further, A carves out and sells on March 4, 1969, a $300,000 production payment, and on November 14, 1969, a $150,000 production payment. None of the production payments are carved out for exploration or development. During 1969, A has gross income of $600,000 (determined initially for this purpose by treating the $150,000 production payment carved out on November 14, 1969, as a loan) and allowable deductions of $700,000.

(b) The provisions of section 636 do not apply to a portion of the November 14, 1969, production payment for purposes other than section 611 and section 904 of the Code, determined as follows:

(1) Amount of production payment carved out in 1969 on or after August 7, 1969........	$150,000

(2) Amount of production payment carved out during 1968	500,000
(3) Amount of production payment carved out during 1969 taxable year before August 7, 1969	300,000
(4) Item (2) minus item (3)	200,000
(5) Excess of allowable deductions over gross income for 1969	100,000
(6) Amount of production payment carved out in 1969 on or after August 7, 1969, to which section 636 does not apply (lesser of items (1), (4), and (5))	100,000

Thus, A will not treat $100,000 of the consideration received for the production payment carved out on November 14, 1969, as a loan and as a result his gross income for 1969 will be $700,000. However, in computing percentage depletion, A will not include the $100,000 in "gross income from property" and in computing cost depletion A will not include the mineral units attributable thereto. Nor, will A include the $100,000 in determining the limitation on foreign tax credit under section 904.

Example (2). Assume the same facts as in example (1) except that for taxable year 1969 A's gross income (determined initially for this purpose by treating the November 14, 1969, production payment as a loan) exceeds the amount of his allowable deductions under chapter 1 of subtitle A of the Code. The entire amount of the November 14, 1969, production payment is treated as a mortgage loan under section 636(a).

[T.D. 7261, 38 FR 5465, March 1, 1973]

Continental Shelf Areas

§ 1.638–1 Continental Shelf areas.

(a) **General rule.** For purposes of applying any provision of Chapter 1, 2, 3, or 24 (including section 861(a)(3), 862(a)(3), 1441, 3402, or other provisions dealing with the performance of personal services), with respect to mines, oil and gas wells, and other natural deposits—

(1) **United States and possession of the United States.** The terms "United States" and "possession of the United States" when used in a geographical sense include the seabed and subsoil of those submarine areas which are adjacent to the territorial waters of the United States or such possession and over which the United States has exclusive rights, in accordance with international law, with respect to the exploration for, and exploitation of, natural resources. The terms "Continental Shelf of the United States" and "Continental Shelf of a possession of the United States," as used in this section, refer to the seabed and subsoil included, respectively, in the terms "United States" and "possession of the United States," as provided in the preceding sentence.

(2) **Foreign country.** The term "foreign country" when used in a geographical sense includes the seabed and subsoil of those submarine areas which are adjacent to the territorial waters of the foreign country and over which such foreign country has exclusive rights, in accordance with international law, with respect to the exploration for, and exploitation of, natural resources, but this sentence applies only if such foreign country exercises, directly or indirectly, taxing jurisdiction with respect to such exploration or exploitation. The term "foreign continental shelf," as used in this section, refers to the seabed and subsoil described in the preceding sentence. A foreign country is not to be treated as a country contiguous to the United States by reason of the application of section 638 and this section.

(b) **Exercise of taxing jurisdiction.** For purposes of paragraph (a)(2) of this section, the exercise, directly or indirectly, of taxing jurisdiction with respect to the exploration for, or exploitation of, natural resources is deemed to include (but is not limited to) those cases in which a foreign country—

(1) Imposes a tax upon assets, equipment, or other property connected with or income derived from such exploration or exploitation, or

(2) Requires natural resources referred to in paragraph (a)(2) of this section to be transported to points within its landward boundaries and then levies a tax upon such natural resources or upon the income derived from the sale thereof.

A foreign country which, for purposes of paragraph (a)(2) of this section, exercises taxing jurisdiction by the imposition of tax upon any person, property, or activity engaged in or related to the exploration for, or exploitation of, natural resources in the seabed or subsoil referred to in paragraph (a)(2) of this section, or the income therefrom of any taxpayer, is deemed to exercise taxing jurisdiction over all such persons, property, and activities and over all income therefrom of all such taxpayers; thus, for example, a foreign country which imposes tax upon a person engaged in exploitation of oil and gas wells in its seabed and subsoil referred to in paragraph (a)(2) of this section is deemed to exercise taxing jurisdiction over property related to exploration for other natural deposits in such seabed and subsoil. A foreign country is deemed to be imposing tax upon a person, property, activity, or income described in the preceding sentence if such foreign country exempts such person, property, activity, or income

from tax for a period not in excess of 10 years from the commencement of such exploration or exploitation. Except in the case of a foreign country which is deemed under the preceding sentence to impose tax by virtue of an exemption for a period not in excess of 10 years, a foreign country which exempts all persons, property, and activities engaged in or related to the exploration for, or exploitation of, natural resources in the seabed or subsoil referred to in paragraph (a)(2) of this section and the income therefrom, from taxation is deemed not to be exercising, directly or indirectly, taxing jurisdiction for purposes of paragraph (a)(2) of this section. For purposes of paragraph (a)(2) of this section, the exercise of taxing jurisdiction with respect to any type of tax constitutes the exercise of taxing jurisdiction with respect to all types of taxes. However, a royalty or other charge (whether payable in a lump sum or over a period of time or in amounts dependent upon the volume of production of natural resources) for the right to explore for or exploit natural resources does not constitute a tax.

(c) Scope. (1) For purposes of applying this section, persons, property, or activities which are engaged in or related to the exploration for, or exploitation of, mines, oil and gas wells, or other natural deposits need not be physically upon, connected, or attached to the seabed or subsoil referred to in subparagraph (1) or (2) of paragraph (a) of this section to be deemed to be within the United States, a possession of the United States, or a foreign country, as the case may be, to the extent provided in subparagraph (2) or (3) and subparagraph (4) of this paragraph.

(2) Persons, property, or activities which are not in a foreign country (determined without regard to section 638 or this section), and which are engaged in or related to the exploration for, or exploitation of, mines, oil and gas wells, or other natural deposits of the seabed or subsoil referred to in paragraph (a)(1) of this section, are generally within the United States or a possession of the United States, as the case may be, unless such persons, property, or activities are solely involved in or constitute transportation to (or from) the site of exploration or exploitation from (or to) a foreign country, other than transportation on a regular basis from (or to) a base of operations.

(3) Persons, property, or activities which are not in the United States or in a third country (determined in each case without regard to section 638 or this section), and which are engaged in or related to the exploration for, or exploitation of, mines, oil and gas wells, or other natural deposits of the seabed or subsoil of a foreign country referred to in paragraph (a)(2) of this section, are generally within such foreign country, unless such persons, property, or activities are solely involved in or constitute transportation to (or from) the site of exploration or exploitation from (or to) the United States or a possession of the United States or a third country, as the case may be, other than transportation on a regular basis from (or to) a base of operations.

(4) Persons, property, or activities are within the United States, a possession of the United States, or a foreign country, as the case may be, pursuant to this paragraph, only to the extent such persons, property, or activities are engaged in or related to the exploration for or exploitation of, mines, oil and gas wells, or other natural deposits.

(d) Natural deposits and natural resources. For purposes of this section, the terms "natural deposits" and "natural resources" mean nonliving resources to which section 611(a) applies. Such terms do not include sedentary species (organisms which, at the harvestable stage, either are immovable on or under the seabed or are unable to move except in constant physical contact with the seabed or subsoil), fish or other animal or plant life.

(e) Rights under international law. Nothing in this section shall prejudice or affect the freedoms of the high seas and other rights under international law, or the exercise of such freedoms and rights by the United States or foreign countries.

(f) Examples. The application of the provisions of section 638 and this section may be illustrated by the following examples:

Example (1). A, a citizen of the United States employed as an engineer, is engaged in the exploitation of oil and is physically present on an offshore oil drilling platform operated by employees of L Corporation. Such platform is affixed to the foreign continental shelf of foreign country X. Assuming that foreign country X exercises taxing jurisdiction as provided in paragraph (b) of this section, A is to be treated as being employed in foreign country X with respect to compensation for his employment for purposes of chapters 1 and 24.

Example (2). The facts are the same as in example (1) except that B, a citizen of the United States engaged in the private practice of law, is physically present on such platform for the sole purpose of interviewing his client, A, whom he represents in a domestic relations matter. Since B is not engaged in activities related to the exploration for, or exploitation of, natural deposits, he is not to be treated as being in foreign country X for purposes of chapters 1 and 2.

Example (3). The facts are the same as in example (1) except that C, a citizen of the United States engaged in the private practice of medicine, is physically present on such platform for the purpose of making routine physical examinations of L Corporation's employees who are engaged in the exploitation of oil on the platform. C is paid by L Corporation to give such examinations on the platform at regular intervals

in order to determine whether the state of any employee's health is such that he should not continue work on the platform. The balance of C's medical practice is conducted at his office on the U.S. mainland. Since C is engaged in activities related to the exploitation of oil, he is treated as being in foreign country X under section 638 and this section while making physical examinations on L Corporation's platform, provided that foreign country X exercise taxing jurisdiction as provided in paragraph (b) of this section. For purposes of chapters 1 and 2, amounts paid by L Corporation to C are treated as derived from sources within foreign country X.

Example (4). C, a nonresident alien individual employed as an engineer in a foreign country, designs equipment for use on oil drilling platforms affixed to the continental shelf of the United States and engaged in the exploitation of oil. Although C's activities in this respect are related to the exploitation of oil, C is not treated as being in the United States under section 638 and this section by reason of such activities.

Example (5). M Corporation, a domestic corporation, chartered a ship from N Corporation, also a domestic corporation, under a time charter under which N Corporation's personnel continued to navigate and manage the shop. M Corporation equipped the ship with special oil exploration equipment and furnished its personnel to operate the equipment. The ship then commenced to explore for oil in the foreign Continental Shelf of foreign country Y. Foreign country Y exercises taxing jurisdiction as provided in paragraph (b) of this section. The ship is treated as being within foreign country Y under section 638 and this section for the period it was engaged in the exploration for oil in such foreign Continental Shelf. Thus, the entire income derived during such period by N Corporation from the charter is income derived from sources within foreign country Y, since N Corporation had property and employees engaged in the exploration for oil in such foreign Continental Shelf.

Example (6). The facts are the same as in example (5) except that C, a citizen of the United States, was employed by N Corporation as a cook and was physically present on the ship. C's sole duties consisted of cooking meals for personnel aboard such ship. In such case, as C's activities are related to the exploration for oil, C is to be treated as being in foreign country Y under section 638 and this section for the period he was aboard such ship while it was engaged in activities relating to the exploration for oil in the foreign Continental Shelf referred to in example (5). For purposes of chapters 1 and 24, C's compensation as a cook for such period is treated as derived from sources without the United States.

Example (7). Z Corporation, a foreign corporation, entered into a contract with Y Corporation, a United States corporation, to engage in exploratory oil drilling activities on a leasehold held by Y Corporation. Such leasehold was located in the Continental Shelf of the United States. Since Z Corporation is engaged in and has property and activities which are engaged in the exploration for oil, such property and activities are to be treated as being in the United States under section 638 and this section for the period such property and activities were engaged in or related to the exploration for oil in the Continental Shelf of the United States and were not in a foreign country. For purposes of chapters 1 and 3, amounts paid to Z Corporation pursuant to the contract are treated as derived from sources within the United States.

Example (8). M Corporation is a controlled foreign corporation (within the meaning of section 957(b)) for its entire taxable year beginning in 1972. During such taxable year, M Corporation issues a policy of insurance relating to fire damage to an offshore oil drilling platform, owned by N Corporation (a foreign corporation), which is attached to the Continental Shelf of the United States. The income attributable to the issuing of such policy would be taxed under subchapter L, chapter 1, subtitle A of the Code (as modified, for this purpose, by section 953(b)(1), (2), and (3)) if such income were the income of a domestic insurance corporation. Since N Corporation's oil drilling platform is located within the United States under section 638 and this section, M Corporation's income attributable to the issuing of the insurance in connection with such platform is income derived from the insurance of United States risks, within the meaning of section 953(a)(1)(A).

[T.D. 7277, 38 FR 12740, May 15, 1973]

§ 1.638–2 Effective date.

The specific requirements and limitations of § 1.638–1 apply on and after December 30, 1969.

[T.D. 7277, 38 FR 12742, May 15, 1973]

ESTATES, TRUSTS, BENEFICIARIES, AND DECEDENTS

Estates, Trusts, and Beneficiaries

General Rules For Taxation Of Estates And Trusts

§ 1.641 [Reserved]

§ 1.641(a)–0 Scope of Subchapter J.

(a) In general. Subchapter J (sections 641 and following), Chapter 1 of the Code, deals with the taxation of income of estates and trusts and their beneficiaries, and of income in respect of decedents. Part I of Subchapter J contains general rules for taxation of estates and trusts (Subpart A), specific rules relating to trusts which distribute current income only (Subpart B), estates and trusts which may accumulate income or which distribute corpus (Subpart C), treatment of excess distributions by trusts (Subpart D), grantors and other persons treated as substantial owners (Subpart E), and miscellaneous provisions relating to limitations on charitable deductions, income of an estate or trust in case of divorce, and taxable years to which the provisions of Subchapter J are applicable (Subpart F). Part I has no application to any organization which is not to be classified for tax purposes as a trust under the classification rules of §§ 301.7701–2, 301.7701–3, and 301.7701–4 of this chapter (Regulations on Procedure and Administration). Part II of Subchapter J relates to

the treatment of income in respect of decedents. However, the provisions of Subchapter J do not apply to employee trusts subject to Subchapters D and F, Chapter 1 of the Code, and common trust funds subject to Subchapter H, Chapter 1 of the Code.

(b) Scope of Subparts A, B, C, and D. Subparts A, B, C, and D (section 641 and following), Part I, Subchapter J, Chapter 1 of the Code, relate to the taxation of estates and trusts and their beneficiaries. These subparts have no application to any portion of the corpus or income of a trust which is to be regarded, within the meaning of the Code, as that of the grantor or others treated as its substantial owners. See Subpart E (section 671 and following), Part I, Subchapter J, Chapter 1 of the Code, and the regulations thereunder for rules for the treatment of any portion of a trust where the grantor (or another person) is treated as the substantial owner. So-called alimony trusts are treated under Subparts A, B, C, and D, except to the extent otherwise provided in section 71 or section 682. These subparts have no application to beneficiaries of nonexempt employees' trusts. See section 402(b) and the regulations thereunder.

(c) Multiple trusts. Multiple trusts that have—

(1) No substantially independent purposes (such as independent dispositive purposes),

(2) The same grantor and substantially the same beneficiary, and

(3) The avoidance or mitigation of (i) the progressive rates of tax (including mitigation as a result of deferral of tax) or (ii) the minimum tax for tax preferences imposed by section 56 as their principal purpose,

shall be consolidated and treated as one trust for the purposes of Subchapter J.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 731, Jan. 17, 1969; T.D. 7204, 37 FR 17158, Aug. 25, 1972]

§ 1.641(a)–1 Imposition of tax; application of tax.

For taxable years beginning after December 31, 1970, section 641 prescribes that the taxes imposed by section 1(d), as amended by the Tax Reform Act of 1969, shall apply to the income of estates or of any kind of property held in trust. For taxable years ending before January 1, 1971, section 641 prescribes that the taxes imposed upon individuals by chapter 1 of the Code apply to the income of estates or of any kind of property held in trust. The rates of tax, the statutory provisions respecting gross income, and, with certain exceptions, the deductions and credits allowed to individuals apply also to estates and trust.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7117, 36 FR 9421, May 25, 1971]

§ 1.641(a)–2 Gross income of estates and trusts.

The gross income of an estate or trust is determined in the same manner as that of an individual. Thus, the gross income of an estate or trust consists of all items of gross income received during the taxable year, including:

(a) Income accumulated in trust for the benefit of unborn or unascertained persons or persons with contingent interests;

(b) Income accumulated or held for future distribution under the terms of the will or trust;

(c) Income which is to be distributed currently by the fiduciary to the beneficiaries, and income collected by a guardian of an infant which is to be held or distributed as the court may direct;

(d) Income received by estates of deceased persons during the period of administration or settlement of the estate; and

(e) Income which, in the discretion of the fiduciary, may be either distributed to the beneficiaries or accumulated. The several classes of income enumerated in this section do not exclude others which also may come within the general purposes of section 641.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.641(b)–1 Computation and payment of tax; deductions and credits of estates and trusts.

Generally, the deductions and credits allowed to individuals are also allowed to estates and trusts. However, there are special rules for the computation of certain deductions and for the allocation between the estate or trust and the beneficiaries of certain credits and deductions. See section 642 and the regulations thereunder. In addition, an estate or trust is allowed to deduct, in computing its taxable income, the deductions provided by sections 651 and 661 and regulations thereunder, relating to distributions to beneficiaries.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.641(b)–2 Filing of returns and payment of the tax.

(a) The fiduciary is required to make and file the return and pay the tax on the taxable income

of an estate or of a trust. Liability for the payment of the tax on the taxable income of an estate attaches to the person of the executor or administrator up to and after his discharge if, prior to distribution and discharge, he had notice of his tax obligations or failed to exercise due diligence in ascertaining whether or not such obligations existed. For the extent of such liability, see section 3467 of the Revised Statutes, as amended by section 518 of the Revenue Act of 1934 (31 U.S.C. 192). Liability for the tax also follows the assets of the estate distributed to heirs, devisees, legatees, and distributees, who may be required to discharge the amount of the tax due and unpaid to the extent of the distributive shares received by them. See section 6901. The same considerations apply to trusts.

(b) The estate of an infant, incompetent, or other person under a disability, or, in general, of an individual or corporation in receivership or a corporation in bankruptcy is not a taxable entity separate from the person for whom the fiduciary is acting, in that respect differing from the estate of a deceased person or of a trust. See section 6012(b)(2) and (3) for provisions relating to the obligation of the fiduciary with respect to returns of such persons.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6580, 26 FR 11486, Dec. 5, 1961]

§ 1.641(b)–3 Termination of estates and trusts.

(a) The income of an estate of a deceased person is that which is received by the estate during the period of administration or settlement. The period of administration or settlement is the period actually required by the administrator or executor to perform the ordinary duties of administration, such as the collection of assets and the payment of debts, taxes, legacies, and bequests, whether the period required is longer or shorter than the period specified under the applicable local law for the settlement of estates. For example, where an executor who is also named as trustee under a will fails to obtain his discharge as executor, the period of administration continues only until the duties of administration are complete and he actually assumes his duties as trustee, whether or not pursuant to a court order. However, the period of administration of an estate cannot be unduly prolonged. If the administration of an estate is unreasonably prolonged, the estate is considered terminated for Federal income tax purposes after the expiration of a reasonable period for the performance by the executor of all the duties of administration. Further, an estate will be considered as terminated when all the assets have been distributed except for a reasonable amount which is set aside in good faith for the payment of unascertained or contingent liabilities and expenses (not including a claim by a beneficiary in the capacity of beneficiary).

(b) Generally, the determination of whether a trust has terminated depends upon whether the property held in trust has been distributed to the persons entitled to succeed to the property upon termination of the trust rather than upon the technicality of whether or not the trustee has rendered his final accounting. A trust does not automatically terminate upon the happening of the event by which the duration of the trust is measured. A reasonable time is permitted after such event for the trustee to perform the duties necessary to complete the administration of the trust. Thus, if under the terms of the governing instrument, the trust is to terminate upon the death of the life beneficiary and the corpus is to be distributed to the remainderman, the trust continues after the death of the life beneficiary for a period reasonably necessary to a proper winding up of the affairs of the trust. However, the winding up of a trust cannot be unduly postponed and if the distribution of the trust corpus is unreasonably delayed, the trust is considered terminated for Federal income tax purposes after the expiration of a reasonable period for the trustee to complete the administration of the trust. Further, a trust will be considered as terminated when all the assets have been distributed except for a reasonable amount which is set aside in good faith for the payment of unascertained or contingent liabilities and expenses (not including a claim by a beneficiary in the capacity of beneficiary).

(c)(1) Except as provided in subparagraph (2) of this paragraph, during the period between the occurrence of an event which causes a trust to terminate and the time when the trust is considered as terminated under this section, whether or not the income and the excess of capital gains over capital losses of the trust are to be considered as amounts required to be distributed currently to the ultimate distributee for the year in which they are received depends upon the principles stated in § 1.651(a)–2. See § 1.663–1 et seq. for application of the separate share rule.

(2)(i) Except in cases to which the last sentence of this subdivision applies, for taxable years of a trust ending before September 1, 1957, subparagraph (1) of this paragraph shall not apply and the rule of subdivision (ii) of this subparagraph shall

apply unless the trustee elects to have subparagraph (1) of this paragraph apply. Such election shall be made by the trustee in a statement filed on or before April 15, 1959, with the district director with whom such trust's return for any such taxable year was filed. The election provided by this subdivision shall not be available if the treatment given the income and the excess of capital gains over capital losses for taxable years for which returns have been filed was consistent with the provisions of subparagraph (1) of this paragraph.

(ii) The rule referred to in subdivision (i) of this subparagraph is as follows: During the period between the occurrence of an event which causes a trust to terminate and the time when a trust is considered as terminated under this section, the income and the excess of capital gains over capital losses of the trust are in general considered as amounts required to be distributed for the year in which they are received. For example, a trust instrument provides for the payment of income to A during her life, and upon her death for the payment of the corpus to B. The trust reports on the basis of the calendar year. A dies on November 1, 1955, but no distribution is made to B until January 15, 1956. The income of the trust and the excess of capital gains over capital losses for the entire year 1955, to the extent not paid, credited, or required to be distributed to A or A's estate, are treated under sections 661 and 662 as amounts required to be distributed to B for the year 1955.

(d) If a trust or the administration or settlement of an estate is considered terminated under this section for Federal income tax purposes (as for instance, because administration has been unduly prolonged), the gross income, deductions, and credits of the estate or trust are, subsequent to the termination, considered the gross income, deductions, and credits of the person or persons succeeding to the property of the estate or trust.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(a)(1)–1 Partially tax-exempt interest.

An estate or trust is allowed the credit against tax for partially tax-exempt interest provided by section 35 only to the extent that the credit does not relate to interest properly allocable to a beneficiary under section 652 or 662 and the regulations thereunder. A beneficiary of an estate or trust is allowed the credit against tax for partially tax-exempt interest provided by section 35 only to the extent that the credit relates to interest properly allocable to him under section 652 or 662 and the regulations thereunder. If an estate or trust holds partially tax-exempt bonds and elects under section 171 to treat the premium on the bonds as amortizable, the credit allowable under section 35, with respect to the bond interest (whether allowable to the estate or trust or to the beneficiary), is reduced under section 171(a)(3) by reducing the shares of the interest allocable, respectively, to the estate or trust and its beneficiary by the portion of the amortization deduction attributable to the shares.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(a)(2)–1 Foreign taxes.

An estate or trust is allowed the credit against tax for taxes imposed by foreign countries and possessions of the United States to the extent allowed by section 901 only for so much of those taxes as are not properly allocable under that section to the beneficiaries. See section 901(b)(4). For purposes of section 901(b)(4), the term "beneficiaries" includes charitable beneficiaries.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(a)(3)–1 Dividends received by an estate or trust.

An estate or trust is allowed a credit against the tax for dividends received on or before December 31, 1964 (see section 34), only for so much of the dividends as are not properly allocable to any beneficiary under section 652 or 662. Section 642(a)(3), and this section do not apply to amounts received as dividends after December 31, 1964. For treatment of the credit in the hands of the beneficiary see § 1.652(b)–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6777, 29 FR 17808, Dec. 16, 1964]

§ 1.642(a)(3)–2 Time of receipt of dividends by beneficiary.

In general, dividends are deemed received by a beneficiary in the taxable year in which they are includible in his gross income under section 652 or 662. For example, a simple trust, reporting on the basis of a fiscal year ending October 30, receives quarterly dividends on November 3, 1954, and February 3, May 3, and August 3, 1955. These dividends are all allocable to beneficiary A, reporting on a calendar year basis, under section 652 and are deemed received by A in 1955. See section 652(c). Accordingly, A may take all these dividends into account in determining his credit for dividends received under section 34 and his dividends exclusion under section 116. However, solely for purposes of determining whether divi-

dends deemed received by individuals from trusts or estates qualify under the time limitations of section 34(a) or section 116(a), section 642(a)(3) provides that the time of receipt of the dividends by the trust or estate is also considered the time of receipt by the beneficiary. For example, a simple trust reporting on the basis of a fiscal year ending October 30 receives quarterly dividends on December 3, 1953, and March 3, June 3, and September 3, 1954. These dividends are all allocable to beneficiary A, reporting on the calendar year basis, under section 652 and are includible in his income for 1954. However, for purposes of section 34(a) or section 116(a), these dividends are deemed received by A on the same dates that the trust received them. Accordingly, A may take into account in determining the credit under section 34 only those dividends received by the trust on September 3, 1954, since the dividend received credit is not allowed under section 34 for dividends received before August 1, 1954 (or after December 31, 1964). Section 642(a)(3) and this section do not apply to amounts received by an estate or trust as dividends after December 31, 1964. However, the rules in this section relating to time of receipt of dividends by a beneficiary are applicable to dividends received by an estate or trust prior to January 1, 1965, and accordingly, such dividends are deemed to be received by the beneficiary (even though received after December 31, 1964) on the same dates that the estate or trust received them for purposes of determining the credit under section 34 or the exclusion under section 116.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6777, 29 FR 17808, Dec. 16, 1964]

§ 1.642(a)(3)–3 Cross reference.

See § 1.683–2(c) for examples relating to the treatment of dividends received by an estate or trust during a fiscal year beginning in 1953 and ending in 1954.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(b)–1 Deduction for personal exemption.

In lieu of the deduction for personal exemptions provided by section 151:

(a) An estate is allowed a deduction of $600,

(b) A trust which, under its governing instrument, is required to distribute currently all of its income for the taxable year is allowed a deduction of $300, and

(c) All other trusts are allowed a deduction of $100.

A trust which, under its governing instrument, is required to distribute all of its income currently is allowed a deduction of $300, even though it also distributes amounts other than income in the taxable year and even though it may be required to make distributions which would qualify for the charitable contributions deduction under section 642(c) (and therefore does not qualify as a "simple trust" under sections 651–652). A trust for the payment of an annuity is allowed a deduction of $300 in a taxable year in which the amount of the annuity required to be paid equals or exceeds all the income of the trust for the taxable year. For the meaning of the term "income required to be distributed currently", see § 1.651(a)–2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(c)–0 Effective dates.

The provisions of section 642(c) (other than section 642(c)(5)) and of §§ 1.642(c)–1 through 1.642(c)–4 apply to amounts paid, permanently set aside, or to be used for a charitable purpose in taxable years beginning after December 31, 1969. The provisions of section 642(c)(5) and of §§ 1.642(c)–5 through 1.642(c)–7 apply to transfers in trust made after July 31, 1969. For provisions relating to amounts paid, permanently set aside, or to be used for a charitable purpose in taxable years beginning before January 1, 1970, see 26 CFR 1.642(c)–1 through 1.642(c)–4 (Rev. as of Jan. 1, 1971).

[T.D. 7357, 40 FR 23739, June 2, 1975]

§ 1.642(c)–1 Unlimited deduction for amounts paid for a charitable purpose.

(a) *In general.* (1) Any part of the gross income of an estate, or trust which, pursuant to the terms of the governing instrument is paid (or treated under paragraph (b) of this section as paid) during the taxable year for a purpose specified in section 170(c) shall be allowed as a deduction to such estate or trust in lieu of the limited charitable contributions deduction authorized by section 170(a). In applying this paragraph without reference to paragraph (b) of this section, a deduction shall be allowed for an amount paid during the taxable year in respect of gross income received in a previous taxable year, but only if no deduction was allowed for any previous taxable year for the amount so paid.

(2) In determining whether an amount is paid for a purpose specified in section 170(c)(2) the provisions of section 170(c)(2)(A) shall not be

taken into account. Thus, an amount paid to a corporation, trust, or community chest, fund, or foundation otherwise described in section 170(c)(2) shall be considered paid for a purpose specified in section 170(c) even though the corporation, trust, or community chest, fund, or foundation is not created or organized in the United States, any State, the District of Columbia, or any possession of the United States.

(3) See section 642(c)(6) and § 1.642(c)–4 for disallowance of a deduction under this section to a trust which is, or is treated under section 4947(a)(1) as though it were a private foundation (as defined in section 509(a) and the regulations thereunder) and not exempt from taxation under section 501(a).

(b) Election to treat contributions as paid in preceding taxable year—(1) In general. For purposes of determining the deduction allowed under paragraph (a) of this section, the fiduciary (as defined in section 7701(a)(6)) of an estate or trust may elect under section 642(c)(1) to treat as paid during the taxable year (whether or not such year begins before January 1, 1970) any amount of gross income received during such taxable year or any preceding taxable year which is otherwise deductible under such paragraph and which is paid after the close of such taxable year but on or before the last day of the next succeeding taxable year of the estate or trust. The preceding sentence applies only in the case of payments actually made in a taxable year which is a taxable year beginning after December 31, 1969. No election shall be made, however, in respect of any amount which was deducted for any previous taxable year or which is deducted for the taxable year in which such amount is paid.

(2) Time for making election. The election under subparagraph (1) of this paragraph shall be made not later than the time, including extensions thereof, prescribed by law for filing the income tax return for the succeeding taxable year. Such election shall, except as provided in subparagraph (4) of this paragraph, become irrevocable after the last day prescribed for making it. Having made the election for any taxable year, the fiduciary may, within the time prescribed for making it, revoke the election without the consent of the Commissioner.

(3) Manner of making the election. The election shall be made by filing with the income tax return (or an amended return) for the taxable year in which the contribution is treated as paid a statement which—

(i) States the name and address of the fiduciary,

(ii) Identifies the estate or trust for which the fiduciary is acting,

(iii) Indicates that the fiduciary is making an election under section 642(c)(1) in respect of contributions treated as paid during such taxable year,

(iv) Gives the name and address of each organization to which any such contribution is paid, and

(v) States the amount of each contribution and date of actual payment or, if applicable, the total amount of contributions paid to each organization during the succeeding taxable year, to be treated as paid in the preceding taxable year.

(4) Revocation of certain elections with consent. An application to revoke with the consent of the Commissioner any election made on or before June 8, 1970, must be in writing and must be filed not later than September 2, 1975.

No consent will be granted to revoke an election for any taxable year for which the assessment of a deficiency is prevented by the operation of any law or rule of law. If consent to revoke the election is granted, the fiduciary must attach a copy of the consent to the return (or amended return) for each taxable year affected by the revocation. The application must be addressed to the Commissioner of Internal Revenue, Washington, D.C. 20224, and must indicate—

(i) The name and address of the fiduciary and the estate or trust for which he was acting,

(ii) The taxable year for which the election was made,

(iii) The office of the district director, or the service center, where the return (or amended return) for the year of election was filed, and

(iv) The reason for revoking the election.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7357, 40 FR 23739, June 2, 1975; 40 FR 24361, June 6, 1975]

§ 1.642(c)–2 Unlimited deduction for amounts permanently set aside for a charitable purpose.

(a) Estates. Any part of the gross income of an estate which pursuant to the terms of the will—

(1) Is permanently set aside during the taxable year for a purpose specified in section 170(c), or

(2) Is to be used (within or without the United States or any of its possessions) exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, or for the establishment, acquisition, maintenance, or operation of a public cemetery not operated for profit,

shall be allowed as a deduction to the estate in lieu of the limited charitable contributions deduction authorized by section 170(a).

(b) **Certain trusts—(1) In general.** Any part of the gross income of a trust to which either subparagraph (3) or (4) of this paragraph applies, that by the terms of the governing instrument—

(i) Is permanently set aside during the taxable year for a purpose specified in section 170(c), or

(ii) Is to be used (within or without the United States or any of its possessions) exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, or for the establishment, acquisition, maintenance, or operation of a public cemetery not operated for profit,

shall be allowed, subject to the limitation provided in subparagraph (2) of this paragraph, as a deduction to the trust in lieu of the limited charitable contributions deduction authorized by section 170(a). The preceding sentence applied only to a trust which is required by the terms of its governing instrument to set amounts aside. See section 642(c)(6) and § 1.642(c)-4 for disallowance of a deduction under this section to a trust which is, or is treated under section 4947(a)(1) as though it were, a private foundation (as defined in section 509(a) and the regulations thereunder) that is not exempt from taxation under section 501(a).

(2) **Limitation of deduction.** Subparagraph (1) of this paragraph applies only to the gross income earned by a trust with respect to amounts transferred to the trust under a will executed on or before October 9, 1969, and satisfying the requirements of subparagraph (4) of this paragraph or transferred to the trust on or before October 9, 1969. For such purposes, any income, gains, or losses, which are derived at any time from the amounts so transferred to the trust shall also be taken into account in applying subparagraph (1) of this paragraph. If any such amount so transferred to the trust is invested or reinvested at any time, any asset received by the trust upon such investment or reinvestment shall also be treated as an amount which was so transferred to the trust. In the case of a trust to which this paragraph applies which contains (i) amounts transferred pursuant to transfers described in the first sentence of this subparagraph and (ii) amounts transferred pursuant to transfers not so described, subparagraph (1) of this paragraph shall apply only if the amounts described in subdivision (i) of this subparagraph, together with all income, gains, and losses derived therefrom, are separately accounted for from the amounts described in subdivision (ii) of this subparagraph, together with all income, gains, and losses derived therefrom. Such separate accounting shall be carried out consistently with the principles of paragraph (c)(4) of § 53.4947-1 of this chapter (Foundation Excise Tax Regulations), relating to accounting for segregated amounts of split-interest trusts.

(3) **Trusts created on or before October 9, 1969.** A trust to which this subparagraph applies is a trust, testamentary or otherwise, which was created on or before October 9, 1969, and which qualifies under either subdivision (i) or (ii) of this subparagraph.

(i) **Transfer of irrevocable remainder interest to charity.** To qualify under this subdivision the trust must have been created under the terms of an instrument granting an irrevocable remainder interest in such trust to or for the use of an organization described in section 170(c). If the instrument granted a revocable remainder interest but the power to revoke such interest terminated on or before October 9, 1969, without the remainder interest having been revoked, the remainder interest will be treated as irrevocable for purposes of the preceding sentence.

(ii) **Grantor under a mental disability to change terms of trust.** (A) To qualify under this subdivision (ii) the trust must have been created by a grantor who was at all times after October 9, 1969, under a mental disability to change the terms of the trust. The term "mental disability" for this purpose means mental incompetence to change the terms of the trust, whether or not there has been an adjudication of mental incompetence and whether or not there has been an appointment of a committee, guardian, fiduciary, or other person charged with the care of the person or property of the grantor.

(B) If the grantor has not been adjudged mentally incompetent, the trustee must obtain from a qualified physician a certificate stating that the grantor of the trust has been mentally incompetent at all times after October 9, 1969, and that there is no reasonable probability that the grantor's mental capacity will ever improve to the extent that he will be mentally competent to change the terms of

the trust. A copy of this certification must be filed with the first return on which a deduction is claimed by reason of this subdivision (ii) and subparagraph (1) of this paragraph. Thereafter, a statement referring to such medical opinion must be attached to any return for a taxable year for which such a deduction is claimed and during which the grantor's mental incompetence continues. The original certificate must be retained by the trustee of the trust.

(C) If the grantor has been adjudged mentally incompetent, a copy of the judgment or decree, and any modification thereof, must be filed with the first return on which a deduction is claimed by reason of this subdivision (ii) and subparagraph (1) of this paragraph. Thereafter, a statement referring to such judgment or decree must be attached to any return for a taxable year for which such a deduction is claimed and during which the grantor's mental incompetence continues. A copy of such judgment or decree must also be retained by the trustee of the trust.

(D) This subdivision (ii) applies even though a person charged with the care of the person or property of the grantor has the power to change the terms of the trust.

(4) Testamentary trust established by will executed on or before October 9, 1969. A trust to which this subparagraph applies is a trust which was established by will executed on or before October 9, 1969, and which qualifies under either subdivision (i), (ii), or (iii) of this subparagraph. This subparagraph does not apply, however, to that portion of any trust, not established by a will executed on or before October 9, 1969, which was transferred to such trust by a will executed on or before October 9, 1969. Nor does it apply to that portion of any trust, not established by a will executed on or before October 9, 1969, which was subject to a testamentary power of appointment that fails by reason of the testator's nonexercise of the power in a will executed on or before October 9, 1969.

(i) Testator dying within 3 years without republishing his will. To qualify under this subdivision the trust must have been established by the will of a testator who died after October 9, 1969, but before October 9, 1972, without having amended any dispositive provision of the will after October 9, 1969, by codicil or otherwise.

(ii) Testator having no right to change his will. To qualify under this subdivision the trust must have been established by the will of a testator who died after October 9, 1969, and who at no time after that date had the right to change any portion of such will pertaining to such trust. This subdivision could apply, for example, where a contract has been entered into for the execution of wills containing reciprocal provisions as well as provisions for the benefit of an organization described in section 170(c) and under applicable local law the surviving testator is prohibited from revoking his will because he has accepted the benefit of the provisions of the will of the other contracting party.

(iii) Testator under a mental disability to republish his will. To qualify under this subdivision the trust must have been established by the will of a testator who died after October 8, 1972, without having amended any dispositive provision of such will after October 9, 1969, and before October 9, 1972, by codicil or otherwise, and who is under a mental disability at all times after October 8, 1972, to amend such will, by codicil or otherwise. The provisions of subparagraph (3)(ii) of this paragraph with respect to mental incompetence apply for purposes of this subdivision.

(iv) Amendment of dispositive provisions. The provisions of paragraph (e)(4) and (5) of § 20.2055–2 of this chapter (Estate Tax Regulations) are to be applied under subdivisions (i) and (iii) of this subparagraph in determining whether there has been an amendment of a dispositive provision of a will.

(c) Pooled income funds. Any part of the gross income of a pooled income fund to which § 1.642(c)–5 applies for the taxable year that is attributable to net long-term capital gain (as defined in section 1222(7)) which, pursuant to the terms of the governing instrument, is permanently set aside during the taxable year for a purpose specified in section 170(c) shall be allowed as a deduction to the fund in lieu of the limited charitable contributions deduction authorized by section 170(a). No deduction shall be allowed under this paragraph for any portion of the gross income of such fund which is (1) attributable to income other than net long-term capital gain (2) earned with respect to amounts transferred to such fund before August 1, 1969. However, see paragraph (b) of this section for a deduction (subject to the limitations of such paragraph) for amounts permanently set aside by a pooled income fund which meets the requirements of that paragraph. The principles of paragraph (b) or (2) of this section with respect to investment, reinvestment, and separate accounting shall apply under this paragraph in the case of

amounts transferred to the fund after July 31, 1969.

(d) Disallowance of deduction for certain amounts not deemed to be permanently set aside for charitable purposes. No amount will be considered to be permanently set aside, or to be used, for a purpose described in paragraph (a) or (b)(1) of this section unless under the terms of the governing instrument and the circumstances of the particular case the possibility that the amount set aside, or to be used, will not be devoted to such purpose or use is so remote as to be negligible. Thus, for example, where there is possibility of the invasion of the corpus of a charitable remainder trust, as defined in § 1.664–1(a)(1)(ii), in order to make payment of the annuity amount or unitrust amount, no deduction will be allowed under paragraph (a) of this section in respect of any amount set aside by an estate for distribution to such a charitable remainder trust.

For treatment of distributions by an estate to a charitable remainder trust, see paragraph (a)(5)(iii) of § 1.664–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7357, 40 FR 23740, June 2, 1975; 40 FR 24361, June 6, 1975]

§ 1.642(c)–3 Adjustments and other special rules for determining unlimited charitable contributions deduction.

(a) Income in respect of a decedent. For purposes of §§ 1.642(c)–1 and 1.642(c)–2, an amount received by an estate or trust which is includible in its gross income under section 691(a)(1) as income in respect of a decedent shall be included in the gross income of the estate or trust.

(b) Reduction of charitable contributions deduction by amounts not included in gross income. (1) If an estate, pooled income fund, or other trust pays, permanently sets aside, or uses any amount of its income for a purpose specified in section 642(c)(1), (2) or (3) and that amount includes any items of estate or trust income not entering into the gross income of the estate or trust, the deduction allowable under § 1.642(c)–1 or § 1.642(c)–2 is limited to the gross income so paid, permanently set aside, or used. In the case of a pooled income fund for which a deduction is allowable under paragraph (c) of § 1.642(c)–2 for amounts permanently set aside, only the gross income of the fund which is attributable to net long-term capital gain (as defined in section 1222(7)) shall be taken into account.

(2) In determining whether the amounts of income so paid, permanently set aside, or used for a purpose specified in section 642(c)(1), (2), or (3) include particular items of income of an estate or trust not included in gross income, the specific provision controls if the governing instrument specifically provides as to the source out of which amounts are to be paid, permanently set aside, or used for such a purpose.

In the absence of specific provisions in the governing instrument, an amount to which section 642(c)(1), (2) or (3) applies is deemed to consist of the same proportion of each class of the items of income of the estate or trust as the total of each class bears to the total of all classes. See paragraph (b) of § 1.643(a)–5 for the method of determining the allocable portion of exempt income and foreign income.

(3) For examples showing the determination of the character of an amount deductible under § 1.642(c)–1 or § 1.642(c)–2, see examples (1) and (2) in § 1.662(b)–2 and paragraph (e) of the example in § 1.662(c)–4.

(4) For the purpose of this paragraph, the provisions of section 116 are not to be taken into account.

(c) Capital gains included in charitable contribution. Where any amount of the income paid, permanently set aside, or used for a purpose specified in section 642(c)(1), (2), or (3), is attributable to net long-term capital gain (as defined in section 1222(7)), the amount of the deduction otherwise allowable under § 1.642(c)–1 or § 1.642(c)–2, must be adjusted for any deduction provided in section 1202 of 50 percent of the excess, if any, of the net long-term capital gain over the net short-term capital loss. For determination of the extent to which the contribution to which § 1.642(c)–1 or § 1.642(c)–2 applies is deemed to consist of net long-term capital gains, see paragraph (b) of this section. The application of this paragraph may be illustrated by the following examples:

Example (1). Under the terms of the trust instrument, the income of a trust described in § 1.642(c)–2(b)(3)(i) is currently distributable to A during his life and capital gains are allocable to corpus. No provision is made in the trust instrument for the invasion of corpus for the benefit of A. Upon A's death the corpus of the trust is to be distributed to M University, an organization described in section 501(c)(3) which is exempt from taxation under section 501(a). During the taxable year ending December 31, 1970, the trust has long-term capital gains of $100,000 from property transferred to it on or before October 9, 1969, which are permanently set aside for charitable purposes. The trust includes $100,000 in gross income but is allowed a deduction of $50,000 under section 1202 for the long-term capital gains and a charitable contributions deduction of $50,000 under section 642(c)(2) ($100,000 permanently

set aside for charitable purposes less $50,000 allowed as a deduction under section 1202 with respect to such $100,000).

Example (2). Under the terms of the will, $200,000 of the income (including $100,000 capital gains) for the taxable year 1972 of an estate is distributed, one-quarter to each of two individual beneficiaries and one-half to N University, an organization described in section 501(c)(3) which is exempt from taxation under section 501(a). During 1972 the estate has ordinary income of $200,000, long-term capital gains of $100,000, and no capital losses. It is assumed that for 1972 the estate has no other items of income or any deductions other than those discussed herein. The entire capital gains of $100,000 are included in the gross income of the estate for 1972, and N University receives $100,000 from the estate in such year. However, the amount allowable to the estate under section 642(c)(1) is subject to appropriate adjustment for the deduction allowable under section 1202. In view of the distributions of $25,000 of capital gains to each of the individual beneficiaries, the deduction allowable to the estate under section 1202 is limited by such section to $25,000 [($100,000 capital gains less $50,000 capital gains includible in income of individual beneficiaries under section 662) × 50%]. Since the whole of this $25,000 deduction under section 1202 is attributable to the distribution of $50,000 of capital gains to N University, the deduction allowable to the estate in 1972 under section 642(c)(1) is $75,000 [$100,000 (distributed to N) less $25,000 (proper adjustment for section 1202 deduction)].

Example (3). Under the terms of the trust instrument, 30 percent of the gross income (exclusive of capital gains) of a trust described in § 1.642(c)–2(b)(3)(i) is currently distributed to B, the sole income beneficiary. Net capital gains (capital gain net income for taxable years beginning after December 31, 1976) and undistributed ordinary income are allocable to corpus. No provision is made in the trust instrument for the invasion of corpus for the benefit of B. Upon B's death the remainder of the trust is to be distributed to M Church. During the taxable year 1972, the trust has ordinary income of $100,000, long-term capital gains of $15,000, short-term capital gains of $1,000, long-term capital losses of $5,000, and short-term capital losses of $2,500. It is assumed that the trust has no other items of income or any deductions other than those discussed herein. All the ordinary income and capital gains and losses are attributable to amounts transferred to the trust before October 9, 1969. The trust includes in gross income for 1972 the total amount of $116,000 [$100,000 (ordinary income) + $16,000 (total capital gains determined without regard to capital losses)]. Pursuant to the terms of the governing instrument the trust distributes to B in 1972 the amount of $30,000 ($100,000 × 30%). The balance of $78,500 [($116,000 less $7,500 capital losses)–030,000 distribution] is available for the set-aside for charitable purposes. In determining taxable income for 1972 the capital losses of $7,500 ($5,000 + $2,500) are allowable in full under section 1211(b)(1). The net capital gain (capital gain net income for taxable years beginning after December 31, 1976) of $8,500 ($16,000 less $7,500) is the excess of the net long-term capital gain of $10,000 ($15,000 less $5,000) over the net short-term capital loss of $1,500 ($2,500 less $1,000). The deduction under section 1202 is $4,250 ($8,500 × 50%), all of which is attributable to the set-aside for charitable purposes. Accordingly, for 1972 the deduction allowable to the trust under section 642(c)(2) is $74,250 [$78,500 (set-aside for M) less $4,250 (proper adjustment for section 1202 deduction)].

Example (4). During the taxable year a pooled income fund, as defined in § 1.642(c)–5, has in addition to ordinary income long-term capital gains of $150,000, short-term capital gains of $15,000, long-term capital losses of $100,000, and short-term capital losses of $10,000. Under the Declaration of Trust and pursuant to State law net long-term capital gain is allocable to corpus and net short-term capital gain is to be distributed to the income beneficiaries of the fund. All the capital gains and losses are attributable to amounts transferred to the fund after July 31, 1969. In view of the distribution of the net short-term capital gain of $5,000 ($15,000 less $10,000) to the income beneficiaries, the deduction allowed to the fund under section 1202 is limited by such section to $25,000 [($150,000 (long-term capital gains) less $100,000 (long-term capital losses)) × 50%]. Since the whole of this deduction under section 1202 is attributable to the set-aside for charitable purposes, the deduction of $50,000 ($150,000 less $100,000) otherwise allowable under section 642(c)(3) is subject to appropriate adjustment under section 642(c)(4) for the deduction allowable under section 1202. Accordingly, the amount of the set-aside deduction is $25,000 [$50,000 (set-aside for public charity) less $25,000 (proper adjustment for section 1202 deduction)].

Example (5). The facts are the same as in example (4) except that under the Declaration of Trust and pursuant to State law all the net capital gain (capital gain net income for taxable years beginning after December 31, 1976) for the taxable year is allocable to corpus of the fund. The fund would thus include in gross income total capital gains of $165,000 ($150,000 + $15,000). In determining taxable income for the taxable year the capital losses of $110,000 ($100,000 + $10,000) are allowable in full under section 1211(b)(1). The net capital gain of $55,000 ($165,000 less $110,000) is available for the set-aside for charitable purposes under section 642(c)(3) only in the amount of the net long-term capital gain of $50,000 ($150,000 long-term gains less $100,000 long-term losses). The deduction under section 1202 is $25,000 ($50,000 × 50%), all of which is attributable to the set-aside for charitable purposes. Accordingly, the deduction allowable to the fund under section 642(c)(3) is $25,000 [$50,000 (set-aside for public charity) less $25,000 (proper adjustment for section 1202 deduction)]. The $5,000 balance of net capital gain (capital gain net income for taxable years beginning after December 31, 1976) is taken into account in determining taxable income of the pooled income fund for the taxable year.

(d) Disallowance of deduction for amounts allocable to unrelated business income. In the case of a trust, the deduction otherwise allowable under § 1.642(c)–1 or § 1.642(c)–2 is disallowed to the extent of amounts allocable to the trust's unrelated business income. See section 681(a) and the regulations thereunder.

(e) Disallowance of deduction in certain cases. For disallowance of certain deductions otherwise allowable under section 642(c)(1), (2), or (3), see sections 508(d) and 4948(c)(4).

(f) Information returns. For rules applicable to the annual information return that must be filed by trusts claiming a deduction under section 642(c) for the taxable year, see section 6034 and the regulations thereunder.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7357, 40 FR 23741, June 2, 1975; 40 FR 24361, June 6, 1975; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.642(c)–4 Nonexempt private foundations.

In the case of a trust which is, or is treated under section 4947(a)(1) as though it were, a

private foundation (as defined in section 509(a) and the regulations thereunder) that is not exempt from taxation under section 501(a) for the taxable year, a deduction for amounts paid or permanently set aside, or used for a purpose specified in section 642(c)(1), or (2) shall not be allowed under § 1.642(c)–1 or § 1.642(c)–2, but such trust shall, subject to the provisions applicable to individuals, be allowed a deduction under section 170 for charitable contributions paid during the taxable year. Section 642(c)(6) and this section do not apply to a trust described in section 4947(a)(1) unless such trust fails to meet the requirements of section 508(e). However, if on October 9, 1969, or at any time thereafter, a trust is recognized as being exempt from taxation under section 501(a) as an organization described in section 501(c)(3), if at such time such trust is a private foundation, and if at any time thereafter such trust is determined not to be exempt from taxation under section 501(a) as an organization described in section 501(c)(3), section 642(c)(6) and this section will apply to such trust. See § 1.509(b)–1(b).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7357, 40 FR 23742, June 2, 1975; 40 FR 24362, June 6, 1975]

§ 1.642(c)–5 Definition of pooled income fund.

(a) In general—(1) Application of provisions. Section 642(c)(5) prescribes certain rules for the valuation of contributions involving transfers to certain funds described in that section as pooled income funds. This section sets forth the requirements for qualifying as a pooled income fund and provides for the manner of allocating the income of the fund to the beneficiaries. Section 1.642(c)–6 provides for the valuation of a remainder interest in property transferred to a pooled income fund. § 1.642(c)–7 provides transitional rules under which certain funds may be amended so as to qualify as pooled income funds in respect to transfers of property occurring after July 31, 1969.

(2) Tax status of fund and its beneficiaries. Notwithstanding any other provision of this chapter, a fund which meets the requirements of a pooled income fund, as defined in section 642(c)(5) and paragraph (b) of this section, shall not be treated as an association within the meaning of section 7701(a)(3). Such a fund, which need not be a trust under local law, and its beneficiaries shall be taxable under Part I, Subchapter J, Chapter 1 of the Code, but the provisions of Subpart E (relating to grantors and others treated as substantial owners) of such part shall not apply to such fund.

(3) Recognition of gain or loss on transfer to fund. No gain or loss shall be recognized to the donor on the transfer of property to a pooled income fund. In such case, the fund's basis and holding period with respect to property transferred to the fund by a donor shall be determined as provided in sections 1015(b) and 1223(2). If, however, a donor transfers property to a pooled income fund and, in addition to creating or retaining a life income interest therein, receives property from the fund, or transfers property to the fund which is subject to an indebtedness, this subparagraph shall not apply to the gain realized by reason of (i) the receipt of such property or (ii) the amount of such indebtedness, whether or not assumed by the pooled income fund, which is required to be treated as an amount realized on the transfer. For applicability of the bargain sale rules, see section 1011(b) and the regulations thereunder.

(4) Charitable contributions deduction. A charitable contributions deduction for the value of the remainder interest, as determined under § 1.642(c)–6, may be allowed under section 170, 2055, 2106, or 2522, where there is a transfer of property to a pooled income fund. For a special rule relating to the reduction of the amount of a charitable contribution of certain ordinary income property or capital gain property, see section 170(e)(1)(A) or (B)(i) and the regulations thereunder.

(5) Definitions. For purposes of this section, §§ 1.642(c)–6, and § 1.642(c)–7—

(i) The term "income" has the same meaning as it does under section 643(b) and the regulations thereunder.

(ii) The term "donor" includes a decedent who makes a testamentary transfer of property to a pooled income fund.

(iii) The term "governing instrument" means either the governing plan under which the pooled income fund is established and administered or the instrument of transfer, as the context requires.

(iv) The term "public charity" means an organization described in clause (i) to (vi) of section 170(b)(1)(A). If an organization is described in clause (i) to (vi) of section 170(b)(1)(A) and is also described in clause (viii) of such section, it shall be treated as a public charity.

(v) The term "fair market value", when used with respect to property, means its value in excess of the indebtedness or charges against such property.

(vi) The term "determination date" means each day within the taxable year of a pooled income fund on which a valuation is made of the property in the fund. The property in the fund shall be valued on the first day of the taxable year of the fund and on at least 3 other days within the taxable year. The period between any two consecutive determination dates within the taxable year shall not be greater than 3 calendar months. In the case of a taxable year of less than 12 months, the property in the fund shall be valued on the first day of such taxable year and on such other days within such year as occur at successive intervals of no greater than 3 calendar months. Where a valuation date falls on a Saturday, Sunday, or legal holiday (as defined in section 7503 and the regulations thereunder), the valuation may be made on either the next preceding day which is not a Saturday, Sunday, or legal holiday or the next succeeding day which is not a Saturday, Sunday, or legal holiday, so long as the next such preceding day or next such succeeding day is consistently used where the valuation date falls on a Saturday, Sunday, or legal holiday.

(6) Cross references. (i) See section 4947(a)(2) and section 4947(b)(3)(B) for the application to pooled income funds of the provisions relating to private foundations and section 508(e) for rules relating to provisions required in the governing instrument prohibiting certain activities specified in section 4947(a)(2).

(ii) For rules for postponing the time for deduction of a charitable contribution of a future interest in tangible personal property, see section 170(a)(3) and the regulations thereunder.

(b) Requirements for qualification as a pooled income fund. A pooled income fund to which this section applies must satisfy all of the following requirements:

(1) Contribution of remainder interest to charity. Each donor must transfer property to the fund and contribute an irrevocable remainder interest in such property to or for the use of a public charity, retaining for himself, or creating for another beneficiary or beneficiaries, a life income interest in the transferred property. A contingent remainder interest shall not be treated as an irrevocable remainder interest for purposes of this subparagraph.

(2) Creation of life income interest. Each donor must retain for himself for life an income interest in the property transferred to such fund, or create an income interest in such property for the life of one or more beneficiaries, each of whom must be living at the time of the transfer of the property to the fund by the donor. The term "one or more beneficiaries" includes those members of a named class who are alive and can be ascertained at the time of the transfer of the property to the fund. In the event more than one beneficiary of the income interest is designated, such beneficiaries may enjoy their shares of income concurrently, consecutively, or both concurrently and consecutively. The donor may retain the power exercisable only by will to revoke or terminate the income interest of any designated beneficiary other than the public charity. The governing instrument must specify at the time of the transfer the particular beneficiary or beneficiaries to whom the income is payable and the share of income distributable to each person so specified. The public charity to or for the use of which the remainder interest is contributed may also be designated as one of the beneficiaries of an income interest. The donor need not retain or create a life interest in all the income from the property transferred to the fund provided any income not payable under the terms of the governing instrument to an income beneficiary is contributed to, and within the taxable year in which it is received is paid to, the same public charity to or for the use of which the remainder interest is contributed. No charitable contributions deduction shall be allowed to the donor for the value of such income interest of the public charity or for the amount of any such income paid to such organization.

(3) Commingling of property required. The property transferred to the fund by each donor must be commingled with, and invested or reinvested with, other property transferred to the fund by other donors satisfying the requirements of subparagraphs (1) and (2) of this paragraph. The governing instrument of the pooled income fund must contain a provision requiring compliance with the preceding sentence. The public charity to or for the use of which the remainder interest is contributed may maintain more than one pooled income fund, provided that each such fund is maintained by the organization and is not a device to permit a group of donors to create a fund which may be subject to their manipulation. The fund must not include property transferred under arrangements other than those specified in section 642(c)(5) and this paragraph. However, a fund shall not be disqualified as a pooled income fund

under this paragraph because any portion of its properties is invested or reinvested jointly with other properties, not a part of the pooled income fund, which are held by, or for the use of, the public charity which maintains the fund, as for example, with securities in the general endowment fund of the public charity to or for the use of which the remainder interest is contributed. Where such joint investment or reinvestment of properties occurs, records must be maintained which sufficiently identify the portion of the total fund which is owned by the pooled income fund and the income earned by, and attributable to, such portion. Such a joint investment or reinvestment of properties shall not be treated as an association or partnership for purposes of the Code. A bank which serves as trustee of more than one pooled income fund may maintain a common trust fund to which section 584 applies for the collective investment and reinvestment of moneys of such funds.

(4) **Prohibition against exempt securities.** The property transferred to the fund by any donor must not include any securities, the income from which is exempt from tax under subtitle A of the Code, and the fund must not invest in such securities. The governing instrument of the fund must contain specific prohibitions against accepting or investing in such securities.

(5) **Maintenance by charitable organization required.** The fund must be maintained by the same public charity to or for the use of which the irrevocable remainder interest is contributed. The requirement of maintenance will be satisfied where the public charity exercises control directly or indirectly over the fund. For example, this requirement of control shall ordinarily be met when the public charity has the power to remove the trustee or trustees of the fund and designate a new trustee or trustees. A national organization which carries out its purposes through local organizations, chapters, or auxiliary bodies with which it has an identity of aims and purposes may maintain a pooled income fund (otherwise satisfying the requirements of this paragraph) in which one or more local organizations, chapters, or auxiliary bodies which are public charities have been named as recipients of the remainder interests. For example, a national church body may maintain a pooled income fund where donors have transferred property to such fund and contributed an irrevocable remainder interest therein to or for the use of various local churches or educational institutions of such body. The fact that such local organizations or chapters have been separately incorporated from the national organization is immaterial.

(6) **Prohibition against donor or beneficiary serving as trustee.** The fund must not have, and the governing instrument must prohibit the fund from having, as a trustee a donor to the fund or a beneficiary (other than the public charity to or for the use of which the remainder interest is contributed) of an income interest in any property transferred to such fund. Thus, if a donor or beneficiary (other than such public charity) directly or indirectly has general responsibilities with respect to the fund which are ordinarily exercised by a trustee, such fund does not meet the requirements of section 642(c)(5) and this paragraph. The fact that a donor of property to the fund, or a beneficiary of the fund, is a trustee, officer, director, or other official of the public charity to or for the use of which the remainder interest is contributed ordinarily will not prevent the fund from meeting the requirements of section 642(c)(5) and this paragraph.

(7) **Income of beneficiary to be based on rate of return of fund.** Each beneficiary entitled to income of any taxable year of the fund must receive such income in an amount determined by the rate of return earned by the fund for such taxable year with respect to his income interest, computed as provided in paragraph (c) of this section. The governing instrument of the fund shall direct the trustee to distribute income currently or within the first 65 days following the close of the taxable year in which the income is earned. Any such payment made after the close of the taxable year shall be treated as paid on the last day of the taxable year. A statement shall be attached to the return of the pooled income fund indicating the date and amount of such payments after the close of the taxable year. Subject to the provisions of Part I, Subchapter J, Chapter 1 of the Code, the beneficiary shall include in his gross income all amounts properly paid, credited, or required to be distributed to the beneficiary during the taxable year or years of the fund ending within or with his taxable year. The governing instrument shall provide that the income interest of any designated beneficiary shall either terminate with the last regular payment which was made before the death of the beneficiary or be prorated to the date of his death.

(8) **Termination of life income interest.** Upon the termination of the income interest retained or created by any donor, the trustee shall sever from the fund an amount equal to the value of the remainder interest in the property upon which the income interest is based. The value of the remain-

der interest for such purpose may be either (i) its value as of the determination date next succeeding the termination of the income interest or (ii) its value as of the date on which the last regular payment was made before the death of the beneficiary if the income interest is terminated on such payment date. The amount so severed from the fund must either be paid to, or retained for the use of, the designated public charity, as provided in the governing instrument. However, see subparagraph (3) of this paragraph for rules relating to commingling of property.

(c) Allocation of income to beneficiary—(1) In general. Every income interest retained or created in property transferred to a pooled income fund shall be assigned a proportionate share of the annual income earned by the fund, such share, or unit of participation, being based on the fair market value of such property on the date of transfer, as provided in this paragraph.

(2) Units of participation—(i) Unit plan. (a) On each transfer of property by a donor to a pooled income fund, one or more units of participation in the fund shall be assigned to the beneficiary or beneficiaries of the income interest retained or created in such property, the number of units of participation being equal to the number obtained by dividing the fair market value of the property by the fair market value of a unit in the fund at the time of the transfer.

(b) The fair market value of a unit in the fund at the time of the transfer shall be determined by dividing the fair market value of all property in the fund at such time by the number of units then in the fund. The initial fair market value of a unit in a pooled income fund shall be the fair market value of the property transferred to the fund divided by the number of units assigned to the income interest in that property. The value of each unit of participation will fluctuate with each new transfer of property to the fund in relation to the appreciation or depreciation in the fair market value of the property in the fund, but all units in the fund will always have equal value.

(c) The share of income allocated to each unit of participation shall be determined by dividing the income of the fund for the taxable year by the outstanding number of units in the fund at the end of such year, except that, consistently with paragraph (b)(7) of this section, income shall be allocated to units outstanding during only part of such year by taking into consideration the period of time such units are outstanding. For this purpose the actual income of such part of the taxable year, or a prorated portion of the annual income, may be used, after making such adjustments as are reasonably necessary to reflect fluctuations during the year in the fair market value of the property in the fund.

(ii) Other plans. The governing instrument of the fund may provide any other reasonable method not described in subdivision (i) of this subparagraph for assigning units of participation in the fund and allocating income to such units which reaches a result reasonably consistent with the provisions of such subdivision.

(iii) Transfers between determination dates. For purposes of subdivisions (i) and (ii) of this subparagraph, if a transfer of property to the fund by a donor occurs on other than a determination date, the number of units of participation assigned to the income interest in such property may be determined by using the fair market value of the property in the fund on the determination date immediately preceding the date of transfer (determined without regard to the property so transferred), subject, however, to appropriate adjustments on the next succeeding determination date. Such adjustments may be made by any reasonable method, including the use of a method whereby the fair market value of the property in the fund at the time of the transfer is deemed to be the average of the fair market values of the property in the fund on the determination dates immediately preceding and succeeding the date of transfer. For purposes of determining such average any property transferred to the fund between such preceding and succeeding dates, or on such succeeding date, shall be excluded. The application of this subdivision may be illustrated by the following example:

Example. The determination dates of a pooled income fund are the first day of each calendar month. On April 1, 1971, the fair market value of the property in the fund is $100,000, at which time 1,000 units of participation are outstanding with a value of $100 each. On April 15, 1971, B transfers property with a fair market value of $50,000 to the fund, retaining for himself for life an income interest in such property. No other property is transferred to the fund after April 1, 1971. On May 1, 1971, the fair market value of the property in the fund, including the property transferred by B, is $160,000. The average of the fair market values of the property in the fund (excluding the property transferred by B) on April 1 and May 1, 1971, is $105,000 ($100,000+ [$160,000–$50,000]÷2). Accordingly, the fair market value of a unit of participation in the fund on April 15, 1971, at the time of B's transfer may be deemed to be $105 ($105,000/1,000 units), and B is assigned 476.19 units of participation in the fund ($50,000/$105).

(3) Special rule for partial allocation of income to charity. Notwithstanding subparagraph (2) of this paragraph, the governing instrument may provide that a unit of participation is entitled to share in the income of the fund in a lesser amount than

would otherwise be determined under such subparagraph, provided that the income otherwise allocable to the unit under such subparagraph is paid within the taxable year in which it is received to the public charity to or for the use of which the remainder interest is contributed under the governing instrument.

(4) **Illustrations.** The application of this paragraph may be illustrated by the following examples:

Example (1). On July 1, 1970, A and B transfer separate properties with a fair market value of $20,000 and $10,000, respectively, to a newly created pooled income fund which is maintained by Y University and uses as its taxable year the fiscal year ending June 30. A and B each retain in themselves for life an income interest in such property, the remainder interest being contributed to Y University. The pooled income fund assigns an initial value of $100 to each unit of participation in the fund, and under the governing instruments A receives 200 units, and B receives 100 units, in the fund. On October 1, 1970, which is a determination date, C transfers property to the fund with a fair market value of $12,000, retaining in himself for life an income interest in such property and contributing the remainder interest to Y University. The fair market value of the property in the fund at the time of C's transfer is $36,000. The fair market value of A's and B's units at the time of such transfer is $120 each ($36,000/300). By reason of his transfer of property C is assigned 100 units of participation in the fund ($12,000/$120).

Example (2). Assume that the pooled income fund in example (1) earns $2,600 for its taxable year ending June 30, 1971, and there are no further contributions of property to the fund in such year. Further assume $300 is earned in the first quarter ending September 30, 1970. Therefore, the fund earns $1 per unit for the first quarter ($300 divided by 300 units outstanding) and $5.75 per unit for the remainder of the taxable year ([$2,600–$300] divided by 400 units outstanding). If the fund distributes its income for the year based on its actual earnings per quarter, the income must be distributed as follows:

Beneficiary	*Share of income*
A	$1,350 ([200 × $1] + [200 × $5.75]).
B	$675 ([100 × $1] + [100 × $5.75]).
C	$575 (100 × $5.75).

Example (3). (a) On July 1, 1970, A and B transfer separate properties with a fair market value of $10,000 and $20,000, respectively, to a newly created pooled income fund which is maintained by X University and uses as its taxable year the fiscal year ending June 30. A and B each retain in themselves an income interest for life in such property, the remainder interest being contributed to X University. The governing instrument provides that each unit of participation in the fund shall have a value of not more than its initial fair market value; the instrument also provides that the income allocable to appreciation in the fair market value of such unit (to the extent in excess of its initial fair market value) at the end of each quarter of the fiscal year is to be distributed currently to X University. On October 1, 1970, which is a determination date, C contributes to the fund property with a fair market value of $60,000 and retains in himself an income interest for life in such property, the remainder interest being contributed to X University. The initial fair market value of the units assigned to A, B, and C is $100. A, B, and C's units of participation are as follows:

Beneficiary	*Units of participation*
A	100 ($10,000 divided by $100).
B	200 ($20,000 divided by $100).
C	100 ($10,000 divided by $100).

(b) The fair market value of the property in the fund at the time of C's contribution is $40,000. Assuming the fair market value of the property in the fund is $100,000 on December 31, 1970, and that the income of the fund for the second quarter ending December 31, 1970, is $2,000, the income is shared by the income beneficiaries and X University as follows:

Beneficiary	*Allocation of income*
A, B, and C	90% ($90,000 divided by $100,000).
X University	10% ($10,000 divided by $100,000).

(c) For the quarter ending December 31, 1970, each unit of participation is allocated $2 (90 percent × $2,000 divided by 900) of the income earned for that quarter. A, B, C, and X University share in the income as follows:

Beneficiary	*Share of income*
A	$200 (100 × $2).
B	$400 (200 × $2).
C	$1,200 (600 × $2).
X University	$200 (10% × $2,000).

[T.D. 7105, 36 FR 6477, April 6, 1971; 36 FR 7004, April 13, 1971, as amended by T.D. 7125, 36 FR 11032, June 8, 1971; T.D. 7357, 40 FR 23742, June 2, 1975; T.D. 7633, 44 FR 57925, Oct. 9, 1979]

§ 1.642(c)–6 Valuation of a remainder interest in property transferred to a pooled income fund.

(a) **In general.** (1) For purposes of sections 170, 2055, 2106, and 2522 the fair market value of a remainder interest in property transferred after July 31, 1969, to a pooled income fund to which § 1.642(c)–5 applies is its present value determined under this section. The present value of the remainder interest at the time of the transfer of property to the fund shall be determined by computing the present value at such time of the life income interest in the transferred property (as determined under paragraph (b) of this section) and subtracting such value from the fair market value of the transferred property on the appropriate valuation date. The fact that the income beneficiary of the income interest in such property may not receive the last income payment, as provided in paragraph (b)(7) of § 1.642(c)–5, shall not be taken into account for purposes of determining the present value of the life income interest. For purposes of this section, the term "appropriate valuation date" means the date on which property is transferred to the fund by the donor except that, for purposes of section 2055 or 2106, it means the alternate valuation date if it is elected

in accordance with section 2032 and the regulations thereunder.

(2) The method for determining the present value of a remainder interest in property transferred to a pooled income fund where such value is dependent on the termination of one life is set forth in paragraph (d) of this section. If the computation of the value of the remainder interest requires the use of a factor which is not provided in paragraph (d) of this section, the Commissioner may, if conditions permit, supply the factor upon request. The request must be accompanied by a statement of the pooled income fund's yearly rate of return and of the date of birth and sex of each individual the duration of whose life may affect the value of the remainder interest and by copies of the relevant instruments. If the Commissioner furnishes the factor, a copy of the letter supplying the factor shall be attached to the tax return in which the deduction is claimed. If the Commissioner does not furnish the factor, the taxpayer must furnish a factor computed in accordance with the principles set forth in this section. A copy of the publication containing many such special factors, may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, D.C. 20402. Any claim for deduction in any return for the value of a remainder interest in property transferred to a pooled income fund must be supported by a statement attached to the return showing the computation of the present value of such interest.

(b) Present value of life income interest. The present value of the life income interest in property transferred to a pooled income fund shall be computed on the basis of—

(1) Life contingencies determined, from the values of l_x that are set forth in Table LN of paragraph (f) of § 20.2031–7 or § 20.2031–10, whichever is appropriate, of this chapter (Estate Tax Regulations), and

(2) Discount at a rate of interest, compounded annually, equal to the highest yearly rate of return of the pooled income fund for the 3 taxable years immediately preceding its taxable year in which the transfer of property to the fund is made. For purposes of this subparagraph, the first taxable year of a pooled income fund shall be considered a taxable year even though such taxable year consists of less than 12 months. However, appropriate adjustments shall be made to annualize the rate of return earned by the fund for such period. Where it appears from the facts and circumstances that the highest yearly rate of return for the 3 taxable years immediately preceding the taxable year in which the transfer of property is made has been purposely arranged to be substantially incommensurate with the reasonably anticipated earnings of the fund with the objective of obtaining an excessive charitable contributions deduction, such rate of return shall not be used. In such a case the highest yearly rate of return of the fund shall be determined by treating the fund as a pooled income fund which has been in existence for less than 3 preceding taxable years. If a pooled income fund has been in existence less than 3 taxable years immediately preceding the taxable year in which the transfer of property to the fund is made, the highest yearly rate of return shall be deemed to be 9 percent (6 percent for transfers of property to pooled income funds made before December 1, 1983). For purposes of this subparagraph the yearly rate of return of a pooled income fund shall be determined as provided in paragraph (c) of this section unless the highest yearly rate of return is deemed to be 9 percent (6 percent for transfers of property to pooled income funds made before December 1, 1983).

(c) Computation of pooled income fund's yearly rate of return. **(1)** For purposes of paragraph (b) of this section, the yearly rate of return earned by a pooled income fund for a taxable year shall be that percentage obtained by dividing the amount of income earned by the pooled income fund for such taxable year by an amount equal to (i) the average fair market value for such taxable year of the property in such fund less (ii) the corrective term adjustment.

(2) The average fair market value of the property in a pooled income fund for a taxable year shall be the sum of the amounts of the fair market value of all property held by the pooled income fund on each determination date, as defined in paragraph (a)(5)(vi) of § 1.642(c)–5, of such taxable year divided by the number of determination dates in such taxable year. For such purposes the fair market value of property held by the fund shall be determined without including any income earned by the fund.

(3)(i) The corrective term adjustment shall be the sum of the products obtained by multiplying each income payment made by the pooled income fund within its taxable year by the percentage set forth in column (2) of the following table opposite the period within such year, set forth in column (1), which includes the date on which that payment is made:

TABLE

(1) *Payment period*	(2) *Percentage of payment*
Last week of 4th quarter	0
Balance of 4th quarter	.25
Last week of 3d quarter	.25
Balance of 3d quarter	.50
Last week of 2d quarter	.50
Balance of 2d quarter	.75
Last week of 1st quarter	.75
Balance of 1st quarter	100

(ii) If the taxable year of the fund consists of less than 12 months, the corrective term adjustment shall be the sum of the products obtained by multiplying each income payment made by the pooled income fund within such taxable year by the percentage obtained by subtracting from 1 a fraction the numerator of which is the number of days from the first day of such taxable year to the date of such income payment and the denominator of which is 365.

(4) A pooled income fund's method of calculating its yearly rate of return must be supported by a full statement attached to the income tax return of the pooled income fund for each taxable year.

(5) The application of this paragraph may be illustrated by the following examples:

Example (1). (a) The pooled income fund maintained by W University has established determination dates on the first day of each calendar quarter. The pooled income fund is on a calendar-year basis. The pooled income fund earned $5,000 of income during 1971. The fair market value of its property (determined without including any income earned by the fund), and the income paid out, on the first day of each calendar quarter in 1971 are as follows:

Date	Fair market value of property	Income payment
Jan. 1	$100,000	$1,200
Apr. 1	105,000	1,200
July 1	95,000	1,200
Oct. 1	100,000	1,400
	400,000	5,000

(b) The average fair market value of the property in the fund for 1971 is $100,000 ($400,000, divided by 4).

(c) The corrective term adjustment for 1971 is $3,050, determined by applying the percentages obtained in column (2) of the table in subparagraph (3) of this paragraph:

Multiplication:	Product
100% × $1,200	$1,200
75% × $1,200	900
50% × $1,200	600
25% × $1,400	350
Sum of products	3,050

(d) The pooled income fund's yearly rate of return for 1971 is 5.157 percent, determined as follows:

$5,000 ÷ $100,000 − $3,050 = 0.05157

Example (2). (a) The pooled income fund maintained by X University has established determination dates on the first day of each calendar quarter. The pooled income fund is on a calendar-year basis. The pooled income fund earned $5,000 of income during 1971 and paid out $3,000 on December 15, 1971, and $2,000 on January 15, 1972, the last amount being treated under paragraph (b)(7) of § 1.642(c)–5 as paid on December 31, 1971. The fair market value of its property (determined without including any income earned by the fund) on the determination dates in 1971 and the income paid out during 1971 are as follows:

Date	Fair market value of property	Income payment
Jan. 1	$125,000	
Apr. 1	125,000	
July 1	75,000	
Oct. 1	75,000	
Dec. 15		$3,000
Dec. 31		2,000
	400,000	5,000

(b) The average fair market value of the property in the fund for 1971 is $100,000 ($400,000 divided by 4).

(c) The corrective term adjustment for 1971 is $750, determined by applying the percentages obtained in column (2) of the table in subparagraph (3) of this paragraph:

Multiplication:	Product
0% × $2,000	
25% × $3,000	$750
Sum of products	750

(d) The pooled income fund's yearly rate of return for 1971 is 5.038 percent, determined as follows:

$5,000÷$100,000–$750=0.05038

(d) Present value of remainder interest dependent on the termination of one life; for transfers to pooled income funds made after November 30, 1983—(1) In general. For transfers to pooled income funds made after November 30, 1983, the present value under this section of a remainder interest which is dependent on the termination of the life of one individual shall be determined under paragraphs (d)(1) through (3) of this section. The present value of such a remainder interest shall be computed by the use of Table G in paragraph (d)(3) of this section. For purposes of the computations under this section, the age of an individual is to be taken as the age of the individual at the individual's nearest birthday. For transfers to pooled income funds made before December 1, 1983, see paragraphs (e)(1) through (3) of this section.

(2) Computation of value of remainder interest. The factor which is used in determining the present value of the remainder interest is the factor

under the appropriate yearly rate of return in column (2) of Table G opposite the number in column (1) which corresponds to the age of the individual upon whose life the value of the remainder interest is based. If the yearly rate of return is a percentage which is between yearly rates of return for which factors are provided in Table G, a linear interpolation must be made. The present value of the remainder interest is determined by multiplying, by the factor determined under this paragraph (d)(2), the fair market value on the appropriate valuation date. If the yearly rate of return is below 2.2 percent or above 14 percent, see paragraph (a)(2) of this section. This paragraph (d)(2) may be illustrated by the following example:

Example. A, who will be 50 years old on April 15, 1985, transfers $100,000 to a pooled income fund on January 1, 1985, and retains a life income interest in such property. The highest yearly rate of return earned by the fund for its 3 preceding taxable years is 9.9 percent. In Table G the figure in column (2) opposite 50 years under 9.8 percent is .15653 and under 10 percent is .15257. The present value of the remainder interest is $15,455, computed as follows:

Factor at 9.8 percent for person aged 50	.15653
Factor at 10 percent for person aged 50	.15257
Difference	.00396
Interpolation adjustment:	

$$9.9\%-9.8\% \div .2\% = x \div .00396$$

$$x = .00198$$

Factor at 9.8 percent for person aged 50	0.15653
Less:	
Interpolation adjustment	.00198
Interpolated factor	.15455
Present value of remainder interest ($100,000 × .15455)	$15,455

(3) Actuarial tables. The following tables shall be used in the application of the provisions of this section.

TABLE G.—TABLE, SINGLE LIFE, UNISEX, SHOWING THE PRESENT WORTH OF THE REMAINDER INTEREST IN PROPERTY TRANSFERRED TO A POOLED INCOME FUND HAVING THE YEARLY RATE OF RETURN SHOWN

(1) Age	(2) Yearly rate of return 2.2%	2.4%	2.6%	2.8%	3.0%
0	.23930	.21334	.19077	.17113	.15401
1	.22891	.20224	.17903	.15880	.14114
2	.23297	.20610	.18265	.16218	.14429

(e) Present value of remainder interest dependent on the termination of one life; for transfers to pooled income funds made before December 1, 1983—(1) In general. For transfers to pooled income funds made before December 1, 1983, the present value under this section of a remainder interest which is dependent on the termination of the life of one individual shall be determined under paragraphs (e)(1) through (3) of this section. The present value of such a remainder interest shall be computed by the use of Table G(1) or Table G(2) in subparagraph (3) of this paragraph. Table G(1) is to be used when the individual upon whose life the present value of the remainder interest is based is a male, and Table G(2) is to be used when the individual upon whose life the present value of the remainder interest is based is a female whose age is less than 95 years. In the case of a female whose age is more than 94 years, Table G(1) is to be used. The factors in these tables have been obtained by subtracting from 1 the factor for deter-

mining the present value of the life income interest. For purposes of the computations under this section, the age of an individual is to be taken as the age of that individual at his nearest birthday. For transfers to pooled income funds made after November 30, 1983, see paragraphs (d)(1) through (3) of this section.

(2) Computation of value of remainder interest. The factor which is used in determining the present value of the remainder interest is the factor under the appropriate yearly rate of return in column (2) of Table G(1) or Table G(2) opposite the number in column (1) which corresponds to the age of the individual upon whose life the value of the remainder interest is based. If the yearly rate of return is a percentage which is between yearly rates of return for which factors are provided in Table G(1) or Table G(2), a linear interpolation must be made. The present value of the remainder interest is determined by multiplying, by the factor determined under this subparagraph, the fair market value on the appropriate valuation date. If the yearly rate of return is below 2.2 percent or above 8 percent, see paragraph (a)(2) of this section. The application of this subparagraph may be illustrated by the following example:

Example. M, a male who will be 50 years old on April 15, 1970, transfers $100,000 to a pooled income fund on January 1, 1970, and retains in himself a life income interest in such property. The highest yearly rate of return earned by the fund for its 3 preceding taxable years is 4.717 percent. In Table G(1) the figure in column (2) opposite 50 years under 4.6 percent is 0.40087 and under 4.8 percent is 0.38764. The present value of the remainder interest is $39,313, computed as follows:

Factor at 4.6 percent for male aged 50	0.40087
Factor at 4.8 percent for male aged 50	.38764
Difference	.01323
Interpolation adjustment:	
4.717% − 4.6% ÷ 0.2% = x ÷ 0.01323	
x = 0.00774	
Factor at 4.6 percent for male aged 50	0.40087
Less: Interpolation adjustment	.00774
Interpolated factor	.39313
Present value of remainder interest ($100,000 × 0.39313)	$39,313

(3) Actuarial tables. The following tables, which show the factor obtained by subtracting from 1 the factor for determining the present value of the life income interest dependent on the termination of the life of one individual, shall be used in the application of the provisions of this section:

TABLE G(1)

TABLE, SINGLE LIFE, MALE, SHOWING THE PRESENT WORTH OF A REMAINDER INTEREST IN PROPERTY TRANSFERRED TO A POOLED INCOME FUND HAVING THE YEARLY RATE OF RETURN SHOWN

[T.D. 7105, 36 FR 6480, April 6, 1971, as amended by 36 FR 9512, May 26, 1971; 36 FR 12290, June 30, 1971; T.D. 7955, 49 FR 19976, May 11, 1984]

§ 1.642(c)–7 Transitional rules with respect to pooled income funds.

(a) In general—(1) Amendment of certain funds. A fund created before May 7, 1971, and not otherwise qualifying as a pooled income fund may be treated as a pooled income fund to which § 1.642(c)–5 applies if on July 31, 1969, or on each date of transfer of property to the fund occurring after July 31, 1969, it possessed the initial characteristics described in paragraph (b) of this section and is amended, in the time and manner provided in paragraph (c) of this section, to meet all the requirements of section 642(c)(5) and § 1.642(c)–5. If a fund to which this subparagraph applies is amended in the time and manner provided in paragraph (c) of this section it shall be

treated as provided in paragraph (d) of this section for the period beginning on August 1, 1969, or, if later, on the date of its creation and ending the day before the date on which it meets the requirements of section 642(c)(5) and § 1.642(c)–5.

(2) Severance of a portion of a fund. Any portion of a fund created before May 7, 1971, which consists of property transferred to such fund after July 31, 1969, may be severed from such fund consistently with the principles of paragraph (c)(2) of this section and established before January 1, 1972, as a separate pooled income fund, provided that on and after the date of severance the severed fund meets all the requirements of section 642(c)(5) and § 1.642(c)–5. A separate fund which is established pursuant to this subparagraph shall be treated as provided in paragraph (d) of this section for the period beginning on the day of the first transfer of property which becomes part of the separate fund and ending the day before the day on which the separate fund meets the requirements of section 642(c)(5) and § 1.642(c)–5.

(b) Initial characteristics required. A fund described in paragraph (a)(1) of this section shall not be treated as a pooled income fund to which section 642(c)(5) applies, even though it is amended as provided in paragraph (c) of this section, unless it possessed the following characteristics on July 31, 1969, or on each date of transfer of property to the fund occurring after July 31, 1969:

(1) It satisfied the requirements of section 642(c)(5)(A) other than that the fund be a trust;

(2) It was constituted in a way to attract and contain commingled properties transferred to the fund by more than one donor satisfying such requirements; and

(3) Each beneficiary of a life income interest which was retained or created in any property transferred to the fund was entitled to receive, but not less often than annually, a proportional share of the annual income earned by the fund, such share being based on the fair market value of the property in which such life interest was retained or created.

(c) Amendment requirements. (1) A fund described in paragraph (a)(1) of this section and possessing the initial characteristics described in paragraph (b) of this section on the date prescribed therein shall be treated as a pooled income fund if it is amended to meet all the requirements of section 642(c)(5) and § 1.642(c)–5 before January 1, 1972, or, if later, on or before the 30th day after the date on which any judicial proceedings commenced before January 1, 1972, which are required to amend its governing instrument or any other instrument which does not permit it to meet such requirements, become final. However, see paragraph (d) of this section for limitation on the period in which a claim for credit or refund may be filed.

(2) In addition, if the transferred property described in paragraph (b)(2) of this section is commingled with other property, the transferred property must be separated on or before the date specified in subparagraph (1) of this paragraph from the other property and allocated to the fund in accordance with the transferred property's percentage share of the fair market value of the total commingled property on the date of separation. The percentage share shall be the ratio which the fair market value of the transferred property on the date of separation bears to the fair market value of the total commingled property on that date and shall be computed in a manner consistent with paragraph (c) of § 1.642(c)–5. The property which is so allocated to the fund shall be treated as property received from transfers which meet the requirements of section 642(c)(5), and such transfers shall be treated as made on the dates on which the properties giving rise to such allocation were transferred to the fund by the respective donors. The property so allocated to the fund must be representative of all the commingled property other than securities the income from which is exempt from tax under subtitle A of the Code; compensating increases in other commingled property allocated to the fund shall be made where such tax-exempt securities are not allocated to the fund. The application of this subparagraph may be illustrated by the following example:

Example. (a) The trustees of X fund are in the process of amending it in order to qualify as a pooled income fund. The property transferred to the X fund was commingled with other property transferred to the organization by which the fund was established. After taking into account the various transfers and the appreciation in the fair market value of all the properties, the fair market value of the property allocated to the fund on the various transfer dates is set forth in the following schedule and determined in the manner indicated:

TRANSFERS

Date of transfer	Value of all property before transfer (1)	Trust property (2)	Other property (3)	Value of all property after transfer (4)	Property allocated to fund (5)
January 1, 1968	....	$100,000	$100,000	$200,000	[1]$100,000
September 30, 1968	$300,000	100,000	....	400,000	[2]250,000
January 15, 1969	480,000	60,000	....	540,000	[3]360,000
November 11, 1969	600,000	200,000	....	800,000	[4]600,000

[1] $100,000 = (the amount in column (2)).
[2] $250,000 = ([$100,000/$200,000 × $300,000] + $100,000).
[3] $360,000 = ([$250,000/$400,000 × $480,000] + $60,000).
[4] $600,000 = ([$360,000/$540,000 × $600,000] + $200,000).

(b) On September 30, 1970, the trustees decide to separate the property of X fund from the other property. The fair market value of all the commingled property is $1 million on September 30, 1970, and there were no additional transfers to the fund after November 11, 1969. Accordingly, the fair market value of the property required to be allocated to X fund must be $750,000 ($600,000/$800,000×$1,000,000), and X fund's percentage share of the commingled property is 75 percent ($750,000/$1,000,000). Accordingly, assuming that the commingled property consists of Y stock with a fair market value of $800,000 and Z bonds with a fair market value of $200,000, there must be allocated to X fund at the close of September 30, 1970, Y stock with a value of $600,000 ($800,000×75%) and Z bonds with a value of $150,000 ($200,000×75%).

(d) Transactions before amendment of or severance from fund. (1) A fund which is amended pursuant to paragraph (c) of this section, or is severed from a fund pursuant to paragraph (a)(2) of this section, shall be treated for all purposes, including the allowance of a deduction for any charitable contribution, as if it were before its amendment or severance a pooled income fund to which section 642(c)(5) and § 1.642(c)–5 apply. Thus, for example, where a donor transferred property in trust to such an amended or severed fund on August 1, 1969, but before its amendment or severance under this section, a charitable contributions deduction for the value of the remainder interest may be allowed under section 170, 2055, 2106, or 2522. The deduction may not be allowed, however, until the fund is amended or severed pursuant to this section and shall be allowed only if a claim for credit or refund is filed within the period of limitation prescribed by section 6511(a).

(2) For purposes of determining under paragraph (b)(2) of § 1.642(c)–6 the highest yearly rate of return earned by a fund (which is amended pursuant to paragraph (c) of this section) for the 3 preceding taxable years, taxable years of the fund preceding its taxable year in which the fund is so amended and qualifies as a pooled income fund under this section shall be used provided that the fund did not at any time during such preceding years hold any investments in securities the income from which is exempt from tax under subtitle A of the Code. If any such tax-exempt securities were held during such period by such amended fund, or if the fund consists of a portion of a fund which is severed pursuant to paragraph (a)(2) of this section, the highest yearly rate of return under paragraph (b)(2) of § 1.642(c)–6 shall be determined by treating the fund as a pooled income fund which has been in existence for less than 3 taxable years preceding the taxable year in which the transfer of property to the fund is made.

(3) Property transferred to a fund before its amendment pursuant to paragraph (c) of this section, or before its severance under paragraph (a)(2) of this section, shall be treated as property received from transfers which meet the requirements of section 642(c)(5).

[T.D. 7105, 36 FR 6486, April 6, 1971, as amended by T.D. 7125, 36 FR 11032, June 8, 1971]

§ 1.642(d)–1 Net operating loss deduction.

The net operating loss deduction allowed by section 172 is available to estates and trusts generally, with the following exceptions and limitations:

(a) In computing gross income and deductions for the purposes of section 172, a trust shall exclude that portion of the income and deductions attributable to the grantor or another person under sections 671 through 678 (relating to grantors and others treated as substantial owners).

(b) An estate or trust shall not, for the purposes of section 172, avail itself of the deductions allowed by section 642(c)(relating to charitable contributions deductions) and sections 651 and 661 (relating to deductions for distributions).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(e)–1 Depreciation and depletion.

An estate or trust is allowed the deductions for depreciation and depletion, but only to the extent the deductions are not apportioned to beneficiaries under sections 167(h) and 611(b). For purposes of sections 167(h) and 611(b), the term "beneficiaries" includes charitable beneficiaries. See the regulations under those sections.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3655, March 24, 1964]

§ 1.642(f)–1 Amortization deductions.

An estate or trust is allowed amortization deductions with respect to an emergency facility as defined in section 168(d), with respect to a certified pollution control facility as defined in section 169(d), with respect to qualified railroad rolling stock as defined in section 184(d), with respect to certified coal mine safety equipment as defined in section 187(d), with respect to on-the-job training and child-care facilities as defined in section 188(b), and with respect to certain rehabilitations of certified historic structures as defined in section 191, in the same manner and to the same extent as in the case of an individual. However, the principles governing the apportionment of the deductions for depreciation and depletion between fiduciaries and the beneficiaries of an estate or trust (see sections 167(h) and 611(b) and the regulations thereunder) shall be applicable with respect to such amortization deductions.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3655, Mar. 24, 1964; T.D. 7116, 36 FR 9017, May 18, 1971; T.D. 7599, 44 FR 14552, Mar. 13, 1979; T.D. 7700, 45 FR 38055, June 6, 1980]

§ 1.642(g)–1 Disallowance of double deductions; in general.

Amounts allowable under section 2053(a)(2) (relating to administration expenses) or under section 2054 (relating to losses during administration) as deductions in computing the taxable estate of a decedent are not allowed as deductions in computing the taxable income of the estate unless there is filed a statement, in duplicate, to the effect that the items have not been allowed as deductions from the gross estate of the decedent under section 2053 or 2054 and that all rights to have such items allowed at any time as deductions under section 2053 or 2054 are waived. The statement should be filed with the return for the year for which the items are claimed as deductions or with the district director for the internal revenue district in which the return was filed, for association with the return. The statement may be filed at any time before the expiration of the statutory period of limitation applicable to the taxable year for which the deduction is sought. Allowance of a deduction in computing an estate's taxable income is not precluded by claiming a deduction in the estate tax return, so long as the estate tax deduction is not finally allowed and the statement is filed. However, after a statement is filed under section 642(g) with respect to a particular item or portion of an item, the item cannot thereafter be allowed as a deduction for estate tax purposes since the waiver operates as a relinquishment of the right to have the deduction allowed at any time under section 2053 or 2054.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(g)–2 Deductions included.

It is not required that the total deductions, or the total amount of any deduction, to which section 642(g) is applicable be treated in the same way. One deduction or portion of a deduction may be allowed for income tax purposes if the appropriate statement is filed, while another deduction or portion is allowed for estate tax purposes. Section 642(g) has no application to deductions for taxes, interest, business expenses, and other items accrued at the date of a decedent's death so that they are allowable as a deduction under section 2053(a)(3) for estate tax purposes as claims against the estate, and are also allowable under section 691(b) as deductions in respect of a decedent for income tax purposes. However, section 642(g) is applicable to deductions for interest, business expenses, and other items not accrued at the date of the decedent's death so that they are allowable as deductions for estate tax purposes only as administration expenses under section 2053(a)(2). Although deductible under section 2053(a)(3) in determining the value of the taxable estate of a decedent, medical, dental, etc., expenses of a decedent which are paid by the estate of the decedent are not deductible in computing the taxable income of the estate. See section 213(d) and the regulations thereunder for rules relating to the deductibility of such expenses in computing the taxable income of the decedent.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(h)–1 Unused loss carryovers on termination of an estate or trust.

(a) If, on the final termination of an estate or trust, a net operating loss carryover under section 172 or a capital loss carryover under section 1212 would be allowable to the estate or trust in a taxable year subsequent to the taxable year of termination but for the termination, the carryover or carryovers are allowed under section 642(h)(1) to the beneficiaries succeeding to the property of

the estate or trust. See § 1.641(b)–3 for the determination of when an estate or trust terminates.

(b) The net operating loss carryover and the capital loss carryover are the same in the hands of a beneficiary as in the estate or trust, except that the capital loss carryover in the hands of a beneficiary which is a corporation is a short-term loss irrespective of whether it would have been a long-term or short-term capital loss in the hands of the estate or trust. The net operating loss carryover and the capital loss carryover are taken into account in computing taxable income, adjusted gross income, and the tax imposed by section 56 (relating to the minimum tax for tax preferences). The first taxable year of the beneficiary to which the loss shall be carried over is the taxable year of the beneficiary in which or with which the estate or trust terminates. However, for purposes of determining the number of years to which a net operating loss, or a capital loss under paragraph (a) of § 1.1212–1, may be carried over by a beneficiary, the last taxable year of the estate or trust (whether or not a short taxable year) and the first taxable year of the beneficiary to which a loss is carried over each constitute a taxable year, and, in the case of a beneficiary of an estate or trust that is a corporation, capital losses carried over by the estate or trust to any taxable year of the estate or trust beginning after December 31, 1963, shall be treated as if they were incurred in the last taxable year of the estate or trust (whether or not a short taxable year). For the treatment of the net operating loss carryover when the last taxable year of the estate or trust is the last taxable year to which such loss can be carried over, see § 1.642(h)–2.

(c) The application of this section may be illustrated by the following examples:

Example (1). A trust distributes all of its assets to A, the sole remainderman, and terminates on December 31, 1954, when it has a capital loss carryover of $10,000 attributable to transactions during the taxable year 1952. A, who reports on the calendar year basis, otherwise has ordinary income of $10,000 and capital gains of $4,000 for the taxable year 1954. A would offset his capital gains of $4,000 against the capital loss of the trust and, in addition, deduct under section 1211(b) $1,000 on his return for the taxable year 1954. The balance of the capital loss carryover of $5,000 may be carried over only to the years 1955 and 1956, in accordance with paragraph (a) of § 1.1212–1 and the rules of this section.

Example (2). A trust distributes all of its assets, one-half to A, an individual, and one-half to X, a corporation, who are the sole remaindermen, and terminates on December 31, 1966, when it has a short-term capital loss carryover of $20,000 attributable to short-term transactions during the taxable years 1964, 1965, and 1966, and a long-term capital loss carryover of $12,000 attributable to long-term transactions during such years. A, who reports on the calendar year basis, otherwise has ordinary income of $15,000, short-term capital gains of $4,000 and long-term capital gains of $6,000, for the taxable year 1966. A would offset his short-term capital gains of $4,000 against his share of the short-term capital loss carryover of the trust, $10,000 (one-half of $20,000), and, in addition deduct under section 1211(b) $1,000 (treated as a short-term gain for purposes of computing capital loss carryovers) on his return for the taxable year 1966. A would also offset his long-term capital gains of $6,000 against his share of the long-term capital loss carryover of the trust, $6,000 (one-half of $12,000). The balance of A's share of the short-term capital loss carryover, $5,000, may be carried over as a short-term capital loss carryover to the succeeding taxable year and treated as a short-term capital loss incurred in such succeeding taxable year in accordance with paragraph (b) of § 1.1212–1. X, which also reports on the calendar year basis, otherwise has capital gains of $4,000 for the taxable year 1966. X would offset its capital gains of $4,000 against its share of the capital loss carryovers of the trust, $16,000 (the sum of one-half of each the short-term carryover and the long-term carryover of the trust), on its return for the taxable year 1966. The balance of X's share, $12,000, may be carried over as a short-term capital loss only to the years 1967, 1968, 1969, and 1970, in accordance with paragraph (a) of § 1.1212–1 and the rules of this section.

[T.D.6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6828, 30 FR 7805, June 17, 1965; T.D. 7564, 43 FR 40495, Sept. 12, 1978]

§ 1.642(h)–2 Excess deductions on termination of an estate or trust.

(a) If, on the termination of an estate or trust, the estate or trust has for its last taxable year deductions (other than the deductions allowed under section 642(b) (relating to personal exemption) or section 642(c) (relating to charitable contributions)) in excess of gross income, the excess is allowed under section 642(h)(2) as a deduction to the beneficiaries succeeding to the property of the estate or trust. The deduction is allowed only in computing taxable income and must be taken into account in computing the items of tax preference of the beneficiary; it is not allowed in computing adjusted gross income. The deduction is allowable only in the taxable year of the beneficiary in which or with which the estate or trust terminates, whether the year of termination of the estate or trust is of normal duration or is a short taxable year. For example: Assume that a trust distributes all of its assets to B and terminates on December 31, 1954. As of that date it has excess deductions, for example, because of corpus commissions on termination, of $18,000. B, who reported on the calendar year basis, could claim the $18,000 as a deduction for the taxable year 1954. However, if the deduction (when added to his other deductions) exceeds his gross income, the excess may not be carried over to the year 1955 or subsequent years.

(b) A deduction based upon a net operating loss carryover will never be allowed to beneficiaries under both paragraphs (1) and (2) of section 642(h). Accordingly, a net operating loss deduction which is allowable to beneficiaries succeeding

to the property of the estate or trust under the provisions of paragraph (1) of section 642(h) cannot also be considered a deduction for purposes of paragraph (2) of section 642(h) and paragraph (a) of this section. However, if the last taxable year of the estate or trust is the last year in which a deduction on account of a net operating loss may be taken, the deduction, to the extent not absorbed in that taxable year by the estate or trust, is considered an "excess deduction" under section 642(h)(2) and paragraph (a) of this section.

(c) Any item of income or deduction, or any part thereof, which is taken into account in determining the net operating loss or capital loss carryover of the estate or trust for its last taxable year shall not be taken into account again in determining excess deductions on termination of the trust or estate within the meaning of section 642(h)(2) and paragraph (a) of this section (see example in § 1.642(h)–5).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7564, 43 FR 40495, Sept. 12, 1978]

§ 1.642(h)–3 Meaning of "beneficiaries succeeding to the property of the estate or trust".

(a) The phrase "beneficiaries succeeding to the property of the estate or trust" means those beneficiaries upon termination of the estate or trust who bear the burden of any loss for which a carryover is allowed, or of any excess of deductions over gross income for which a deduction is allowed, under section 642(h).

(b) With reference to an intestate estate, the phrase means the heirs and next of kin to whom the estate is distributed, or if the estate is insolvent, to whom it would have been distributed if it had not been insolvent. If a decedent's spouse is entitled to a specified dollar amount of property before any distribution to other heirs and next of kin, and if the estate is less than that amount, the spouse is the beneficiary succeeding to the property of the estate or trust to the extent of the deficiency in amount.

(c) In the case of a testate estate, the phrase normally means the residuary beneficiaries (including a residuary trust), and not specific legatees or devisees, pecuniary legatees, or other nonresiduary beneficiaries. However, the phrase does not include the recipient of a specific sum of money even though it is payable out of the residue, except to the extent that it is not payable in full. On the other hand, the phrase includes a beneficiary (including a trust) who is not strictly a residuary beneficiary but whose devise or bequest is determined by the value of the decedent's estate as reduced by the loss or deductions in question. Thus the phrase includes:

(1) A beneficiary of a fraction of a decedent's net estate after payment of debts, expenses, etc.;

(2) A nonresiduary legatee or devisee, to the extent of any deficiency in his legacy or devise resulting from the insufficiency of the estate to satisfy it in full;

(3) A surviving spouse receiving a fractional share of an estate in fee under a statutory right of election, to the extent that the loss or deductions are taken into account in determining the share. However, the phrase does not include a recipient of dower or curtesy, or any income beneficiary of the estate or trust from which the loss or excess deduction is carried over.

(d) The principles discussed in paragraph (c) of this section are equally applicable to trust beneficiaries. A remainderman who receives all or a fractional share of the property of a trust as a result of the final termination of the trust is a beneficiary succeeding to the property of the trust. For example, if property is transferred to pay the income to A for life and then to pay $10,000 to B and distribute the balance of the trust corpus to C, C and not B is considered to be the succeeding beneficiary except to the extent that the trust corpus is insufficient to pay B $10,000.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(h)–4 Allocation.

The carryovers and excess deductions to which section 642(h) applies are allocated among the beneficiaries succeeding to the property of an estate or trust (see § 1.642(h)–3) proportionately according to the share of each in the burden of the loss or deductions. A person who qualified as a beneficiary succeeding to the property of an estate or trust with respect to one amount and does not qualify with respect to another amount is a beneficiary succeeding to the property of the estate or trust as to the amount with respect to which he qualifies. The application of this section may be illustrated by the following example:

Example. A decedent's will leaves $100,000 to A, and the residue of his estate equally to B and C. His estate is sufficient to pay only $90,000 to A, and nothing to B and C. There is an excess of deductions over gross income for the last taxable year of the estate or trust of $5,000, and a capital loss carryover of $15,000, to both of which section 642(h) applies. A is a beneficiary succeeding to the property of the estate to the extent of $10,000, and since the total of the excess of deductions and the loss carryover is $20,000, A is entitled to the benefit of one half of each item, and the remaining half is divided equally between B and C.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.642(h)–5 Example.

The application of section 642(h) may be illustrated by the following example:

Example. (a) A decedent dies January 31, 1954, leaving a will which provides for distributing all her estate equally to A and an existing trust for B. The period of administration of the estate terminates on December 31, 1954, at which time all the property of the estate is distributed to A and the trust. A reports his income for tax purposes on a calendar year basis, and the trust reports its income on the basis of a fiscal year ending August 31. During the period of the administration, the estate has the following items of income and deductions:

Taxable interest	$2,500
Business income	3,000
Total	5,500
Business expenses (including administrative expense allocable to business income)	5,000
Administrative expenses and corpus commissions not allocable to business income	9,800
Total deductions	14,800

It also has a capital loss of $5,000

(b) Under section 642(h)(1), an unused net operating loss carryover of the estate on termination of $2,000 will be allowable to: A to the extent of $1,000 for his taxable year 1954 and the next four taxable years in accordance with section 172; and to the trust to the extent of $1,000 for its taxable year ending August 31, 1955, and its next four taxable years. The amount of the net operating loss carryover is computed as follows:

Deductions of estate for 1954	$14,800
Less adjustment under section 172(d)(4) (deductions not attributable to a trade or business ($9,800) allowable only to extent of gross income not derived from such trade or business ($2,500))	7,300
Deductions as adjusted	7,500
Gross income of estate for 1954	5,500
Net operating loss of estate for 1954	2,000
(No deduction for capital loss of $5,000 under section 172(d)(2))	

Neither A nor the trust will be allowed to carry back any part of the net operating loss made available to them under section 642(h)(1).

(c) Under section 642(h)(2), excess deductions of the estate of $7,300 will be allowed as a deduction to A to the extent of $3,650 for the calendar year 1954 and to the trust to the extent of $3,650 for the taxable year ending August 31, 1955. The deduction of $7,300 for administrative expenses and corpus commissions is the only amount which was not taken into account in determining the net operating loss of the estate ($9,800 of such expenses less $2,500 taken into account).

(d) Under section 642(h)(1), there will be allowable to A a capital loss carryover of $2,500 for his taxable year 1954 and for his next 4 taxable years in accordance with paragraph (a) of § 1.1212–1. There will be allowable to the trust a similar capital loss carryover of $2,500 for its taxable year ending August 31, 1955, and its next 4 taxable years (but see paragraph (b) of § 1.643(a)–3), (for taxable years beginning after December 31, 1963, net capital losses may be carried over indefinitely by beneficiaries other than corporations, in accordance with § 1.642(h)–1 and paragraph (b) of § 1.1212–1.)

(e) The carryovers and excess deductions are not allowable directly to B, the trust beneficiary, but to the extent the distributable net income of the trust is reduced by the carryovers and excess deductions B may receive indirect benefit.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6828, 30 FR 7806, June 17, 1965]

§ 1.642(i)–1 Certain distributions by cemetery perpetual care funds.

(a) In general. Section 642 (i) provides that amounts distributed during taxable years ending after December 31, 1963, by a cemetery perpetual care fund trust for the care and maintenance of gravesites shall be treated as distributions solely for purposes of sections 651 and 661. The deduction for such a distribution is allowable only if the fund is taxable as a trust. In addition, the fund must have been created pursuant to local law by a taxable cemetery corporation (as defined in § 1.642 (i)–2 (a)) expressly for the care and maintenance of cemetery property. A care fund will be treated as having been created by a taxable cemetery corporation ("cemetery") if the distributee cemetery is taxable, even though the care fund was created by the distributee cemetery in a year that it was tax-exempt or by a predecessor of such distributee cemetery which was tax-exempt in the year the fund was established. The deduction is the amount of the distributions during the fund's taxable year to the cemetery corporation for such care and maintenance that would be otherwise allowable under section 651 or 661, but in no event is to exceed the limitations described in paragraphs (b) and (c) of this section. The provisions of this paragraph shall not have the effect of extending the period of limitations under section 6511.

(b) Limitation on amount of deduction. The deduction in any taxable year may not exceed the product of $5 multiplied by the aggregate number of gravesites sold by the cemetery corporation before the beginning of the taxable year of the trust. In general, the aggregate number of gravesites sold shall be the aggregate number of interment rights sold by the cemetery corporation (including gravesites sold by the cemetery before a care fund trust law was enacted). In addition, the number of gravesites sold shall include gravesites used to make welfare burials. Welfare burials and pre-trust fund law gravesites shall be included only to the extent that the cemetery cares for and maintain such gravesites. For purposes of this section, a gravesite is sold as of the date on which the purchaser acquires interment rights enforceable under local law. The aggregate number of gravesites includes only those gravesites with respect to which the fund or taxable cemetery corporation has an obligation for care and maintenance.

(c) Requirements for deductibility of distributions for care and maintenance—(1) Obligation for

care and maintenance. A deduction is allowed only for distributions for the care and maintenance of gravesites with respect to which the fund or taxable cemetery corporation has an obligation for care and maintenance. Such obligation may be established by the trust instrument, by local law, or by the cemetery's practice of caring for and maintaining gravesites, such as welfare burial plots or gravesites sold before the enactment of a care fund trust law.

(2) Distribution actually used for care and maintenance. The amount of a deduction otherwise allowable for care fund distributions in any taxable year shall not exceed the portion of such distributions expended by the distributee cemetery corporation for the care and maintenance of gravesites before the end of the fund's taxable year following the taxable year in which it makes the distributions. A 6-month extension of time for filing the trust's return may be obtained upon request under section 6081. The failure of a cemetery to expend the care fund's distributions within a reasonable time before the due date for filing the return will be considered reasonable grounds for granting a 6-month extension of time for section 6081. For purposes of this paragraph, any amount expended by the care fund directly for the care and maintenance of gravesites shall be treated as an additional care fund distribution which is expended on the day of distribution by the cemetery corporation. The fund shall be allowed a deduction for such direct expenditure in the fund's taxable year during which the expenditure is made.

(3) Example. The application of paragraph (c)(2) of this section is illustrated by the following example:

A, a calendar-year perpetual care fund trust, meeting the requirements of section 642 (i), makes a $10,000 distribution on December 1, 1978 to X, a taxable cemetery corporation operating on a May 31 fiscal year. From this $10,000 distribution, the cemetery makes the following expenditures for the care and maintenance of gravesites: $2,000 on December 20, 1978; $4,000 on June 1, 1979; $2,000 on October 1, 1979; and $1,000 on April 1, 1980. In addition, as authorized by the trust instrument, A itself makes a direct $1,000 payment to a contractor on September 1, 1979 for qualifying care and maintenance work performed. As a result of these transactions, A will be allowed an $8,000 deduction for its 1978 taxable year attributable to the cemetery's expenditures, and a $1,000 deduction for its 1979 taxable year attributable to the fund's direct payment. A will not be allowed a deduction for its 1978 taxable year for the cemetery's expenditure of either the $1,000 expended on April 1, 1980 or the remaining unspent portion of the original $10,000 distribution. The trustee may request a 6-month extension in order to allow the fund until October 15, 1979 to file its return for 1978.

(d) Certified statement made by cemetery officials to fund trustees. A trustee of a cemetery perpetual care fund shall not be held personally liable for civil or criminal penalties resulting from false statements on the trust's tax return to the extent that such false statements resulted from the trustee's reliance on a certified statement made by the cemetery specifying the number of interments sold by the cemetery or the amount of the cemetery's expenditures for care and maintenance. The statement must indicate the basis upon which the cemetery determined what portion of its expenditures were made for the care and maintenance of gravesites. The statement must be certified by an officer or employee of the cemetery who has the responsibility to make or account for expenditures for care and maintenance. A copy of this statement shall be retained by the trustee along with the trust's return and shall be made available for inspection upon request by the Secretary. This paragraph does not relieve the care fund trust of its liability to pay the proper amount of tax due and to maintain adequate records to substantiate each of its deductions, including the deduction provided in section 642(i) and this section.

[T.D. 7651, 44 FR 61596, Oct. 26, 1979]

§ 1.642(i)–2 Definitions.

(a) Taxable cemetery corporation. For purposes of section 642(i) and this section, the meaning of the term "taxable cemetery corporation" is limited to a corporation (within the meaning of section 7701(a)(3)) engaged in the business of owning and operating a cemetery that either (1) is not exempt from Federal tax, or (2) is subject to tax under section 511 with respect to its cemetery activities.

(b) Pursuant to local law. A cemetery perpetual care fund is created pursuant to local law if:

(1) The governing law of the relevant jurisdiction (State, district, county, parish, etc.) requires or expressly permits the creation of such a fund, or

(2) The legally enforceable bylaws or contracts of a taxable cemetery corporation require a perpetual care fund.

(c) Gravesite. A gravesite is any type of interment right that has been sold by a cemetery, including, but not limited to, a burial lot, mausoleum, lawn crypt, niche, or scattering ground. For purposes of § 1.642(i)–1, the term "gravesites" includes only those gravesites with respect to which the care fund or cemetery has an obligation for care and maintenance within the meaning of § 1.642(i)–1(c)(1).

(d) *Care and maintenance.* For purposes of section 642(i) and this section, the term "care and maintenance of gravesite" shall be generally defined in accordance with the definition of such term under the local law pursuant to which the cemetery perpetual care fund is created. If the applicable local law contains no definition, care and maintenance of gravesites may include the upkeep, repair and preservation of those portions of cemetery property in which gravesites (as defined in paragraph (c) of this section) have been sold; including gardening, road maintenance, water line and drain repair and other activities reasonably necessary to the preservation of cemetery property. The costs for care and maintenance include, but are not limited to, expenditures for the maintenance, repair and replacement of machinery, tools, and equipment, compensation of employees performing such work, insurance premiums, reasonable payments for employees' pension and other benefit plans, and the costs of maintaining necessary records of lot ownership, transfers and burials. However, if some of the expenditures of the cemetery corporation, such as officers' salaries, are for both care and maintenance and for other purposes, the expenditures must be properly allocated between care and maintenance of gravesites and the other purposes. Only those expenditures that are properly allocable to those portions of cemetery property in which gravesites have been sold qualify as expenditures for care and maintenance of gravesites.

[T.D. 7651, 44 FR 61596, Oct. 26, 1979]

§ 1.643(a)–0 Distributable net income; deduction for distributions; in general.

The term "distributable net income" has no application except in the taxation of estates and trusts and their beneficiaries. It limits the deductions allowable to estates and trusts for amounts paid, credited, or required to be distributed to beneficiaries and is used to determine how much of an amount paid, credited, or required to be distributed to a beneficiary will be includible in his gross income. It is also used to determine the character of distributions to the beneficiaries. Distributable net income means for any taxable year, the taxable income (as defined in section 63) of the estate or trust, computed with the modifications set forth in §§ 1.643(a)–1 through 1.643(a)–7.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.643(a)–1 Deduction for distributions.

The deduction allowable to a trust under section 651 and to an estate or trust under section 661 for amounts paid, credited, or required to be distributed to beneficiaries is not allowed in the computation of distributable net income.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.643(a)–2 Deduction for personal exemption.

The deduction for personal exemption under section 642(b) is not allowed in the computation of distributable net income.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.643(a)–3 Capital gains and losses.

(a) Except as provided in § 1.643(a)–6, gains from the sale or exchange of capital assets are ordinarily excluded from distributable net income, and are not ordinarily considered as paid, credited, or required to be distributed to any beneficiary unless they are:

(1) Allocated to income under the terms of the governing instrument or local law by the fiduciary on its books or by notice to the beneficiary,

(2) Allocated to corpus and actually distributed to beneficiaries during the taxable year, or

(3) Utilized (pursuant to the terms of the governing instrument or the practice followed by the fiduciary) in determining the amount which is distributed or required to be distributed.

However, if capital gains are paid, permanently set aside, or to be used for the purposes specified in section 642(c), so that a charitable deduction is allowed under that section in respect of the gains, they must be included in the computation of distributable net income.

(b) Losses from the sale or exchange of capital assets are excluded in computing distributable net income except to the extent that they enter into the determination of any capital gains that are paid, credited, or required to be distributed to any beneficiary during the taxable year (but see § 1.642(h)–1 with respect to capital loss carryovers in the year of final termination of an estate or trust).

(c) The deduction under section 1202 (relating to capital gains) is taken into account in computing distributable net income to the extent that it is allocable to capital gains which are paid, permanently set aside, or to be used for the purposes specified in section 642(c). See the regulations under section 642(c) to determine the extent to which the amount so paid, permanently set aside, or to be used consists of capital gains. The deduc-

tion for capital gains provided in section 1202 insofar as it is allocable to the remainder of the capital gains is not taken into account.

(d) The application of this section may be illustrated by the following examples:

Example (1). A trust is created to pay the income to A for life, with a discretionary power in the trustee to invade principal for A's benefit. In the taxable year, $10,000 is realized from the sale of securities at a profit, and $10,000 in excess of income is distributed to A. The capital gain is not allocated to A by the trustee. During the taxable year the trustee received and paid out $5,000 of dividends. No other cash was received or on hand during the taxable year. The capital gain will not ordinarily be included in distributable net income. However, if the trustee follows a regular practice of distributing the exact net proceeds of the sale of trust property, capital gains will be included in distributable net income.

Example (2). The result in example (1) would have been the same if the trustee had been directed to pay an annuity of $15,000 a year to A (instead of being directed to pay the income to A with a discretionary power to distribute principal).

Example (3). The trustee of a trust containing Blackacre and other property is directed to hold Blackacre for ten years, and then sell it and distribute its proceeds to A. Any capital gain realized from the sale of Blackacre will be included in distributable net income.

Example (4). A trust instrument directs that the income shall be paid to A, and that the principal shall be distributed to A when he reaches age 35. All capital gains realized in the year of termination will be included in distributable net income. (See § 1.641(b)–3 for the determination of the year of final termination and the taxability of capital gains realized after the terminating event and before final distribution.)

Example (5). If in example (4) the trustee had been directed to distribute half of the principal to A when he reached 35, the capital gain would be included in distributable net income (and in the distribution to A) to the extent the capital gain is allocable to A under the governing instrument and local law. Thus, if the trust assets consisted entirely of 100 shares of corporation M stock and the trustee sold half the shares and distributed the proceeds to A, the entire capital gain would normally be considered as allocated to A. On the other hand, if the trustee sold all the shares and distributed half the proceeds to A, half the capital gain would be considered as allocable to A.

Example (6). If in example (4) the trustee had been directed to pay $10,000 to B before making distribution to A, no portion of the capital gains would be allocable to B since the distribution to B is a gift of a specific sum of money within the meaning of section 663(a)(1).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 731, Jan. 17, 1969; T.D. 7357, 40 FR 23742, June 2, 1975]

§ 1.643(a)–4 Extraordinary dividends and taxable stock dividends.

In the case solely of a trust which qualifies under Subpart B (section 651 and following) as a "simple trust," there are excluded from distributable net income extraordinary dividends (whether paid in cash or in kind) or taxable stock dividends which are not distributed or credited to a beneficiary because the fiduciary in good faith determines that under the terms of the governing instrument and applicable local law such dividends are allocable to corpus. See section 665(e), paragraph (b) of § 1.665(e)–1, and paragraph (b) of § 1.665(e)–1A for the treatment of such dividends upon subsequent distribution.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 741, Jan. 17, 1969; T.D. 7204, 37 FR 17134, Aug. 25, 1972]

§ 1.643(a)–5 Tax-exempt interest.

(a) There is included in distributable net income any tax-exempt interest excluded from gross income under section 103, reduced by disbursements allocable to such interest which would have been deductible under section 212 but for the provisions of section 265 (relating to disallowance of deductions allocable to tax-exempt income).

(b) If the estate or trust is allowed a charitable contributions deduction under section 642(c), the amounts specified in paragraph (a) of this section and § 1.643(a)–6 are reduced by the portion deemed to be included in income paid, permanently set aside, or to be used for the purposes specified in section 642(c). If the governing instrument specifically provides as to the source out of which amounts are paid, permanently set aside, or to be used for such charitable purposes, the specific provisions control. In the absence of specific provisions in the governing instrument, an amount to which section 642(c) applies is deemed to consist of the same proportion of each class of the items of income of the estate or trust as the total of each class bears to the total of all classes. For illustrations showing the determination of the character of an amount deductible under section 642(c), see examples (1) and (2) of § 1.662(b)–2 and paragraph (e) of § 1.662(c)–4.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.643(a)–6 Income of foreign trust.

(a) **Distributable net income of a foreign trust.** In the case of a foreign trust (see section 7701(a)(31)), the determination of distributable net income is subject to the following rules:

(1) There is included in distributable net income the amounts of gross income from sources without the United States, reduced by disbursements allocable to such foreign income which would have been deductible but for the provisions of section 265 (relating to disallowance of deductions allocable to tax exempt income). See paragraph (b) of § 1.643(a)–5 for rules applicable when an estate or

trust is allowed a charitable contributions deduction under section 642(c).

(2) In the case of a distribution made by a trust before January 1, 1963, for purposes of determining the distributable net income of the trust for the taxable year in which the distribution is made, or for any prior taxable year;

(i) Gross income from sources within the United States is determined by taking into account the provisions of section 894 (relating to income exempt under treaty); and

(ii) Distributable net income is determined by taking into account the provisions of section 643(a)(3) (relating to exclusion of certain gains from the sale or exchange of capital assets).

(3) In the case of a distribution made by a trust after December 31, 1962, for purposes of determining the distributable net income of the trust for any taxable year, whether ending before January 1, 1963, or after December 31, 1962;

(i) Gross income (for the entire foreign trust) from sources within the United States is determined without regard to the provisions of section 894 (relating to income exempt under treaty);

(ii) In respect of a foreign trust created by a U.S. person (whether such trust constitutes the whole or only a portion of the entire foreign trust) (see section 643(d) and § 1.643(d)–1), there shall be included in gross income gains from the sale or exchange of capital assets reduced by losses from such sales or exchanges to the extent such losses do not exceed gains from such sales or exchanges, and the deduction under section 1202 (relating to deduction for capital gains) shall not be taken into account; and

(iii) In respect of a foreign trust created by a person other than a U.S. person (whether such trust constitutes the whole or only a portion of the entire foreign trust) (see section 643(d) and § 1.643(d)–1), distributable net income is determined by taking into account all of the provisions of section 643 except section 643(a)(6)(C) (relating to gains from the sale or exchange of capital assets by a foreign trust created by a U.S. person).

(b) Examples. The application of this section, showing the computation of distributable net income for one of the taxable years for which such a computation must be made, may be illustrated by the following examples:

Example (1). (1) A trust is created in 1952 under the laws of Country X by the transfer to a trustee in Country X of money and property by a U.S. person. The entire trust constitutes a foreign trust created by a U.S. person. The income from the trust corpus is to be accumulated until the beneficiary, a resident citizen of the United States who was born in 1944, reaches the age of 21 years, and upon his reaching that age, the corpus and accumulated income are to be distributed to him. The trust instrument provides that capital gains are to be allocated to corpus and are not to be paid, credited, or required to be distributed to any beneficiary during the taxable year or paid, permanently set aside, or to be used for the purposes specified in section 642(c). Under the terms of a tax convention between the United States and Country X, interest income received by the trust from U.S. sources is exempt from U.S. taxation. In 1965 the corpus and accumulated income are distributed to the beneficiary. During the taxable year 1964, the trust has the following items of income, loss, and expense:

Interest on bonds of a U.S. corporation	$10,000
Net long-term capital gain from U.S. sources	30,000
Gross income from investments in Country X	40,000
Net short-term capital loss from U.S. sources	5,000
Expenses allocable to gross income from investments in Country X	5,000

(2) The distributable net income for the taxable year 1964 of the foreign trust created by a U.S. person, determined under section 643(a), is $70,000, computed as follows:

Interest on bonds of a U.S. corporation		$10,000
Gross income from investments in Country X		40,000
Net long-term capital gain from U.S. sources.................	$30,000	
Less: Net short-term capital loss from U.S. sources............	5,000	
Excess of net long-term capital gain over net short-term capital loss		25,000
Total		75,000
Less: Expenses allocable to income from investments in Country X		5,000
Distributable net income................		70,000

(3) In determining the distributable net income of $70,000, the taxable income of the trust is computed with the following modifications: No deduction is allowed for the personal exemption of the trust (section 643(a)(2)); the interest received on bonds of a U.S. corporation is included in the trust gross income despite the fact that such interest is exempt from U.S. tax under the provisions of the tax treaty between Country X and the United States (section 643(a)(6) (see H. Con. Res. (B)); the excess of net long-term capital gain over net short-term capital loss allocable to corpus is included in distributable net income, but such excess is not subject to the deduction under section 1202 (section 643(a)(6)(C)); and the amount representing gross income from investments in Country X is included, but such amount is reduced by the amount of the disbursements allocable to such income (section 643(a)(6)(A)).

Example (2). (1) The facts are the same as in example (1) except that money or property has also been transferred to the trust by a person other than a U.S. person and, pursuant to the provisions of § 1.643(d)–1, during 1964 only 60 percent of the entire trust constitutes a foreign trust created by a U.S. person.

(2) The distributable net income for the taxable year 1964 of the foreign trust created by a U.S. person, determined under section 643(a), is $42,000 computed as follows:

Interest on bonds of a U.S. corporation (60 percent of $10,000)	$6,000

Gross income from investments in Country X (60 percent of $40,000)		$24,000
Net long-term capital gain from U.S. sources (60 percent of $30,000)	$18,000	
Less: Net short-term capital loss from U.S. sources (60 percent of $5,000)	3,000	
		15,000
Total		45,000
Less: Expenses allocable to income from investments in Country X (60 percent of $5,000)		3,000
Distributable net income		42,000

(3) The distributable net income for the taxable year 1964 of the portion of the entire foreign trust which does not constitute a foreign trust created by a U.S. person, determined under section 643(a), is $18,000, computed as follows:

Interest on bonds of a U.S. corporation (40 percent of $10,000)	$4,000
Gross income from investments in Country X (40 percent of $40,000)	16,000
Total	20,000
Less: Expenses allocable to income from investments in Country X (40 percent of $5,000)	2,000
Distributable net income	18,000

(4) The distributable net income of the entire foreign trust for the taxable year 1964 is $60,000, computed as follows:

Distributable net income of the foreign trust created by a U.S. person	$42,000
Distributable net income of that portion of the entire foreign trust which does not constitute a foreign trust created by a U.S. person	18,000
Distributable net income of the entire foreign trust	60,000

It should be noted that the difference between the $70,000 distributable net income of the foreign trust in example (1) and the $60,000 distributable net income of the entire foreign trust in this example is due to the $10,000 (40 percent of $25,000) net capital gain (capital gain net income for taxable years beginning after December 31, 1976) which under section 643(a)(3) is excluded from the distributable net income of that portion of the foreign trust in example (2) which does not constitute a foreign trust created by a U.S. person.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 731, Jan. 17, 1969; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.643(a)–7 Dividends.

Dividends excluded from gross income under section 116 (relating to partial exclusion of dividends received) are included in distributable net income. For this purpose, adjustments similar to those required by § 1.643(a)–5 with respect to expenses allocable to tax-exempt income and to income included in amounts paid or set aside for charitable purposes are not made. See the regulations under section 642(c).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7357, 40 FR 23742, June 2, 1975]

§ 1.643(b)–1 Definition of "income".

For purposes of subparts A through D, part I, subchapter J, chapter 1 of the Code, the term "income" when not preceded by the words "taxable", "distributable net", "undistributed net", or "gross", means the amount of income of an estate or trust for the taxable year determined under the terms of its governing instrument and applicable local law. Trust provisions which depart fundamentally from concepts of local law in the determination of what constitutes income are not recognized for this purpose. For example, if a trust instrument directs that all the trust income shall be paid to A, but defines ordinary dividends and interest as corpus, the trust will not be considered one which under its governing instrument is required to distribute all its income currently for purposes of section 642(b) (relating to the personal exemption) and section 651 (relating to "simple" trusts).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.643(b)–2 Dividends allocated to corpus.

Extraordinary dividends or taxable stock dividends which the fiduciary, acting in good faith, determines to be allocable to corpus under the terms of the governing instrument and applicable local law are not considered "income" for purposes of Subpart A, B, C, or D, Part I, Subchapter J, Chapter 1 of the Code. See section 643(a)(4), § 1.643(a)–4, § 1.643(d)–2, section 665(e), paragraph (b) of § 1.665(e)–1, and paragraph (b) of § 1.665(e)–1A for the treatment of such items in the computation of distributable net income.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 741, Jan. 17, 1969; T.D. 7204, 37 FR 17134, Aug. 25, 1972]

§ 1.643(c)–1 Definition of "beneficiary".

An heir, legatee, or devisee (including an estate or trust) is a beneficiary. A trust created under a decedent's will is a beneficiary of the decedent's estate. The following persons are treated as beneficiaries:

(a) Any person with respect to an amount used to discharge or satisfy that person's legal obligation as that term is used in § 1.662(a)–4.

(b) The grantor of a trust with respect to an amount applied or distributed for the support of a dependent under the circumstances specified in section 677(b) out of corpus or out of other than income for the taxable year of the trust.

(c) The trustee or cotrustee of a trust with respect to an amount applied or distributed for the support of a dependent under the circumstances specified in section 678(c) out of corpus or out of other than income for the taxable year of the trust. [T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.643(d)–1 Definition of "foreign trust created by a United States person."

(a) In general. For the purpose of Part I, Subchapter J, Chapter 1 of the Internal Revenue Code, the term "foreign trust created by a United States person" means that portion of a foreign trust (as defined in section 7701(a)(31)) attributable to money or property (including all accumulated earnings, profits, or gains attributable to such money or property) of a U.S. person (as defined in section 7701(a)(30)) transferred directly or indirectly, or under the will of a decedent who at the date of his death was a U.S. citizen or resident, to the foreign trust. A foreign trust created by a person who is not a U.S. person, to which a U.S. person transfers his money or property, is a foreign trust created by a U.S. person to the extent that the fair market value of the entire foreign trust is attributable to money or property of the U.S. person transferred to the foreign trust. The transfer of money or property to the foreign trust may be made either directly or indirectly by a U.S. person. Transfers of money or property to a foreign trust do not include transfers of money or property pursuant to a sale or exchange which is made for a full and adequate consideration. Transfers to which section 643(d) and this section apply are transfers of money or property which establish or increase the corpus of a foreign trust. The rules set forth in this section with respect to transfers by a U.S. person to a foreign trust also are applicable with respect to transfers under the will of a decedent who at the date of his death was a U.S. citizen or resident. For provisions relating to the information returns which are required to be filed with respect to the creation of or transfers to foreign trusts, see section 6048 and § 16.3–1 of this chapter (Temporary Regulations under the Revenue Act of 1962).

(b) Determination of a foreign trust created by a U.S. person—(1) Transfers of money or property only by a U.S. person. If all the items of money or property constituting the corpus of a foreign trust are transferred to the trust by a U.S. person, the entire foreign trust is a foreign trust created by a U.S. person.

(2) Transfers of money or property by both a U.S. person and a person other than a U.S. person; transfers required to be treated as separate funds. Where there are transfers of money or property by both a U.S. person and a person other than a U.S. person to a foreign trust, and it is necessary, either by reason of the provisions of the governing instrument of the trust or by reason of some other requirement such as local law, that the trustee treat the entire foreign trust as composed of two separate funds, one consisting of the money or property (including all accumulated earnings, profits, or gains attributable to such money or property) transferred by the U.S. person and the other consisting of the money or property (including all accumulated earnings, profits, or gains attributable to such money or property) transferred by the person other than the U.S. person, the foreign trust created by a U.S. person shall be the fund consisting of the money or property transferred by the U.S. person. See example (1) in paragraph (c) of this section.

(3) Transfers of money or property by both a U.S. person and a person other than a U.S. person; transfers not required to be treated as separate funds. Where the corpus of a foreign trust consists of money or property transferred to the trust (simultaneously or at different times) by a U.S. person and by a person who is not a U.S. person, the foreign trust created by a U.S. person within the meaning of section 643(d) is that portion of the entire foreign trust which, immediately after any transfer of money or property to the trust, the fair market value of money or property (including all accumulated earnings, profits, or gains attributable to such money or property) transferred to the foreign trust by the U.S. person bears to the fair market value of the corpus (including all accumulated earnings, profits, or gains attributable to the corpus) of the entire foreign trust.

(c) Examples. The provisions of paragraph (b) of this section may be illustrated by the following examples. Example (1) illustrates the application of paragraph (b)(2) of this section. Example (2) illustrates the application of paragraph (b)(3) of this section in a case where there is no provision in the governing instrument of the trust or elsewhere which would require the trustee to treat the corpus of the trust as composed of more than one fund.

Example (1). On January 1, 1964, the date of the creation of a foreign trust, a U.S. person transfers to it stock of a U.S. corporation with a fair market value of $50,000. On the same day, a person other than a U.S. person transfers to the trust Country X bonds with a fair market value of $25,000. The governing instrument of the trust provides that the income from the stock of the U.S. corporation is to be accumulated until A, a U.S. beneficiary, reaches the age of 21 years, and upon his reaching that age, the stock and income accumulated

thereon are to be distributed to him. The governing instrument of the trust further provides that the income from the Country X bonds is to be accumulated until B, a U.S. beneficiary, reaches the age of 21 years, and upon his reaching that age, the bonds and income accumulated thereon are to be distributed to him. To comply with the provisions of the governing instrument of the trust that the income from the stock of the U.S. corporation be accumulated and distributed to A and that the income from the Country X bonds be accumulated and distributed to B, it is necessary that the trustee treat the transfers as two separate funds. The fund consisting of the stock of the U.S. corporation is a foreign trust created by a U.S. person.

Example (2). On January 1, 1964, the date of the creation of a foreign trust, a U.S. person transfers to it property having a fair market value of $60,000 and a person other than a U.S. person transfers to it property having a fair market value of $40,000. Immediately after these transfers, the foreign trust created by a U.S. person is 60 percent of the entire foreign trust, determined as follows:

$60,000 (Value of property transferred by U.S. person)/$100,000 (Value of entire property transferred to trust)=60 percent

The undistributed net income for the calendar years 1964 and 1965 is $20,000 which increases the value of the entire foreign trust to $120,000 ($100,000 plus $20,000). Accordingly, as of December 31, 1965, the portion of the foreign trust created by the U.S. person is $72,000 (60 percent of $120,000). On January 1, 1966, the U.S. person transfers property having a fair market value of $40,000 increasing the value of the entire foreign trust to $160,000 ($120,000 plus $40,000) and increasing the value of the portion of the foreign trust created by the U.S. person to $112,000 ($72,000 plus $40,000). Immediately, after this transfer, the foreign trust created by the U.S. person is 70 percent of the entire foreign trust, determined as follows:

$112,000 (Value of property transferred by U.S. person)/$160,000 (Value of entire property transferred to the trust)=70 percent

[T.D. 6989, 34 FR 732, Jan. 17, 1969]

§ 1.643(d)–2 Illustration of the provisions of section 643.

(a) The provisions of section 643 may be illustrated by the following example:

Example. (1) Under the terms of the trust instrument, the income of a trust is required to be currently distributed to W during her life. Capital gains are allocable to corpus and all expenses are charges against corpus. During the taxable year the trust has the following items of income and expenses:

Dividends from domestic corporations	$30,000
Extraordinary dividends allocated to corpus by the trustee in good faith	20,000
Taxable interest	10,000
Tax-exempt interest	10,000
Long-term capital gains	10,000
Trustee's commissions and miscellaneous expenses allocable to corpus	5,000

(2) The "income" of the trust determined under section 643(b) which is currently distributable to W is $50,000, consisting of dividends of $30,000, taxable interest of $10,000, and tax-exempt interest of $10,000. The trustee's commissions and miscellaneous expenses allocable to tax-exempt interest amount to $1,000 (10,000/50,000 × $5,000).

(3) The "distributable net income" determined under section 643(a) amounts to $45,000, computed as follows:

Dividends from domestic corporations		$30,000
Taxable interest		10,000
Nontaxable interest	$10,000	
Less: Expenses allocable thereto	1,000	
		9,000
Total		49,000
Less: Expenses ($5,000 less $1,000 allocable to tax-exempt interest)		4,000
Distributable net income		45,000

In determining the distributable net income of $45,000, the taxable income of the trust is computed with the following modifications: No deductions are allowed for distributions to W and for personal exemption of the trust (section 643(a)(1) and (2)); capital gains allocable to corpus are excluded and the deduction allowable under section 1202 is not taken into account (section 643(a)(3)): the extraordinary dividends allocated to corpus by the trustee in good faith are excluded (sections 643(a)(4)); and the tax-exempt interest (as adjusted for expenses) and the dividend exclusion of $50 are included (section 643(a)(5) and (7)).

(b) See paragraph (c) of the example in § 1.661(c)–2 for the computation of distributable net income where there is a charitable contributions deduction.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960. Redesignated by T.D. 6989, 34 FR 732, Jan. 1, 1969]

Trusts Which Distribute Current Income Only

§ 1.651(a)–1 Simple trusts; deduction for distributions; in general.

Section 651 is applicable only to a trust the governing instruments of which:

(a) Requires that the trust distribute all of its income currently for the taxable year, and

(b) Does not provide that any amounts may be paid, permanently set aside, or used in the taxable year for the charitable, etc., purposes specified in section 642(c),

and does not make any distribution other than of current income. A trust to which section 651 applies is referred to in this part as a "simple" trust. Trusts subject to section 661 are referred to as "complex" trusts. A trust may be a simple trust for one year and a complex trust for another year. It should be noted that under section 651 a trust qualifies as a simple trust in a taxable year in

which it is required to distribute all its income currently and makes no other distributions, whether or not distributions of current income are in fact made. On the other hand a trust is not a complex trust by reason of distributions of amounts other than income unless such distributions are in fact made during the taxable year, whether or not they are required in that year.
[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.651(a)–2 Income required to be distributed currently.

(a) The determination of whether trust income is required to be distributed currently depends upon the terms of the trust instrument and the applicable local law. For this purpose, if the trust instrument provides that the trustee in determining the distributable income shall first retain a reserve for depreciation or otherwise make due allowance for keeping the trust corpus intact by retaining a reasonable amount of the current income for that purpose, the retention of current income for that purpose will not disqualify the trust from being a "simple" trust. The fiduciary must be under a duty to distribute the income currently even if, as a matter of practical necessity, the income is not distributed until after the close of the trust's taxable year. For example: Under the terms of the trust instrument, all of the income is currently distributable to A. The trust reports on the calendar year basis and as a matter of practical necessity makes distribution to A of each quarter's income on the fifteenth day of the month following the close of the quarter. The distribution made by the trust on January 15, 1955, of the income for the fourth quarter of 1954 does not disqualify the trust from treatment in 1955 under section 651, since the income is required to be distributed currently. However, if the terms of a trust require that none of the income be distributed until after the year of its receipt by the trust, the income of the trust is not required to be distributed currently and the trust is not a simple trust. For definition of the term "income" see section 643(b) and § 1.643(b)–1.

(b) It is immaterial, for purposes of determining whether all the income is required to be distributed currently, that the amount of income allocated to a particular beneficiary is not specified in the instrument. For example, if the fiduciary is required to distribute all the income currently, but has discretion to "sprinkle" the income among a class of beneficiaries, or among named beneficiaries, in such amount as he may see fit, all the income is required to be distributed currently, even though the amount distributable to a particular beneficiary is unknown until the fiduciary has exercised his discretion.

(c) If in one taxable year of a trust its income for that year is required or permitted to be accumulated, and in another taxable year its income for the year is required to be distributed currently (and no other amounts are distributed), the trust is a simple trust for the latter year. For example, a trust under which income may be accumulated until a beneficiary is 21 years old, and thereafter must be distributed currently, is a simple trust for taxable years beginning after the beneficiary reaches the age of 21 years in which no other amounts are distributed.
[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.651(a)–3 Distribution of amounts other than income.

(a) A trust does not qualify for treatment under section 651 for any taxable year in which it actually distributes corpus. For example, a trust which is required to distribute all of its income currently would not qualify as a simple trust under section 651 in the year of its termination since in that year actual distributions of corpus would be made.

(b) A trust, otherwise qualifying under section 651, which may make a distribution of corpus in the discretion of the trustee, or which is required under the terms of its governing instrument to make a distribution of corpus upon the happening of a specified event, will be disqualified for treatment under section 651 only for the taxable year in which an actual distribution of corpus is made. For example: Under the terms of a trust, which is required to distribute all of its income currently, half of the corpus is to be distributed to beneficiary A when he becomes 30 years of age. The trust reports on the calendar year basis. On December 28, 1954, A becomes 30 years of age and the trustee distributes half of the corpus of the trust to him on January 3, 1955. The trust will be disqualified for treatment under section 651 only for the taxable year 1955, the year in which an actual distribution of corpus is made.

(c) See section 661 and the regulations thereunder for the treatment of trusts which distribute corpus or claim the charitable contributions deduction provided by section 642(c).
[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.651(a)–4 Charitable purposes.

A trust is not considered to be a trust which may pay, permanently set aside, or use any

amount for charitable, etc., purposes for any taxable year for which it is not allowed a charitable, etc., deduction under section 642(c). Therefore, a trust with a remainder to a charitable organization is not disqualified for treatment as a simple trust if either (a) the remainder is subject to a contingency, so that no deduction would be allowed for capital gains or other amounts added to corpus as amounts permanently set aside for a charitable, etc., purpose under section 642 (c), or (b) the trust receives no capital gains or other income added to corpus for the taxable year for which such a deduction would be allowed.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.651(a)–5 Estates.

Subpart B has no application to an estate.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.651(b)–1 Deduction for distributions to beneficiaries.

In computing its taxable income, a simple trust is allowed a deduction for the amount of income which is required under the terms of the trust instrument to be distributed currently to beneficiaries. If the amount of income required to be distributed currently exceeds the distributable net income, the deduction allowable to the trust is limited to the amount of the distributable net income. For this purpose the amount of income required to be distributed currently, or distributable net income, whichever is applicable, does not include items of trust income (adjusted for deductions allocable thereto) which are not included in the gross income of the trust. For determination of the character of the income required to be distributed currently, see § 1.652(b)–2. Accordingly, for the purposes of determining the deduction allowable to the trust under section 651, distributable net income is computed without the modifications specified in paragraphs (5), (6), and (7) of section 643(a), relating to tax-exempt interest, foreign income, and excluded dividends. For example: Assume that the distributable net income of a trust as computed under section 643(a) amounts to $99,000 but includes nontaxable income of $9,000. Then distributable net income for the purpose of determining the deduction allowable under section 651 is $90,000 ($99,000 less $9,000 nontaxable income).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.652(a)–1 Simple trusts; inclusion of amounts in income of beneficiaries.

Subject to the rules in §§ 1.652(a)–2 and 1.652(b)–1, a beneficiary of a simple trust includes in his gross income for the taxable year the amounts of income required to be distributed to him for such year, whether or not distributed. Thus, the income of a simple trust is includible in the beneficiary's gross income for the taxable year in which the income is required to be distributed currently even though, as a matter of practical necessity, the income is not distributed until after the close of the taxable year of the trust. See § 1.642(a)(3)–2 with respect to time of receipt of dividends. See § 1.652(c)–1 for treatment of amounts required to be distributed where a beneficiary and the trust have different taxable years. The term "income required to be distributed currently" includes income required to be distributed currently which is in fact used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)–4.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.652(a)–2 Distributions in excess of distributable net income.

If the amount of income required to be distributed currently to beneficiaries exceeds the distributable net income of the trust (as defined in section 643(a)), each beneficiary includes in his gross income an amount equivalent to his proportionate share of such distributable net income. Thus, if beneficiary A is to receive two-thirds of the trust income and B is to receive one-third, and the income required to be distributed currently is $99,000, A will receive $66,000 and B, $33,000. However, if the distributable net income, as determined under section 643(a) is only $90,000, A will include two-thirds ($60,000) of that sum in his gross income, and B will include one-third ($30,000) in his gross income. See §§ 1.652(b)–1 and 1.652(b)–2, however, for amounts which are not includible in the gross income of a beneficiary because of their tax-exempt character.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.652(b)–1 Character of amounts.

In determining the gross income of a beneficiary, the amounts includible under § 1.652(a)–1 have the same character in the hands of the beneficiary as in the hands of the trust. For example, to the extent that the amounts specified in § 1.652(a)–1 consist of income exempt from tax under section 103, such amounts are not included in the beneficiary's gross income. Similarly, dividends distributed to a beneficiary retain their original character in the beneficiary's hands for purposes of determining the availability to the benefi-

ciary of the dividends received credit under section 34 (for dividends received on or before December 31, 1964) and the dividend exclusion under section 116. Also, to the extent that the amounts specified in § 1.652(a)–1 consist of "earned income" in the hands of the trust under the provisions of section 1348 such amount shall be treated under section 1348 as "earned income" in the hands of the beneficiary. Similarly, to the extent such amounts consist of an amount received as a part of a lump sum distribution from a qualified plan and to which the provisions of section 72(n) would apply in the hands of the trust, such amount shall be treated as subject to such section in the hands of the beneficiary except where such amount is deemed under section 666(a) to have been distributed in a preceding taxable year of the trust and the partial tax described in section 668(a)(2) is determined under section 668(b)(1)(B). The tax treatment of amounts determined under § 1.652(a)–1 depends upon the beneficiary's status with respect to them not upon the status of the trust. Thus, if a beneficiary is deemed to have received foreign income of a foreign trust, the includibility of such income in his gross income depends upon his taxable status with respect to that income.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6777, 29 FR 17809, Dec. 16, 1964; T.D. 7204, 37 FR 17134, Aug. 25, 1972]

§ 1.652(b)–2 Allocation of income items.

(a) The amounts specified in § 1.652(a)–1 which are required to be included in the gross income of a beneficiary are treated as consisting of the same proportion of each class of items entering into distributable net income of the trust (as defined in section 643(a)) as the total of each class bears to such distributable net income, unless the terms of the trust specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation. For example: Assume that under the terms of the governing instrument, beneficiary A is to receive currently one-half of the trust income and beneficiaries B and C are each to receive currently one-quarter, and the distributable net income of the trust (after allocation of expenses) consists of dividends of $10,000, taxable interest of $10,000, and tax-exempt interest of $4,000. A will be deemed to have received $5,000 of dividends, $5,000 of taxable interest, and $2,000 of tax-exempt interest; B and C will each be deemed to have received $2,500 of dividends, $2,500 of taxable interest, and $1,000 of tax-exempt interest. However, if the terms of the trust specifically allocate different classes of income to different beneficiaries, entirely or in part, or if local law requires such an allocation, each beneficiary will be deemed to have received those items of income specifically allocated to him.

(b) The terms of the trust are considered specifically to allocate different classes of income to different beneficiaries only to the extent that the allocation is required in the trust instrument, and only to the extent that it has an economic effect independent of the income tax consequences of the allocation. For example:

(1) Allocation pursuant to a provision in a trust instrument granting the trustee discretion to allocate different classes of income to different beneficiaries is not a specific allocation by the terms of the trust.

(2) Allocation pursuant to a provision directing the trustee to pay all of one income to A, or $10,000 out of the income to A, and the balance of the income to B, but directing the trustee first to allocate a specific class of income to A's share (to the extent there is income of that class and to the extent it does not exceed A's share) is not a specific allocation by the terms of the trust.

(3) Allocation pursuant to a provision directing the trustee to pay half the class of income (whatever it may be) to A, and the balance of the income to B, is a specific allocation by the terms of the trust.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.652(b)–3 Allocation of deductions.

Items of deduction of a trust that enter into the computation of distributable net income are to be allocated among the items of income in accordance with the following principles:

(a) All deductible items directly attributable to one class of income (except dividends excluded under section 116) are allocated thereto. For example, repairs to, taxes on, and other expenses directly attributable to the maintenance of rental property or the collection of rental income are allocated to rental income. See § 1.642(e)–1 for treatment of depreciation of rental property. Similarly, all expenditures directly attributable to a business carried on by a trust are allocated to the income from such business. If the deductions directly attributable to a particular class of income exceed that income, the excess is applied against other classes of income in the manner provided in paragraph (d) of this section.

(b) The deductions which are not directly attributable to a specific class of income may be allocated to any item of income (including capital gains) included in computing distributable net income, but a portion must be allocated to nontaxable income (except dividends excluded under section 116) pursuant to section 265 and the regulations thereunder. For example, if the income of a trust is $30,000 (after direct expenses), consisting equally of $10,000 of dividends, tax-exempt interest, and rents, and income commissions amount to $3,000, one-third ($1,000) of such commissions should be allocated to tax-exempt interest, but the balance of $2,000 may be allocated to the rents or dividends in such proportions as the trustee may elect. The fact that the governing instrument or applicable local law treats certain items of deduction as attributable to corpus or to income not included in distributable net income does not affect allocation under this paragraph. For instance, if in the example set forth in this paragraph the trust also had capital gains which are allocable to corpus under the terms of the trust instrument, no part of the deductions would be allocable thereto since the capital gains are excluded from the computation of distributable net income under section 643(a)(3).

(c) Examples of expenses which are considered as not directly attributable to a specific class of income are trustee's commissions, the rental of safe deposit boxes, and State income and personal property taxes.

(d) To the extent that any items of deduction which are directly attributable to a class of income exceed that class of income, they may be allocated to any other class of income (including capital gains) included in distributable net income in the manner provided in paragraph (b) of this section, except that any excess deductions attributable to tax-exempt income (other than dividends excluded under section 116) may not be offset against any other class of income. See section 265 and the regulations thereunder. Thus, if the trust has rents, taxable interest, dividends, and tax-exempt interest, and the deductions directly attributable to the rents exceed the rental income, the excess may be allocated to the taxable interest or dividends in such proportions as the fiduciary may elect. However, if the excess deductions are attributable to the tax-exempt interest, they may not be allocated to either the rents, taxable interest, or dividends.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.652(c)–1 Different taxable years.

If a beneficiary has a different taxable year (as defined in section 441 or 442) from the taxable year of the trust, the amount he is required to include in gross income in accordance with section 652(a) and (b) is based on the income of the trust for any taxable year or years ending with or within his taxable year. This rule applies to taxable years of normal duration as well as to so-called short taxable years. Income of the trust for its taxable year or years is determined in accordance with its method of accounting and without regard to that of the beneficiary.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.652(c)–2 Death of individual beneficiaries.

If income is required to be distributed currently to a beneficiary, by a trust for a taxable year which does not end with or within the last taxable year of a beneficiary (because of the beneficiary's death), the extent to which the income is included in the gross income of the beneficiary for his last taxable year or in the gross income of his estate is determined by the computations under section 652 for the taxable year of the trust in which his last taxable year ends. Thus, the distributable net income of the taxable year of the trust determines the extent to which the income required to be distributed currently to the beneficiary is included in his gross income for his last taxable year or in the gross income of his estate. (Section 652(c) does not apply to such amounts.) The gross income for the last taxable year of a beneficiary on the cash basis includes only income actually distributed to the beneficiary before his death. Income required to be distributed, but in fact distributed to his estate, is included in the gross income of the estate as income in respect of a decedent under section 691. See paragraph (e) of § 1.663(c)–3 with respect to separate share treatment for the periods before and after the decedent's death. If the trust does not qualify as a simple trust for the taxable year of the trust in which the last taxable year of the beneficiary ends, see section 662(c) and § 1.662(c)–2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.652(c)–3 Termination of existence of other beneficiaries.

If the existence of a beneficiary which is not an individual terminates, the amount to be included under section 652(a) in its gross income for its last taxable year is computed with reference to §§ 1.652(c)–1 and 1.652(c)–2 as if the beneficiary

were a deceased individual, except that income required to be distributed prior to the termination but actually distributed to the beneficiary's successor in interest is included in the beneficiary's income for its last taxable year.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.652(c)–4 Illustration of the provisions of sections 651 and 652.

The rules applicable to a trust required to distribute all of its income currently to its beneficiaries may be illustrated by the following example:

Example. (a) Under the terms of a simple trust all of the income is to be distributed equally to beneficiaries A and B and capital gains are to be allocated to corpus. The trust and both beneficiaries file returns on the calendar year basis. No provision is made in the governing instrument with respect to depreciation. During the taxable year 1955, the trust had the following items of income and expense:

Rents	$25,000
Dividends of domestic corporations	50,000
Tax-exempt interest on municipal bonds	25,000
Long-term capital gains	15,000
Taxes and expenses directly attributable to rents	5,000
Trustee's commissions allocable to income account	2,600
Trustee's commissions allocable to principal account	1,300
Depreciation	5,000

(b) The income of the trust for fiduciary accounting purposes is $92,400, computed as follows:

Rents		$25,000
Dividends		50,000
Tax-exempt interest		25,000
Total		100,000
Deductions:		
Expenses directly attributable to rental income	$5,000	
Trustee's commissions allocable to income account	2,600	
		7,600
Income computed under section 643(b)		92,400

One-half ($46,200) of the income of $92,400 is currently distributable to each beneficiary.

(c) The distributable net income of the trust computed under section 643(a) is $91,100, determined as follows (cents are disregarded in the computation):

Rents		$25,000
Dividends		50,000
Tax-exempt interest	$25,000	
Less: Expenses allocable thereto (25,000/100,000 × $3,900)	975	
		24,025
Total		99,025
Deductions:		
Expenses directly attributable to rental income	$5,000	
Trustee's commissions ($3,900 less $975 allocable to tax-exempt interest)	2,925	
		7,925
Distributable net income		91,100

In computing the distributable net income of $91,100, the taxable income of the trust was computed with the following modifications: No deductions were allowed for distributions to the beneficiaries and for personal exemption of the trust (section 643(a)(1) and (2)); capital gains were excluded and no deduction under section 1202 (relating to the 50-percent deduction for long-term capital gains) was taken into account (section 643(a)(3)); the tax-exempt interest (as adjusted for expenses) and the dividend exclusion of $50 were included (section 643(a)(5) and (7)). Since all of the income of the trust is required to be currently distributed, no deduction is allowable for depreciation in the absence of specific provisions in the governing instrument providing for the keeping of the trust corpus intact. See section 167(h) and the regulations thereunder.

(d) The deduction allowable to the trust under section 651(a) for distributions to the beneficiaries is $67,025, computed as follows:

Distributable net income computed under section 643(a) (see paragraph (c))		$91,100
Less:		
Tax-exempt interest as adjusted	$24,025	
Dividend exclusion	50	
		24,075
Distributable net income as determined under section 651(b)		67,025

Since the amount of the income ($92,400) required to be distributed currently by the trust exceeds the distributable net income ($67,025) as computed under section 651(b), the deduction allowable under section 651(a) is limited to the distributable net income of $67,025.

(e) The taxable income of the trust is $7,200 computed as follows:

Rents		$25,000
Dividends ($50,000 less $50 exclusion)		49,950
Long-term capital gains		15,000
Gross income		89,950
Deductions:		
Rental expenses	$5,000	
Trustee's commissions	2,925	
Capital gain deduction	7,500	
Distributions to beneficiaries	67,025	
Personal exemption	300	
		82,750
Taxable income		7,200

The trust is not allowed a deduction for the portion ($975) of the trustee's commissions allocable to tax-exempt interest in computing its taxable income.

(f) In determining the character of the amounts includible in the gross income of A and B, it is assumed that the trustee elects to allocate to rents the expenses not directly attributable to a specific item of income other than the portion ($975) of such expenses allocated to tax-exempt interest. The allocation of expenses among the items of income is shown below:

	Rents	Dividends	Tax-exempt interest	Total
Income for trust accounting purposes	$25,000	$50,000	$25,000	$100,000
Less:				
Rental expenses	5,000	....	....	5,000
Trustee's commissions	2,925	....	975	3,900
Total deductions	7,925	0	975	8,900
Character of amounts in the hands of the beneficiaries	17,075	50,000	24,025	[1]91,100

[1] Distributable net income.

Inasmuch as the income of the trust is to be distributed equally to A and B, each is deemed to have received one-half of each item of income; that is, rents of $8,537.50, dividends of $25,000, and tax-exempt interest of $12,012.50. The dividends of $25,000 allocated to each beneficiary are to be aggregated with his other dividends (if any) for purposes of the dividend exclusion provided by section 116 and the dividend received credit allowed under section 34. Also, each beneficiary is allowed a deduction of $2,500 for depreciation of rental property attributable to the portion (one-half) of the income of the trust distributed to him.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3655, March 24, 1964]

Estates and Trusts Which May Accumulate Income or Which Distribute Corpus

§ 1.661(a)–1 Estates and trusts accumulating income or distributing corpus; general.

Subpart C, Part I, Subchapter J, Chapter 1 of the Code, is applicable to all decedents' estates and their beneficiaries, and to trusts and their beneficiaries other than trusts subject to the provisions of Subpart B of such Part I (relating to trusts which distribute current income only, or "simple" trusts). A trust which is required to distribute amounts other than income during the taxable year may be subject to Subpart B, and not Subpart C, in the absence of an actual distribution of amounts other than income during the taxable year. See §§ 1.651(a)–1 and 1.651(a)–3. A trust to which Subpart C is applicable is referred to as a "complex" trust in this part. Section 661 has no application to amounts excluded under section 663(a).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.661(a)–2 Deduction for distributions to beneficiaries.

(a) In computing the taxable income of an estate or trust there is allowed under section 661(a) as a deduction for distributions to beneficiaries the sum of:

(1) The amount of income for the taxable year which is required to be distributed currently, and

(2) Any other amounts properly paid or credited or required to be distributed for such taxable year.

However, the total amount deductible under section 661(a) cannot exceed the distributable net income as computed under section 643(a) and as modified by section 661(c). See § 1.661(c)–1.

(b) The term "income required to be distributed currently" includes any amount required to be distributed which may be paid out of income or corpus (such as an annuity), to the extent it is paid out of income for the taxable year. See § 1.651(a)–2 which sets forth additional rules which are applicable in determining whether income of an estate or trust is required to be distributed currently.

(c) The term "any other amounts properly paid, credited, or required to be distributed" includes all amounts properly paid, credited, or required to be distributed by an estate or trust during the taxable year other than income required to be distributed currently. Thus, the term includes the payment of an annuity to the extent it is not paid out of income for the taxable year, and a distribution of property in kind (see paragraph (f) of this section). However, see section 663(a) and regulations thereunder for distributions which are not included. Where the income of an estate or trust may be accumulated or distributed in the discretion of the fiduciary, or where the fiduciary has a power to distribute corpus to a beneficiary, any such discretionary distribution would qualify under section 661(a)(2). The term also includes an amount applied or distributed for the support of a dependent of a grantor or of a trustee or cotrustee under the circumstances described in section 677(b) or section 678(c) out of corpus or out of other than income for the taxable year.

(d) The terms "income required to be distributed currently" and "any other amounts properly

paid or credited or required to be distributed" also include any amount used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)–4.

(e) The terms "income required to be distributed currently" and "any other amounts properly paid or credited or required to be distributed" include amounts paid, or required to be paid, during the taxable year pursuant to a court order or decree or under local law, by a decedent's estate as an allowance or award for the support of the decedent's widow or other dependent for a limited period during the administration of the estate. The term "any other amounts properly paid or credited or required to be distributed" does not include the value of any interest in real estate owned by a decedent, title to which under local law passes directly from the decedent to his heirs or devisees.

(f) If property is paid, credited, or required to be distributed in kind:

(1) No gain or loss is realized by the trust or estate (or the other beneficiaries) by reason of the distribution, unless the distribution is in satisfaction of a right to receive a distribution in a specific dollar amount or in specific property other than that distributed.

(2) In determining the amount deductible by the trust or estate and includible in the gross income of the beneficiary the property distributed in kind is taken into account at its fair market value at the time it was distributed, credited, or required to be distributed.

(3) The basis of the property in the hands of the beneficiary is its fair market value at the time it was paid, credited, or required to be distributed, to the extent such value is included in the gross income of the beneficiary. To the extent that the value of property distributed in kind is not included in the gross income of the beneficiary, its basis in the hands of the beneficiary is governed by the rules in sections 1014 and 1015 and the regulations thereunder. For this purpose, if the total value of cash and property distributed, credited, or required to be distributed in kind to a beneficiary in any taxable year exceeds the amount includible in his gross income for that year, the value of the property other than cash is normally considered as includible in his gross income only to the extent that the amount includible exceeds the cash paid, credited, or required to be distributed to the beneficiary in that year. Further, to the extent that the value of different items of property other than cash is includible in the gross income of a beneficiary in accordance with the preceding sentence, a pro rata portion of the total value of each item of property distributed, credited, or required to be distributed is normally considered as includible in the beneficiary's gross income.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7287, 38 FR 26912, Sept. 27, 1973]

§ 1.661(b)–1 Character of amounts distributed; in general.

In the absence of specific provisions in the governing instrument for the allocation of different classes of income, or unless local law requires such an allocation, the amount deductible for distributions to beneficiaries under section 661(a) is treated as consisting of the same proportion of each class of items entering into the computation of distributable net income as the total of each class bears to the total distributable net income. For example, if a trust has distributable net income of $20,000, consisting of $10,000 each of taxable interest and royalties and distributes $10,000 to beneficiary A, the deduction of $10,000 allowable under section 661(a) is deemed to consist of $5,000 each of taxable interest and royalties, unless the trust instrument specifically provides for the distribution or accumulation of different classes of income or unless local law requires such an allocation. See also § 1.661(c)–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.661(b)–2 Character of amounts distributed when charitable contributions are made.

In the application of the rule stated in § 1.661(b)–1, the items of deduction which enter into the computation of distributable net income are allocated among the items of income which enter into the computation of distributable net income in accordance with the rules set forth in § 1.652(b)–3, except that, in the absence of specific provisions in the governing instrument, or unless local law requires a different apportionment, amounts paid, permanently set aside, or to be used for the charitable, etc., purposes specified in section 642(c) are first ratably apportioned among each class of items of income entering into the computation of the distributable net income of the estate or trust, in accordance with the rules set out in paragraph (b) of § 1.643(a)–5.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.661(c)–1 Limitation on deduction.

An estate or trust is not allowed a deduction under section 661(a) for any amount which is treated under section 661(b) as consisting of any item of distributable net income which is not included in the gross income of the estate or trust. For example, if in 1962, a trust, which reports on the calendar year basis, has distributable net income of $20,000, which is deemed to consist of $10,000 of dividends and $10,000 of tax-exempt interest, and distributes $10,000 to beneficiary A, the deduction allowable under section 661(a) (computed without regard to section 661(c)) would amount to $10,000 consisting of $5,000 of dividends and $5,000 of tax-exempt interest. The deduction actually allowable under section 661(a) as limited by section 661(c) is $4,975, since no deduction is allowable for the $5,000 of tax-exempt interest and the $25 deemed distributed out of the $50 of dividends excluded under section 116, items of distributable net income which are not included in the gross income of the estate or trust.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6777, 29 FR 17809, Dec. 16, 1964]

§ 1.661(c)–2 Illustration of the provisions of section 661.

The provisions of section 661 may be illustrated by the following example:

Example. (a) Under the terms of a trust, which reports on the calendar year basis, $10,000 a year is required to be paid out of income to a designated charity. The balance of the income may, in the trustee's discretion, be accumulated or distributed to beneficiary A. Expenses are allocable against income and the trust instrument requires a reserve for depreciation. During the taxable year 1955 the trustee contributes $10,000 to charity and in his discretion distributes $15,000 of income to A. The trust has the following items of income and expense for the taxable year 1955:

Dividends	$10,000
Partially tax-exempt interest	10,000
Fully tax-exempt interest	10,000
Rents	20,000
Rental expenses	2,000
Depreciation of rental property	3,000
Trustee's commissions	5,000

(b) The income of the trust for fiduciary accounting purposes is $40,000, computed as follows:

Dividends		$10,000
Partially tax-exempt interest		10,000
Fully tax-exempt interest		10,000
Rents		20,000
Total		50,000
Less:		
Rental expenses	$2,000	
Depreciation	3,000	
Trustee's commissions	5,000	
		10,000
Income as computed under section 643(b)		40,000

(c) The distributable net income of the trust as computed under section 643(a) is $30,000, determined as follows:

Rents			$20,000
Dividends			10,000
Partially tax-exempt interest			10,000
Fully tax-exempt interest		$10,000	
Less:			
Expenses allocable thereto (10,000/50,000 × $5,000)	$1,000		
Charitable contributions allocable thereto (10,000/50,000 × $10,000)	2,000		
		3,000	
			7,000
Total			47,000
Deductions:			
Rental expenses		2,000	
Depreciation of rental property		3,000	
Trustee's commissions ($5,000 less $1,000 allocated to tax-exempt interest)		4,000	
Charitable contributions ($10,000 less $2,000 allocated to tax-exempt interests)		8,000	
			17,000
Distributable net income (section 643(a))			30,000

(d) The character of the amounts distributed under section 661(a), determined in accordance with the rules prescribed in §§ 1.661(b)–1 and 1.661(b)–2 is shown by the following table (for the purpose of this allocation, it is assumed that the trustee elected to allocate the trustee's commissions to rental income except for the amount required to be allocated to tax-exempt interest):

	Rental income	Taxable dividends	Excluded dividends	Partially Tax-exempt interest	Tax-exempt interest	Total
Trust income	$20,000	$9,950	$50	$10,000	$10,000	$50,000
Less:						
Charitable contributions	4,000	2,000	....	2,000	2,000	10,000
Rental expenses	2,000	....	....	....	....	2,000
Depreciation	3,000	....	....	....	....	3,000
Trustee's commissions	4,000	....	....	....	1,000	5,000

	Rental income	Taxable dividends	Excluded dividends	Partially Tax-exempt interest	Tax-exempt interest	Total
Total deductions	13,000	2,000	0	2,000	3,000	20,000
Distributable net income	7,000	7,950	50	8,000	7,000	30,000
Amounts deemed distributed under section 661(a) before applying the limitation of section 661(c)	3,500	3,975	25	4,000	3,500	15,000

In the absence of specific provisions in the trust instrument for the allocation of different classes of income, the charitable contribution is deemed to consist of a pro rata portion of the gross amount of each items of income of the trust (except dividends excluded under section 116) and the trust is deemed to have distributed to A a pro rata portion (one-half) of each item of income included in distributable net income.

(e) The taxable income of the trust is $11,375 computed as follows:

Rental income		$20,000
Dividends ($10,000 less $50 exclusion)		9,950
Partially tax-exempt interest		10,000
Gross income		39,950
Deductions:		
Rental expenses	$2,000	
Depreciation of rental property	3,000	
Trustee's commissions	4,000	
Charitable contributions	8,000	
Distributions to A	11,475	
Personal exemption	100	
		28,575
Taxable income		11,375

In computing the taxable income of the trust no deduction is allowable for the portions of the charitable contributions deduction ($2,000) and trustee's commissions ($1,000) which are treated under section 661(b) as attributable to the tax-exempt interest excludable from gross income. Also, of the dividends of $4,000 deemed to have been distributed to A under section 661(a), $25 25/150ths of $50) is deemed to have been distributed from the excluded dividends and is not an allowable deduction to the trust. Accordingly, the deduction allowable under section 661 is deemed to be composed of $3,500 rental income, $3,975 of dividends, and $4,000 partially tax-exempt interest. No deduction is allowable for the portion of tax-exempt interest or for the portion of the excluded dividends deemed to have been distributed to the beneficiary.

(f) The trust is entitled to the credit allowed by section 34 with respect to dividends of $5,975 ($9,950 less $3,975 distributed to A) included in gross income. Also, the trust is allowed the credit provided by section 35 with respect to partially tax-exempt interest of $6,000 ($10,000 less $4,000 deemed distributed to A) included in gross income.

(g) Dividends of $4,000 allocable to A are to be aggregated with his other dividends (if any) for purposes of the dividend exclusion under section 116 and the dividend received credit under section 84.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.662(a)–1 Inclusion of amounts in gross income of beneficiaries of estates and complex trusts; general.

There is included in the gross income of a beneficiary of an estate or complex trust the sum of:

(a) Amounts of income required to be distributed currently to him, and

(b) All other amounts properly paid, credited, or required to be distributed to him

by the estate or trust. The preceding sentence is subject to the rules contained in § 1.662(a)–2 (relating to currently distributable income), § 1.662(a)–3 (relating to other amounts distributed), and §§ 1.662(b)–1 and 1.662(b)–2 (relating to character of amounts). Section 662 has no application to amounts excluded under section 663(a). [T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.662(a)–2 Currently distributable income.

(a) There is first included in the gross income of each beneficiary under section 662(a)(1) the amount of income for the taxable year of the estate or trust required to be distributed currently to him, subject to the provisions of paragraph (b) of this section. Such amount is included in the beneficiary's gross income whether or not it is actually distributed.

(b) If the amount of income required to be distributed currently to all beneficiaries exceeds the distributable net income (as defined in section 643(a) but computed without taking into account the payment, crediting, or setting aside of an amount for which a charitable contributions deduction is allowable under section 642(c)) of the estate or trust, then there is included in the gross income of each beneficiary an amount which bears the same ratio to distributable net income (as so computed) as the amount of income required to be distributed currently to the beneficiary bears to the amount required to be distributed currently to all beneficiaries.

(c) The phrase "the amount of income for the taxable year required to be distributed currently" includes any amount required to be paid out of income or corpus to the extent the amount is satisfied out of income for the taxable year. Thus, an annuity required to be paid in all events (either out of income or corpus) would qualify as income required to be distributed currently to the extent there is income (as defined in section 643(b)) not paid, credited, or required to be distributed to

other beneficiaries for the taxable year. If an annuity or a portion of an annuity is deemed under this paragraph to be income required to be distributed currently, it is treated in all respects in the same manner as an amount of income actually required to be distributed currently. The phrase "the amount of income for the taxable year required to be distributed currently" also includes any amount required to be paid during the taxable year in all events (either out of income or corpus) pursuant to a court order or decree or under local law, by a decedent's estate as an allowance or award for the support of the decedent's widow or other dependent for a limited period during the administration of the estate to the extent there is income (as defined in section 643(b)) of the estate for the taxable year not paid, credited, or required to be distributed to other beneficiaries.

(d) If an annuity is paid, credited, or required to be distributed tax free, that is, under a provision whereby the executor or trustee will pay the income tax of the annuitant resulting from the receipt of the annuity, the payment of or for the tax by the executor or trustee will be treated as income paid, credited, or required to be distributed currently to the extent it is made out of income.

(e) The application of the rules stated in this section may be illustrated by the following examples:

Example (1). (1) Assume that under the terms of the trust instrument $5,000 is to be paid to X charity out of income each year; that $20,000 of income is currently distributable to A; and that an annuity of $12,000 is to be paid to B out of income or corpus. All expenses are charges against income and capital gains are allocable to corpus. During the taxable year the trust had income of $30,000 (after the payment of expenses) derived from taxable interest and made the payments to X charity and distributions to A and B as required by the governing instrument.

(2) The amounts treated as distributed currently under section 662(a)(1) total $25,000 ($20,000 to A and $5,000 to B). Since the charitable contribution is out of income the amount of income available for B's annuity is only $5,000. The distributable net income of the trust computed under section 643(a) without taking into consideration the charitable contributions deduction of $5,000 as provided by section 661(a)(1), is $30,000. Since the amounts treated as distributed currently of $25,000 do not exceed the distributable net income (as modified) of $30,000, A is required to include $20,000 in his gross income and B is required to include $5,000 in his gross income under section 662(a)(1).

Example (2). Assume the same facts as in paragraph (1) of example (1), except that the trust has, in addition, $10,000 of administration expenses, commissions, etc., chargeable to corpus. The amounts treated as distributed currently under section 662(a)(1) total $25,000 ($20,000 to A and $5,000 to B), since trust income under section 643(b) remains the same as in example (1). Distributable net income of the trust computed under section 643(a) but without taking into account the charitable contributions deduction of $5,000 as provided by section 662(a)(1) is only $20,000. Since the amounts treated as distributed currently of $25,000 exceed the distributable net income (as so computed) of $20,000, A is required to include $16,000 (20,000/25,000 of $20,000) in his gross income and B is required to include $4,000 (5,000/25,000 of $20,000) in his gross income under section 662(a)(1). Because A and B are beneficiaries of amounts of income required to be distributed currently, they do not benefit from the reduction of distributable net income by the charitable contributions deduction.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7287, 38 FR 26912, Sept. 27, 1973]

§ 1.662(a)–3 Other amounts distributed.

(a) There is included in the gross income of a beneficiary under section 662(a)(2) any amount properly paid, credited, or required to be distributed to the beneficiary for the taxable year, other than (1) income required to be distributed currently, as determined under § 1.662(a)–2, (2) amounts excluded under section 663(a) and the regulations thereunder, and (3) amounts in excess of distributable net income (see paragraph (c) of this section). An amount which is credited or required to be distributed is included in the gross income of a beneficiary whether or not it is actually distributed.

(b) Some of the payments to be included under paragraph (a) of this section are: (1) A distribution made to a beneficiary in the discretion of the fiduciary; (2) a distribution required by the terms of the governing instrument upon the happening of a specified event; (3) an annuity which is required to be paid in all events but which is payable only out of corpus; (4) a distribution of property in kind (see paragraph (f) of § 1.661(a)–2); (5) an amount applied or distributed for the support of a dependent of a grantor or a trustee or cotrustee under the circumstances specified in section 677(b) or section 678(c) out of corpus or out of other than income for the taxable year; and (6) an amount required to be paid during the taxable year pursuant to a court order or decree or under local law, by a decedent's estate as an allowance or award for the support of the decedent's widow or other dependent for a limited period during the administration of the estate which is payable only out of corpus of the estate under the order or decree or local law.

(c) If the sum of the amounts of income required to be distributed currently (as determined under § 1.662(a)–2) and other amounts properly paid, credited, or required to be distributed (as determined under paragraph (a) of this section) exceeds distributable net income (as defined in section 643(a)), then such other amounts properly paid, credited, or required to be distributed are

included in gross income of the beneficiary but only to the extent of the excess of such distributable net income over the amounts of income required to be distributed currently. If the other amounts are paid, credited, or required to be distributed to more than one beneficiary, each beneficiary includes in gross income his proportionate share of the amount includible in gross income pursuant to the preceding sentence. The proportionate share is an amount which bears the same ratio to distributable net income (reduced by amounts of income required to be distributed currently) as the other amounts (as determined under paragraphs (a) and (d) of this section) distributed to the beneficiary bear to the other amounts distributed to all beneficiaries. For treatment of excess distributions by trusts, see sections 665 to 668, inclusive, and the regulations thereunder.

(d) The application of the rules stated in this section may be illustrated by the following example:

Example. The terms of a trust require the distribution annually of $10,000 of income to A. If any income remains, it may be accumulated or distributed to B, C, and D in amounts in the trustee's discretion. He may also invade corpus for the benefit of A, B, C, or D. In the taxable year, the trust has $20,000 of income after the deduction of all expenses. Distributable net income is $20,000. The trustee distributes $10,000 of income to A. Of the remaining $10,000 of income, he distributes $3,000 each to B, C, and D, and also distributes an additional $5,000 to A. A includes $10,000 in income under section 662(a)(1). The "other amounts distributed" amount of $14,000, includible in the income of the recipients to the extent of $10,000, distributable net income less the income currently distributable to A. A will include an additional $3,571 (5,000/14,000×$10,000) in income under this section, and B, C, and D will each include $2,143 (3,000/14,000×$10,000).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7287, 38 FR 26913, Sept. 27, 1973]

§ 1.662(a)–4 Amounts used in discharge of a legal obligation.

Any amount which, pursuant to the terms of a will or trust instrument, is used in full or partial discharge or satisfaction of a legal obligation of any person is included in the gross income of such person under section 662(a)(1) or (2), whichever is applicable, as though directly distributed to him as a beneficiary, except in cases to which section 71 (relating to alimony payments) or section 682 (relating to income of a trust in case of divorce, etc.) applies. The term "legal obligation" includes a legal obligation to support another person if, and only if, the obligation is not affected by the adequacy of the dependent's own resources. For example, a parent has a "legal obligation" within the meaning of the preceding sentence to support his minor child if under local law property or income from property owned by the child cannot be used for his support so long as his parent is able to support him. On the other hand, if under local law a mother may use the resources of a child for the child's support in lieu of supporting him herself, no obligation of support exists within the meaning of this paragraph, whether or not income is actually used for support. Similarly, since under local law a child ordinarily is obligated to support his parent only if the parent's earnings and resources are insufficient for the purpose, no obligation exists whether or not the parent's earnings and resources are sufficient. In any event the amount of trust income which is included in the gross income of a person obligated to support a dependent is limited by the extent of his legal obligation under local law. In the case of a parent's obligation to support his child, to the extent that the parent's legal obligation of support, including education, is determined under local law by the family's station in life and by the means of the parent, it is to be determined without consideration of the trust income in question.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.662(b)–1 Character of amounts; when no charitable contributions are made.

In determining the amount includible in the gross income of a beneficiary, the amounts which are determined under section 662(a) and §§ 1.662(a)–1 through 1.662(a)–4 shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. The amounts are treated as consisting of the same proportion of each class of items entering into the computation of distributable net income as the total of each class bears to the total distributable net income of the estate or trust unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation. For this purpose, the principles contained in § 1.652(b)–1 shall apply.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.662(b)–2 Character of amounts; when charitable contributions are made.

When a charitable contribution is made, the principles contained in §§ 1.652(b)–1 and 1.662(b)–1 generally apply. However, before the allocation of other deductions among the items of distributable net income, the charitable contributions deduction allowed under section 642(c) is (in

the absence of specific allocation under the terms of the governing instrument or the requirement under local law of a different allocation) allocated among the classes of income entering into the computation of estate or trust income in accordance with the rules set forth in paragraph (b) of § 1.643(a)–5. In the application of the preceding sentence, for the purpose of allocating items of income and deductions to beneficiaries to whom income is required to be distributed currently, the amount of the charitable contributions deduction is disregarded to the extent that it exceeds the income of the trust for the taxable year reduced by amounts for the taxable year required to be distributed currently. The application of this section may be illustrated by the following examples (of which example (1) is illustrative of the preceding sentence):

Example (1). (a) A trust instrument provides that $30,000 of its income must be distributed currently to A, and the balance may either be distributed to B, distributed to a designated charity, or accumulated. Accumulated income may be distributed to B and to the charity. The trust for its taxable year has $40,000 of taxable interest and $10,000 of tax-exempt income, with no expenses. The trustee distributed $30,000 to A, $50,000 to charity X, and $10,000 to B.

(b) Distributable net income for the purpose of determining the character of the distribution to A is $30,000 (the charitable contributions deduction, for this purpose, being taken into account only to the extent of $20,000, the difference between the income of the trust for the taxable year, $50,000, and the amount required to be distributed currently, $30,000).

(c) The charitable contributions deduction taken into account, $20,000, is allocated proportionately to the items of income of the trust, $16,000 to taxable interest and $4,000 to tax-exempt income.

(d) Under section 662(a)(1), the amount of income required to be distributed currently to A is $30,000, which consists of the balance of these items, $24,000 of taxable interest and $6,000 of tax-exempt income.

(e) In determining the amount to be included in the gross income of B under section 662 for the taxable year, however, the entire charitable contributions deduction is taken into account, with the result that there is no distributable net income and therefore no amount to be included in gross income.

(f) See subpart D (section 665 and following), part 1, subchapter J, chapter 1 of the Code for application of the throwback provisions to the distribution made to B.

Example (2). The net income of a trust is payable to A for life, with the remainder to a charitable organization. Under the terms of the trust instrument and local law capital gains are added to corpus. During the taxable year the trust receives dividends of $10,000 and realized a long-term capital gain of $10,000, for which a long-term capital gain deduction of $5,000 is allowed under section 1202. Since under the trust instrument and local law the capital gains are allocated to the charitable organization, and since the capital gain deduction is directly attributable to the capital gain, the charitable contributions deduction and the capital gain deduction are both allocable to the capital gain, and dividends in the amount of $10,000 are allocable to A.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.662(c)–1 Different taxable years.

If a beneficiary has a different taxable year (as defined in section 441 or 442) from the taxable year of an estate or trust, the amount he is required to include in gross income in accordance with section 662(a) and (b) is based upon the distributable net income of the estate or trust and the amounts properly paid, credited, or required to be distributed to the beneficiary for any taxable year or years of the estate or trust ending with or within his taxable year. This rule applies as to so-called short taxable years as well as taxable years of normal duration. Income of an estate or trust for its taxable year or years is determined in accordance with its method of accounting and without regard to that of the beneficiary.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.662(c)–2 Death of individual beneficiary.

If an amount specified in section 662(a)(1) or (2) is paid, credited, or required to be distributed by an estate or trust for a taxable year which does not end with or within the last taxable year of a beneficiary (because of the beneficiary's death), the extent to which the amount is included in the gross income of the beneficiary for his last taxable year or in the gross income of his estate is determined by the computations under section 662 for the taxable year of the estate or trust in which his last taxable year ends. Thus, the distributable net income and the amounts paid, credited, or required to be distributed for the taxable year of the estate or trust, determine the extent to which the amounts paid, credited, or required to be distributed to the beneficiary are included in his gross income for his last taxable year or in the gross income of his estate. (Section 662(c) does not apply to such amounts.) The gross income for the last taxable year of a beneficiary on the cash basis includes only income actually distributed to the beneficiary before his death. Income required to be distributed, but in fact distributed to his estate, is included in the gross income of the estate as income in respect of a decedent under section 691. See paragraph (e) of § 1.663(c)–3 with respect to separate share treatment for the periods before and after the death of a trust's beneficiary.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.662(c)–3 Termination of existence of other beneficiaries.

If the existence of a beneficiary which is not an individual terminates, the amount to be included

under section 662(a) in its gross income for the last taxable year is computed with reference to §§ 1.662(c)–1 and 1.662(c)–2 as if the beneficiary were a deceased individual, except that income required to be distributed prior to the termination but actually distributed to the beneficiary's successor in interest is included in the beneficiary's income for its last taxable year.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.662(c)–4 Illustration of the provisions of sections 661 and 662.

The provisions of sections 661 and 662 may be illustrated in general by the following example:

Example. (a) Under the terms of a testamentary trust one-half of the trust income is to be distributed currently to W, the decedent's wife, for her life. The remaining trust income may, in the trustee's discretion, either be paid to D, the grantor's daughter, paid to designated charities, or accumulated. The trust is to terminate at the death of W and the principal will then be payable to D. No provision is made in the trust instrument with respect to depreciation of rental property. Capital gains are allocable to the principal account under the applicable local law. The trust and both beneficiaries file returns on the calendar year basis. The records of the fiduciary show the following items of income and deduction for the taxable year 1955:

Rents	$50,000
Dividends of domestic corporations	50,000
Tax-exempt interest	20,000
Partially tax-exempt interest	10,000
Capital gains (long term)	20,000
Depreciation of rental property	10,000
Expenses attributable to rental income	15,400
Trustee's commissions allocable to income account	2,800
Trustee's commissions allocable to principal account	1,100

(b) The income for trust accounting purposes is $111,800, and the trustee distributes one-half ($55,900) to W and in his discretion makes a contribution of one-quarter ($27,950) to charity X and distributes the remaining one-quarter ($27,950) to D. The total of the distributions to beneficiaries is $83,850, consisting of (1) income required to be distributed currently to W of $55,900 and (2) other amounts properly paid or credited to D of $27,950. The income for trust accounting purposes of $111,800 is determined as follows:

Rents		$50,000
Dividends		50,000
Tax-exempt interest		20,000
Partially tax-exempt interest		10,000
Total		130,000
Less:		
Rental expenses	$15,400	
Trustee's commissions allocable to income account	2,800	
		18,200
Income as computed under section 643(b)		111,800

(c) The distributable net income of the trust as computed under section 643(a) is $82,750, determined as follows:

Rents			$50,000
Dividends			50,000
Partially tax-exempt interest			10,000
Tax-exempt interest		$20,000	
Less:			
Trustee's commissions allocable thereto (20,000/130,000 of $3,900)	$600		
Charitable contributions allocable thereto (20,000/130,000 of $27,950)	4,300		
		4,900	
			15,100
Total			125,100
Deductions:			
Rental expenses		15,400	
Trustee's commissions ($3,900 less $600 allocated to tax-exempt interest)		3,300	
Charitable deduction ($27,950 less $4,300 attributable to tax-exempt interest)		23,650	
			42,350
Distributable net income			82,750

In computing the distributable net income of $82,750, the taxable income of the trust was computed with the following modifications: No deductions were allowed for distributions to beneficiaries and for personal exemption of the trust (section 643(a)(1) and (2)); capital gains were excluded and no deduction under section 1202 (relating to the 50 percent deduction for long-term capital gains) was taken into account (section 643(a)(3)); and the tax-exempt interest (as adjusted for expenses and charitable contributions) and the dividend exclusion of $50 were included (section 643(a)(5) and (7)).

(d) Inasmuch as the distributable net income of $82,750 as determined under section 643(a) is less than the sum of the amounts distributed to W and D of $83,850, the deduction allowable to the trust under section 661(a) is such distributable net income as modified under section 661(c) to exclude therefrom the items of income not included in the gross income of the trust, as follows:

Distributable net income		$82,750
Less:		
Tax-exempt interest (as adjusted for expenses and the charitable contributions)	$15,100	
Dividend exclusion allowable under section 116	50	
		15,150
Deduction allowable under section 661(a)		67,600

(e) For the purpose of determining the character of the amounts deductible under section 642(c) and section 661(a), the trustee elected to offset the trustee's commissions (other than the portion required to be allocated to tax-exempt interest) against the rental income. The following table shows the determination of the character of the amounts deemed distributed to beneficiaries and contributed to charity.

	Rents	Taxable dividends	Excluded dividends	Tax exempt interest	Partially tax exempt interest	Total
Trust income	$50,000	$49,950	$50	$20,000	$10,000	$130,000
Less:						
Charitable contribution	10,750	10,750	....	4,300	2,150	27,950
Rental expenses	15,400	....	....	....	....	15,400
Trustee's commissions	3,300	....	....	600	....	3,900
Total deductions	29,450	10,750	0	4,900	2,150	47,250
Amounts distributable to beneficiaries	20,550	39,200	50	15,100	7,850	82,750

The character of the charitable contribution is determined by multiplying the total charitable contribution ($27,950) by a fraction consisting of each item of trust income, respectively, over the total trust income, except that no part of the dividends excluded from gross income are deemed included in the charitable contribution. For example, the charitable contribution is deemed to consist of rents of $10,750 (50,000/130,000 × $27,-950).

(f) The taxable income of the trust is $9,900 determined as follows:

Rental income		$50,000
Dividends ($50,000 less $50 exclusion)		49,950
Partially tax-exempt interest		10,000
Capital gains		20,000
Gross income		129,950
Deductions:		
Rental expenses	15,400	
Trustee's commissions	3,300	
Charitable contributions	23,650	
Capital gain deductions	10,000	
Distributions to beneficiaries	67,600	
Personal exemption	100	
		$120,050
Taxable income		9,900

(g) In computing the amount includible in W's gross income under section 662(a)(1), the $55,900 distribution to her is deemed to be composed of the following proportions of the items of income deemed to have been distributed to the beneficiaries by the trust (see paragraph (e) of this example):

Rents (20,550/82,750 × $55,900)	$13,882
Dividends (39,250/82,750 × $55,900)	26,515
Partially tax-exempt interest (7,850/82,750 × $55,900)	5,303
Tax-exempt interest (15,100/82,750 × $55,900)	10,200
Total	55,900

Accordingly, W will exclude $10,200 of tax-exempt interest from gross income and will receive the credits and exclusion for dividends received and for partially tax-exempt interest provided in sections 34, 116, and 35, respectively, with respect to the dividends and partially tax-exempt interest deemed to have been distributed to her, her share of the dividends being aggregated with other dividends received by her for purposes of the dividend credit and exclusion. In addition, she may deduct a share of the depreciation deduction proportionate to the trust income allocable to her; that is, one-half of the total depreciation deduction, or $5,000.

(h) Inasmuch as the sum of the amount of income required to be distributed currently to W ($55,900) and the other amounts properly paid, credited, or required to be distributed to D ($27,950) exceeds the distributable net income ($82,750) of the trust as determined under section 643(a), D is deemed to have received $26,850 ($82,750 less $55,900) for income tax purposes. The character of the amounts deemed distributed to her is determined as follows:

Rents (20,550/82,750 × $26,850)	$6,668
Dividends (39,250/82,750 × $26,850)	12,735
Partially tax-exempt interest (7,850/82,750 × $26,850)	2,547
Tax-exempt interest (15,100/82,750 × $26,850)	4,900
Total	26,850

Accordingly, D will exclude $4,900 of tax-exempt interest from gross income and will receive the credits and exclusion for dividends received and for partially tax-exempt interest provided in sections 34, 116, and 35, respectively, with respect to the dividends and partially tax-exempt interest deemed to have been distributed to her, her share of the dividends being aggregated with other dividends received by her for purposes of the dividend credit and exclusion. In addition, she may deduct a share of the depreciation deduction proportionate to the trust income allocable to her; that is, one-fourth of the total depreciation deduction, or $2,500.

(i) [Reserved]

(j) The remaining $2,500 of the depreciation deduction is allocated to the amount distributed to charity X and is hence nondeductible by the trust, W, or D. (See § 1.642(e)–1.)

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.663(a)–1 Special rules applicable to sections 661 and 662; exclusions; gifts, bequests, etc.

(a) In general. A gift or bequest of a specific sum of money or of specific property, which is required by the specific terms of the will or trust instrument and is properly paid or credited to a beneficiary, is not allowed as a deduction to an estate or trust under section 661 and is not included in the gross income of a beneficiary under section 662, unless under the terms of the will or trust instrument the gift or bequest is to be paid or credited to the recipient in more than three installments. Thus, in order for a gift or bequest to be excludable from the gross income of the recipient, (1) it must qualify as a gift or bequest of a specific sum of money or of specific property (see paragraph (b) of this section), and (2) the terms of the governing instrument must not provide for its payment in more than three installments (see para-

graph (c) of this section). The date when the estate came into existence or the date when the trust was created is immaterial.

(b) **Definition of a gift or bequest of a specific sum of money or of specific property.** (1) In order to qualify as a gift or bequest of a specific sum of money or of specific property under section 663(a), the amount of money or the identity of the specific property must be ascertainable under the terms of a testator's will as of the date of his death, or under the terms of an inter vivos trust instrument as of the date of the inception of the trust. For example, bequests to a decedent's son of the decedent's interest in a partnership and to his daughter of a sum of money equal to the value of the partnership interest are bequests of specific property and of a specific sum of money, respectively. On the other hand, a bequest to the decedent's spouse of money or property, to be selected by the decedent's executor, equal in value to a fraction of the decedent's "adjusted gross estate" is neither a bequest of a specific sum of money or of specific property. The identity of the property and the amount of money specified in the preceding sentence are dependent both on the exercise of the executor's discretion and on the payment of administration expenses and other charges, neither of which are facts existing on the date of the decedent's death. It is immaterial that the value of the bequest is determinable after the decedent's death before the bequest is satisfied (so that gain or loss may be realized by the estate in the transfer of property in satisfaction of it).

(2) The following amounts are not considered as gifts or bequests of a sum of money or of specific property within the meaning of this paragraph:

(i) An amount which can be paid or credited only from the income of an estate or trust, whether from the income for the year of payment or crediting, or from the income accumulated from a prior year;

(ii) An annuity, or periodic gifts of specific property in lieu of or having the effect of an annuity;

(iii) A residuary estate or the corpus of a trust; or

(iv) A gift or bequest paid in a lump sum or in not more than three installments, if the gift or bequest is required to be paid in more than three installments under the terms of the governing instrument.

(3) The provisions of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples, in which it is assumed that the gift or bequest is not required to be made in more than three installments (see paragraph (c)):

Example (1). Under the terms of a will, a legacy of $5,000 was left to A, 1,000 shares of X company stock was left to W, and the balance of the estate was to be divided equally between W and X. No provision was made in the will for the disposition of income of the estate during the period of administration. The estate had income of $25,000 during the taxable year 1954, which was accumulated and added to corpus for estate accounting purposes. During the taxable year, the executor paid the legacy of $5,000 in a lump sum to A and transferred the X company stock to W. No other distributions to beneficiaries were made during the taxable year. The distributions to A and W qualify as exclusions within the meaning of section 663(a)(1).

Example (2). Under the terms of a will, the testator's estate was to be divided equally between A and B. No provision was made in the will for the disposition of income of the estate during the period of administration. The estate had income of $50,000 for the taxable year 1954. In accordance with an agreement among the beneficiaries that part of the assets of the estate would be distributed in kind to the beneficiaries, stock in corporation X was distributed to A during 1954. The fair market value of the stock was $40,000 on the date of distribution. No other distribution was made during the year. The distribution does not qualify as an exclusion within the meaning of section 663(a)(1), since it is not a specific gift to A required by the terms of the will. Accordingly, the fair market value of the property ($40,000) represents a distribution within the meaning of section 661(a) and section 662(a) (see paragraph (c) of § 1.661(a)–2).

Example (3). Under the terms of a trust instrument, income is to be accumulated during the minority of A. Upon A's reaching the age of 21, $10,000 is to be distributed to B out of income or corpus. Also at that time, $10,000 is to be distributed to C out of the accumulated income and the remainder of the accumulations are to be paid to A. A is then to receive all the income until he is 25, when the trust is to terminate. Only the distribution to B would qualify for exclusion under section 663(a)(1).

(4) A gift or bequest of a specific sum of money or of specific property is not disqualified under this paragraph solely because its payment is subject to a condition. For example, provision for a payment by a trust to beneficiary A of $10,000 when he reaches age 25, and $10,000 when he reaches age 30, with payment over to B of any amount not paid to A because of his death, is a gift to A of a specific sum of money payable in two installments, within the meaning of this paragraph, even though the exact amount payable to A cannot be ascertained with certainty under the terms of the trust instrument.

(c) **Installment payments.** (1) In determining whether a gift or bequest of a specific sum of money or of specific property, as defined in paragraph (b) of this section, is required to be paid or credited to a particular beneficiary in more than three installments—

(i) Gifts or bequests of articles for personal use (such as personal and household effects, automobiles, and the like) are disregarded.

(ii) Specifically devised real property, the title to which passes directly from the decedent to the devisee under local law, is not taken into account, since it would not constitute an amount paid, credited, or required to be distributed under section 661 (see paragraph (e) of § 1.661(a)–2).

(iii) All gifts and bequests under a decedent's will (which are not disregarded pursuant to subdivisions (i) and (ii) of this subparagraph) for which no time of payment or crediting is specified, and which are to be paid or credited in the ordinary course of administration of the decedent's estate, are considered as required to be paid or credited in a single installment.

(iv) All gifts and bequests (which are not disregarded pursuant to subdivisions (i) and (ii) of this subparagraph) payable at any one specified time under the terms of the governing instrument are taken into account as a single installment.

For purposes of determining the number of installments paid or credited to a particular beneficiary, a decedent's estate and a testamentary trust shall each be treated as a separate entity.

(2) The application of the rules stated in subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). (i) Under the terms of a decedent's will, $10,000 in cash, household furniture, a watch, an automobile, 100 shares of X company stock, 1,000 bushels of grain, 500 head of cattle, and a farm (title to which passed directly to A under local law) are bequeathed or devised outright to A. The will also provides for the creation of a trust for the benefit of A, under the terms of which there are required to be distributed to A, $10,000 in cash and 100 shares of Y company stock when he reaches 25 years of age, $25,000 in cash and 200 shares of Y company stock when he reaches 30 years of age, and $50,000 in cash and 300 shares of Y company stock when he reaches 35 years of age.

(ii) The furniture, watch, automobile, and the farm are excluded in determining whether any gift or bequest is required to be paid or credited to A in more than three installments. These items qualify for the exclusion under section 663(a)(1) regardless of the treatment of the other items of property bequeathed to A.

(iii) The $10,000 in cash, the shares of X company stock, the grain, the cattle and the assets required to create the trust, to be paid or credited by the estate to A and the trust are considered as required to be paid or credited in a single installment to each, regardless of the manner of payment or distribution by the executor, since no time of payment or crediting is specified in the will. The $10,000 in cash and shares of Y company stock required to be distributed by the trust to A when he is 25 years old are considered as required to be paid or distributed as one installment under the trust. Likewise, the distributions to be made by the trust to A when he is 30 and 35 years old are each considered as one installment under the trust. Since the total number of installments to be made by the estate does not exceed three, all of the items of money and property distributed by the estate qualify for the exclusion under section 663(a)(1). Similarly, the three distributions by the trust qualify.

Example (2). Assume the same facts as in example (1), except that another distribution of a specified sum of money is required to be made by the trust to A when he becomes 40 years old. This distribution would also qualify as an installment, thus making four installments in all under the trust. None of the gifts to A under the trust would qualify for the exclusion under section 663(a)(1). The situation as to the estate, however, would not be changed.

Example (3). A trust instrument provides that A and B are each to receive $75,000 in installments of $25,000, to be paid in alternate years. The trustee distributes $25,000 to A in 1954, 1956, and 1958, and to B in 1955, 1957, and 1959. The gifts to A and B qualify for exclusion under section 663(a)(1), although a total of six payments is made. The gifts of $75,000 to each beneficiary are to be separately treated.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.663(a)–2 Charitable, etc., distributions.

Any amount paid, permanently set aside, or to be used for the charitable, etc., purposes specified in section 642(c) and which is allowable as a deduction under that section is not allowed as a deduction to an estate or trust under section 661 or treated as an amount distributed for purposes of determining the amounts includible in gross income of beneficiaries under section 662. Amounts paid, permanently set aside, or to be used for charitable, etc., purposes are deductible by estates or trusts only as provided in section 642(c). For purposes of this section, the deduction provided in section 642(c) is computed without regard to the provisions of section 508(d), section 681, or section 4948(c)(4) (concerning unrelated business income and private foundations).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7428, 41 FR 34627, Aug. 16, 1976]

§ 1.663(a)–3 Denial of double deduction.

No amount deemed to have been distributed to a beneficiary in a preceding year under section 651 or 661 is included in amounts falling within section 661(a) or 662(a). For example, assume that all of the income of a trust is required to be distributed currently to beneficiary A and both the trust and A report on the calendar year basis. For administrative convenience, the trustee distributes in January and February 1956 a portion of the income of the trust required to be distributed in 1955. The portion of the income for 1955 which was distributed by the trust in 1956 may not be claimed as a deduction by the trust for 1956

since it is deductible by the trust and includible in A's gross income for the taxable year 1955.
[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.663(b)–1 Distributions in first 65 days of taxable year; scope.

(a) **Taxable years beginning after December 31, 1968—(1) General rule.** With respect to taxable years beginning after December 31, 1968, the fiduciary of a trust may elect under section 663(b) to treat any amount or portion thereof that is properly paid or credited to a beneficiary within the first 65 days following the close of the taxable year as an amount that was properly paid or credited on the last day of such taxable year.

(2) **Effect of election.** (i) An election is effective only with respect to the taxable year for which the election is made. In the case of distributions made after May 8, 1972, the amount to which the election applies shall not exceed—

(a) The amount of income of the trust (as defined in § 1.643(b)–1) for the taxable year for which the election is made, or

(b) The amount of distributable net income of the trust (as defined in §§ 1.643(a)–1 through 1.643(a)–7) for such taxable year, if greater,

reduced by any amounts paid, credited, or required to be distributed in such taxable year other than those amounts considered paid or credited in a preceding taxable year by reason of section 663(b) and this section. An election shall be made for each taxable year for which the treatment is desired. The application of this paragraph may be illustrated by the following example:

Example. X Trust, a calendar year trust, has $1,000 of income (as defined in § 1.643(b)–1) and $800 of distributable net income (as defined in §§ 1.643(a)–1 through 1.643(a)–7) in 1972. The trust properly pays $550 to A, a beneficiary, on January 15, 1972, which the trustee elects to treat under section 663(b) as paid on December 31, 1971. The trust also properly pays to A $600 on July 19, 1972, and $450 on January 17, 1973. For 1972, the maximum amount that may be elected under this subdivision to be treated as properly paid or credited on the last day of 1972 is $400 ($1,000–$600). The $550 paid on January 15, 1972, does not reduce the maximum amount to which the election may apply, because that amount is treated as properly paid on December 31, 1971.

(ii) If an election is made with respect to a taxable year of a trust, this section shall apply only to those amounts which are properly paid or credited within the first 65 days following such year and which are so designated by the fiduciary in his election. Any amount considered under section 663(b) as having been distributed in the preceding taxable year shall be so treated for all purposes. For example, in determining the beneficiary's tax liability, such amount shall be considered as having been received by the beneficiary in his taxable year in which or with which the last day of the preceding taxable year of the trust ends.

(b) **Taxable years beginning before January 1, 1969.** With respect to taxable years of a trust beginning before January 1, 1969, the fiduciary of the trust may elect under section 663(b) to treat distributions within the first 65 days following such taxable year as amounts which were paid or credited on the last day of such taxable year, if:

(1) The trust was in existence prior to January 1, 1954;

(2) An amount in excess of the income of the immediately preceding taxable year may not (under the terms of the governing instrument) be distributed in any taxable year; and

(3) The fiduciary elects (as provided in § 1.663(b)–2) to have section 663(b) apply.
[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7204, 37 FR 17135, Aug. 25, 1972]

§ 1.663(b)–2 Election.

(a) **Manner and time of election; irrevocability—(1) When return is required to be filed.** If a trust return is required to be filed for the taxable year of the trust for which the election is made, the election shall be made in the appropriate place on such return. The election under this subparagraph shall be made not later than the time prescribed by law for filing such return (including extensions thereof). Such election shall become irrevocable after the last day prescribed for making it.

(2) **When no return is required to be filed.** If no return is required to be filed for the taxable year of the trust for which the election is made, the election shall be made in a statement filed with the internal revenue office with which a return by such trust would be filed if such trust were required to file a return for such taxable year. See section 6091 and the regulations thereunder for place for filing returns. The election under this subparagraph shall be made not later than the time prescribed by law for filing a return if such trust were required to file a return for such taxable year. Such election shall become irrevocable after the last day prescribed for making it.

(b) **Elections under prior law.** Elections made pursuant to section 663(b) prior to its amendment by section 331(b) of the Tax Reform Act of 1969 (83 Stat. 598), which, under prior law, were irrev-

ocable for the taxable year for which the election was made and all subsequent years, are not effective for taxable years beginning after December 31, 1968. In the case of a trust for which an election was made under prior law, the fiduciary shall make the election for each taxable year beginning after December 31, 1968, for which the treatment provided by section 663(b) is desired.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7204, 37 FR 17135, Aug. 25, 1972]

§ 1.663(c)–1 Separate shares treated as separate trusts; in general.

(a) If a single trust has more than one beneficiary, and if different beneficiaries have substantially separate and independent shares, their shares are treated as separate trusts for the sole purpose of determining the amount of distributable net income allocable to the respective beneficiaries under sections 661 and 662. Application of this rule will be significant in, for example, situations in which income is accumulated for beneficiary A but a distribution is made to beneficiary B of both income and corpus in an amount exceeding the share of income that would be distributable to B had there been separate trusts. In the absence of a separate share rule B would be taxed on income which is accumulated for A. The division of distributable net income into separate shares will limit the tax liability of B. Section 663(c) does not affect the principles of applicable law in situations in which a single trust instrument creates not one but several separate trusts, as opposed to separate shares in the same trust within the meaning of this section.

(b) The separate share rule does not permit the treatment of separate shares as separate trusts for any purpose other than the application of distributable net income. It does not, for instance, permit the treatment of separate shares as separate trusts for purposes of:

(1) The filing of returns and payment of tax,

(2) The exclusion of dividends under section 116,

(3) The deduction of personal exemption under section 642(b), and

(4) The allowance to beneficiaries succeeding to the trust property of excess deductions and unused net operating loss and capital loss carryovers on termination of the trust under section 642(h).

(c) The separate share rule may be applicable even though separate and independent accounts are not maintained and are not required to be maintained for each share on the books of account of the trust, and even though no physical segregation of assets is made or required.

(d) Separate share treatment is not elective. Thus, if a trust is properly treated as having separate and independent shares, such treatment must prevail in all taxable years of the trust unless an event occurs as a result of which the terms of the trust instrument and the requirements of proper administration require different treatment.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.663(c)–2 Computation of distributable net income.

The amount of distributable net income for any share under section 663(c) is computed for each share as if each share constituted a separate trust. Accordingly, any deduction or any loss which is applicable solely to one separate share of the trust is not available to any other share of the same trust.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.663(c)–3 Applicability of separate share rule.

(a) The applicability of the separate share rule provided by section 663(c) will generally depend upon whether distributions of the trust are to be made in substantially the same manner as if separate trusts had been created. Thus, if an instrument directs a trustee to divide the testator's residuary estate into separate shares (which under applicable law do not constitute separate trusts) for each of the testator's children and the trustee is given discretion, with respect to each share, to distribute or accumulate income or to distribute principal or accumulated income, or to do both, separate shares will exist under section 663(c). In determining whether separate shares exist, it is immaterial whether the principal and any accumulated income of each share is ultimately distributable to the beneficiary of such share, to his descendants, to his appointees under a general or special power of appointment, or to any other beneficiaries (including a charitable organization) designated to receive his share of the trust and accumulated income upon termination of the beneficiary's interest in the share. Thus, a separate share may exist if the instrument provides that upon the death of the beneficiary of the share, the share will be added to the shares of the other beneficiaries of the trust.

(b) Separate share treatment will not be applied to a trust or portion of a trust subject to a power to:

(1) Distribute, apportion, or accumulate income, or

(2) Distribute corpus

to or for one or more beneficiaries within a group or class of beneficiaries, unless payment of income, accumulated income, or corpus of a share of one beneficiary cannot affect the proportionate share of income, accumulated income, or corpus of any shares of the other beneficiaries, or unless substantially proper adjustment must thereafter be made (under the governing instrument) so that substantially separate and independent shares exist.

(c) A share may be considered as separate even though more than one beneficiary has an interest in it. For example, two beneficiaries may have equal, disproportionate, or indeterminate interests in one share which is separate and independent from another share in which one or more beneficiaries have an interest. Likewise, the same person may be a beneficiary of more than one separate share.

(d) Separate share treatment may be given to a trust or portion of a trust otherwise qualifying under this section if the trust or portion of a trust is subject to a power to pay out to a beneficiary of a share (of such trust or portion) an amount of corpus in excess of his proportionate share of the corpus of the trust if the possibility of exercise of the power is remote. For example, if the trust is subject to a power to invade the entire corpus for the health, education, support, or maintenance of A, separate share treatment is applied if exercise of the power requires consideration of A's other income which is so substantial as to make the possibility of exercise of the power remote. If instead it appears that A and B have separate shares in a trust, subject to a power to invade the entire corpus for the comfort, pleasure, desire, or happiness of A, separate share treatment shall not be applied.

(e) For taxable years ending before December 31, 1978, the separate share rule may also be applicable to successive interests in point of time, as for instance in the case of a trust providing for a life estate to A and a second life estate or outright remainder to B. In such a case, in the taxable year of a trust in which a beneficiary dies items of income and deduction properly allocable under trust accounting principles to the period before a beneficiary's death are attributed to one share, and those allocable to the period after the beneficiary's death are attributed to the other share. Separate share treatment is not available to a succeeding interest, however, with respect to distributions which would otherwise be deemed distributed in a taxable year of the earlier interest under the throwback provisions of Subpart D (section 665 and following), Part I, Subchapter J, Chapter 1 of the Code. The application of this paragraph may be illustrated by the following example:

Example. A trust instrument directs that the income of a trust is to be paid to A for her life. After her death income may be distributed to B or accumulated. A dies on June 1, 1956. The trust keeps its books on the basis of the calendar year. The trust instrument permits invasions of corpus for the benefit of A and B, and an invasion of corpus was in fact made for A's benefit in 1956. In determining the distributable net income of the trust for the purpose of determining the amounts includible in A's income, income and deductions properly allocable to the period before A's death are treated as income and deductions of a separate share; and for that purpose no account is taken of income and deductions allocable to the period after A's death.

(f) Separate share treatment is not applicable to an estate.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7633, 44 FR 57926, Oct. 9, 1979]

§ 1.663(c)–4 Example.

Section 663(c) may be illustrated by the following example:

Example. (a) A single trust was created in 1940 for the benefit of A, B, and C, who were aged 6, 4, and 2, respectively. Under the terms of the instrument, the trust income is required to be divided into three equal shares. Each beneficiary's share of the income is to be accumulated until he becomes 21 years of age. When a beneficiary reaches the age of 21, his share of the income may thereafter be either accumulated or distributed to him in the discretion of the trustee. The trustee also has discretion to invade corpus for the benefit of any beneficiary to the extent of his share of the trust estate, and the trust instrument requires that the beneficiary's right to future income and corpus will be proportionately reduced. When each beneficiary reaches 35 years of age, his share of the trust estate shall be paid over to him. The interest in the trust estate of any beneficiary dying without issue and before he has attained the age of 35 is to be equally divided between the other beneficiaries of the trust. All expenses of the trust are allocable to income under the terms of the trust instrument.

(b) No distributions of income or corpus were made by the trustee prior to 1955, although A became 21 years of age on June 30, 1954. During the taxable year of 1955, the trust has income from royalties of $20,000 and expenses of $5,000. The trustee in his discretion distributes $12,000 to A. Both A and the trust report on the calendar year basis.

(c) The trust qualifies for the separate share treatment under section 663(c) and the distributable net income must be divided into three parts for the purpose of determining the amount deductible by the trust under section 661 and the amount includible in A's gross income under section 662.

(d) The distributable net income of each share of the trust is $5,000 ($6,667 less $1,667). Since the amount ($12,000) dis-

tributed to A during 1955 exceeds the distributable net income of $5,000 allocated to his share, the trust is deemed to have distributed to him $5,000 of 1955 income and $7,000 of amounts other than 1955 income. Accordingly, the trust is allowed a deduction of $5,000 under section 661. The taxable income of the trust for 1955 is $9,900, computed as follows:

Royalties		$20,000
Deductions:		
Expenses	$5,000	
Distribution to A	5,000	
Personal exemption	100	
		10,100
Taxable income		9,900

(e) In accordance with section 662, A must include in his gross income for 1955 an amount equal to the portion ($5,000) of the distributable net income of the trust allocated to his share. Also, the excess distribution of $7,000 made by the trust is subject to the throwback provisions of Subpart D (section 665 and following), Part I, Subchapter J, Chapter 1 of the Code, and the regulations thereunder.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.664–1 Charitable remainder trusts.

(a) In general—(1) Introduction—(i) General description of a charitable remainder trust. Generally, a charitable remainder trust is a trust which provides for a specified distribution, at least annually, to one or more beneficiaries, at least one of which is not a charity, for life or for a term of years, with an irrevocable remainder interest to be held for the benefit of, or paid over to, charity. The specified distribution to be paid at least annually must be a sum certain which is not less than 5 percent of the initial net fair market value of all property placed in trust (in the case of a charitable remainder annuity trust) or a fixed percentage which is not less than 5 percent of the net fair market value of the trust assets, valued annually (in the case of a charitable remainder unitrust). A trust created after July 31, 1969, which is a charitable remainder trust is exempt from all of the taxes imposed by Subtitle A of the Code for any taxable year of the trust except a taxable year in which it has unrelated business taxable income.

(ii) Scope. This section provides definitions, general rules governing the creation and administration of a charitable remainder trust, and rules governing the taxation of the trust and its beneficiaries. For the application of certain foundation rules to charitable remainder trusts, see paragraph (b) of this section. If the trust has unrelated business taxable income, see paragraph (c) of this section. For the treatment of distributions to recipients, see paragraph (d) of this section. For the treatment of distributions to charity, see paragraph (e) of this section. For the time limitations for amendment of governing instruments, see paragraph (f) of this section. For transitional rules under which particular requirements are inapplicable to certain trusts, see paragraph (g) of this section. Section 1.664–2 provides rules relating solely to a charitable remainder annuity trust. Section 1.664–3 provides rules relating solely to a charitable remainder unitrust. Section 1.664–4 provides rules governing the calculation of the fair market value of the remainder interest in a charitable remainder unitrust. For rules relating to the filing of returns for a charitable remainder trust, see paragraph (a)(6) of § 1.6012–3 and section 6034 and the regulations thereunder.

(iii) Definitions. As used in this section and §§ 1.664–2, 1.664–3, and 1.664–4:

(a) Charitable remainder trust. The term "charitable remainder trust" means a trust with respect to which a deduction is allowable under section 170, 2055, 2106, or 2522 and which meets the description of a charitable remainder annuity trust (as described in § 1.664–2) or a charitable remainder unitrust (as described in § 1.664–3).

(b) Annuity amount. The term "annuity amount" means the amount described in paragraph (a)(1) of § 1.664–2 which is payable, at least annually, to the beneficiary of a charitable remainder annuity trust.

(c) Unitrust amount. The term "unitrust amount" means the amount described in paragraph (a)(1) of § 1.664–3 which is payable, at least annually, to the beneficiary of a charitable remainder unitrust.

(d) Recipient. The term "recipient" means the beneficiary who receives the possession or beneficial enjoyment of the annuity amount or unitrust amount.

(e) Governing instrument. The term "governing instrument" has the same meaning as in section 508(e) and the regulations thereunder.

(2) Requirement that the trust must be either a charitable remainder annuity trust or a charitable remainder unitrust. A trust is a charitable remainder trust only if it is either a charitable remainder annuity trust in every respect or a charitable remainder unitrust in every respect. For example, a trust which provides for the payment each year to a noncharitable beneficiary of the greater of a sum certain or a fixed percentage of the annual value of the trust assets is not a charitable remainder trust inasmuch as the trust is neither a charitable remainder annuity trust (for the reason that the payment for the year may be a fixed percentage of the annual value of the trust

assets which is not a "sum certain") nor a charitable remainder unitrust (for the reason that the payment for the year may be a sum certain which is not a "fixed percentage" of the annual value of the trust assets).

(3) **Restrictions on investments.** A trust is not a charitable remainder trust if the provisions of the trust include a provision which restricts the trustee from investing the trust assets in a manner which could result in the annual realization of a reasonable amount of income or gain from the sale or disposition of trust assets. In the case of transactions with, or for the benefit of, a disqualified person, see section 4941(d) and the regulations thereunder for rules relating to the definition of self-dealing.

(4) **Requirement that trust must meet definition of and function exclusively as a charitable remainder trust from its creation.** In order for a trust to be a charitable remainder trust, it must meet the definition of and function exclusively as a charitable remainder trust from the creation of the trust. Solely for the purposes of section 664 and the regulations thereunder, the trust will be deemed to be created at the earliest time that neither the grantor nor any other person is treated as the owner of the entire trust under Subpart E, Part 1, Subchapter J, Chapter 1, Subtitle A of the Code (relating to grantors and others treated as substantial owners), but in no event prior to the time property is first transferred to the trust. For purposes of the preceding sentence, neither the grantor nor his spouse shall be treated as the owner of the trust under such subpart E merely because the grantor or his spouse is named as a recipient. See examples 1 through 3 of subparagraph (6) of this paragraph for illustrations of the foregoing rule.

(5) **Rules applicable to testamentary transfers—(i) Deferral of annuity or unitrust amount.** Notwithstanding subparagraph (4) of this paragraph and §§ 1.664–2 and 1.664–3, for purposes of sections 2055 and 2106 a charitable remainder trust shall be deemed created at the date of death of the decedent (even though the trust is not funded until the end of a reasonable period of administration or settlement) if the obligation to pay the annuity or unitrust amount with respect to the property passing in trust at the death of the decedent begins as of the date of death of the decedent, even though the requirement to pay such amount is deferred in accordance with the rules provided in this subparagraph. If permitted by applicable local law or authorized by the provisions of the governing instrument, the requirement to pay such amount may be deferred until the end of the taxable year of the trust in which occurs the complete funding of the trust. Within a reasonable period after such time, the trust must pay (in the case of an underpayment) or must receive from the recipient (in the case of an overpayment) the difference between—

(a) Any annuity or unitrust amounts actually paid, plus interest on such amounts computed at the rate of interest specified in paragraph (a)(5)(iv) of this section, compounded annually, and

(b) The annuity or unitrust amounts payable, plus interest on such amounts computed at the rate of interest specified in paragraph (a)(5)(iv) of this section, compounded annually.

The amounts payable shall be retroactively determined by using the taxable year, valuation method, and valuation dates which are ultimately adopted by the charitable remainder trust. See subdivision (ii) of this subparagraph for rules relating to retroactive determination of the amount payable under a charitable remainder unitrust. See paragraph (d)(4) of this section for rules relating to the year of inclusion in the case of an underpayment to a recipient and the allowance of a deduction in the case of an overpayment to a recipient.

(ii) For purposes of retroactively determining the amount under subdivision (i)(b) of this subparagraph, the governing instrument of a charitable remainder unitrust may provide that the amount described in subdivision (i)(b) of this subparagraph with respect to property passing in trust at the death of the decedent for the period which begins on the date of death of the decedent and ends on the earlier of the date of death of the last recipient or the end of the taxable year of the trust in which occurs the complete funding of the trust shall be computed by multiplying—

(a) The sum of (1) the value, on the earlier of the date of death of the last recipient or the last day in such taxable year, of the property held in trust which is attributable to property passing to the trust at the death of the decedent, (2) any distributions in respect of unitrust amounts made by the trust or estate before such date, and (3) interest on such distributions computed at the rate of interest specified in paragraph (a)(5)(iv) of this section, compounded annually, from the date of distribution to such date by—

(b) A factor equal to 1.0 less the factor under the appropriate payout rate in column 2 of Table D in § 1.664–4(b)(5) opposite the number of years

in column 1 between the date of death of the decedent and the date of the earlier of the death of the last recipient or the last day in such taxable year.

If the number of years between the date of death and the date of the earlier of the death of the last recipient or end of such taxable year is between periods for which factors are provided in Table D, a linear interpolation must be made.

(iii) Treatment of distributions. The treatment of a distribution to a charitable remainder trust, or to a recipient in respect of an annuity or unitrust amount, paid, credited, or required to be distributed by an estate, or by a trust which is not a charitable remainder trust, shall be governed by the rules of subchapter J, chapter 1, subtitle A of the Code other than section 664. In the case of a charitable remainder trust which is partially or fully funded during the period of administration of an estate or settlement of a trust (which is not a charitable remainder trust), the treatment of any amount paid, credited, or required to be distributed by the charitable remainder trust shall be governed by the rules of section 664.

(iv) Rate of interest. The following rates of interest shall apply for purposes of paragraphs (a)(5)(i) through (iii) of this section:

(a) 10 percent for instruments executed or amended on or after August 9, 1984;

(b) 6 percent or 10 percent for instruments executed or amended after October 24, 1983, and before August 9, 1984; and

(c) 6 percent for instruments executed before October 25, 1983, and not subsequently amended.

(6) Examples. The application of the rules in subparagraphs (4) and (5) of this paragraph may be illustrated by the following examples:

Example (1). On September 19, 1971, H transfers property to a trust over which he retains an inter vivos power of revocation. The trust is to pay W 5 percent of the value of the trust assets, valued annually, for her life, remainder to charity. The trust would satisfy all of the requirements of section 664 if it were irrevocable. For purposes of section 664, the trust is not deemed created in 1971 because H is treated as the owner of the entire trust under subpart E. On May 26, 1975, H predeceases W at which time the trust becomes irrevocable. For purposes of section 664, the trust is deemed created on May 26, 1975, because that is the earliest date on which H is not treated as the owner of the entire trust under subpart E. The trust becomes a charitable remainder trust on May 26, 1975, because it meets the definition of a charitable remainder trust from its creation.

Example (2). The facts are the same as in example (1), except that H retains the inter vivos power to revoke only one-half of the trust. For purposes of section 664, the trust is deemed created on September 19, 1971, because on that date the grantor is not treated as the owner of the entire trust under subpart E. Consequently, a charitable deduction is not allowable either at the creation of the trust or at H's death because the trust does not meet the definition of a charitable remainder trust from the date of its creation. The trust does not meet the definition of a charitable remainder trust from the date of its creation because the trust is subject to a partial power to revoke on such date.

Example (3). The facts are the same as in example (1), except that the residue of H's estate is to be paid to the trust and the trust is required to pay H's debts. The trust is not a charitable remainder trust at H's death because it does not function exclusively as a charitable remainder trust from the date of its creation which, in this case, is the date it becomes irrevocable.

Example (4). (i) In 1971, H transfers property to Trust A over which he retains an inter vivos power of revocation. Trust A, which is not a charitable remainder trust, is to provide income or corpus to W until the death of H. Upon H's death the trust is required by its governing instrument to pay the debts and administration expenses of H's estate, and then to terminate and distribute all of the remaining assets to a separate Trust B which meets the definition of a charitable remainder annuity trust.

(ii) Trust B will be charitable remainder trust from the date of its funding because it will function exclusively as a charitable remainder trust from its creation. For purposes of section 2055, Trust B will be deemed created at H's death if the obligation to pay the annuity amount begins on the date of H's death. For purposes of section 664, Trust B becomes a charitable remainder trust as soon as it is partially or completely funded. Consequently, unless Trust B has unrelated business taxable income, the income of the trust is exempt from all taxes imposed by subtitle A of the Code, and any distributions by the trust, even before it is completely funded, are governed by the rules of section 664. Any distributions made by Trust A, including distributions to a recipient in respect of annuity amounts, are governed by the rules of subchapter J, chapter 1, subtitle A of the Code other than section 664.

Example (5). In 1973, H dies testate leaving the net residue of his estate (after payment by the estate of all debts and administration expenses) to a trust which meets the definition of a charitable remainder unitrust. For purposes of section 2055, the trust is deemed created at H's death if the requirement to pay the unitrust amount begins on H's death and is a charitable remainder trust even though the estate is obligated to pay debts and administration expenses.

For purposes of section 664, the trust becomes a charitable remainder trust as soon as it is partially or completely funded. Consequently, unless the trust has unrelated business taxable income, the income of the trust is exempt from all taxes imposed by subtitle A of the Code, and any distributions by the trust, even before it is completely funded, are governed by the rules of section 664. Any distributions made by H's estate, including distributions to a recipient in respect of unitrust amounts, are governed by the rules of subchapter J, chapter 1, subtitle A of the Code other than section 664.

Example (6). (i) On January 1, 1974, H dies testate leaving the residue of his estate to a charitable remainder unitrust. The governing instrument provides that, beginning at H's death, the trustee is to make annual payments to W, on December 31 of each year of 5 percent of the net fair market value of the trust assets, valued as of December 31 of each year, for W's life and to pay the remainder to charity at the death of W. The governing instrument also provides that the actual payment of the unitrust amount need not be made until the end of the taxable year of the trust in which occurs the complete

funding of the trust. The governing instrument also provides that the amount payable with respect to the period between the date of death and the end of such taxable year shall be computed under the special method provided in subparagraph (5)(ii) of this paragraph. The governing instrument provides that, within a reasonable period after the end of the taxable year of the trust in which occurs the complete funding of the trust, the trustee shall pay (in the case of an underpayment) or shall receive from the recipient (in the case of an overpayment) the difference between the unitrust amounts paid (plus interest at 6 percentage compounded annually) and the amount computed under the special method. The trust is completely funded on September 20, 1976. No amounts were paid before June 30, 1977. The trust adopts a fiscal year of July 1 to June 30. The net fair market value of the trust assets on June 30, 1977, is $100,000.

(ii) Because no amounts were paid prior to the end of the taxable year in which the trust was completely funded, the amount payable at the end of such taxable year is equal to the net fair market value of the trust assets on the last day of such taxable year (June 30, 1977) multiplied by a factor equal to 1.0 minus the factor in Table D corresponding to the number of years in the period between the date of death and the end of such taxable year. The adjusted payout rate (determined under § 1.664–4(b)(2)) is 5 percent. Because the last day of the taxable year in which the trust is completely funded is June 30, 1977, there are 3 181/365 years in such period. Because there is no factor given in Table D for such a period, a linear interpolation must be made:

1.0 minus 0.814506 (factor at 5 percent for 4 years)	0.185494
1.0 minus 0.857375 (factor at 5 percent for 3 years)	.142625
Difference	.042869

$$181 \div 365 = X \div 0.042869$$
$$X = 0.021258$$

1.0 minus 0.857375 (factor at 5 percent for 3 years)	0.142625
Plus: X	.021258
Interpolated factor	.163883

Thus, the amount payable for the period from January 1, 1974, to June 30, 1977, is $16,388.30 ($100,000×0.163883). Thereafter, the trust assets must be valued on December 31 of each year and 5 percent of such value paid annually to W for her life.

(b) Application of certain foundation rules to charitable remainder trusts. See section 4947(a)(2) and section 4947(b)(3)(B) and the regulations thereunder for the application to charitable remainder trusts of certain provisions relating to private foundations. See section 508(e) for rules relating to required provisions in governing instruments prohibiting certain activities specified in section 4947(a)(2).

(c) Taxation of nonexempt charitable remainder trusts. If the charitable remainder trust has any unrelated business taxabie income (within the meaning of section 512 and the regulations thereunder, determined as if part III, subchapter F, chapter 1, subtitle A of the Code applied to such trust) for any taxable year, the trust is subject to all of the taxes imposed by subtitle A of the Code for such taxable year. For taxable years beginning after December 31, 1969, unrelated business taxable income includes debt-financed income. The taxes imposed by subtitle A of the Code upon a nonexempt charitable remainder trust shall be computed under the rules prescribed by subparts A and C, part 1, subchapter J, chapter 1, subtitle A of the Code for trusts which may accumulate income or which distribute corpus. The provisions of subpart E, part 1 of such subchapter J are not applicable with respect to a nonexempt charitable remainder trust. The application of the above rules may be illustrated by the following example:

Example. In 1975, a charitable remainder trust which has a calendar year as its taxable year has $1,000 of ordinary income, including $100 of unrelated business taxable income, and no deductions other than under sections 642(b) and 661(a). The trust is required to pay out $700 for 1975 to a noncharitable recipient. Because the trust has some unrelated business taxable income in 1975, it is not exempt for such year. Consequently, the trust is taxable on all of its income as a complex trust. Under section 661(a) of the Code, the trust is allowed a deduction of $700. Under section 642(b) of the Code, the trust is allowed a deduction of $100. Consequently, the taxable income of the trust for 1975 is $200 ($1,000–$700–$100).

(d) Treatment of annual distributions to recipients—(1) Character of distributions—(i) Order of distributions. Annuity and unitrust amounts shall be treated as having the following characteristics in the hands of the recipients (whether or not the trust is exempt) without credit for any taxes which are imposed by subtitle A of the Code on the trust:

(a) Ordinary income. First, as ordinary income to the extent of the sum of the trust's ordinary income for the taxable year of the trust and its undistributed ordinary income for prior years. An ordinary loss for the current year shall be used to reduce undistributed ordinary income for prior years and any excess shall be carried forward indefinitely to reduce ordinary income for future years. For purposes of this section, the amount of current and prior years' income shall be computed without regard to the deduction for net operating losses provided by sections 172 or 642(d).

(b) Capital gain. Second, as capital gain to the extent of the trust's undistributed capital gains. Undistributed capital gains of the trust are determined on a cumulative net basis under the rules of this subdivision without regard to the provisions of section 1212.

(1) Long- and short-term capital gains. If, in any taxable year of the trust, the trust has both undistributed short-term capital gain and undistributed long-term capital gain, then the short-

term capital gain shall be deemed distributed prior to any long-term capital gain.

(2) Capital losses in excess of capital gains. If the trust has for any taxable year capital losses in excess of capital gains, any excess of the net short-term capital loss over the net long-term capital gain for such year shall be a short-term capital loss in the succeeding taxable year and any excess of the net long-term capital loss over the net short-term capital gain for such year shall be a long-term capital loss in the succeeding taxable year.

(3) Capital gains in excess of capital losses. If the trust has for any taxable year capital gains in excess of capital losses, any excess of the net short-term capital gain over the net long-term capital loss for such year shall be, to the extent not deemed distributed, a short-term capital gain in the succeeding taxable year and any excess of the net long-term capital gain over the net short-term capital loss for such year shall be, to the extent not deemed distributed, a long-term capital gain in the succeeding taxable year.

The application of the rules in this subdivision (b) may be illustrated by the following example:

Example. (i) The X Trust is a charitable remainder trust created on January 1, 1975, and has the calendar year as its taxable year. During the years indicated, it has the following capital transactions:

1975:	
Long-term capital loss	$10
Short-term capital gain	5
1976:	
Short-term capital gain	20
Short-term capital loss	5
1977:	
Long-term capital gain	15

Distributions for 1975 and 1976 were not in excess of current and accumulated ordinary income for those years. In 1977, distributions exceeded current and accumulated ordinary income by $5.

(ii) The treatment of the 1975 and 1976 transactions is as follows:

1975:	
Long-term capital loss recognized	$(10)
Short-term capital gain recognized	5
Net long-term capital loss carried forward to 1976	(5)
1976:	
Short-term capital gain recognized	20
Short-term capital loss recognized	(5)
Long-term capital loss carried forward from 1975	(5)
Net short-term capital gain carried forward to 1977	$10
1977:	
Long-term capital gain recognized	$15
Net short-term capital gain carried forward from 1976	10

(iii) In 1977, the trust has long-term capital gain of $15 and short-term capital gain of $10. If the trust has both short-term capital gain and long-term capital gain for the same taxable year, the short-term capital gain is deemed distributed prior to the long-term capital gain. Therefore, the distribution of $5 in 1977 is deemed to be short-term capital gain. The undistributed net short-term capital gain of $5 is a short-term capital gain carried forward to 1978. The undistributed net long-term capital gain of $15 is a long-term capital gain carried forward to 1978.

(c) Other income. Third, as other income (including income excluded under part III, subchapter B, chapter 1, subtitle A of the Code) to the extent of the sum of the trust's other income for the taxable year and its undistributed other income for prior years. A loss in this category for the current year shall be used to reduce undistributed income in such category for prior years and any excess shall be carried forward indefinitely to reduce such income for future years.

(d) Corpus. Finally, as a distribution of trust corpus. For purposes of this section, the term "corpus" means the net fair market value of the trust assets less the total undistributed income (but not loss) in each of the above categories.

(ii) **Rules relating to character of distributions.** The determination of the character of amounts distributed shall be made as of the end of the taxable year of the trust. Amounts treated as paid from one of the categories of income described in (a), (b), or (c) of subdivision (i) of this subparagraph shall be treated as consisting of the same proportion of each class of items included in such category as the total of the current and accumulated income of each class of items bears to the total of the current and accumulated income for that category. A loss in one of such categories may not be used to reduce a gain in any other category. The provisions of subparts D and E, part 1, subchapter J, chapter 1, subtitle A of the Code are not applicable with respect to a charitable remainder trust (regardless of whether the trust is exempt).

(2) **Allocation of deductions.** Items of deduction of the trust for a taxable year of the trust which are deductible in determining taxable income (other than the deductions permitted by sections 642(b), 642(c), 661, and 1202) which are directly attributable to one or more classes of items within a category of income or to corpus (determined under subparagraph (1)(i) of this paragraph) shall be allocated to such classes of items or to corpus. All other allowable deduc-

tions for such taxable year which are not directly attributable to one or more classes of items within a category of income or to corpus (other than the deductions permitted by sections 642(b), 642(c), 661, and 1202) shall be allocated among the classes of items within the category (excluding classes of items with net losses) on the basis of the gross income of such classes for such taxable year reduced by the deductions allocated thereto under the first sentence of this subparagraph, but in no event shall the amount of expenses allocated to any class of items exceed such income of such class for the taxable year. Items of deduction which are not allocable under the above two sentences (other than the deductions permitted by sections 642(b), 642(c), 661, and 1202) may be allocated in any manner. All taxes imposed by subtitle A of the Code for which the trust is liable because it has unrelated business taxable income and all taxes imposed by chapter 42 of the Code shall be allocated to corpus. Any expense which is not deductible in determining taxable income and which is not allocable to any class of items described in subparagraph (1)(i)(c) of this paragraph shall be allocated to corpus. The deductions allowable to a trust under sections 642(b), 642(c), 661, and 1202 are not allowed in determining the amount or character of any class of items within a category of income or corpus in the categories described in subparagraph (1) of this paragraph.

(3) **Allocation of income among recipients.** If there are two or more recipients, each will be treated as receiving his pro rata portion of the categories of income and corpus. The application of this rule may be illustrated by the following example:

Example. X transfers $40,000 to a charitable remainder annuity trust which is to pay $3,000 per year to X and $2,000 per year to Y for a term of 5 years. During the first taxable year the trust has $3,000 of ordinary income, $500 of capital gain, and $500 of tax-exempt income after allocation of all expenses. X is treated as receiving ordinary income of $1,800 ($3,000/$5,000×$3,000), capital gain of $300 ($3,000/$5,-000×$500), tax exempt income of $300 ($3,000/$5,-000×$500), and corpus of $600 ($3,000/$5,000×[$5,000–$4,-000]). Y is treated as receiving ordinary income of $1,200 ($2,000/$5,000×$3,000), capital gain of $200 ($2,000/$5,-000×$500), tax exempt income of $200 ($2,000/$5,-000×$500), and corpus of $400 ($2,000/$5,000×[$5,000–$4,-000]).

(4) **Year of inclusion—(i) General rule.** To the extent required by this paragraph, the annuity or unitrust amount is includible in the recipient's gross income for the taxable year in which the annuity or unitrust amount is required to be distributed even though the annuity or unitrust amount is not distributed until after the close of the taxable year of the trust. If a recipient has a different taxable year (as defined in section 441 or 442) from the taxable year of the trust, the amount he is required to include in gross income to the extent required by this paragraph shall be included in his taxable year in which or with which ends the taxable year of the trust in which such amount is required to be distributed.

(ii) **Payments resulting from incorrect valuations.** Notwithstanding subdivision (i) of this subparagraph, any payments which are made or required to be distributed by a charitable remainder trust pursuant to paragraph (a)(5) of this section, under paragraph (f)(3) of this section because of an amendment to the governing instrument, or under paragraphs (a)(1) of §§ 1.664–2 and 1.664–3 because of an incorrect valuation, shall, to the extent required by this paragraph, be included in the gross income of the recipient in his taxable year in which or with which ends the taxable year of the trust in which the amount is paid, credited, or required to be distributed. For rules relating to required adjustments of underpayments and overpayments of the annuity or unitrust amounts in respect of payments made prior to the amendment of a governing instrument, see paragraph (f)(3) of this section. There is allowable to a recipient a deduction from gross income for any amounts repaid to the trust because of an overpayment during the reasonable period of administration or settlement or until the trust is fully funded, because of an amendment, or because of an incorrect valuation, to the extent such amounts were included in his gross income. See section 1341 and the regulations thereunder for rules relating to the computation of tax where a taxpayer restores substantial amounts held under a claim of right.

(iii) **Rules applicable to year of recipient's death.** If the taxable year of the trust does not end with or within the last taxable year of the recipient because of the recipient's death, the extent to which the annuity or unitrust amount required to be distributed to him is included in the gross income of the recipient for his last taxable year, or in the gross income of his estate, is determined by making the computations required under this paragraph for the taxable year of the trust in which his last taxable year ends. (The last sentence of subdivision (i) of this subparagraph does not apply to such amounts.) The gross income for the last taxable year of a recipient on the cash basis includes (to the extent required by this paragraph) amounts actually distributed to the recipient before his death. Amounts required to be distributed which are distributed to his estate,

are included (to the extent required by this paragraph) in the gross income of the estate as income in respect of a decedent under section 691.

(5) Distributions in kind. The annuity or unitrust amount may be paid in cash or in other property. In the case of a distribution made in other property, the amount paid, credited, or required to be distributed shall be considered as an amount realized by the trust from the sale or other disposition of property. The basis of the property in the hands of the recipient is its fair market value at the time it was paid, credited, or required to be distributed. The application of these rules may be illustrated by the following example:

Example. On January 1, 1971, X creates a charitable remainder annuity trust, whose taxable year is the calendar year, under which X is to receive $5,000 per year. During 1971, the trust receives $500 of ordinary income. On December 31, 1971, the trust distributed cash of $500 and a capital asset of the trust having a fair market value of $4,500 and a basis of $2,200. The trust is deemed to have realized a capital gain of $2,300. X treats the distribution of $5,000 as being ordinary income of $500, capital gain of $2,300 and trust corpus of $2,200. The basis of the distributed property is $4,500 in the hands of X.

(e) Other distributions—(1) Character of distributions. An amount distributed by the trust to an organization described in section 170(c) other than the annuity or unitrust amount shall be considered as a distribution of corpus and of those categories of income specified in paragraph (d)(1) of this section in an order inverse to that prescribed in such paragraph. The character of such amount shall be determined as of the end of the taxable year of the trust in which the distribution is made after the character of the annuity or unitrust amount has been determined.

(2) Distributions in kind. In the case of a distribution of an amount to which subparagraph (1) of this paragraph applies, no gain or loss is realized by the trust by reason of a distribution in kind unless such distribution is in satisfaction of a right to receive a distribution of a specific dollar amount or in specific property other than that distributed.

(f) Effective date—(1) General rule. The provisions of this section are effective with respect to transfers in trust made after July 31, 1969. Any trust created (within the meaning of applicable local law) prior to August 1, 1969, is not a charitable remainder trust even if it otherwise satisfies the definition of a charitable remainder trust.

(2) Transfers to pre-1970 trusts. Property transferred to a trust created (within the meaning of applicable local law) before August 1, 1969, whose governing instrument provides that an organization described in section 170(c) receives an irrevocable remainder interest in such trust, shall, for purposes of subparagraphs (1) and (3) of this paragraph, be deemed transferred to a trust created on the date of such transfer provided that the transfer occurs after July 31, 1969, and prior to October 18, 1971, and the transferred property and any undistributed income therefrom is severed and placed in a separate trust before December 31, 1972, or if later, on or before the 30th day after the date on which any judicial proceedings begun before December 31, 1972, which are required to sever such property, become final.

(3) Amendment of post-1969 trusts. A trust created (within the meaning of applicable local law) subsequent to July 31, 1969, and prior to December 31, 1972, which is not a charitable remainder trust at the date of its creation, may be treated as a charitable remainder trust from the date it would be deemed created under § 1.664–1(a)(4) and (5)(i) for all purposes: *Provided,* That all the following requirements are met:

(i) At the time of the creation of the trust, the governing instrument provides that an organization described in section 170(c) receives an irrevocable remainder interest in such trust.

(ii) The governing instrument of the trust is amended so that the trust will meet the definition of a charitable remainder trust and, if applicable, will meet the requirement of paragraph (a)(5)(i) of this section that obligation to make payment of the annuity or unitrust amount with respect to property passing at death begin as of the date of death, before December 31, 1972, or if later, on or before the 30th day after the date on which any judicial proceedings which are begun before December 31, 1972, and which are required to amend its governing instrument, become final. In the case of a trust created (within the meaning of applicable local law) subsequent to July 31, 1969, and prior to December 31, 1972, the provisions of section 508(d)(2)(A) shall not apply if the governing instrument of the trust is amended so as to comply with the requirements of section 508(e) before December 31, 1972, or if later, on or before the 30th day after the date on which any judicial proceedings which are begun before December 31, 1972, and which are required to amend its governing instrument, become final. Notwithstanding the provisions of paragraphs (a)(3) and (a)(4) of §§ 1.664–2 and 1.664–3, the governing instrument may grant to the trustee a power to amend the governing instrument for the sole purpose of com-

plying with the requirements of this section and § 1.664–2 or § 1.664–3: Provided, That at the creation of the trust, the governing instrument (a) provides for the payment of a unitrust amount described in § 1.664–3(a)(1)(i) or an annuity which meets the requirements of paragraph (a)(2) of § 1.664–2 or § 1.664–3, (b) designates the recipients of the trust and the period for which the amount described in (a) of this subdivision (ii) is to be paid, and (c) provides that an organization described in section 170(c) receives an irrevocable remainder interest in such trust. The mere granting of such a power is not sufficient to meet the requirements of this subparagraph that the governing instrument be amended in the manner and within the time limitations of this subparagraph.

(iii)(a) Where the amount of the distributions which would have been made by the trust to a recipient if the amended provisions of such trust had been in effect from the time of creation of such trust exceeds the amount of the distributions made by the trust prior to its amendment, the trust pays an amount equal to such excess to the recipient.

(b) Where the amount of distributions made to the recipient prior to the amendment of the trust exceeds the amount of the distributions which would have been made by such trust if the amended provisions of such trust had been in effect from the time of creation of such trust, such excess is repaid to the trust by the recipient.

See paragraph (d)(4) of this section for rules relating to the year of inclusion in the case of an underpayment to a recipient and the allowance of a deduction in the case of an overpayment to a recipient. A deduction for a transfer to a charitable remainder trust shall not be allowed until the requirements of this paragraph are met and then only if the deduction is claimed on a timely filed return (including extensions) or on a claim for refund filed within the period of limitations prescribed by section 6511(a).

(g) Transitional effective date. Notwithstanding any other provision of this section, § 1.664–2 or § 1.664–3, the requirement of paragraph (a)(5)(i) of this section that interest accrue on overpayments and underpayments, the requirement of paragraph (a)(5)(ii) of this section that the unitrust amount accruing under the formula provided therein cease with the death of the last recipient, and the requirement that the governing instrument of the trust contain the provisions specified in paragraph (a)(1)(iv) of § 1.664–2 (relating to computation of the annuity amount in certain circumstances), paragraph (a)(1)(v) of § 1.664–3 (relating to computation of the unitrust amount in certain circumstances), paragraphs (b) of §§ 1.664–2 and 1.664–3 (relating to additional contributions), and paragraph (a)(1)(iii) of § 1.664–3 (relating to incorrect valuations), paragraphs (a)(6)(iv) of §§ 1.664–2 and 1.664–3 (relating to alternative remaindermen) shall not apply to:

(1) A will executed on or before December 31, 1972, if:

(i) The testator dies before December 31, 1975, without having republished the will after December 31, 1972, by codicil or otherwise,

(ii) The testator at no time after December 31, 1972, had the right to change the provisions of the will which pertain to the trust, or

(iii) The will is not republished by codicil or otherwise before December 31, 1975, and the testator is on such date and at all times thereafter under a mental disability to republish the will by codicil or otherwise, or

(2) A trust executed on or before December 31, 1972, if:

(i) The grantor dies before December 31, 1975, without having amended the trust after December 31, 1972,

(ii) The trust is irrevocable on December 31, 1972, or

(iii) The trust is not amended before December 31, 1975, and the grantor is on such date and at all times thereafter under a mental disability to change the terms of the trust.

[T.D. 7202, 37 FR 16913, Aug. 23, 1972; 37 FR 28288, Dec. 22, 1972; T.D. 7955, 49 FR 19983, May 11, 1984]

§ 1.664–2 Charitable remainder annuity trust.

(a) Description. A charitable remainder annuity trust is a trust which complies with the applicable provisions of § 1.664–1 and meets all of the following requirements:

(1) Required payment of annuity amount—(i) Payment of sum certain at least annually. The governing instrument provides that the trust shall pay a sum certain not less often than annually to a person or persons described in subparagraph (3) of this paragraph for each taxable year of the period specified in subparagraph (5) of this paragraph. The trust will not be deemed to have engaged in an act of self-dealing (within the meaning of section 4941), to have unrelated debt-financed income

(within the meaning of section 514), to have received an additional contribution (within the meaning of § 1.664–2(b)), or to have failed to function exclusively as a charitable remainder trust (within the meaning of § 1.664–1(a)(4)) merely because payment of the annuity amount is made after the close of the taxable year: Provided, That such payment is made within a reasonable time after the close of such taxable year. For purposes of the preceding sentence, a reasonable time will not ordinarily extend beyond the date by which the trustee is required to file Form 1041–B (including extensions) for such year.

(ii) Definition of sum certain. A sum certain is a stated dollar amount which is the same either as to each recipient or as to the total amount payable for each year of such period. For example, a provision for an amount which is the same every year to A until his death and concurrently an amount which is the same every year to B until his death, with the amount to each recipient to terminate at his death, would satisfy the above rule. Similarly, provisions for an amount to A and B for their joint lives and then to the survivor would satisfy the above rule. In the case of a distribution to an organization described in section 170(c) at the death of a recipient or the expiration of a term of years, the governing instrument may provide for a reduction of the stated amount payable after such a distribution: Provided, That:

(a) The reduced amount payable is the same either as to each recipient or as to the total amount payable for each year of the balance of such period, and

(b) The requirements of subparagraph (2)(ii) of this paragraph are met.

(iii) Sum certain stated as a fraction or percentage. The stated dollar amount may be expressed as a fraction or a percentage of the initial net fair market value of the property irrevocably passing in trust as finally determined for Federal tax purposes. If the stated dollar amount is so expressed and such market value is incorrectly determined by the fiduciary, the requirement of this subparagraph will be satisfied if the governing instrument provides that in such event the trust shall pay to the recipient (in the case of an undervaluation) or be repaid by the recipient (in the case of an overvaluation) an amount equal to the difference between the amount which the trust should have paid the recipient if the correct value were used and the amount which the trust actually paid the recipient. Such payments or repayments must be made within a reasonable period after the final determination of such value. Any payment due to a recipient by reason of such incorrect valuation shall be considered to be a payment required to be distributed at the time of such final determination for purposes of paragraph (d)(4)(ii) of § 1.664–1. See paragraph (d)(4) of § 1.664–1 for rules relating to the year of inclusion of such payments and the allowance of a deduction for such repayments. See paragraph (b) of this section for rules relating to future contributions. For rules relating to required adjustments for underpayments or overpayments of the amount described in this paragraph in respect of payments made during a reasonable period of administration, see paragraph (a)(5) of § 1.664–1. The application of the rule permitting the stated dollar amount to be expressed as a fraction or a percentage of the initial net fair market value of the property irrevocably passing in trust as finally determined for Federal tax purposes may be illustrated by the following example:

Example. The will of X provides for the transfer of one-half of his residuary estate to a charitable remainder annuity trust which is required to pay to W for life an annuity equal to 5 percent of the initial net fair market value of the interest passing in trust as finally determined for Federal tax purposes. The annuity is to be paid on December 31 of each year computed from the date of X's death. The will also provides that if such initial net fair market value is incorrectly determined, the trust shall pay to W, in the case of an undervaluation, or be repaid by W, in the case of an overvaluation, an amount equal to the difference between the amount which the trust should have paid if the correct value were used and the amount which the trust actually paid. X dies on March 1, 1971. The executor files an estate tax return showing the value of the residuary estate as $250,000 before reduction for taxes and expenses of $50,000. The executor paid to W $4,192 ([$250,000–$50,000]×1/2×5 percent×306/365) on December 31, 1971. On January 1, 1972, the executor transfers one-half of the residue of the estate to the trust. The trust adopts the calendar year as its taxable year. The value of the residuary estate is finally determined for Federal tax purposes to be $240,000 ($290,000–$50,000). Accordingly, the amount which the executor should have paid to W is $5,030 ([$290,000–$50,-000]×1/2×5 percent×306/365). Consequently, an additional amount of $838 ($5,030–$4,192) must be paid to W within a reasonable period after the final determination of value for Federal tax purposes.

(iv) Computation of annuity amount in certain circumstances—(a) Short taxable years. The governing instrument provides that, in the case of a taxable year which is for a period of less than 12 months other than the taxable year in which occurs the end of the period specified in subparagraph (5) of this paragraph, the annuity amount determined under subdivision (i) of this subparagraph shall be the amount otherwise determined under that subdivision multiplied by a fraction the numerator of which is the number of days in the taxable year of the trust and the denominator of

which is 365 (366 if February 29 is a day included in the numerator).

(b) Last taxable year of period. The governing instrument provides that, in the case of the taxable year in which occurs the end of the period specified in subparagraph (5) of this paragraph, the annuity amount which must be distributed under subdivision (i) of this subparagraph shall be the amount otherwise determined under that subdivision multiplied by a fraction the numerator of which is the number of days in the period beginning on the first day of such taxable year and ending on the last day of the period specified in subparagraph (5) of this paragraph and the denominator of which is 365 (366 if February 29 is a day included in the numerator). See subparagraph (5) of this paragraph for a special rule allowing termination of payment of the annuity amount with the regular payment next preceding the termination of the period specified therein.

(2) Minimum annuity amount—(i) General rule. The total amount payable under subparagraph (1) of this paragraph is not less than 5 percent of the initial net fair market value of the property placed in trust as finally determined for Federal tax purposes.

(ii) Reduction of annuity amount in certain cases. A trust will not fail to meet the requirements of this subparagraph by reason of the fact that it provides for a reduction of the stated amount payable upon the death of a recipient or the expiration of a term of years provided that:

(a) A distribution is made to an organization described in section 170(c) at the death of such recipient or the expiration of such term of years, and

(b) The total amounts payable each year under subparagraph (1) of this paragraph after such distribution are not less than a stated dollar amount which bears the same ratio to 5 percent of the initial net fair market value of the trust assets as the net fair market value of the trust assets immediately after such distribution bears to the net fair market value of the trust assets immediately before such distribution.

(iii) Rule applicable to inter vivos trust which does not provide for payment of minimum annuity amount. In the case where the grantor of an inter vivos trust underestimates in good faith the initial net fair market value of the property placed in trust as finally determined for Federal tax purposes and specifies a fixed dollar amount for the annuity which is less than 5 percent of the initial net fair market value of the property placed in trust as finally determined for Federal tax purposes, the trust will be deemed to have met the 5 percent requirement if the grantor or his representative consents, by appropriate agreement with the District Director, to accept an amount equal to 20 times the annuity as the fair market value of the property placed in trust for purposes of determining the appropriate charitable contributions deduction.

(3) Permissible recipients—(i) General rule. The amount described in subparagraph (1) of this paragraph is payable to or for the use of a named person or persons, at least one of which is not an organization described in section 170(c). If the amount described in subparagraph (1) of this paragraph is to be paid to an individual or individuals, all such individuals must be living at the time of the creation of the trust. A named person or persons may include members of a named class provided that, in the case of a class which includes any individual, all such individuals must be alive and ascertainable at the time of the creation of the trust unless the period for which the annuity amount is to be paid to such class consists solely of a term of years. For example, in the case of a testamentary trust, the testator's will may provide that an amount shall be paid to his children living at his death.

(ii) Power to alter amount paid to recipients. A trust is not a charitable remainder annuity trust if any person has the power to alter the amount to be paid to any named person other than an organization described in section 170(c) if such power would cause any person to be treated as the owner of the trust, or any portion thereof, if Subpart E, Part 1, Subchapter J, Chapter 1, Subtitle A of the Code were applicable to such trust. See paragraph (a)(4) of this section for a rule permitting the retention by a grantor of a testamentary power to revoke or terminate the interest of any recipient other than an organization described in section 170(c). For example, the governing instrument may not grant the trustee the power to allocate the annuity among members of a class unless such power falls within one of the exceptions to section 674(a).

(4) Other payments. No amount other than the amount described in subparagraph (1) of this paragraph may be paid to or for the use of any person other than an organization described in section 170(c). An amount is not paid to or for the use of any person other than an organization described in section 170(c) if the amount is transferred for full and adequate consideration. The

trust may not be subject to a power to invade, alter, amend, or revoke for the beneficial use of a person other than an organization described in section 170(c). Notwithstanding the preceding sentence, the grantor may retain the power exercisable only by will to revoke or terminate the interest of any recipient other than an organization described in section 170(c). The governing instrument may provide that any amount other than the amount described in subparagraph (1) of this paragraph shall be paid (or may be paid in the discretion of the trustee) to an organization described in section 170(c) provided that in the case of distributions in kind, the adjusted basis of the property distributed is fairly representative of the adjusted basis of the property available for payment on the date of payment. For example, the governing instrument may provide that a portion of the trust assets may be distributed currently, or upon the death of one or more recipients, to an organization described in section 170(c).

(5) Period of payment of annuity amount—(i) General rules. The period for which an amount described in subparagraph (1) of this paragraph is payable begins with the first year of the charitable remainder trust and continues either for the life or lives of a named individual or individuals or for a term of years not to exceed 20 years. Only an individual or an organization described in section 170(c) may receive an amount for the life of an individual. If an individual receives an amount for life, it must be solely for his life. Payment of the amount described in subparagraph (1) of this paragraph may terminate with the regular payment next preceding the termination of the period described in this subparagraph. The fact that the recipient may not receive such last payment shall not be taken into account for purposes of determining the present value of the remainder interest. In the case of an amount payable for a term of years, the length of the term of years shall be ascertainable with certainty at the time of the creation of the trust, except that the term may be terminated by the death of the recipient or by the grantor's exercise by will of a retained power to revoke or terminate the interest of any recipient other than an organization described in section 170(c). In any event, the period may not extend beyond either the life or lives of a named individual or individuals or a term of years not to exceed 20 years. For example, the governing instrument may not provide for the payment of an annuity amount to A for his life and then to B for a term of years because it is possible for the period to last longer than either the lives of recipients in being at the creation of the trust or a term of years not to exceed 20 years. On the other hand, the governing instrument may provide for the payment of an annuity amount to A for his life and then to B for his life or a term of years (not to exceed 20 years), whichever is shorter (but not longer), if both A and B are in being at the creation of the trust because it is not possible for the period to last longer than the lives of recipients in being at the creation of the trust.

(ii) Relationship to 5 percent requirement. The 5 percent requirement provided in subparagraph (2) of this paragraph must be met until the termination of all of the payments described in subparagraph (1) of this paragraph. For example, the following provisions would satisfy the above rules:

(a) An amount equal to at least 5 percent of the initial net fair market value of the property placed in trust to A and B for their joint lives and then to the survivor for his life;

(b) An amount equal to at least 5 percent of the initial net fair market value of the property placed in trust to A for life or for a term of years not longer than 20 years, whichever is longer (or shorter);

(c) An amount equal to at least 5 percent of the initial net fair market value of the property placed in trust to A for a term of years not longer than 20 years and then to B for life (provided B was living at the date of creation of the trust);

(d) An amount to A for his life and concurrently an amount to B for his life (the amount to each recipient to terminate at his death) if the amount given to each individual is not less than 5 percent of the initial net fair market value of the property placed in trust; or

(e) An amount to A for his life and concurrently an equal amount to B for his life, and at the death of the first to die, the trust to distribute one-half of the then value of its assets to an organization described in section 170(c), if the total of the amounts given to A and B is not less than 5 percent of the initial net fair market value of the property placed in trust.

(6) Permissible remaindermen—(i) General rule. At the end of the period specified in subparagraph (5) of this paragraph the entire corpus of the trust is required to be irrevocably transferred, in whole or in part, to or for the use of one or more organizations described in section 170(c) or retained, in whole or in part, for such use.

(ii) Treatment of trust. If all of the trust corpus is to be retained for such use, the taxable year

of the trust shall terminate at the end of the period specified in subparagraph (5) of this paragraph and the trust shall cease to be treated as a charitable remainder trust for all purposes. If all or any portion of the trust corpus is to be transferred to or for the use of such organization or organizations, the trustee shall have a reasonable time after the period specified in subparagraph (5) of this paragraph to complete the settlement of the trust. During such time, the trust shall continue to be treated as a charitable remainder trust for all purposes, such as sections 664, 4947(a)(2), and 4947(b)(3)(B). Upon the expiration of such period, the taxable year of the trust shall terminate and the trust shall cease to be treated as a charitable remainder trust for all purposes. If the trust continues in existence, it will be subject to the provisions of section 4947(a)(1) unless the trust is exempt from taxation under section 501(a). For purposes of determining whether the trust is exempt under section 501(a) as an organization described in section 501(c)(3), the trust shall be deemed to have been created at the time it ceases to be treated as a charitable remainder trust.

(iii) Concurrent or successive remaindermen. Where interests in the corpus of the trust are given to more than one organization described in section 170(c) such interests may be enjoyed by them either concurrently or successively.

(iv) Alternative remaindermen. The governing instrument shall provide that if an organization to or for the use of which the trust corpus is to be transferred or for the use of which the trust corpus is to be retained is not an organization described in section 170(c) at the time any amount is to be irrevocably transferred to or for the use of such organization, such amount shall be transferred to or for the use of one or more alternative organizations which are described in section 170(c) at such time or retained for such use. Such alternative organization or organizations may be selected in any manner provided by the terms of the governing instrument.

(b) Additional contributions. A trust is not a charitable remainder annuity trust unless its governing instrument provides that no additional contributions may be made to the charitable remainder annuity trust after the initial contribution. For purposes of this section, all property passing to a charitable remainder annuity trust by reason of death of the grantor shall be considered one contribution.

(c) Calculation of the fair market value of the remainder interest of a charitable remainder annuity trust. For purposes of sections 170, 2055, 2106, and 2522, the fair market value of the remainder interest of a charitable remainder annuity trust (as described in this section) is the net fair market value (as of the appropriate valuation date) of the property placed in trust less the present value of the annuity. For purposes of this section, the term "appropriate valuation date" means the date on which the property is transferred to the trust by the donor except that, for purposes of section 2055 or 2106, it means the date of death unless the alternate valuation date is elected in accordance with section 2032 and the regulations thereunder in which event it means the alternate valuation date. The present value of an annuity is computed under § 20.2031–7 or § 20.2031–10, whichever is appropriate, of the Estate Tax Regulations regardless of when the trust was created.

(d) Deduction for transfers to a charitable remainder annuity trust. For rules relating to a deduction for transfers to a charitable remainder annuity trust, see sections 170, 2055, 2106, or 2522 and the regulations thereunder. Any claim for deduction on any return for the value of a remainder interest in a charitable remainder annuity trust must be supported by a full statement attached to the return showing the computation of the present value of such interest. The deduction allowed by section 170 is limited to the fair market value of the remainder interest of a charitable remainder annuity trust regardless of whether an organization described in section 170(c) also receives a portion of the annuity. For a special rule relating to the reduction of the amount of a charitable contribution deduction with respect to a contribution of certain ordinary income property or capital gain property, see sections 170(e)(1)(A) or 170(e)(1)(B)(i) and the regulations thereunder. For rules for postponing the time for deduction of a charitable contribution of a future interest in tangible personal property, see section 170(a)(3) and the regulations thereunder.

[T.D. 7202, 37 FR 16918, Aug. 23, 1972, as amended by T.D. 7955, 49 FR 19983, May 11, 1984]

§ 1.664–3 Charitable remainder unitrust.

(a) Description. A charitable remainder unitrust is a trust which complies with the applicable provisions of § 1.664–1 and meets all of the following requirements:

(1) Required payment of unitrust amount—(i) Payment of fixed percentage at least annually—(a) General rule. The governing instrument provides that the trust shall pay not less often than annually a fixed percentage of the net fair market value of

the trust assets determined annually to a person or persons described in subparagraph (3) of this paragraph for each taxable year of the period specified in subparagraph (5) of this paragraph. The trust will not be deemed to have engaged in an act of self-dealing (within the meaning of section 4941), to have unrelated debt-financed income (within the meaning of section 4941), to have received an additional contribution (within the meaning of § 1.664–3(b)), or to have failed to function exclusively as a charitable remainder trust (within the meaning of § 1.664–1(a)(4)) merely because payment of the unitrust amount is made after the close of the taxable year: Provided, That such payment is made within a reasonable time after the close of such taxable year. For purposes of the preceding sentence, a reasonable time will not ordinarily extend beyond the date by which the trustee is required to file Form 1041–B (including extensions) for such year.

(b) Income exception. Instead of the amount described in (a) of this subdivision (i), the governing instrument may provide that the trust shall pay for any year either the amount described in (1) or the total of the amounts described in (1) and (2) of this subdivision (b).

(1) The amount of trust income (as defined in section 643(b) and the regulations thereunder), for a taxable year to the extent that such amount is not more than the amount required to be distributed under (a) of this subdivision (i).

(2) An amount of trust income for a taxable year which is in excess of the amount required to be distributed under (a) of this subdivision (i) for such year, to the extent that (by reason of (1)) the aggregate of the amounts paid in prior years was less than the aggregate of such required amounts.

(ii) Definition of fixed percentage. The fixed percentage may be expressed either as a fraction or as a percentage and must be payable each year in the period specified in subparagraph (5) of this paragraph. A percentage is fixed if the percentage is the same either as to each recipient or as to the total percentage payable each year of such period. For example, provision for a fixed percentage which is the same every year to A until his death and concurrently a fixed percentage which is the same every year to B until his death, the fixed percentage to each recipient to terminate at his death, would satisfy the rule. Similarly, provision for a fixed percentage to A and B for their joint lives and then to the survivor would satisfy the rule. In the case of a distribution to an organization described in section 170(c) at the death of a recipient or the expiration of a term of years, the governing instrument may provide for a reduction of the fixed percentage payable after such distribution Provided That:

(a) The reduced fixed percentage is the same either as to each recipient or as to the total amount payable for each year of the balance of such period, and

(b) The requirements of subparagraph (2)(ii) of this paragraph are met.

(iii) Rules applicable to incorrect valuations. The governing instrument provides that in the case where the net fair market value of the trust assets is incorrectly determined by the fiduciary, the trust shall pay to the recipient (in the case of an undervaluation) or be repaid by the recipient (in the case of an overvaluation) an amount equal to the difference between the amount which the trust should have paid the recipient if the correct value were used and the amount which the trust actually paid the recipient. Such payments or repayments must be made within a reasonable period after the final determination of such value. Any payment due to a recipient by reason of such incorrect valuation shall be considered to be a payment required to be distributed at the time of such final determination for purposes of paragraph (d)(4)(ii) of § 1.664–1. See paragraph (d)(4) of § 1.664–1 for rules relating to the year of inclusion of such payments and the allowance of a deduction for such repayments. See paragraph (b) of this section for rules relating to additional contributions.

(iv) Rules applicable to valuation. In computing the net fair market value of the trust assets there shall be taken into account all assets and liabilities without regard to whether particular items are taken into account in determining the income of the trust. The net fair market value of the trust assets may be determined on any one date during the taxable year of the trust, or by taking the average of valuations made on more than one date during the taxable year of the trust, so long as the same valuation date or dates and valuation methods are used each year. If the governing instrument does not specify the valuation date or dates, the trustee shall select such date or dates and shall indicate his selection on the first return on Form 1041–B which the trust is required to file. The amount described in subdivision (i)(a) of this subparagraph which must be paid each year must be based upon the valuation for such year.

(v) Computation of unitrust amount in certain circumstances—(a) Short taxable years. The governing instrument provides that, in the case of a

taxable year which is for a period of less than 12 months other than the taxable year in which occurs the end of the period specified in subparagraph (5) of this paragraph:

(1) The amount determined under subdivision (i)(a) of this subparagraph shall be the amount otherwise determined under that subdivision multiplied by a fraction the numerator of which is the number of days in the taxable year of the trust and the denominator of which is 365 (366 if February 29 is a day included in the numerator),

(2) The amount determined under subdivision (i)(b) of this subparagraph shall be computed by using the amount determined under subdivision (a)(1) of this subdivision (v), and

(3) If no valuation date occurs before the end of the taxable year of the trust, the trust assets shall be valued as of the last day of the taxable year of the trust.

(b) Last taxable year of period. (1) The governing instrument provides that, in the case of the taxable year in which occurs the end of the period specified in subparagraph (5) of this paragraph:

(i) The unitrust amount which must be distributed under subdivision (i)(a) of this subparagraph shall be the amount otherwise determined under that subdivision multiplied by a fraction the numerator of which is the number of days in the period beginning on the first day of such taxable year and ending on the last day of the period specified in subparagraph (5) of this paragraph and the denominator of which is 365 (366 if February 29 is a day included in the numerator),

(ii) The amount determined under subdivision (i)(b) of this subparagraph shall be computed by using the amount determined under (b)(1)(i) of this subdivision (v), and

(iii) If no valuation date occurs before the end of such period, the trust assets shall be valued as of the last day of such period.

(2) See subparagraph (5) of this paragraph for a special rule allowing termination of payment of the unitrust amount with the regular payment next preceding the termination of the period specified therein.

(2) Minimum unitrust amount—(i) General rule. The fixed percentage described in subparagraph (1)(i) of this paragraph with respect to all beneficiaries taken together is not less than 5 percent.

(ii) Reduction of unitrust amount in certain cases. A trust will not fail to meet the requirements of this subparagraph by reason of the fact that it provides for a reduction of the fixed percentage payable upon the death of a recipient or the expiration of a term of years Provided That:

(a) A distribution is made to an organization described in section 170(c) at the death of such recipient or the expiration of such term of years, and

(b) The total of the percentage payable under subparagraph (1) of this paragraph after such distribution is not less than 5 percent.

(3) Permissible recipients—(i) General rule. The amount described in subparagraph (1) of this paragraph is payable to or for the use of a named person or persons, at least one of which is not an organization described in section 170(c). If the amount described in subparagraph (1) of this paragraph is to be paid to an individual or individuals, all such individuals must be living at the time of creation of the trust. A named person or persons may include members of a named class except in the case of a class which includes any individual, all such individuals must be alive and ascertainable at the time of the creation of the trust unless the period for which the unitrust amount is to be paid to such class consists solely of a term of years. For example, in the case of a testamentary trust, the testator's will may provide that the required amount shall be paid to his children living at his death.

(ii) Power to alter amount paid to recipients. A trust is not a charitable remainder unitrust if any person has the power to alter the amount to be paid to any named person other than an organization described in section 170(c) if such power would cause any person to be treated as the owner of the trust, or any portion thereof, if Subpart E, Part 1, Subchapter J, Chapter 1, Subtitle A of the Code were applicable to such trust. See paragraph (a)(4) of this section for a rule permitting the retention by a grantor of a testamentary power to revoke or terminate the interest of any recipient other than an organization described in section 170(c). For example, the governing instrument may not grant the trustee the power to allocate the fixed percentage among members of a class unless such power falls within one of the exceptions to section 674(a).

(4) Other payments. No amount other than the amount described in subparagraph (1) of this paragraph may be paid to or for the use of any person other than an organization described in section 170(c). An amount is not paid to or for the use of any person other than an organization

described in section 170(c) if the amount is transferred for full and adequate consideration. The trust may not be subject to a power to invade, alter, amend, or revoke for the beneficial use of a person other than an organization described in section 170(c). Notwithstanding the preceding sentence, the grantor may retain the power exercisable only by will to revoke or terminate the interest of any recipient other than an organization described in section 170(c). The governing instrument may provide that any amount other than the amount described in subparagraph (1) of this paragraph shall be paid (or may be paid in the discretion of the trustee) to an organization described in section 170(c) provided that, in the case of distributions in kind, the adjusted basis of the property distributed is fairly representative of the adjusted basis of the property available for payment on the date of payment. For example, the governing instrument may provide that a portion of the trust assets may be distributed currently, or upon the death of one or more recipients, to an organization described in section 170(c).

(5) Period of payment of unitrust amount—(i) General rules. The period for which an amount described in subparagraph (1) of this paragraph is payable begins with the first year of the charitable remainder trust and continues either for the life or lives of a named individual or individuals or for a term of years not to exceed 20 years. Only an individual or an organization described in section 170(c) may receive an amount for the life of an individual. If an individual receives an amount for life, it must be solely for his life. Payment of the amount described in subparagraph (1) of this paragraph may terminate with the regular payment next preceding the termination of the period described in this subparagraph. The fact that the recipient may not receive such last payment shall not be taken into account for purposes of determining the present value of the remainder interest. In the case of an amount payable for a term of years, the length of the term of years shall be ascertainable with certainty at the time of the creation of the trust, except that the term may be terminated by the death of the recipient or by the grantor's exercise by will of a retained power to revoke or terminate the interest of any recipient other than an organization described in section 170(c). In any event, the period may not extend beyond either the life or lives of a named individual or individuals or a term of years not to exceed 20 years. For example, the governing instrument may not provide for the payment of a unitrust amount to A for his life and then to B for a term of years because it is possible for the period to last longer than either the lives of recipients in being at the creation of the trust or a term of years not to exceed 20 years. On the other hand, the governing instrument may provide for the payment of a unitrust amount to A for his life and then to B for his life or a term of years (not to exceed 20 years), whichever is shorter (but not longer), if both A and B are in being at the creation of the trust because it is not possible for the period to last longer than the lives of recipients in being at the creation of the trust.

(ii) Relationship to 5 percent requirement. The 5 percent requirement provided in subparagraph (2) of this paragraph must be met until the termination of all of the payments described in subparagraph (1) of this paragraph. For example, the following provisions would satisfy the above rules:

(a) A fixed percentage of at least 5 percent to A and B for their joint lives and then to the survivor for his life;

(b) A fixed percentage of at least 5 percent to A for life or for a term of years not longer than 20 years, whichever is longer (or shorter);

(c) A fixed percentage of at least 5 percent to A for life or for a term of years not longer than 20 years and then to B for life (provided B was living at the creation of the trust);

(d) A fixed percentage to A for his life and concurrently a fixed percentage to B for his life (the percentage to each recipient to terminate at his death) if the percentage given to each individual is not less than 5 percent;

(e) A fixed percentage to A for his life and concurrently an equal percentage to B for his life, and at the death of the first to die, the trust to distribute one-half of the then value of its assets to an organization described in section 170(c) if the total of the percentages is not less than 5 percent for the entire period described in this subparagraph.

(6) Permissible remaindermen—(i) General rule. At the end of the period specified in subparagraph (5) of this paragraph, the entire corpus of the trust is required to be irrevocably transferred, in whole or in part, to or for the use of one or more organizations described in section 170(c) or retained, in whole or in part, for such use.

(ii) Treatment of trust. If all of the trust corpus is to be retained for such use, the taxable year of the trust shall terminate at the end of the period specified in subparagraph (5) of this paragraph and the trust shall cease to be treated as a charita-

ble remainder trust for all purposes. If all or any portion of the trust corpus is to be transferred to or for the use of such organization or organizations, the trustee shall have a reasonable time after the period specified in subparagraph (5) of this paragraph to complete the settlement of the trust. During such time, the trust shall continue to be treated as a charitable remainder trust for all purposes, such as section 664, 4947(a)(2), and 4947(b)(3)(B). Upon the expiration of such period, the taxable year of the trust shall terminate and the trust shall cease to be treated as a charitable remainder trust for all purposes. If the trust continues in existence, it will be subject to the provisions of section 4947(a)(1) unless the trust is exempt from taxation under section 501(a). For purposes of determining whether the trust is exempt under section 501(a) as an organization described in section 501(c)(3), the trust shall be deemed to have been created at the time it ceases to be treated as a charitable remainder trust.

(iii) Concurrent or successive remaindermen. Where interests in the corpus of the trust are given to more than one organization described in section 170(c) such interests may be enjoyed by them either concurrently or successively.

(iv) Alternative remaindermen. The governing instrument shall provide that if an organization to or for the use of which the trust corpus is to be transferred or for the use of which the trust corpus is to be retained is not an organization described in section 170(c) at the time any amount is to be irrevocably transferred to or for the use of such organization, such amount shall be transferred to or for the use of or retained for the use of one or more alternative organizations which are described in section 170(c) at such time. Such alternative organization or organizations may be selected in any manner provided by the terms of the governing instrument.

(b) Additional contributions. A trust is not a charitable remainder annuity trust unless its governing instrument either prohibits additional contributions to the trust after the initial contribution or provides that for the taxable year of the trust in which the additional contribution is made:

(1) Where no valuation date occurs after the time of the contribution and during the taxable year in which the contribution is made, the additional property shall be valued as of the time of contribution; and

(2) The amount described in paragraph (a)(1)(i)(a) of this section shall be computed by multiplying the fixed percentage by the sum of (i) the net fair market value of the trust assets (excluding the value of the additional property and any earned income from and any appreciation on such property after its contribution), and (ii) that proportion of the value of the additional property (that was excluded under subdivision (i) of this paragraph), which the number of days in the period which begins with the date of contribution and ends with the earlier of the last day of such taxable year or the last day of the period described in paragraph (a)(5) of this section bears to the number of days in the period which begins with the first day of such taxable year and ends with the earlier of the last day of such taxable year or the last day of the period described in paragraph (a)(5) of this section.

For purposes of this section, all property passing to a charitable remainder unitrust by reason of death of the grantor shall be considered one contribution. The application of the preceding rules may be illustrated by the following examples:

Example (1). On March 2, 1971, X makes an additional contribution of property to a charitable remainder unitrust. The taxable year of the trust is the calendar year and the regular valuation date is January 1 of each year. For purposes of computing the required payout with respect to the additional contribution for the year of contribution, the additional contribution is valued on March 2, 1971, the time of contribution. The property had a value on that date of $5,000. Income from such property in the amount of $250 was received on December 31, 1971. The required payout with respect to the additional contribution for the year of contribution is $208 (5 percent × $5,000 × 305/365). The income earned after the date of the contribution and after the regular valuation date does not enter into the computation.

Example (2). On July 1, 1971, X makes an additional contribution of $10,000 to a charitable remainder unitrust. The taxable year of the trust is the calendar year and the regular valuation date is December 31 of each year. The fixed percentage is 5 percent. Between July 1, 1971, and December 31, 1971, the additional property appreciates in value to $12,500 and earns $500 of income. Because the regular valuation date for the year of contribution occurs after the date of the additional contribution, the additional contribution including income earned by it is valued on the regular valuation date. Thus, the required payout with respect to the additional contribution is $325.87 (5 percent × [$12,500 + $500] × 183/365).

(c) Calculation of the fair market value of the remainder interest of a charitable remainder unitrust. See § 1.664–4 for rules relating to the calculation of the fair market value of the remainder interest of a charitable remainder unitrust.

(d) Deduction for transfers to a charitable remainder unitrust. For rules relating to a deduction for transfers to a charitable remainder unitrust, see sections 170, 2055, 2106, or 2522 and the regulations thereunder. The deduction allowed by section 170 for transfers to charity is limited to the fair market value of the remainder interest of a

charitable remainder unitrusts regardless of whether an organization described in section 170(c) also receives a portion of the amount described in § 1.664–3(a)(1). For a special rule relating to the reduction of the amount of a charitable contribution deduction with respect to a contribution of certain ordinary income property or capital gain property, see section 170(e)(1)(A) or (B)(i) and the regulations thereunder. For rules for postponing the time for deduction of a charitable contribution of a future interest in tangible personal property, see section 170(a)(3) and the regulations thereunder.

[T.D. 7202, 37 FR 16920, Aug. 23, 1972]

§ 1.664–4 Calculation of the fair market value of the remainder interest in a charitable remainder unitrust.

(a) General rule—(1) Rules for determining present value. Except as otherwise provided in paragraph (a)(2) of this section, for purposes of section 170, 2055, 2106, or 2522, the fair market value of a remainder interest in a charitable remainder unitrust (as described in § 1.664–3) is its present value determined under this section. The present value determined under this section shall be computed on the basis of—

(i) Life contingencies determined as to each life involved, from the values of lx set forth in column 2 of Table LN, paragraph (f) of § 20.2031–7 (columns 2 and 3, respectively, of Table LN of paragraph (f) of § 20.2031–10 for transfers made before December 1, 1983);

(ii) Interest at the rate of 10 percent (6 percent for transfers to charitable remainder unitrusts made before December 1, 1983); and

(iii) The assumption that the amount described in paragraph (a)(1)(i)(*a*) of § 1.664–3 shall be distributed in accordance with the payout sequence described in the governing instrument.

If the governing instrument does not prescribe when the distribution shall be made during the period for which the payment is made, for purposes of this section, the distribution shall be considered payable on the first day of the period for which the payment is made.

(2) Rules for determining present value for testamentary transfers where the decedent dies after November 30, 1983, and before August 9, 1984. For purposes of section 2055 or 2106, if—

(i) the decedent dies after November 30, 1983, and before August 9, 1984, or

(ii) on December 1, 1983, the decedent is under a mental disability such that the disposition of the property cannot be changed, and such decedent dies any time on or after December 1, 1983 without ever regaining competency to dispose of such decedent's property, or dies within 90 days of the date on which such decedent first regains competency, paragraph (a)(1)(ii) of this section shall be applied by substituting the phrase "6 percent or 10 percent, whichever is most beneficial to the taxpayer" for "10 percent." However, if the taxpayer uses 6 percent, the life contingencies under Table LN of § 20.2031–10(f) must be used.

(3) Valuation of charitable remainder unitrusts having certain payout sequences. The method of applying these principles to charitable remainder unitrusts which have certain payout sequences is set forth in paragraph (b) of this section.

(4) Commissioner may supply factor. If the computation of the value of the remainder interest of a charitable remainder unitrust requires the use of a factor which is not provided in paragraph (b) of this section, the Commissioner may, if conditions permit, supply the factor upon request. The request must be accompanied by a statement of the date of birth and sex of each individual the duration of whose life may affect the value of the remainder interest and by copies of the relevant instruments. If the Commissioner furnishes the factor, a copy of the letter supplying the factor shall be attached to the tax return in which the deduction is claimed. A copy of the publication containing many such special factors, may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, D.C. 20402. If the Commissioner does not furnish the factor, the taxpayer must furnish a factor computed in accordance with the principles set forth in subparagraph (1) of this paragraph.

(5) Statement supporting deduction required. Any claim for deduction on any return for the value of a remainder interest in a charitable remainder unitrust must be supported by a full statement attached to the return showing the computation of the present value of such interest.

(b) Valuation of charitable remainder unitrusts having certain payout sequences; for transfers made after November 30, 1983—(1) In general. Except as otherwise provided in paragraph (c) of this section, for transfers made after November 30, 1983, the present value determined under this section of a remainder interest which is dependent on a term of years or the termination of the life of one individual shall be determined under para-

graphs (b)(1) through (5) of this section provided that the amount of the payout as of any payout date during any taxable year of the trust is not larger than the amount which the trust could distribute on such date under paragraph (a)(1)(v) of § 1.664–3 if the taxable year of the trust were to end on such date. The present value of the remainder interest in such trust shall be determined by computing the adjusted payout rate (as defined in paragraph (b)(2) of this section) and following the procedure outlined in paragraph (b)(3) or (b)(4) of this section, whichever is applicable. The present value of a remainder interest which is dependent on a term of years is computed under paragraph (b)(3) of this section. The present value of a remainder interest which is dependent on the termination of the life of one individual is computed under paragraph (b)(4) of this section. See paragraph (c) of this section for testamentary transfers occurring after November 30, 1983, and before August 9, 1984. For transfers made before December 1, 1983, see paragraphs (d)(1) through (5) of this section.

(2) **Adjusted payout rate.** The adjusted payout rate is determined by multiplying the fixed percentage described in paragraph (a)(1)(i)(*a*) of § 1.664–3 by the figure in column (2) of Table F(1) which describes the payout sequence of the trust opposite the number in column (1) of Table F(1) which corresponds to the number of months by which the valuation date for the first full taxable year of the trust precedes the first payout date for such taxable year. If the governing instrument does not prescribe when the distribution shall be made during the taxable year of the trust, see paragraph (a)(4) of this section. In the case of a trust having a payout sequence for which no figures have been provided by Table F(1) and in the case of a trust which determines the fair market value of the trust assets by taking the average of valuations on more than one date during the taxable year, see paragraph (a)(3) of this section.

(3) **Period is a term of years.** If the period described in paragraph (a)(5) of § 1.664–3 is a term of years, the factor which is used in determining the present value of the remainder interest is the factor under the appropriate adjusted payout rate in column (2) of Table D in paragraph (b)(5) of this section opposite the number in column (1) of Table D which corresponds to the number of years in the term. If the adjusted payout rate is an amount which is between adjusted payout rates for which factors are provided in Table D, a linear interpolation must be made. The present value of the remainder interest is determined by multiplying the net fair market value (as of the appropriate valuation date) of the property placed in trust by the factor determined under this paragraph (b)(3). For purposes of this section, the term "appropriate valuation date" means the date on which the property is transferred to the trust by the donor except that, for purposes of section 2055 or 2106, it means the date of death unless the alternate valuation date is elected in accordance with section 2032 and the regulations thereunder in which event it means the alternate valuation date. If the adjusted payout rate is greater than 15 percent, see paragraph (a)(4) of this section. The application of this paragraph (b)(3) may be illustrated by the following example:

Example. D transfers $100,000 to a charitable remainder unitrust on January 1, 1985. The trust instrument requires that the trust pay to D semiannually (on June 30 and December 31) 10 percent of the fair market value of the trust assets as of June 30th for a term of 15 years. The adjusted payout rate is 9.767 percent (10% x 0.976731). The present value of the remainder interest is $21,404.90, computed as follows:

Factor at 9.6 percent for 15 years	0.220053
Factor at 9.8 percent for 15 years	.212862
Difference	.007191

$$\frac{9.767\% - 9.6\%}{0.2\%} = \frac{X}{.007191}$$

0.2% = .007191

X = .006004

Factor at 9.6 percent for 15 years	0.220053
Less: X	.006004
Interpolated factor	.214049

Present value of remainder interest = $100,000 × 0.214049 = $21,404.90

(4) **Period is the life of one individual.** If the period described in paragraph (a)(5) of § 1.664–3 is the life of one individual, the factor which is used in determining the present value of the remainder interest is the factor under the appropriate adjusted payout rate in column (2) of Table E in paragraph (b)(5) of this section opposite the number in column (1) which corresponds to the age of the individual whose life measures the period. For purposes of the computations described in this paragraph (b)(4), the age of an individual is to be taken as the age of that individual at the individual's nearest birthday. If the adjusted payout rate is an amount which is between adjusted payout rates for which factors are provided for in Table E, a linear interpolation must be made. The present value of the remainder interest is determined by multiplying the net fair market value (as of the appropriate valuation date) of the property placed in trust by the factor determined under this paragraph (b)(4). If the adjusted payout rate is greater than 14 percent, see

paragraph (a)(4) of this section. The application of this paragraph may be illustrated by the following example:

Example. A, who will be 50 years old on April 15, 1985, transfers $100,000 to a charitable remainder unitrust on January 1, 1985. The trust instrument requires that the trust pay to A at the end of each taxable year of the trust 10 percent of the fair market value of the trust assets as of the beginning of each taxable year of the trust. The adjusted payout rate is 9.091 percent (10 percent × .909091). The present value of the remainder interest is $15,259.00 computed as follows:

Factor at 9 percent at age 50	0.15472
Factor at 9.2 percent at age 50	.15003
Difference	.00469

$$9.091\% - 9\% \div 0.2\% = X \div 0.00469$$
$$x = 0.00213$$

Factor at 9 percent at age 50	.15472
Less: X	.00213
Interpolated factor	.15259

Present value of remainder interest = $100,000 × 0.15259 = $15,259.00

(5) Actuarial Tables. The following tables shall be used in the application of the provisions of this section:

TABLE D.—TABLE SHOWING THE PRESENT WORTH OF A REMAINDER INTEREST POSTPONED FOR A TERM OF YEARS IN A CHARITABLE REMAINDER UNITRUST HAVING THE ADJUSTED PAYOUT RATE SHOWN

(c) Valuation of charitable remainder unitrusts having certain payout sequences; for testamentary transfers made after November 30, 1983, and before August 9, 1984. For purposes of section 2055 or 2106, if—

(1) the testamentary transfer occurred after November 30, 1983, and before August 9, 1984, or

(2) on December 1, 1983, a decedent was under a mental disability such that the disposition of the property could not be changed, and the testamentary transfer occurs any time on or after December 1, 1983 without such decedent ever having regained competency to dispose of such decedent's property, or having died within 90 days of the date on which such decedent first regains competency,

the present value determined under this section of a remainder interest shall be determined in accordance with paragraphs (b)(1) through (5) or (d)(1) through (5) of this section, whichever is most beneficial to the taxpayer.

(d) Valuation of charitable remainder unitrusts having certain payout sequences; for transfer made before December 1, 1983—(1) In general. For transfers made before December 1, 1983, the present value determined under this section of a remainder interest which is dependent on a term of years or the termination of the life of one individual shall be determined under paragraphs (d)(1) through (5) of this section provided that the amount of the payout as of any payout date during any taxable year of the trust is not larger than the amount which the trust could distribute on such date under paragraph (a)(1)(v) of § 1.644–3 if the taxable year of the trust were to end on such date. The present value of the remainder interest in such trust shall be determined by computing the adjusted payout rate (as defined in subparagraph (2) of this paragraph) and following the procedure outlined in subparagraph (3) or (4) of this paragraph, whichever is applicable. The present value of a

remainder interest which is dependent on a term of years is computed under subparagraph (3) of this paragraph. The present value of a remainder interest which is dependent on the termination of the life of one individual is computed under subparagraph (4) of this paragraph. For transfers made after November 30, 1983, see paragraphs (b)(1) through (5) and (c) of this section.

(2) Adjusted payout rate. The adjusted payout rate is determined by multiplying the fixed percentage described in paragraph (a)(1)(i)(a) of § 1.664–3 by the figure in column (2) of Table F which describes the payout sequence of the trust opposite the number in column (1) of Table F which corresponds to the number of months by which the valuation date for the first full taxable year of the trust precedes the first payout date for such taxable year. If the governing instrument does not prescribe when the distribution shall be made during the taxable year of the trust, see paragraph (a)(4) of this section. In the case of a trust having a payout sequence for which no figures have been provided by Table F and in the case of a trust which determines the fair market value of the trust assets by taking the average of valuations on more than one date during the taxable year, see paragraph (a)(3) of this section.

(3) Period is a term of years. If the period described in paragraph (a)(5) of § 1.664–3 is a term of years, the factor which is used in determining the present value of the remainder interest is the factor under the appropriate adjusted payout rate in column (2) of Table D in subparagraph (5) of this paragraph opposite the number in column (1) of Table D which corresponds to the number of years in the term. If the adjusted payout rate is an amount which is between adjusted payout rates for which factors are provided in Table D, a linear interpolation must be made. The present value of the remainder interest is determined by multiplying the net fair market value (as of the appropriate valuation date) of the property placed in trust by the factor determined under this subparagraph. For purposes of this section, the term "appropriate valuation date" means the date on which the property is transferred to the trust by the donor except that, for purposes of section 2055 or 2106, it means the date of death unless the alternate valuation date is elected in accordance with section 2032 and the regulations thereunder in which event it means the alternate valuation date. If the adjusted payout rate is greater than 9 percent, see paragraph (a)(4) of this section. The application of this paragraph may be illustrated by the following example:

Example. D transfers $100,000 to a charitable remainder unitrust on January 1, 1970. The trust instrument requires that the trust pay to D semiannually (on June 30 and December 31) 5 percent of the fair market value of the trust assets as of June 30th for a term of 15 years. The adjusted payout rate is 4.928 percent ($5\% \times 0.985643$). The present value of the remainder interest is $46,863.60, computed as follows:

Factor at 4.8 percent for 15 years	0.478139
Factor at 5.0 percent for 15 years	.463291
Difference	.014848

$$4.928\% - 4.8\% \div 0.2\% = X \div 0.014848$$
$$X = 0.009503$$

Factor at 4.8 percent for 15 years	.478139
Less: X	.009503
Interpolated factor	.468636

Present value of remainder interest = $100,000 × 0.468636 = $46,863.60.

(4) Period is the life of one individual. If the period described in paragraph (a)(5) of § 1.664–3 is the life of one individual, the factor which is used in determining the present value of the remainder interest is the factor under the appropriate adjusted payout rate in column (2) of Table E(1) or E(2) in paragraph (5) of this paragraph opposite the number in column (1) which corresponds to the age of the individual whose life measures the period. Table E(1) is to be used when the individual upon whose life the remainder interest is based is a male and Table E(2) is to be used when such individual is a female whose age is less than 95 years. In the case of a female whose age is more than 94 years, Table E(1) is to be used. For purposes of the computations described in this paragraph, the age of an individual is to be taken as the age of that individual at his nearest birthday. If the adjusted payout rate is an amount which is between adjusted payout rates for which factors are provided in Table E(1) or E(2), a linear interpolation must be made. The present value of the remainder interest is determined by multiplying the net fair market value (as of the appropriate valuation date) of the property placed in trust by the factor determined under this subparagraph. If the adjusted payout rate is greater than 9 percent, see paragraph (a)(4) of this section. The application of this paragraph may be illustrated by the following example:

Example. D, a male who will be 50 years old on April 15, 1970, transfers $100,000 to a charitable remainder unitrust on January 1, 1970. The trust instrument requires that the trust pay to D at the end of each taxable year of the trust 5 percent of the fair market value of the trust assets as of the beginning of each taxable year of the trust. The adjusted payout rate is 4.717 percent (5 percent × .943396). The present value of the remainder interest is $37,816, computed as follows:

Factor at 4.6 percent for male aged 50	0.38623
Factor at 4.8 percent for male aged 50	.37244
Difference	.01379

$$4.717\% - 4.6\% \div 0.2\% = X \div 0.01379$$
$$X = 0.00807$$

Factor at 4.6 percent for male aged 50	.38623
Less: X	.00807
Interpolated factor	.37816

Present value of remainder interest = $100,000 × 0.37816 = $37,816.

(5) The following tables shall be used in the application of the provisions of this section:

TABLE D

TABLE SHOWING THE PRESENT WORTH OF A REMAINDER INTEREST POSTPONED FOR A TERM OF YEARS IN A CHARITABLE REMAINDER UNITRUST HAVING THE ADJUSTED PAYOUT RATE SHOWN

§ 1.665(a)–0A Excess distributions by trusts; scope of subpart D.

(a) In general. (1) Subpart D (section 665 and following), part I, subchapter J, chapter 1 of the

Code as amended by the Tax Reform Act of 1969, is designed to tax the beneficiary of a trust that accumulates, rather than distributes, all or part of its income currently (*i.e.*, an accumulation trust), in most cases, as if the income had been currently distributed to the beneficiary instead of accumulated by the trusts. Accordingly, subpart D provides special rules for the treatment of amounts paid, credited, or required to be distributed by a complex trust (one that is subject to subpart C (section 661 and following) of such part I) in any year in excess of "distributable net income" (as defined in section 643(a)) for that year. Such an excess distribution is an "accumulation distribution" (as defined in section 665(b)). The special rules of subpart D are generally inapplicable to amounts paid, credited, or required to be distributed by a trust in a taxable year in which it qualifies as a simple trust (one that is subject to subpart B (section 651 and following) of such part I). However, see § 1.665(e)–1A(b) for rules relating to the treatment of a simple trust as a complex trust.

(2) An accumulation distribution is deemed to consist of, first, "undistributed net income" (as defined in section 665(a)) of the trust from preceding taxable years, and, after all the undistributed net income for all preceding taxable years has been deemed distributed, "undistributed capital gain" (as defined in section 665(f)) of the trust for all preceding taxable years commencing with the first year such amounts were accumulated. An accumulation distribution of undistributed capital gain is a "capital gain distribution" (as defined in section 665(g)). To the extent an accumulation distribution exceeds the "undistributed net income" and "undistributed capital gain" so determined, it is deemed to consist of corpus.

(3) The accumulation distribution is "thrown back" to the earliest "preceding taxable year" of the trust, which, in the case of distributions made for a taxable year beginning after December 31, 1973, from a trust (other than a foreign trust created by a U.S. person), is any taxable year beginning after December 31, 1968. Special transitional rules apply for distributions made in taxable years beginning before January 1, 1974. In the case of a foreign trust created by a U.S. person, a "preceding taxable year" is any year of the trust to which the Code applies.

(4) A distribution of undistributed net income (included in an accumulation distribution) and a capital gain distribution will be included in the income of the beneficiary in the year they are actually paid, credited, or required to be distributed to him. The tax on the distribution will be approximately the amount of tax the beneficiary would have paid with respect to the distribution had the income and capital gain been distributed to the beneficiary in the year earned by the trust. An additional amount equal to the "taxes imposed on the trust" for the preceding year is also deemed distributed. To prevent double taxation, however, the beneficiary receives a credit for such taxes.

(b) Effective dates. All regulations sections under subpart D (sections 665 through 669) which have an "A" suffix (such as § 1.665(a)A and § 1.666(b)–1A) are applicable to taxable years beginning on or after January 1, 1969, and all references therein to sections 665 through 669 are references to such sections as amended by the Tax Reform Act of 1969. Sections without the "A" suffix (such as § 1.666(b)–1) are applicable only to taxable years beginning before January 1, 1969, and all references therein to sections 665 through 669 are references to such sections before amendment by the Tax Reform Act of 1969.

(c) Examples. Where examples contained in the regulations under subpart D refer to tax rates for years after 1968, such tax rates are not necessarily the actual rates for such years, but are only used for example purposes.

(d) Applicability to estates. Subpart D does not apply to any estate.

[T.D. 7204, 37 FR 17135, Aug. 25, 1972]

§ 1.665(a)–1A Undistributed net income.

(a) Domestic trusts. The term "undistributed net income", in the case of a trust (other than a foreign trust created by a U.S. person) means, for any taxable year beginning after December 31, 1968, the distributable net income of the trust for that year (as determined under section 643(a)), less:

(1) The amount of income required to be distributed currently and any other amounts properly paid or credited or required to be distributed to beneficiaries in the taxable year as specified in section 661(a), and

(2) The amount of taxes imposed on the trust attributable to such distributable net income, as defined in § 1.665(d)–1A. The application of the rule in this paragraph to a taxable year of a trust in which income is accumulated may be illustrated by the following example:

Example. Under the terms of the trust, $10,000 of income is required to be distributed currently to A and the trustee has discretion to make additional distributions to A. During the

taxable year 1971 the trust had distributable net income of $30,100 derived from royalties and the trustee made distributions of $20,000 to A. The taxable income of the trust is $10,000 on which a tax of $2,190 is paid. The undistributed net income of the trust for the taxable year 1971 is $7,910, computed as follows:

Distributable net income		$30,100
Less:		
Income currently distributable to A	$10,000	
Other amounts distributed to A	10,000	
Taxes imposed on the trust attributable to the undistributed net income (see § 1.665(d)–1A)	2,190	
Total		22,190
Undistributed net income		7,910

(b) Foreign trusts. The undistributed net income of a foreign trust created by a U.S. person for any taxable year is the distributable net income of such trust (see § 1.643(a)–6 and the examples set forth in paragraph (b) thereof), less:

(1) The amount of income required to be distributed currently and any other amounts properly paid or credited or required to be distributed to beneficiaries in the taxable year as specified in section 661(a), and

(2) The amount of taxes imposed on such trust by chapter 1 of the Internal Revenue Code, which are attributable to items of income which are required to be included in such distributable net income.

For purposes of subparagraph (2) of this paragraph, the amount of taxes imposed on the trust for any taxable year by chapter 1 of the Internal Revenue Code is the amount of taxes imposed pursuant to section 871 (relating to tax on non-resident alien individuals) which is properly allocable to the undistributed portion of the distributable net income. See § 1.665(d)–1A. The amount of taxes imposed pursuant to section 871 is the difference between the total tax imposed pursuant to that section on the foreign trust created by a U.S. person for the year and the amount which would have been imposed on such trust had all the distributable net income, as determined under section 643(a), been distributed. The application of the rule in this paragraph may be illustrated by the following examples:

Example (1). A trust was created in 1952 under the laws of Country X by the transfer to a trustee in Country X of property by a U.S. person. The entire trust constitutes a foreign trust created by a U.S. person. The governing instrument of the trust provides that $7,000 of income is required to be distributed currently to a U.S. beneficiary and gives the trustee discretion to make additional distributions to the beneficiary. During the taxable year 1973 the trust had income of $10,000 from dividends of a U.S. corporation (on which Federal income taxes of $3,000 were imposed pursuant to section 871 and withheld under section 1441, resulting in the receipt by the trust of cash in the amount of $7,000), $20,000 in capital gains from the sale of stock of a Country Y corporation and $30,000 from dividends of a Country X corporation, none of the gross income of which was derived from sources within the United States. No income taxes were required to be paid to Country X or Country Y in 1973. The trustee did not file a U.S. income tax return for the taxable year 1973. The distributable net income of the trust before distributions to the beneficiary for 1973 is $60,000 ($57,000 of which is cash). During 1973 the trustee made distributions to the U.S. beneficiary equaling one-half of the trust's distributable net income. Thus, the U.S. beneficiary is treated as having had distributed to him $5,000 (composed of $3,500 as a cash distribution and $1,500 as the tax imposed pursuant to section 871 and withheld under section 1441), representing one-half of the income from U.S. sources; $10,000 in cash, representing one-half of the capital gains from the sale of stock of the Country Y corporation; and $15,000 in cash, representing one-half of the income from Country X sources for a total of $30,000. The undistributed net income of the trust at the close of taxable year 1973 is $28,500 computed as follows:

Distributable net income		$60,000
Less:		
(1) Amounts distributed to the beneficiary:		
Income currently distributed to the beneficiary	$7,000	
Other amounts distributed to the beneficiary	21,500	
Taxes under sec. 871 deemed distributed to the beneficiary	1,500	
Total amounts distributed to the beneficiary	80,000	
(2) Amount of taxes imposed on the trust under chapter 1 of the Code attributable to the undistributed net income (See § 1.665(d)–1A) $3,000 less $1,500)	$1,500	
Total		$31,500
Undistributed net income		28,500

Example (2). The facts are the same as in example (1) except that property has been transferred to the trust by a person other than a U.S. person, and during 1973 the foreign trust created by a U.S. person was 60 percent of the entire foreign trust. The trustee paid no income taxes to Country X or Country Y in 1973.

(1) The undistributed net income of the portion of the entire trust which is a foreign trust created by a U.S. person for 1973 is $17,100, computed as follows:

Distributable net income (60% of each item of gross income of entire trust):		
60% of $10,000 U.S. dividends		$6,000
60% of $20,000 Country X capital gains		12,000
60% of $30,000 Country X dividends		18,000
Total		36,000
Less:		
(i) Amounts distributed to the beneficiary—		
Income currently distributed to the beneficiary (60% of $7,000)	$4,200	

Other amounts distributed to the beneficiary (60% of $21,500)	$12,900	
Taxes under sec. 871 deemed distributed to the beneficiary (60% of $1,500)	900	
Total amounts distributed to the beneficiary	18,000	
(ii) Amount of taxes imposed on the trust under chapter 1 of the Code attributable to the undistributed net income (see § 1.665(d)–1A) (60% of $1,500)	900	
Total		18,900
Undistributed net income		17,100

(2) The undistributed net income of the portion of the entire trust which is not a foreign trust created by a U.S. person for 1973 is $11,400, computed as follows:

Distributable net income (40% of each item of gross income of entire trust)		
40% of $10,000 U.S. dividends		$4,000
40% of $20,000 Country X capital gains		8,000
40% of $30,000 Country X dividends		12,000
Total		24,000
Less:		
(i) Amounts distributed to the beneficiary—		
Income currently distributed to the beneficiary (40% of $7,000)	$2,800	
Other amounts distributed to the beneficiary (40% of $21,500)	8,600	
Taxes under sec. 871 deemed distributed to the beneficiary (40% of $1,500)	600	
Total amounts distributed to the beneficiary	12,000	
(ii) Amount of taxes imposed on the trust under chapter 1 of the Code attributable to the undistributed net income (See § 1.665(d)–1A) (40% of $1,500)	600	
Total		12,600
Undistributed net income		11,400

(c) Effect of prior distributions. The undistributed net income for any year to which an accumulation distribution for a later year may be thrown back will be reduced by accumulation distributions in intervening years that are required to be thrown back to such year. For example, if a trust has undistributed net income for 1975, and an accumulation distribution is made in 1980, there must be taken into account the effect on undistributed net income for 1975 of any accumulation distribution made in 1976, 1977, 1978, or 1979. However, undistributed net income for any year will not be reduced by any distributions in any intervening years that are excluded under section 663(a)(1), relating to gifts, bequests, etc. See paragraph (d) of § 1.666(a)–1A for an illustration of the reduction of undistributed net income for any year by a subsequent accumulation distribution.

(d) Distributions made in taxable years beginning before January 1, 1974. For special rules relating to accumulation distributions of undistributed net income made in taxable years of the trust beginning before January 1, 1974, see § 1.665(b)–2A.

[T.D. 7204, 37 FR 17136, Aug. 25, 1972]

§ 1.665(b)–1A Accumulation distributions.

(a) In general. (1) For any taxable year of a trust the term "accumulation distribution" means an amount by which the amounts properly paid, credited, or required to be distributed within the meaning of section 661(a)(2) (*i.e.,* all amounts properly paid, credited, or required to be distributed to the beneficiary other than income required to be distributed currently within the meaning of section 661(a)(1)) for that year exceed the distributable net income (determined under section 643(a)) of the trust, reduced (but not below zero) by the amount of income required to be distributed currently. To the extent provided in section 663(b) and the regulations thereunder, distributions made within the first 65 days following a taxable year may be treated as having been distributed on the last day of such taxable year.

(2) An accumulation distribution also includes, for a taxable year of the trust, any amount to which section 661(a)(2) and the preceding paragraph are inapplicable and which is paid, credited, or required to be distributed during the taxable year of the trust by reason of the exercise of a power to appoint, distribute, consume, or withdraw corpus of the trust or income of the trust accumulated in a preceding taxable year. No accumulation distribution is deemed to be made solely because the grantor or any other person is treated as owner of a portion of the trust by reason of an unexercised power to appoint, distribute, consume, or withdraw corpus or accumulated income of the trust. Nor will an accumulation distribution be deemed to have been made by reason of the exercise of a power that may affect only taxable income previously attributed to the holders of such power under subpart E (section 671 and following). See example 4 of paragraph (d) of this section for an example of an accumulation distribution occurring as a result of the exercise of a power of withdrawal.

(3) Although amounts properly paid or credited under section 661(a) do not exceed the income of the trust during the taxable year, an accumulation distribution may result if the amounts properly paid or credited under section 661(a)(2) exceed distributable net income reduced (but not below zero) by the amount required to be distributed currently under section 661(a)(1). This may occur, for example, when expenses, interest, taxes, or other items allocable to corpus are taken into account in determining taxable income and hence causing distributable net income to be less than the trust's income.

(b) Payments that are accumulation distributions. The following are some instances in which an accumulation distribution may arise:

(1) One trust to another. A distribution from one trust to another trust is generally an accumulation distribution. See § 1.643(c)–1. This general rule will apply regardless of whether the distribution is to an existing trust or to a newly created trust and regardless of whether the trust to which the distribution is made was created by the same person who created the trust from which the distribution is made or a different person. However, a distribution made from one trust to a second trust will be deemed an accumulation distribution by the first trust to an ultimate beneficiary of the second trust if the primary purpose of the distribution to the second trust is to avoid the capital gain distribution provisions (see section 669 and the regulations thereunder). An amount passing from one separate share of a trust to another separate share of the same trust is not an accumulation distribution. See § 1.665(g)–2A. For rules relating to the computation of the beneficiary's tax under section 668 by reason of an accumulation distribution from the second trust, see paragraphs (b)(1) and (c)(1)(i) of § 1.668(b)–1A and paragraphs (b)(1) and (c)(1)(i) of § 1.669(b)–1A.

(2) Income accumulated during minority. A distribution of income accumulated during the minority of the beneficiary is generally an accumulation distribution. For example, if a trust accumulates income until the beneficiary's 21st birthday, and then distributes the income to the beneficiary, such a distribution is an accumulation distribution. However, see § 1.665(b)–2A for rules governing income accumulated in taxable years beginning before January 1, 1969.

(3) Amounts paid for support. To the extent that amounts forming all or part of an accumulation distribution are applied or distributed for the support of a dependent under the circumstances specified in section 677(b) or section 678(c) or are used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)–4, such amounts will be considered as having been distributed directly to the person whose obligation is being satisfied.

(c) Payments that are not accumulation distributions—(1) Gifts, bequests, etc., described in section 663(a)(1). A gift or bequest of a specific sum of money or of specific property described in section 663(a)(1) is not an accumulation distribution.

(2) Charitable payments. Any amount paid, permanently set aside, or used for the purposes specified in section 642(c) is not an accumulation distribution, even though no charitable deduction is allowed under such section with respect to such payment.

(3) Income required to be distributed currently. No accumulation distribution will arise by reason of a payment of income required to be distributed currently even though such income exceeds the distributable net income of the trust because the payment is an amount specified in section 661(a)(1).

(d) Examples. The provisions of this section may be illustrated by the following examples:

Example (1). A trustee properly makes a distribution to a beneficiary of $20,000 during the taxable year 1976, of which $10,000 is income required to be distributed currently to the beneficiary. The distributable net income of the trust is $15,000. There is an accumulation distribution of $5,000 computed as follows:

Total distribution		$20,000
Less: Income required to be distributed currently (section 661(a)(1))		10,000
Other amounts distributed (section 661(a)(2))		10,000
Distributable net income	$15,000	
Less: Income required to be distributed currently	10,000	
Balance of distributable net income		5,000
Accumulation distribution		5,000

Example (2). Under the terms of the trust instrument, an annuity of $15,000 is required to be paid to A out of income each year and the trustee may in his discretion make distributions out of income or corpus to B. During the taxable year the trust had income of $18,000, as defined in section 643(b), and expenses allocable to corpus of $5,000. Distributable net income amounted to $13,000. The trustee distributed $15,000 of income to A and, in the exercise of his discretion, paid $5,000 to B. There is an accumulation distribution of $5,000 computed as follows:

Total distribution	$20,000
Less: Income required to be distributed currently to A (section 661(a)(1))	15,000

Other amounts distributed (section 661(a)(2))		$5,000
Distributable net income	$13,000	
Less: Income required to be distributed currently to A	15,000	
Balance of distributable net income		0
Accumulation distribution to B		5,000

Example (3). Under the terms of a trust instrument, the trustee may either accumulate the trust income or make distributions to A and B. The trustee may also invade corpus for the benefit of A and B. During the taxable year, the trust had income as defined in section 643(b) of $22,000 and expenses of $5,000 allocable to corpus. Distributable net income amounts to $17,000. The trustee distributed $10,000 each to A and B during the taxable year. There is an accumulation distribution of $3,000 computed as follows:

Total distribution		$20,000
Less: Income required to be distributed currently		0
Other amounts distributed (section 661(a)(2))		20,000
Distributable net income	$17,000	
Less: Income required to be distributed currently	0	
Balance of distributable net income		17,000
Accumulation distribution		3,000

Example (4). A dies in 1974 and bequeaths one-half the residue of his estate in trust. His widow, W, is given a power, exercisable solely by her, to require the trustee to pay her each year of the trust $5,000 from corpus. W's right to exercise such power was exercisable at any time during the year but was not cumulative, so that, upon her failure to exercise it before the end of any taxable year of the trust, her right as to that year lapsed. The trust's taxable year is the calendar year. During the calendar years 1975 and 1976, W did not exercise her right and it lapsed as to those years. In the calendar years 1977 and 1978, in which years the trust had no distributable net income, she exercised her right and withdrew $4,000 in 1977 and $5,000 in 1978. No accumulation distribution was made by the trust in the calendar years 1975 and 1976. An accumulation distribution of $4,000 was made in 1977 and an accumulation distribution of $5,000 was made in 1978. The accumulation distribution for the years 1977 and 1978 is not reduced by any amount of income of the trust attributable to her under section 678 by reason of her power of withdrawal.
[T.D. 7204, 37 FR 17137, Aug. 25, 1972]

§ 1.665(b)–2A Special rules for accumulation distributions made in taxable years beginning before January 1, 1974.

(a) General rule. Section 331(d)(2)(A) of the Tax Reform Act of 1969 excludes certain accumulated income from the tax imposed by section 668(a)(2) by providing certain exceptions from the definition of an "accumulation distribution." Any amount paid, credited, or required to be distributed by a trust (other than a foreign trust created by a U.S. person) during a taxable year of the trust beginning after December 31, 1968, and before January 1, 1974, shall not be subject to the tax imposed by section 668(a)(2) to the extent of the portion of such amount that (1) would be allocated under section 666(a) to a preceding taxable year of the trust beginning before January 1, 1969, and (2) would not have been deemed an accumulation distribution because of the provisions of paragraphs (1), (2), (3), or (4) of section 665(b) as in effect on December 31, 1968, had the trust distributed such amounts on the last day of its last taxable year beginning before January 1, 1969. However, the $2,000 *de minimis* exception formerly in section 665(b) does not apply in the case of any distribution made in a taxable year of a trust beginning after December 31, 1968. Amounts to which this exclusion applies shall reduce the undistributed net income of the trust for the preceding taxable year or years to which such amounts would be allocated under section 666(a). However, since section 668(a)(2) does not apply to such amounts, no amount of taxes imposed on the trust allocable to such undistributed net income is deemed distributed under section 666(b) and (c).

(b) Application of general rule. The rule expressed in paragraph (a) of this section is applied to the exceptions formerly in section 665(b) as follows:

(1) Distributions from amounts accumulated while beneficiary is under 21. (i) Paragraph (1) of section 665(b) as in effect on December 31, 1968, provided that amounts paid, credited, or required to be distributed to a beneficiary as income accumulated before the birth of such beneficiary or before such beneficiary attains the age of 21 were not to be considered to be accumulation distributions. If an accumulation distribution is made in a taxable year of the trust beginning after December 31, 1968, and before January 1, 1974, and under section 666(a) such accumulation distribution would be allocated to a preceding taxable year beginning before January 1, 1969, no tax shall be imposed under section 668(a)(2) to the extent the income earned by the trust for such preceding taxable year would be deemed under § 1.665(b)–2(b)(1) to have been accumulated before the beneficiary's birth or before his 21st birthday. The provisions of this subparagraph may be illustrated by the following example:

Example. A trust on the calendar year basis was established on January 1, 1965, to accumulate the income during the minority of B, and to pay the accumulated income over to B upon his attaining the age of 21. B's 21st birthday is January 1, 1973. On January 2, 1973, the trustee pays over to B all the accumulated income of the trust. The distribution is an accumulation distribution that may be allocated under section 666(a) to 1968, 1969, 1970, 1971, and 1972 (the 5 preceding taxable years as defined in § 1.665(e)–1A). To the extent the distribution is allocated to 1968, no tax is imposed under section 668(a)(2).

(ii) As indicated in paragraph (a) of this section, a distribution of an amount excepted from the tax otherwise imposed under section 668(a)(2) will reduce undistributed net income for the purpose of determining the effect of a future distribution. Thus, under the facts of the example in subdivision (i) of this subparagraph, the undistributed net income for the trust's taxable year 1968 would be reduced by the amount of the distribution allocated to that year under section 666(a).

(2) Emergency distributions. Paragraph (2) of section 665(b) as in effect on December 31, 1968, provided an exclusion from the definition of an accumulation distribution for amounts properly paid or credited to a beneficiary to meet his emergency needs. Therefore, if an accumulation distribution is made from a trust in a taxable year beginning before January 1, 1974, and under section 666(a) such accumulation distribution would be allocated to a preceding taxable year of the trust beginning before January 1, 1969, no tax shall be imposed under section 668(a)(2) if such distribution would have been considered an emergency distribution under § 1.665(b)–2(b)(2) had it been made in a taxable year of the trust beginning before January 1, 1969. For example, assume a trust on a calendar year basis in 1972 makes an accumulation distribution which under § 1.665(b)–2(b)(2) would be considered an emergency distribution and under section 666(a) the distribution would be allocated to the years 1967, 1968, and 1969. To the extent such amount is allocated to 1967 and 1968, no tax would be imposed under section 668(a)(2).

(3) Certain distributions at specified ages. Paragraph (3) of section 665(b) as in effect on December 31, 1968, provided an exclusion (in the case of certain trusts created before January 1, 1954) from the definition of an accumulation distribution for amounts properly paid or credited to a beneficiary upon his attaining a specified age or ages, subject to certain restrictions (see § 1.665(b)–2(b)(3)). Therefore, a distribution from a trust in a taxable year beginning after December 31, 1968, will not be subject to the tax imposed under section 668(a)(2) to the extent such distribution would be allocated to a preceding taxable year of the trust beginning before January 1, 1969, if such distribution would have qualified under the provisions of § 1.665(b)–2(b)(3) had it been made in a taxable year of the trust to which such section was applicable.

(4) Certain final distributions. Paragraph (4) of section 665(b) as in effect on December 31, 1968, provided an exclusion from the definition of an accumulation distribution for amounts properly paid or credited to a beneficiary as a final distribution of the trust if such final distribution was made more than 9 years after the date of the last transfer to such trust. Therefore, amounts properly paid or credited to a beneficiary as a final distribution of a trust in a taxable year of a trust beginning after December 31, 1968, and before January 1, 1974, will not be subject to the tax imposed under section 668(a)(2) to the extent such distribution would be allocated to a preceding taxable year of the trust beginning before January 1, 1969, if such final distribution was made more than 9 years after the date of the last transfer to such trust. The provisions of this subparagraph may be illustrated by the following example:

Example. A trust on a calendar year basis was established on January 1, 1958, and no additional transfers were made to it. On January 1, 1973, the trustee terminates the trust and on the same day he makes a final distribution to the beneficiary, B. The distribution is an accumulation distribution that may be allocated under section 666(a) to 1968, 1969, 1970, 1971, and 1972 (the 5 preceding taxable years as defined in § 1.665(e)–1A). Because more than 9 years elapsed between the date of the last transfer to the trust and the date of final distribution, the distribution is not taxed under section 668(a)(2) to the extent it would be allocated to 1968 under section 666(a).

[T.D. 7204, 37 FR 17138, Aug. 25, 1972]

§ 1.665(c)–1A Special rule applicable to distributions by certain foreign trusts.

(a) In general. Except as provided in paragraph (b) of this section, for purposes of section 665 any amount paid to a U.S. person which is from a payor who is not a U.S. person and which is derived directly or indirectly from a foreign trust created by a U.S. person shall be deemed in the year of payment to the U.S. person to have been directly paid to the U.S. person by the trust. For example, if a nonresident alien receives a distribution from a foreign trust created by a U.S. person and then pays the amount of the distribution over to a U.S. person, the payment of such amount to the U.S. person represents an accumulation distribution to the U.S. person from the trust to the extent that the amount received would have been an accumulation distribution had the trust paid the amount directly to the U.S. person in the year in which the payment was received by the U.S. person. This section also applies in a case where a nonresident alien receives indirectly an accumulation distribution from a foreign trust created by a U.S. person and then pays it over to a U.S. person. An example of such a transaction is one where the foreign trust created by a U.S. person makes the distribution to an intervening

foreign trust created by either a U.S. person or a person other than a U.S. person and the intervening trust distributes the amount received to a nonresident alien who in turn pays it over to a U.S. person. Under these circumstances, it is deemed that the payment received by the U.S. person was received directly from a foreign trust created by a U.S. person.

(b) Limitation. In the case of a distribution to a beneficiary who is a U.S. person, paragraph (a) of this section does not apply if the distribution is received by such beneficiary under circumstances indicating lack of intent on the part of the parties to circumvent the purposes for which section 7 of the Revenue Act of 1962 (76 Stat. 985) was enacted.

[T.D. 7204, 37 FR 17139 Aug. 25, 1972]

§ 1.665(d)–1A Taxes imposed on the trust.

(a) In general. **(1)** For purposes of subpart D, the term "taxes imposed on the trust" means the amount of Federal income taxes properly imposed for any taxable year on the trust that are attributable to the undistributed portions of distributable net income and gains in excess of losses from the sales or exchanges of capital assets. Except as provided in paragraph (c)(2) of this section, the minimum tax for tax preferences imposed by section 56 is not a tax attributable to the undistributed portions of distributable net income and gains in excess of losses from the sales or exchanges of capital assets. See section 56 and the regulations thereunder.

(2) In the case of a trust that has received an accumulation distribution from another trust, the term "taxes imposed on the trust" also includes the amount of taxes deemed distributed under §§ 1.666(b)–1A, 1.666(c)–1A, 1.669(d)–1A, and 1.669(e)–1A (whichever are applicable) as a result of such accumulation distribution, to the extent that they were taken into account under paragraphs (b)(2) or (c)(1)(vi) of § 1.668(b)–1A and (b)(2) or (c)(1)(vi) of § 1.669(b)–1A in computing the partial tax on such accumulation distribution. For example, assume that trust A, a calendar year trust, makes an accumulation distribution in 1975 to trust B, also on the calendar year basis, in connection with which $500 of taxes are deemed under § 1.666(b)–1A to be distributed to trust B. The partial tax on the accumulation distribution is computed under paragraph (b) of § 1.668(b)–1A (the exact method) to be $600 and all of the $500 is used under paragraph (b)(2) of § 1.668(b)–1A to reduce the partial tax to $100. The taxes imposed on trust B for 1975 will, in addition to the $100 partial tax, also include the $500 used to reduce the partial tax.

(b) Taxes imposed on the trust attributable to undistributed net income. **(1)** For the purpose of subpart D, the term "taxes imposed on the trust attributable to the undistributed net income" means the amount of Federal income taxes for the taxable year properly allocable to the undistributed portion of the distributable net income for such taxable year. This amount is (i) an amount that bears the same relationship to the total taxes of the trust for the year (other than the minimum tax for tax preferences imposed by section 56), computed after the allowance of credits under section 642(a), as (a) the taxable income of the trust, other than the capital gains not included in distributable net income less their share of section 1202 deduction, bears to (b) the total taxable income of the trust for such year or, (ii) if the alternative tax computation under section 1201(b) is used and there are no net short-term gains, an amount equal to such total taxes less the amount of the alternative tax imposed on the trust and attributable to the capital gain. Thus, for the purposes of subpart D, in determining the amount of taxes imposed on the trust attributable to the undistributed net income, that portion of the taxes paid by the trust attributable to capital gain allocable to corpus is excluded. The rule stated in this subparagraph may be illustrated by the following example, which assumes that the alternative tax computation is not used:

Example. (1) Under the terms of a trust, which reports on the calendar year basis, the income may be accumulated or distributed to A in the discretion of the trustee and capital gains are allocable to corpus. During the taxable year 1974, the trust had income of $20,000 from royalties, long-term capital gains of $10,000, and expenses of $2,000. The trustee in his discretion made a distribution of $10,000 to A. The taxes imposed on the trust for such year attributable to the undistributed net income are $2,319, determined as shown below.

(2) The distributable net income of the trust computed under section 643(a) is $18,000 (royalties of $20,000 less expenses of $2,000). The total taxes paid by the trust are $3,787, computed as follows:

Royalties		$20,000
Capital gain allocable to corpus		10,000
Gross income		30,000
Deductions:		
Expenses	$2,000	
Distributions to A	10,000	
Capital gain deduction	5,000	
Personal exemption	100	
		17,100
Taxable income		12,900
Total income taxes		3,787

(3) Taxable income other than capital gains less the section 1202 deduction is $7,900 ($12,900–($10,000–$5,000)). Therefore, the amount of taxes imposed on the trust attributable to the undistributed net income is $2,319, computed as follows:

$3,787 (total taxes) × $7,900 (taxable income other than capital gains not included in d.n.i. less the 1202 deduction) divided by $12,900 (taxable income)	$2,319

(2) If in any taxable year an accumulation distribution of undistributed net income is made by the trust which results in a throwback to a prior year, the taxes of the prior year imposed on the trust attributable to any remaining undistributed net income of such prior year are the taxes prescribed in subparagraph (1) of this paragraph reduced by the taxes of the prior year deemed distributed under section 666(b) or (c). The provisions of this subparagraph may be illustrated by the following example:

Example. Assume the same facts as in the example in subparagraph (1) of this paragraph. In 1975 the trust makes an accumulation distribution, of which an amount of undistributed net income is deemed distributed in 1974. Taxes imposed on the trust (in the amount of $1,000) attributable to the undistributed net income are therefore deemed distributed in such year. Consequently, the taxes imposed on the trust subsequent to the 1975 distribution attributable to the remaining undistributed net income are $1,319 ($2,319 less $1,000).

(c) Taxes imposed on the trust attributable to undistributed capital gain—(1) Regular tax. For the purpose of subpart D the term "taxes imposed on the trust attributable to undistributed capital gain" means the amount of Federal income taxes for the taxable year properly attributable to that portion of the excess of capital gains over capital losses of the trust that is allocable to corpus for such taxable year. Such amount is the total of—

(i) The amount computed under subparagraph (2) of this paragraph (the minimum tax), plus

(ii) The amount that bears the same relationship to the total taxes of the trust for the year (other than the minimum tax), computed after the allowance of credits under section 642(a), as (a) the excess of capital gains over capital losses for such year that are not included in distributable net income, computed after its share of the deduction under section 1202 (relating to the deduction for capital gains) has been taken into account, bears to the greater of (b) the total taxable income of the trust for such year, or (c) the amount of capital gains computed under (a) of this subdivision.

However, if the alternative tax computation under section 1201(b) is used and there are no net short-term gains, the amount is the amount of the alternative tax imposed on the trust and attributable to the capital gain. The application of this subparagraph may be illustrated by the following example, which assumes that the alternative tax computation is not used:

Example. Assume the same facts as in the example in paragraph (b)(1). The capital gains not included in d.n.i. are $10,000, and the deduction under section 1202 is $5,000. The amount of taxes imposed on the trust attributable to undistributed capital gain is $1,468, computed as follows:

$3,787 (total taxes)× $5,000 (capital gains not included in d.n.i. less section 1202 deductions) divided by $12,900 (taxable income)	$1,468

(2) Minimum tax. The term "taxes imposed on the trust attributable to the undistributed capital gain" also includes the minimum tax for tax preferences imposed on the trust by section 56 with respect to the undistributed capital gain. The amount of such minimum tax so included bears the same relation to the total amount of minimum tax imposed on the trust by section 56 for the taxable year as one-half the net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977) (as defined in section 1222(11)) from such taxable year bears to the sum of the items of tax preference of the trust for such taxable year which are apportioned to the trust in accordance with § 1.58–3(a)(1).

(3) Reduction for prior distribution. If in any taxable year a capital gain distribution is made by the trust which results in a throwback to a prior year, the taxes of the prior year imposed on the trust attributable to any remaining undistributed capital gain of the prior year are the taxes prescribed in subparagraph (1) of this paragraph reduced by the taxes of the prior year deemed distributed under section 669(d) or (e). The provisions of this subparagraph may be illustrated by the following example:

Example. Assume the same facts as in the example in subparagraph (1) of this paragraph. In 1976, the trust makes a capital gain distribution, of which an amount of undistributed capital gain is deemed distributed in 1974. Taxes imposed on the trust (in the amount of $500) attributable to the undistributed capital gain are therefore deemed distributed in such year. Consequently, the taxes imposed on the trust attributable to the remaining undistributed capital gain are $968 ($1,468 less $500).

[T.D. 7204, 37 FR 17139, Aug. 25, 1972, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.665(e)–1A Preceding taxable year.

(a) Definition—(1) Domestic trusts—(i) In general. For purposes of subpart D, in the case of a trust other than a foreign trust created by a U.S. person, the term "preceding taxable year" serves to identify and limit the taxable years of a trust to which an accumulation distribution consisting of

undistributed net income or undistributed capital gain may be allocated (or "thrown back") under sections 666(a) and 669(a). An accumulation distribution consisting of undistributed net income or undistributed capital gain may not be allocated or "thrown back" to a taxable year of a trust if such year is not a "preceding taxable year."

(ii) **Accumulation distributions.** In the case of an accumulation distribution consisting of undistributed net income made in a taxable year beginning before January 1, 1974, any taxable year of the trust that precedes by more than 5 years the taxable year of the trust in which such accumulation distribution was made is not a "preceding taxable year." Thus, for a domestic trust on a calendar year basis, calendar year 1967 is not a "preceding taxable year" with respect to an accumulation distribution made in calendar year 1973, whereas calendar year 1968 is a "preceding taxable year." In the case of an accumulation distribution made during a taxable year beginning after December 31, 1973, any taxable year of the trust that begins before January 1, 1969, is not a "preceding taxable year." Thus, for a domestic trust on a calendar year basis, calendar year 1968 is not a "preceding taxable year" with respect to an accumulation distribution made in calendar year 1975, whereas calendar year 1969 is a "preceding taxable year."

(iii) **Capital gain distributions.** In the case of an accumulation distribution that is a capital gain distribution, any taxable year of the trust that (a) begins before January 1, 1969, or (b) is prior to the first year in which income is accumulated, whichever occurs later, is not a "preceding taxable year." Thus, for the purpose of capital gain distributions and section 669, only taxable years beginning after December 31, 1968, can be "preceding taxable years." See § 1.688(a)–1A(c).

(2) **Foreign trusts created by U.S. persons.** For purposes of Subpart D, in the case of a foreign trust created by a U.S. person, the term "preceding taxable year" does not include any taxable year to which Part I of Subchapter J does not apply. See section 683 and regulations thereunder. Accordingly, the provisions of Subpart D may not, in the case of a foreign trust created by a U.S. person, be applied to any taxable year which begins before 1954 or ends before August 17, 1954. For example, if a foreign trust created by a U.S. person (reporting on the calendar year basis) makes a distribution during the calendar year 1970 of income accumulated during prior years, the earliest year of the trust to which the accumulation distribution may be allocated under such Subpart D is 1954, but it may not be allocated to 1953 and prior years, since the Internal Revenue Code of 1939 applies to those years.

(b) **Simple trusts.** A taxable year of a trust during which the trust was a simple trust (that is, was subject to Subpart B) for the entire year shall not be considered a "preceding taxable year" unless during such year the trust received "outside income" or unless the trustee did not distribute all of the income of the trust that was required to be distributed currently for such year. In such event, undistributed net income for such year shall not exceed the greater of the "outside income" or income not distributed during such year. For purposes of this paragraph, the term "outside income" means amounts that are included in distributable net income of the trust for the year but that are not "income" of the trust as that term is defined in § 1.643(b)–1. Some examples of "outside income" are:

(1) Income taxable to the trust under section 691;

(2) Unrealized accounts receivable that were assigned to the trust; and

(3) Distributions from another trust that include distributable net income or undistributed net income of such other trust.

The term "outside income," however, does not include amounts received as distributions from an estate, other than income specified in (1) and (2), for which the estate was allowed a deduction under section 661(a). The application of this paragraph may be illustrated by the following examples:

Example (1). By his will D creates a trust for his widow W. The terms of the trust require that the income be distributed currently (*i.e.*, it is a simple trust), and authorize the trustee to make discretionary payments of corpus to W. Upon W's death the trust corpus is to be distributed to D's then living issue. The executor of D's will makes a $10,000 distribution of corpus to the trust that carries out estate income consisting of dividends and interest to the trust under section 662(a)(2). The trust reports this income as its only income on its income tax return for its taxable year in which ends the taxable year of the estate in which the $10,000 distribution was made, and pays a tax thereon of $2,106. Thus, the trust has undistributed net income of $7,894 ($10,000–$2,106). Several years later the trustee makes a discretionary corpus payment of $15,000 to W. This payment is an accumulation distribution under section 665(b). However, since the trust had no "outside income" in the year of the estate distribution, such year is not a preceding taxable year. Thus, W is not treated as receiving undistributed net income of $7,894 and taxes thereon of $2,106 for the purpose of including the same in her gross income under section 668. The result would be the same if the invasion power were not exercised and the accumulation distribution occurred as a result of the distribution of the corpus to D's issue upon the death of W.

Example (2). Trust A, a simple trust on the calendar year basis, received in 1972 extraordinary dividends or taxable stock dividends that the trustee in good faith allocated to corpus, but that are determined in 1974 to have been currently distributable to the beneficiary. See section 643(a)(4) and § 1.643(a)–4. Trust A would qualify for treatment under Subpart C for 1974, the year of distribution of the extraordinary dividends or taxable stock dividends, because the distribution is not out of income of the current taxable year and is treated as another amount properly paid or credited or required to be distributed for such taxable year within the meaning of section 661(a)(2). Also, the distribution in 1974 qualifies as an accumulation distribution for the purposes of Subpart D. For purposes only of such Subpart D, trust A would be treated as subject to the provisions of such Subpart C for 1972, the preceding taxable year in which the extraordinary or taxable stock dividends were received, and, in computing undistributed net income for 1972, the extraordinary or taxable stock dividends would be included in distributable net income under section 643(a). The rule stated in the preceding sentence would also apply if the distribution in 1974 was made out of corpus without regard to a determination that the extraordinary dividends or taxable stock dividends in question were currently distributable to the beneficiary.

[T.D. 7204, 37 FR 17141, Aug. 25, 1972]

§ 1.665(f)–1A Undistributed capital gain.

(a) Domestic trusts. (1) The term "undistributed capital gain" means (in the case of a trust other than a foreign trust created by a U.S. person), for any taxable year of the trust beginning after December 31, 1968, the gains in excess of losses for that year from the sale or exchange of capital assets of the trust less:

(i) The amount of such gains that are included in distributable net income under section 643(a)(3) and § 1.643(a)–3.

(ii) The amount of taxes imposed on the trust for such year attributable to such gains, as defined in § 1.665(d)–1A, and

(iii) In the case of a trust that does not use the alternative method for computing taxes on capital gains of the taxable year, the excess of deductions (other than deductions allowed under section 642(b) relating to personal exemption or section 642(c) relating to charitable contributions) over distributable net income for such year to the extent such excess deductions are properly allowable in determining taxable income for such year.

For purposes of computing the amount of capital gain under this paragraph, no deduction under section 1202, relating to deduction for excess of capital gains over capital losses, shall be taken into account. The application of this subparagraph may be illustrated by the following example:

Example. Under the terms of the trust, the trustee must distribute all income currently and has discretion to distribute capital gain to A or to allocate it to corpus. During the taxable year 1971 the trust recognized capital gain in the amount of $15,000, and capital losses of $5,000, and had interest income (after expenses) of $6,000. The trustee distributed $8,000 to A, consisting of $6,000 of interest and $2,000 of capital gain. The $2,000 of gain distributed to A is included in the computation of distributable net income under § 1.643(a)–3. The balance of the capital gain is not included in distributable net income since it is allocated to corpus and not paid, credited, or required to be distributed to any beneficiary. The trust paid taxes of $671, all of which are attributable under § 1.665(d)–1A to the undistributed capital gain. The amount of undistributed capital gain of the trust for 1971 is therefore $7,329, computed as follows:

Total capital gains	$15,000
Less: Capital losses	5,000
Gains in excess of losses	10,000
Less:	
Amount of capital gain included in distributable net income	2,000
Taxes imposed on the trust attributable to the undistributed capital gain (see § 1.665(d)–1A)	671
	2,671
Undistributed capital gain	7,329

(2) For purposes of subparagraph (1) of this paragraph, the term "losses for that year" includes losses of the trusts from the sale or exchange of capital assets in preceding taxable years not included in the computation of distributable net income of any year, reduced by such losses taken into account in a subsequent preceding taxable year in computing undistributed capital gain but not reduced by such losses taken into account in determining the deduction under section 1211. See section 1212(b)(2) and the regulations thereunder. For example, assume that a trust had a net long-term capital loss in 1970 of $5,000. During the years 1971 through 1975, the trust had no capital gains or capital losses. In 1976, it has a long-term capital gain of $8,000, which it allocates to corpus and does not distribute to a beneficiary, but has no taxes attributable to such gain. The undistributed capital gain for 1976 is $8,000–$5,000, or $3,000, even though all or a part of the $5,000 loss was claimed under section 1211 as a deduction in years 1970 through 1975.

(b) Foreign trusts. Distributable net income for a taxable year of a foreign trust created by a U.S. person includes capital gains in excess of capital losses for such year (see § 1.643(a)–6(a)(3)). Thus, a foreign trust created by a U.S. person can never have any undistributed capital gain.

[T.D. 7204, 37 FR 17142, Aug. 25, 1972]

§ 1.665(g)–1A Capital gain distribution.

For any taxable year of a trust, the term "capital gain distribution" means, to the extent of the undistributed capital gain of the trust, that portion of an accumulation distribution that exceeds the amount of such accumulation distribution deemed under section 666(a) to be undistributed net income of the trust for all preceding taxable years. See § 1.665(b)–1A for the definition of "accumulation distribution". For any such taxable year the undistributed capital gain includes the total undistributed capital gain for all years of the trust beginning with the first taxable year beginning after December 31, 1968, in which income (as determined under section 643(b)) is accumulated, and ending before such taxable year. See § 1.665(g)–2A for application of the separate share rule. The application of this section may be illustrated by the following example:

Example. A trust on the calendar year basis made the following accumulations. For purposes of this example, the undistributed net income is the same as income under applicable local law. No income was accumulated prior to 1970.

Year	Undistributed net income	Undistributed capital gain
1969	None	$10,000
1970	$1,000	3,000
1971	None	4,000

The trust has distributable net income in 1972 of $2,000 and recognizes capital gains of $4,500 that are allocable to corpus. On December 31, 1972, the trustee makes a distribution of $20,000 to the beneficiary. There is an accumulation distribution of $18,000 ($20,000 distribution less $2,000 d.n.i.) that consists of undistributed net income of $1,000 (see § 1.666(a)–1A) and a capital gain distribution of $7,000. The capital gain distribution is computed as follows:

Accumulation distribution	$18,000
Less: Undistributed net income	1,000
Balance	17,000
Capital gain distribution (undistributed capital gain of the trust for 1972 ($3,000 from 1970 and $4,000 from 1971))	7,000
Balance (corpus)	10,000

No undistributed capital gain is deemed distributed from 1969 because 1969 is a year prior to the first year in which income is accumulated (1970). The accumulation distribution is not deemed to consist of any part of the capital gains recognized in 1972.

[T.D. 7204, 37 FR 17142, Aug. 25, 1972]

§ 1.665(g)–2A Application of separate share rule.

(a) In general. If the separate share rule of section 663(c) is applicable for any taxable year of a trust, Subpart D is applied as if each share were a separate trust except as provided in paragraph (c) of this section and in § 1.668(a)–1A(c). Thus, the amounts of an "accumulation distribution", "undistributed net income", "undistributed capital gain", and "capital gain distribution" are computed separately for each share.

(b) Allocation of taxes—Undistributed net income. The "taxes imposed on the trust attributable to the undistributed net income" are allocated as follows:

(1) There is first allocated to each separate share that portion of the "taxes imposed on the trust attributable to the undistributed net income" (as defined in § 1.665(d)–1A(b)), computed before the allowance of any credits under section 642(a), that bears the same relation to the total of such taxes that the distributable net income of the separate share bears to the distributable net income of the trust, adjusted for this purpose as follows:

(i) There is excluded from distributable net income of the trust and of each separate share any tax-exempt interest, foreign income of a foreign trust, and excluded dividends, to the extent such amounts are included in distributable net income pursuant to section 643(a)(5), (6), and (7); and

(ii) The distributable net income of the trust is reduced by any deductions allowable under section 661 for amounts paid, credited, or required to be distributed during the taxable year, and the distributable net income of each separate share is reduced by any such deduction allocable to that share.

(2) The taxes so determined for each separate share are then reduced by that portion of the credits against tax allowable to the trust under section 642(a) in computing the "taxes imposed on the trust" that bears the same relation to the total of such credits that the items of distributable net income allocable to the separate share with respect to which the credit is allowed bear to the total of such items of the trust.

(c) Allocation of taxes—Undistributed capital gain. The "taxes imposed on the trust attributable to undistributed capital gain" are allocated as follows:

(1) There is first allocated to each separate share that portion of the "taxes imposed on the trust attributable to undistributed capital gain" (as defined in § 1.665(d)–1A(c)), computed before the allowance of any credits under section 642(a), that bears the same relation to the total of such taxes that the undistributed capital gain (prior to the

deduction of taxes under section 665(c)(2)) of the separate share bears to the total such undistributed capital gain of the trust.

(2) The taxes so determined for each separate share are then reduced by that portion of the credits against tax allowable to the trust under section 642(a) in computing the "taxes imposed on the trust" that bears the same relation to the total of such credits that the capital gain allocable to the separate share with respect to which the credit is allowed bear to the total of such capital gain of the trust.

(d) Termination of a separate share. **(1)** If upon termination of a separate share, an amount is properly paid, credited, or required to be distributed by the trust under section 661(a)(2) to a beneficiary from such share, an accumulation distribution will be deemed to have been made to the extent of such amount. In determining the distributable net income of such share, only those items of income and deduction for the taxable year of the trust in which such share terminates, properly allocable to such share, shall be taken into consideration.

(2) No accumulation distribution will be deemed to have been made upon the termination of a separate share to the extent that the property constituting such share, or a portion thereof, continues to be held as a part of the same trust. The undistributed net income, undistributed capital gain, and the taxes imposed on the trust attributable to such items, if any, for all preceding taxable years (reduced by any amounts deemed distributed under sections 666(a) and 669(a) by reason of any accumulation distribution of undistributed net income or undistributed capital gain in prior years or the current taxable year), which were allocable to the terminating share, shall be treated as being applicable to the trust itself. However, no adjustment will be made to the amounts deemed distributed under sections 666 and 669 by reason of an accumulation distribution of undistributed net income or undistributed capital gain from the surviving share or shares made in years prior to the year in which the terminating share was added to such surviving share or shares.

(3) The provisions of this paragraph may be illustrated by the following example:

Example. A trust was established under the will of X for the benefit of his wife and upon her death the property was to continue in the same trust for his two sons, Y and Z. The separate share rule is applicable to this trust. The trustee had discretion to pay or accumulate the income to the wife, and after her death was to pay each son's share to him after he attained the age of 25. When the wife died, Y was 23 and Z was 28.

(1) Upon the death of X's widow, there is no accumulation distribution. The entire trust is split into two equal shares, and therefore the undistributed net income and the undistributed capital gain of the trust are split into two shares.

(2) The distribution to Z of his share after his mother's death is an accumulation distribution of his separate share of one-half of the undistributed net income and undistributed capital gain.

[T.D. 7204, 37 FR 17142, Aug. 25, 1972]

Treatment Of Excess Distributions By Trusts

§ 1.665(a)–0 Excess distributions by trusts; scope of subpart D.

Subpart D (section 665 and following), Part I, Subchapter J, Chapter 1 of the Internal Revenue Code, in the case of trusts other than foreign trusts created by U.S. persons, is designed generally to prevent a shift of tax burden to a trust from a beneficiary or beneficiaries. In the case of a foreign trust created by a U.S. person, Subpart D is designed to prevent certain other tax avoidance possibilities. To accomplish these ends, Subpart D provides special rules for treatment of amounts paid, credited, or required to be distributed by a complex trust (subject to Subpart C (section 661 and following) of such Part I) in any year in excess of distributable net income for that year. Such an excess distribution is defined as an accumulation distribution, subject to the limitations in section 665(b) or (c). An accumulation distribution, in the case of a trust other than a foreign trust created by a U.S. person, is "thrown back" to each of the 5 preceding years in inverse order. In the case of a foreign trust created by a U.S. person such an accumulation distribution is "thrown back," in inverse order, to each of the preceding years to which the Internal Revenue Code of 1954 applies. That is, an accumulation distribution will be taxed to the beneficiaries of the trust in the year the distribution is made or required, but, in general, only to the extent of the distributable net income of those years which was not in fact distributed. However, with respect to a distribution by a trust other than a foreign trust created by a U.S. person, the resulting tax will not be greater than the aggregate of the taxes that would have been attributable to the amount thrown back to previous years had they been included in gross income of the beneficiaries in those years. In the case of a foreign trust created by a U.S. person,

the resulting tax is computed under the provisions of section 669. To prevent double taxation, both in the case of a foreign trust created by a U.S. person, and a trust other than a foreign trust created by a U.S. person, the beneficiaries receive a credit for any taxes previously paid by the trust which are attributable to the excess thrown back and which are creditable under the provisions of Chapter 1 of the Internal Revenue Code. Subpart D does not apply to any estate.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 733, Jan. 17, 1969]

§ 1.665(a)–1 Undistributed net income.

(a) The term "undistributed net income" means for any taxable year the distributable net income of the trust for that year as determined under section 643(a), less:

(1) The amount of income required to be distributed currently and any other amounts properly paid or credited or required to be distributed to beneficiaries in the taxable year as specified in paragraphs (1) and (2) of section 661(a), and

(2) The amount of taxes imposed on the trust, as defined in § 1.665(d)–1.

The application of the rule in this paragraph to the first year of a trust in which income is accumulated may be illustrated by the following example:

Example. Assume that under the terms of the trust, $10,000 of income is required to be distributed currently to A and the trustee has discretion to make additional distributions to A. During the taxable year 1954 the trust had distributable net income of $30,100 derived from royalties and the trustee made distributions of $20,000 to A. The taxable income of the trust is $10,000 on which a tax of $2,640 is paid. The undistributed net income of the trust as of the close of the taxable year 1954 is $7,460 computed as follows:

Distributable net income		$30,100
Less:		
Income currently distributable to A	$10,000	
Other amounts distributed to A	10,000	
Taxes imposed on the trust (see § 1.665(d)–1)	2,640	
		22,640
Undistributed net income		7,460

See also paragraphs (e)(1) and (f)(1) of § 1.668(b)–2 for additional illustrations of the application of the rule in this paragraph to the first year of a trust in which income is accumulated.

(b) The undistributed net income of a foreign trust created by a U.S. person for any taxable year is the distributable net income of such trust (see § 1.643(a)–6 and the examples set forth in paragraph (b) thereof), less:

(1) The amount of income required to be distributed currently and any other amounts properly paid or credited or required to be distributed to beneficiaries in the taxable year as specified in paragraphs (1) and (2) of section 661(a), and

(2) The amount of taxes imposed on such trust by Chapter 1 of the Internal Revenue Code, which are attributable to items of income which are required to be included in such distributable net income. For purposes of subparagraph (2) of this paragraph, the amount of taxes imposed on the trust (for any taxable year), by Chapter 1 of the Internal Revenue Code is the amount of taxes imposed pursuant to the provisions of section 871 which is properly allocable to the undistributed portion of the distributable net income. See § 1.665(d)–1. The amount of taxes imposed pursuant to the provisions of section 871 is the difference between the total tax imposed pursuant to the provisions of that section on the foreign trust created by a U.S. person for the year and the amount which would have been imposed on such trust had all the distributable net income, as determined under section 643(a), been distributed. The application of the rule in this paragraph may be illustrated by the following examples:

Example (1). A trust was created in 1952 under the laws of Country X by the transfer to a trustee in Country X of money or property by a U.S. person. The entire trust constitutes a foreign trust created by a U.S. person. The governing instrument of the trust provides that $7,000 of income is required to be distributed currently to a U.S. beneficiary and gives the trustee discretion to make additional distributions to the beneficiary. During the taxable year 1963 the trust had income of $10,000 from dividends of a U.S. corporation (on which Federal income taxes of $3,000 were imposed pursuant to the provisions of section 871 and withheld under section 1441 resulting in the receipt by the trust of cash in the amount of $7,000), $20,000 in capital gains from the sale of stock of a Country Y corporation, and $30,000 from dividends of a Country X corporation, none of the gross income of which was derived from sources within the United States. The trustee did not file a U.S. income tax return for the taxable year 1963. The distributable net income of the trust before distributions to the beneficiary for 1963 is $60,000 ($57,000 of which is cash). During 1963 the trustee made distributions to the U.S. beneficiary equaling one-half of the trust's distributable net income or $30,000. Thus, the U.S. beneficiary is treated as having had distributed to him $5,000 (composed of $3,500 as a cash distribution and $1,500 as the tax imposed pursuant to the provisions of section 871 and withheld under section 1441), representing one-half of the income from U.S. sources; $10,000 in cash, representing one-half of the capital gains from the sale of stock of the Country Y corporation; and $15,000 in cash, representing one-half of the income from Country X sources for a total of $30,000. The undistributed net income of the trust at the close of taxable year 1963 is $28,500 computed as follows:

Distributable net income		$60,000
Less:		

(1) Amounts distributed to the beneficiary—		
Income currently distributed to the beneficiary	$7,000	
Other amounts distributed to the beneficiary	21,500	
Taxes under sec. 871 deemed distributed to the beneficiary	1,500	
Total amounts distributed to the beneficiary	30,000	
(2) Amount of taxes imposed on the trust under chapter 1 of the Code (See § 1.665(d)–1)	1,500	
Total		31,500
Undistributed net income		28,500

Example (2). The facts are the same as in example (1) except that property has been transferred to the trust by a person other than a U.S. person, and during 1963 the foreign trust created by a U.S. person was 60 percent of the entire foreign trust. The trustee paid no income taxes to Country X in 1963.

(1) The undistributed net income of the foreign trust created by a U.S. person for 1963 is $17,100, computed as follows:

Distributable net income (60% of each item of gross income of entire trust):		
60% of $10,000 U.S. dividends		$6,000
60% of $20,000 Country X capital gains		12,000
60% of $30,000 Country X dividends		18,000
Total		36,000
Less:		
(i) Amounts distributed to the beneficiary—		
Income currently distributed to the beneficiary (60% of $7,000)	$4,200	
Other amounts distributed to the beneficiary (60% of $21,500)	12,900	
Taxes under sec. 871 deemed distributed to the beneficiary (60% of $1,500)	900	
Total amounts distributed to the beneficiary	18,000	
(ii) Amount of taxes imposed on the trust under chapter 1 of the Code (See § 1.665(d)–1) (60% of $1,500)	$900	
Total		$18,900
Undistributed net income		17,100

(2) The undistributed net income of the portion of the entire trust which is not a foreign trust created by a U.S. person for 1963 is $11,400, computed as follows:

Distributed net income (40% of each item of gross income of entire trust)		
40% of $10,000 U.S. dividends		$4,000
40% of $20,000 Country X capital gains		8,000
40% of Country X dividends		12,000
Total		24,000
Less:		
(i) Amounts distributed to the beneficiary—		
Income currently distributed to the beneficiary (40% of $7,000)	$2,800	
Other amounts distributed to the beneficiary (40% of $21,500)	8,600	
Taxes under sec. 871 deemed distributed to the beneficiary (40% of $1,500)	600	
Total amounts distributed to the beneficiary	12,000	
(ii) Amount of taxes imposed on the trust under chapter 1 of the Code (See § 1.665(d)–1) (40% of $1,500)	$600	
Total		$12,600
Undistributed net income		11,400

(c) However, the undistributed net income for any year to which an accumulation distribution for a later year may be thrown back may be reduced by accumulation distributions in intervening years and also by any taxes imposed on the trust which are deemed to be distributed under section 666 by reason of the accumulation distributions. On the other hand, undistributed net income for any year will not be reduced by any distributions in an intervening year which are excluded from the definition of an accumulation distribution under section 665(b), or which are excluded under section 663(a)(1), relating to gifts, bequests, etc. See paragraph (f)(5) of § 1.668(b)–2 for an illustration of the reduction of undistributed net income for any year by a subsequent accumulation distribution. [T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 733, 741, Jan. 17, 1969]

§ 1.665(b)–1 Accumulation distributions of trusts other than certain foreign trusts; in general.

(a) Subject to the limitations set forth in § 1.665(b)–2, in the case of a trust other than a foreign trust created by a U.S. person, the term "accumulation distribution" for any taxable year means an amount (if in excess of $2,000), by which the amounts properly paid, credited, or required to be distributed within the meaning of section 661(a)(2) for that year exceed the distributable net income (determined under section 643(a)) of the trust, reduced (but not below zero) by the amount of income required to be distributed currently. (In computing the amount of an accumulation distribution pursuant to the preceding sentence, there is taken into account amounts applied or distributed for the support of a dependent under the circumstances specified in section 677(b) or section 678(c) out of corpus or out of other than income for the taxable year and amounts used to

discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)–4.) If the distribution as so computed is $2,000 or less, it is not an accumulation distribution within the meaning of Subpart D (section 665 and following), Part I, Subchapter J, Chapter 1 of the Code. If the distribution exceeds $2,000, then the full amount is an accumulation distribution for the purposes of Subpart D.

(b) Although amounts properly paid, credited, or required to be distributed under section 661(a)(2) do not exceed the income of the trust during the taxable year, an accumulation distribution may result if such amounts exceed distributable net income reduced (but not below zero) by the amount required to be distributed currently. This may result from the fact that expenses allocable to corpus are taken into account in determining taxable income and hence distributable net income. However, in the case of a trust other than a foreign trust created by a U.S. person, the provisions of Subpart D will not apply unless there is undistributed net income in at least one of the five preceding taxable years. See section 666 and the regulations thereunder.

(c) The provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples (it is assumed in each case that the exclusions provided in § 1.665(b)–2 do not apply):

Example (1). A trustee properly makes a distribution to a beneficiary of $20,000 during the taxable year 1956, of which $10,000 is income required to be distributed currently to the beneficiary. The distributable net income of the trust is $15,000. There is an accumulation distribution of $5,000 computed as follows:

Total distribution		$20,000
Less: Income required to be distributed currently (section 661(a)(1))		10,000
Other amounts distributed (section 661(a)(2))		10,000
Distributable net income	$15,000	
Less: Income required to be distributed currently	10,000	
Balance of distributable net income		5,000
Accumulation distribution		5,000

Example (2). Under the terms of the trust instrument, an annuity of $15,000 is required to be paid to A out of income each year and the trustee may in his discretion make distributions out of income or corpus to B. During the taxable year the trust had income of $18,000, as defined in section 643(b), and expenses allocable to corpus of $5,000. Distributable net income amounted to $13,000. The trustee distributed $15,000 of income to A and in the exercise of his discretion, paid $5,000 to B. There is an accumulation distribution of $5,000 computed as follows:

Total distribution		$20,000
Less: Income required to be distributed currently to A (section 661(a)(1))		15,000
Other amounts distributed (section 661(a)(2))		5,000
Distributable net income	$13,000	
Less: Income required to be distributed currently to A	15,000	
Balance of distributable net income		0
Accumulation distribution to B		5,000

Example (3). Under the terms of a trust instrument, the trustee may either accumulate the trust income or make distributions to A and B. The trustee may also invade corpus for the benefit of A and B. During the taxable year, the trust had income as defined in section 643(b) of $22,000 and expenses of $5,000 allocable to corpus. Distributable net income amounts to $17,000. The trustee distributed $10,000 each to A and B during the taxable year. There is an accumulation distribution of $3,000 computed as follows:

Total distribution	$20,000
Less: income required to be distributed currently	0
Other amounts distributed (section 661(a)(2))	20,000
Distributable net income	17,000
Accumulation distribution	3,000

(d) There are not taken into account, in computing the accumulation distribution for any taxable year, any amounts deemed distributed in that year because of an accumulation distribution in a later year.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 734, Jan. 17, 1969]

§ 1.665(b)–2 Exclusions from accumulation distributions in the case of trusts (other than a foreign trust created by a U.S. person).

(a) In the case of a trust other than a foreign trust created by a U.S. person, certain amounts paid, credited, or required to be distributed to a beneficiary are excluded under section 665(b) in determining whether there is an accumulation distribution for the purposes of Subpart D (section 665 and following), Part I, Subchapter J, Chapter 1 of the Code. These exclusions are solely for the purpose of determining the amount allocable to preceding years under section 666 and in no way affect the determination under Subpart C (section 661 and following) of such Part I of the beneficiary's tax liability for the year of distribution. Further, amounts excluded from accumulation distributions do not reduce the amount of undistributed net income for the 5 years preceding the year of distribution.

(b) The amounts excluded from the computation of an accumulation distribution are discussed in the following subparagraphs:

(1) Distributions from accumulations while a beneficiary is under 21. (i) The first exception to the definition of an accumulation distribution is for amounts paid, credited, or required to be distributed to a beneficiary who was under 21 years of age or unborn when it was accumulated. A distribution is to be considered as so paid, credited, or required to be distributed to the extent, and only to the extent, that there is no undistributed net income for taxable years preceding the year of distribution other than undistributed net income accumulated while the beneficiary was under 21. If a distribution can be made from income accumulated either before or after a beneficiary reaches 21, it will be considered as made from the most recently accumulated income, and it will be so considered even though the governing instrument directs that distributions be charged first against the earliest accumulations.

(ii) As was indicated in paragraph (a) of this section, a distribution of an amount excepted from the definition of an accumulation distribution will not reduce undistributed net income for the purpose of determining the effect of a future accumulation distribution. Thus, a distribution to a beneficiary of income accumulated before he reached 21 would not reduce the undistributed net income includible in a future accumulation distribution to another beneficiary. However, all future distributions to the same beneficiary, or to another beneficiary to whom a distribution would be excepted under the provisions of this subparagraph, would be excepted from the definition of an accumulation distribution to the extent that they could not be paid, credited, or required to be distributed from other accumulated income.

(iii) The following examples illustrate the application of the foregoing rules of this subparagraph (in each of these examples it is assumed that the exceptions in section 665(b)(2), (3), and (4) do not apply):

(a) Income is to be accumulated until A reaches 21 when the corpus and accumulated income are to be distributed to him. The distribution is not an accumulation distribution.

(b) Income is to be accumulated until A is 21, when it is to be distributed to him but the corpus is to remain in trust. A distribution of the accumulated income to A when he reaches 21 is not an accumulation distribution.

(c) Income is to be accumulated and added to corpus until A reaches 21, when he is to receive one-third of the corpus (including accumulations). Thereafter all the income is to be paid to A until he is 23 when the remaining corpus (including accumulations) is to be paid to him. If A dies under that age any undistributed portion is to be paid to B. Distributions to A at 21 and 23 out of accumulations are not accumulation distributions even though they include accumulated income. However, if A died at the age of 22, when B was 23, a distribution to B would be an accumulation distribution to the extent of income accumulations since B reached 21, and the amount of undistributed net income includible in the distribution will not be reduced by the previous distribution to A.

(d) Income is to be accumulated and added to corpus until A is 21. After he is 21, he is entitled to all the income and, in addition, to distributions of corpus in the discretion of the trustee. When he reaches 25 he is entitled to the corpus. Distributions to A are not accumulation distributions, whether they are discretionary or upon termination of the trust.

(e) The facts are the same as in the preceding example, except that income is to be accumulated until A is 23. Distributions to A are accumulation distributions to the extent of income accumulated after A reached 21.

(f) Income may be distributed among a testator's children or accumulated and added to corpus until the youngest child is 21, when the corpus is to be distributed to the testator's then living descendants. Upon termination of the trust, the corpus is distributed to A, age 21; B, age 23; and C, the child of a deceased child, age 3. The distributions to A and C are not accumulation distributions. The distribution to B is an accumulation distribution to the extent of income accumulated after he reaches 21. (If the terms of the trust were such that it was subject to the separate share treatment under section 663(c), the distribution to B would be an accumulation distribution only to the extent of income accumulated for B's separate share since he reached 21.)

(g) Income may be distributed to A or accumulated and added to corpus during A's life. Upon the death of A the corpus is to be distributed to B. B is 23 at A's death. The distribution is an accumulation distribution to the extent of income accumulated since B reached 21.

(2) Emergency distributions. The second exclusion from the definition of an accumulation distribution is for amounts properly paid or credited to a beneficiary to meet his emergency needs. Whether or not a distribution falls within this exclusion depends upon the facts and circumstanc-

es causing the distribution. A distribution based upon an unforeseen or unforeseeable combination of circumstances requiring immediate help to the beneficiary would qualify for the exclusion. However, the beneficiary must be in actual need of the distribution and the fact that he had other sufficient resources would tend to negate the conclusion that a distribution was to meet his emergency needs. Ordinary distributions for the support, maintenance, or education of the beneficiary would not qualify for the exclusion.

(3) **Certain distributions at specified ages.** The third exclusion from the definition of an accumulation distribution is for amounts properly paid or credited to a beneficiary upon the beneficiary's attaining a specified age or ages; provided, (i) the total number of such distributions with respect to that beneficiary cannot exceed 4; (ii) the period between each such distribution is 4 years or more; and (iii) on January 1, 1954, such distributions were required by the specific terms of the governing instrument. Any discretionary invasion of corpus at other times is not excluded under this subparagraph, but does not affect the status of distributions that would otherwise be excluded. If more than four distributions are required to be made to a particular beneficiary at specified ages if he survives to receive them, none of the distributions will be excluded, even though the beneficiary dies before he receives more than four. On the other hand, a direction to make additional distributions to a remainderman will not affect the status of distributions required to be made to the primary beneficiary. For example, a trust agreement provided on January 1, 1954, that when A reached age 25 he would receive one-eighth of the corpus and accumulated income, as then constituted, and similar distributions at ages 30, 35, and 40. It also provided for similar distributions to B after A's death, and for additional discretionary distributions to both A and B. Required distributions to both A and B are excluded, regardless of whether discretionary distributions are made, but discretionary distributions are not excluded. On the other hand, if an additional distribution to A was directed when he reached 45, no distributions to him would be excluded, regardless of when he died.

(4) **Certain final distributions.** (i) The last exception to the definition of an accumulation distribution is for amounts properly paid or credited to a beneficiary as a final distribution of a trust if the final distribution is made more than 9 years after the date of the last transfer to such trust.

(ii) The term "last transfer to such trust" includes only transfers, whether by the original grantor or by a third person, made with a donative intent. A transfer arising out of a property right held by the trust is excluded, such as a transfer by a debtor in satisfaction of his indebtedness, or a distribution in liquidation or reorganization of a corporation. If the terms of two or more trusts include cross-remainders on the deaths of life beneficiaries, the donative transfers occurred at the time the trusts were created. The addition of the corpus of one trust to that of another when a remainder falls in is therefore not a new transfer within the meaning of section 665(b)(4).

(iii) For example, under the terms of a trust created July 1, 1950, with an original corpus of $100,000, by H for the benefit of his wife, W, the income of the trust is to be accumulated and added to corpus. Upon the expiration of a 10-year period, the trust is to terminate and its assets, including all accumulated income, are to be distributed to W. No transfers were made by H or other persons to the trust after it was created. Both the trust and W file returns on the calendar year basis. In accordance with its terms, the trust terminated on June 30, 1960, and on August 1, 1960, the trustee made a final distribution of the assets of the trust to W, consisting of investments derived from $100,000 of donated principal, accumulated income of $30,000 attributable to the period July 1, 1950, through December 31, 1959, and income of $3,000 attributable to the period the trust was in existence during 1960. Subpart D is inapplicable to the $3,000 of income of the trust for 1960 since that amount would be deductible by the trust and includible in W's gross income for that year to the extent provided in subpart C. However, the balance of the distribution will qualify as an exclusion from the provisions of subpart D.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 735, Jan. 17, 1969]

§ 1.665(b)–3 Exclusions under section 663(a)(1).

Subpart D (section 665 and following), part I, subchapter J, chapter 1 of the Code, has no application to an amount which qualifies as an exclusion under section 663(a)(1), relating to gifts, bequests, etc.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.665(c)–1 Accumulation distributions of certain foreign trusts; in general.

(a) In the case of a foreign trust created by a U.S. person, the term "accumulation distribution"

for any taxable year means an amount by which the amounts properly paid, credited, or required to be distributed within the meaning of section 661(a)(2) for that year exceed the distributable net income (determined under section 643(a)) of the trust, reduced (but not below zero) by the amount of income required to be distributed currently. (In computing the amount of an accumulation distribution pursuant to the preceding sentence, there is taken into account amounts applied or distributed for the support of a dependent under circumstances specified in section 677(b) and section 678(c) out of corpus or out of other than income for the taxable year and amounts used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)–4.)

(b) Although amounts properly paid, credited, or required to be distributed under section 661(a)(2) do not exceed the income of the trust during the taxable year, an accumulation distribution may result if such amounts exceed distributable net income reduced (but not below zero) by the amount required to be distributed currently. This may result from the fact that expenses allocable to corpus are taken into account in determining taxable income and hence distributable net income. However, the provisions of Subpart D will not apply unless there is undistributed net income in at least one of the preceding taxable years which began after December 31, 1953, and ended after August 16, 1954. See section 666 and the regulations thereunder.

(c) The provisions of paragraphs (a) and (b) of this section may be illustrated by the examples provided in paragraph (c) of § 1.665(b)–1.

[T.D. 6989, 34 FR 735, Jan. 17, 1969]

§ 1.665(c)–2 Indirect payments to the beneficiary.

(a) **In general.** Except as provided in paragraph (b) of this section, for purposes of section 665 any amount paid to a U.S. person which is from a payor who is not a U.S. person and which is derived directly or indirectly from a foreign trust created by a U.S. person shall be deemed in the year of payment to the U.S. person to have been directly paid to the U.S. person by the trust. For example, if a nonresident alien receives a distribution from a foreign trust created by a U.S. person and then pays the amount of the distribution over to a U.S. person, the payment of such amount to the U.S. person represents an accumulation distribution to the U.S. person from the trust to the extent that the amount received would have been an accumulation distribution had the trust paid the amount directly to the U.S. person in the year in which the payment was received by the U.S. person. This section also applies in a case where a nonresident alien receives indirectly an accumulation distribution from a foreign trust created by a U.S. person and then pays it over to a U.S. person. An example of such a transaction is one where the foreign trust created by a U.S. person makes the distribution to an intervening foreign trust created by either a U.S. person or a person other than a U.S. person and the intervening trust distributes the amount received to a nonresident alien who in turn pays it over to a U.S. person. Under these circumstances, it is deemed that the payment received by the U.S. person was received directly from a foreign trust created by a U.S. person.

(b) **Limitation.** In the case of a distribution to a beneficiary who is a U.S. person, paragraph (a) of this section does not apply if the distribution is received by such beneficiary under circumstances indicating lack of intent on the part of the parties to circumvent the purposes for which section 7 of the Revenue Act of 1962 (76 Stat. 985) was enacted.

[T.D. 6989, 34 FR 735, Jan. 17, 1969]

§ 1.665(d)–1A Taxes imposed on the trust.

(a) For the purpose of subpart D (section 665 and following), part I, subchapter J, chapter 1 of the Code, the term "taxes imposed on the trust" means (for any taxable year) the amount of Federal income taxes which are properly allocable to the undistributed portion of the distributable net income. This amount is the difference between the total taxes of the trust for the year and the amount which would have been paid by the trust had all of the distributable net income, as determined under section 643(a), been distributed. Thus, in determining the amount of taxes imposed on the trust for the purposes of subpart D, there is excluded the portion of the taxes paid by the trust which is attributable to items of gross income which are not includible in distributable net income, such as capital gains allocable to corpus. The rule stated in this paragraph may be illustrated by the following example:

Example. (1) Under the terms of a trust which reports on the calendar year basis the income may be accumulated or distributed to A in the discretion of the trustee and capital gains are allocable to corpus. During the taxable year 1954, the trust had income of $20,000 from royalties, long-term capital gains of $10,000, and expenses of $2,000. The trustee in his discretion made a distribution of $10,000 to A. The

taxes imposed on the trust for the purposes of this subpart are $2,713, determined as shown below.

(2) The distributable net income of the trust computed under section 643(a) is $18,000 (royalties of $20,000 less expenses of $2,000). The total taxes paid by the trust are $3,787, computed as follows:

Royalties		$20,000
Capital gains		10,000
Gross income		30,000
Deductions:		
Expenses	$2,000	
Distributions to A	10,000	
Capital gain deduction	5,000	
Personal exemption	100	
		17,100
Taxable income		12,900
Total income taxes		3,787

(3) The amount of taxes which would have been paid by the trust, had all of the distributable net income ($18,000) of the trust been distributed to A, is $1,074, computed as follows:

Taxable income of the trust	$12,900
Less: Undistributed portion of distributable net income ($18,000–$10,000)	8,000
Balance of taxable income	4,900
Income taxes on $4,900	1,074

(4) The amount of taxes imposed on the trust as defined in this paragraph is $2,713, computed as follows:

Total taxes	$3,787
Taxes which would have been paid by the trust had all of the distributable net income been distributed	1,074
Taxes imposed on the trust as defined in this paragraph	2,713

(b) If in any subsequent year an accumulation distribution is made by the trust which results in a throwback to the taxable year, the taxes of the taxable year allocable to the undistributed portion of distributable net income (the taxes imposed on the trust), after the close of the subsequent year, are the taxes prescribed in paragraph (a) of this section reduced by the taxes of the taxable year allowed as credits to beneficiaries on account of amounts deemed distributed on the last day of the taxable year under section 666. See paragraph (f)(4) of § 1.668(b)–2 for an illustration of the application of this paragraph.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960. Redesignated by T.D. 6989, 34 FR 735, Jan. 17, 1969]

§ 1.665(e)–1 Preceding taxable year.

(a) Definition. For purposes of subpart D (section 665 and following), part I, subchapter J, chapter 1 of the Internal Revenue Code of 1954, the term "preceding taxable year" does not include any taxable year to which such part I does not apply. See section 683 and regulations thereunder. Accordingly, the provisions of such subpart D may not, in general, be applied to any taxable year which begins before 1954 or ends before August 17, 1954. For example, if a trust (reporting on the calendar year basis) makes a distribution during the calendar year 1955 of income accumulated during prior years and the distribution exceeds the distributable net income of 1955, the excess distribution may be allocated under such subpart D to 1954, but it may not be allocated to 1953 and preceding years, since the Internal Revenue Code of 1939 applies to those years.

(b) Simple trusts subject to Subpart D. An accumulation distribution may be properly allocated to a preceding taxable year in which the trust qualified as a simple trust (that is, qualified for treatment under Subpart B (section 651 and following) of such Part I). In such event, the trust is treated for such preceding taxable year in all respects as if it were a trust to which Subpart C (section 661 and following) of such Part I applies. An example of such a circumstance would be in the case of a trust (required under the trust instrument to distribute all of its income currently) which received in the preceding taxable year extraordinary dividends or taxable stock dividends which the trustee in good faith allocated to corpus, but which are subsequently determined to be currently distributable to the beneficiary. See section 643(a)(4) and § 1.643(a)–4. The trust would qualify for treatment under such Subpart C for the year of distribution of the extraordinary dividends or taxable stock dividends, because the distribution is not out of income of the current taxable year and would be treated as other amounts properly paid or credited or required to be distributed for such taxable year within the meaning of section 661(a)(2). Also, in the case of a trust other than a foreign trust created by a U.S. person, the distribution would qualify as an accumulation distribution for the purposes of such Subpart D if in excess of $2,000 and not excepted under section 665(b) and the regulations thereunder. In the case of a foreign trust created by a U.S. person, the distribution, regardless of the amount, would qualify as an accumulation distribution for the purposes of Subpart D. For the purposes only of such Subpart D, the trust would be treated as subject to the provisions of such Subpart C for the preceding taxable year in which the extraordinary or taxable stock dividends were received and in computing undistributed net income for such preceding year, the extraordinary or taxable stock dividends would be included in distributable net income under section 643(a). The rule stated in the preceding sentence

would also apply if the distribution in the later year were made out of corpus without regard to a determination that the extraordinary dividends or taxable stock dividends in question were currently distributable to the beneficiary.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 735, Jan. 17, 1969. Redesignated by T.D. 6989, 34 FR 735, Jan. 17, 1969]

§ 1.665(e)–2 Application of separate share rule.

In trusts to which the separate share rule of section 663(c) is applicable for any taxable year, subpart D (section 665 and following), part I, subchapter J, of the Code, is applied as if each share were a separate trust. Thus, "undistributed net income" and the amount of an "accumulation distribution" are computed separately for each share. The "taxes imposed on the trust" are allocated as follows:

(a) There is first allocated to each separate share that portion of the "taxes imposed on the trust", computed before the allowance of credits under section 642(a), which bears the same relation to the total that the distributable net income of the separate share bears to the distributable net income of the trust, adjusted for this purpose as follows:

(1) There is excluded from distributable net income of the trust and of each separate share any tax-exempt interest, foreign income of a foreign trust, and excluded dividends, to the extent such amounts are included in distributable net income pursuant to section 643(a)(5), (6), and (7); and

(2) The distributable net income of the trust is reduced by any deductions allowable under section 661 for amounts paid, credited, or required to be distributed during the taxable year, and the distributable net income of each separate share is reduced by any such deduction allocable to that share.

(b) The taxes so determined for each separate share are then reduced by that portion of the credits against tax allowable to the trust under section 642(a) in computing the "taxes imposed on the trust" which bear the same relation to the total that the items of income allocable to the separate share with respect to which the credit is allowed bear to the total of such items of the trust. The amount of taxes imposed on the trust allocable to a separate share as so determined is then reduced by the amount of the taxes allowed under sections 667 and 668 as a credit to a beneficiary of the separate share on account of any accumulation distribution determined for any taxable year intervening between the year for which the determination is made and the year of an accumulation distribution with respect to which the determination is made. See paragraph (b) of § 1.665(d)–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 741, Jan. 17, 1969. Redesignated by T.D. 6989, 34 FR 736, Jan. 17, 1969]

§ 1.666(a)–1A Amount allocated.

(a) In general. In the case of a trust that is subject to subpart C of part I of subchapter J of chapter 1 of the Code (relating to estates and trusts that may accumulate income or that distribute corpus), section 666(a) prescribes rules for determining the taxable years from which an accumulation distribution will be deemed to have been made and the extent to which the accumulation distribution is considered to consist of undistributed net income. In general, an accumulation distribution made in taxable years beginning after December 31, 1969, is deemed to have been made first from the earliest preceding taxable year of the trust for which there is undistributed net income. An accumulation distribution made in a taxable year beginning before January 1, 1970, is deemed to have been made first from the most recent preceding taxable year of the trust for which there is undistributed net income. See § 1.665(e)–1A for the definition of "preceding taxable year."

(b) Distributions by domestic trusts—(1) Taxable years beginning after December 31, 1973. An accumulation distribution made by a trust (other than a foreign trust created by a U.S. person) in any taxable year beginning after December 31, 1973, is allocated to the preceding taxable years of the trust (defined in § 1.665(e)–1A(a)(1)(ii) as those beginning after December 31, 1968) according to the amount of undistributed net income of the trust for such years. For this purpose, an accumulation distribution is first to be allocated to the earliest such preceding taxable year in which there is undistributed net income and shall then be allocated, beginning with the next earliest, to any remaining preceding taxable years of the trust. The portion of the accumulation distribution allocated to the earliest preceding taxable year is the amount of the undistributed net income for that preceding taxable year. The portion of the accumulation distribution allocated to any preceding taxable year subsequent to the earliest such preceding taxable year is the excess of the accumulation distribution over the aggregate of the undistributed net income for all earlier preceding taxable years. See para-

graph (d) of this section for adjustments to undistributed net income for prior distributions. The provisions of this subparagraph may be illustrated by the following example:

Example. In 1977, a domestic trust reporting on the calendar year basis makes an accumulation distribution of $33,000. Therefore, years before 1969 are ignored. In 1969, the trust had $6,000 of undistributed net income; in 1970, $4,000; in 1971, none; in 1972, $7,000; in 1973, $5,000; in 1974, $8,000; in 1975, $6,000; and $4,000 in 1976. The accumulation distribution is deemed distributed $6,000 in 1969, $4,000 in 1970, none in 1971, $7,000 in 1972, $5,000 in 1973, $8,000 in 1974, and $3,000 in 1975.

(2) **Taxable years beginning after December 31, 1969, and before January 1, 1974.** If a trust (other than a foreign trust created by a U.S. person) makes an accumulation distribution in a taxable year beginning after December 31, 1969, and before January 1, 1974, the distribution will be deemed distributed in the same manner as accumulation distributions qualifying under subparagraph (1) of this paragraph, except that the first year to which the distribution may be thrown back cannot be earlier than the fifth taxable year of the trust preceding the year in which the accumulation distribution is made. Thus, for example, in the case of an accumulation distribution made in the taxable year of a domestic trust which begins on January 1, 1972, the taxable year of the trust beginning on January 1, 1967, would be the first year in which the distribution was deemed made, assuming that there was undistributed net income for 1967. See also § 1.665(e)–1A(a)(1). The provisions of this subparagraph may be illustrated by the following example:

Example. In 1973, a domestic trust, reporting on the calendar year basis, makes an accumulation distribution of $25,000. In 1968, the fifth year preceding 1973, the trust had $7,000 of undistributed net income; in 1969, none; in 1970, $12,000; in 1971, $4,000; in 1972, $4,000. The accumulation distribution is deemed distributed in the amounts of $7,000 in 1968, none in 1969, $12,000 in 1970, $4,000 in 1971, and $2,000 in 1972.

(3) **Taxable years beginning after December 31, 1968, and before January 1, 1970.** Accumulation distributions made in taxable years of the trust beginning after December 31, 1968, and before January 1, 1970, are allocated to prior years according to § 1.666(a)–1.

(c) **Distributions by foreign trusts—(1) Foreign trusts created solely by U.S. persons—(i) Taxable years beginning after December 31, 1969.** If a foreign trust created by a U.S. person makes an accumulation distribution in any taxable year beginning after December 31, 1969, the distribution is allocated to the trust's preceding taxable years (defined in § 1.665(e)–1A(a)(2) as those beginning after Dec. 31, 1953, and ending after Aug. 16, 1954) according to the amount of undistributed net income of the trust for such years. For this purpose, an accumulation distribution is first allocated to the earliest such preceding taxable year in which there is undistributed net income and shall then be allocated in turn, beginning with the next earliest, to any remaining preceding taxable years of the trust. The portion of the accumulation distribution allocated to the earliest preceding taxable year is the amount of the undistributed net income for that preceding taxable year. The portion of the accumulation distribution allocated to any preceding taxable year subsequent to the earliest such preceding taxable year is the excess of the accumulation distribution over the aggregate of the undistributed net income for all earlier preceding taxable years. See paragraph (d) of this section for adjustments to undistributed net income for prior distributions. The provisions of this subdivision may be illustrated by the following example:

Example. In 1971, a foreign trust created by a U.S. person, reporting on the calendar year basis, makes an accumulation distribution of $50,000. In 1961, the trust had $12,000 of undistributed net income; in 1962, none; in 1963, $10,000; in 1964, $8,000; in 1965, $5,000; in 1966, $14,000; in 1967, none; in 1968, $3,000; in 1969, $2,000; and in 1970, $1,000. The accumulation distribution is deemed distributed in the amounts of $12,000 in 1961, none in 1962, $10,000 in 1963, $8,000 in 1964, $5,000 in 1965, $14,000 in 1966, none in 1967, and $1,000 in 1968.

(ii) **Taxable years beginning after December 31, 1968, and before January 1, 1970.** Accumulation distributions made in taxable years of the trust beginning after December 31, 1968, and before January 1, 1970, are allocated to prior years according to § 1.666(a)–1.

(2) **Foreign trusts created partly by U.S. persons—(i) Taxable years beginning after December 31, 1969.** If a trust that is in part a foreign trust created by a U.S. person and in part a foreign trust created by a person other than a U.S. person makes an accumulation distribution in any year after December 31, 1969, the distribution is deemed made from the undistributed net income of the foreign trust created by a U.S. person in the proportion that the total undistributed net income for all preceding years of the foreign trust created by the U.S. person bears to the total undistributed net income for all years of the entire foreign trust. In addition, such distribution is deemed made from the undistributed net income of the foreign trust created by a person other than a U.S. person in the proportion that the total undistributed net income for all preceding years of the foreign trust created by a person other than a U.S. person bears to the total undistributed net income for all years of the entire foreign trust. Accordingly, an accumulation distribution of such a trust is composed

of two portions with one portion relating to the undistributed net income of the foreign trust created by the U.S. person and the other portion relating to the undistributed net income of the foreign trust created by the person other than a U.S. person. For these purposes, each portion of an accumulation distribution made in any taxable year is first allocated to each of such preceding taxable years in turn, beginning with the earliest preceding taxable year, as defined in § 1.665(e)–1A(a), of the applicable foreign trusts, to the extent of the undistributed net income for the such trust for each of those years. Thus, each portion of an accumulation distribution is deemed to have been made from the earliest accumulated income of the applicable trust. If the foreign trust created by a U.S. person makes an accumulation distribution in any year beginning after December 31, 1969, the distribution is included in the beneficiary's income for that year to the extent of the undistributed net income of the trust for the trust's preceding taxable years which began after December 31, 1953, and ended after August 16, 1954. The provisions of this subdivision may be illustrated by the following example:

Example. A trust is created in 1962 under the laws of Country X by the transfer to a trustee in Country X of property by both a U.S. person and a person other than a U.S. person. Both the trust and the only beneficiary of the trust (who is a U.S. person) report their taxable income on a calendar year basis. On March 31, 1974, the trust makes an accumulation distribution of $150,000 to the beneficiary. The distributable net income of both the portion of the trust which is a foreign trust created by a U.S. person and the portion of the trust which is a foreign trust created by a person other than a U.S. person for each year is computed in accordance with the provisions of paragraph (b)(3) of § 1.643(d)–1 and the undistributed net income for each portion of the trust for each year is computed as described in paragraph (b) of § 1.665(a)–1A. For taxable years 1962 through 1973, the portion of the trust which is a foreign trust created by a U.S. person and the portion of the trust which is a foreign trust created by a person other than a U.S. person had the following amounts of undistributed net income:

Year	Undistributed net income-portion of the trust created by a U.S. person	Undistributed net income-portion of the trust created by a person other than a U.S. person
1962	$7,000	$4,000
1963	12,000	7,000
1964	None	None
1965	11,000	5,000
1966	8,000	3,000
1967	None	None
1968	4,000	2,000
1969	17,000	8,000
1970	16,000	9,000
1971	None	None
1972	25,000	12,000
1973	20,000	10,000
Totals	120,000	60,000

The accumulation distribution in the amount of $150,000 is deemed to have been distributed in the amount of $100,000 (120,000/180,000×$150,000) from the portion of the trust which is a foreign trust created by a U.S. person and in the amount of $39,000, which is less than $50,000 (60,000/180,000×$150,000), from the portion of the trust which is a foreign trust created by a person other than a U.S. person computed as follows:

Year	Throwback to preceding years of foreign trust created by a U.S. person	Throwback to preceding years of portion of the entire foreign trust which is not a foreign trust created by a U.S. person
1962	$7,000	None
1963	12,000	None
1964	None	None
1965	11,000	None
1966	8,000	None
1967	None	None
1968	4,000	None
1969	17,000	$8,000
1970	16,000	9,000
1971	None	None
1972	25,000	$12,000
1973	None	10,000
Totals	100,000	39,000

Pursuant to this paragraph, the accumulation distribution in the amount of $100,000 from the portion of the trust which is a foreign trust created by a U.S. person is included in the beneficiary's income for 1974, as the amount represents undistributed net income of the trust for the trust's preceding taxable years which began after December 31, 1953, and ended after August 16, 1954. The accumulation distribution in the amount of $50,000 from the portion of the trust which is a foreign trust created by a person other than a U.S. person is included in the beneficiary's income for 1974 to the extent of the undistributed net income of the trust for the preceding years beginning after December 31, 1968. Accordingly, with respect to the portion of the trust which is a foreign trust created by a person other than a U.S. person, only the undistributed net income for the years 1969 through 1973, which totals $39,000, is includible in the beneficiary's income for 1974. Thus, of the $150,000 distribution made in 1974, the beneficiary is required to include a total of $139,000 in his income for 1974. The balance of $11,000 is deemed to represent a distribution of corpus.

(ii) Taxable years beginning after December 31, 1968, and before January 1, 1970. Accumulation distributions made in taxable years of the trust beginning after December 31, 1968, and before January 1, 1970, are allocated to prior years according to § 1.666(a)–1.

(3) **Foreign trusts created by non-U.S. persons.** To the extent that a foreign trust is a foreign trust created by a person other than a U.S. person, an accumulation distribution is included in the beneficiary's income for the year paid, credited, or required to be distributed to the extent provided under paragraph (b) of this section.

(d) **Reduction of undistributed net income for prior accumulation distributions.** For the purposes of allocating to any preceding taxable year an accumulation distribution of the taxable year, the undistributed net income of such preceding taxable year is reduced by the amount from such year deemed distributed in any accumulation distribution of undistributed net income made in any taxable year intervening between such preceding taxable year and the taxable year. Accordingly, for example, if a trust has undistributed net income for 1974 and makes accumulation distributions during the taxable years 1978 and 1979, in determining that part of the 1979 accumulation distribution that is thrown back to 1974 the undistributed net income for 1974 is first reduced by the amount of the undistributed net income for 1974 deemed distributed in the 1978 accumulation distribution.

(e) **Rule when no undistributed net income.** If, before the application of the provisions of subpart D to an accumulation distribution for the taxable year, there is no undistributed net income for a preceding taxable year, then no portion of the accumulation distribution is undistributed net income deemed distributed on the last day of such preceding taxable year. Thus, if an accumulation distribution is made during the taxable year 1975 from a trust whose earliest preceding taxable year is taxable year 1970, and the trust had no undistributed net income for 1970, then no portion of the 1975 accumulation distribution is undistributed net income deemed distributed on the last day of 1970.

[T.D. 7204, 37 FR 17143, Aug. 25, 1972]

§ 1.666(b)–1A Total taxes deemed distributed.

(a) If an accumulation distribution is deemed under § 1.666(a)–1A to be distributed on the last day of a preceding taxable year and the amount is not less than the undistributed net income for such preceding taxable year, then an additional amount equal to the "taxes imposed on the trust attributable to the undistributed net income" (as defined in § 1.665(d)–1A(b)) for such preceding taxable year is also deemed distributed under section 661(a)(2). For example, a trust has undistributed net income of $8,000 for the taxable year 1974. The taxes imposed on the trust attributable to the undistributed net income are $3,032. During the taxable year 1977, an accumulation distribution of $8,000 is made to the beneficiary, which is deemed under § 1.666(a)–1A to have been distributed on the last day of 1974. The 1977 accumulation distribution is not less than the 1974 undistributed net income. Accordingly, the taxes of $3,032 imposed on the trust attributable to the undistributed net income for 1974 are also deemed to have been distributed on the last day of 1974. Thus, a total of $11,032 will be deemed to have been distributed on the last day of 1974.

(b) For the purpose of paragraph (a) of this section, the undistributed net income of any preceding taxable year and the taxes imposed on the trust for such preceding taxable year attributable to such undistributed net income are computed after taking into account any accumulation distributions of taxable years intervening between such preceding taxable year and the taxable year. See paragraph (d) of § 1.666(a)–1A.

[T.D. 7204, 37 FR 17145, Aug. 25, 1972]

§ 1.666(c)–1A Pro rata portion of taxes deemed distributed.

(a) If an accumulation distribution is deemed under § 1.666(a)–1A to be distributed on the last day of a preceding taxable year and the amount is less than the undistributed net income for such preceding taxable year, then an additional amount is also deemed distributed under section 661(a)(2). The additional amount is equal to the "taxes imposed on the trust attributable to the undistributed net income" (as defined in § 1.665(a)–1A(b)) for such preceding taxable year, multiplied by a fraction, the numerator of which is the amount of the accumulation distribution allocated to such preceding taxable year and the denominator of which is the undistributed net income for such preceding taxable year. See paragraph (b) of example (1) and paragraphs (c) and (f) of example (2) in § 1.666(c)–2A for illustrations of this paragraph.

(b) For the purpose of paragraph (a) of this section, the undistributed net income of any preceding taxable year and the taxes imposed on the trust for such preceding taxable year attributable to such undistributed net income are computed after taking into account any accumulation distributions of any taxable years intervening between such preceding taxable year and the taxable year. See paragraph (d) of § 1.666(a)–1A and paragraph

(c) of example (1) and paragraphs (e) and (h) of example (2) in § 1.666(c)–2A.

[T.D. 7204, 37 FR 17145, Aug. 25, 1972]

§ 1.666(c)–2A Illustration of the provisions of section 666(a), (b), and (c).

The application of the provisions of §§ 1.666(a)–1A, 1.666(b)–1A, and 1.666(c)–1A may be illustrated by the following examples:

Example (1). (a) A trust created on January 1, 1974, makes accumulation distributions as follows:

1979	$7,000
1980	26,000

For 1974 through 1978, the undistributed portion of distributable net income, taxes imposed on the trust attributable to the undistributed net income, and undistributed net income are as follows:

Year	Undistributed portion of distributable net income	Taxes imposed on the trust attributable to the undistributed net income	Undistributed net income
1974	$12,100	$3,400	$8,700
1975	16,100	5,200	10,900
1976	6,100	1,360	4,740
1977	None	None	None
1978	10,100	2,640	7,460

The trust has no undistributed capital gain.

(b) Since the entire amount of the accumulation distribution for 1979 ($7,000) is less than the undistributed net income for 1974 ($8,700), an additional amount of $2,736 (7,000/8,700 × $3,400) is deemed distributed under section 666(c).

(c) In allocating the accumulation distribution for 1980, the amount of undistributed net income for 1974 will reflect the accumulation distribution for 1979. The undistributed net income for 1974 will then be $1,700 and the taxes imposed on the trust for 1974 will be $664, determined as follows:

Undistributed net income as of the close of 1974	$8,700
Less: Accumulation distribution (1979)	7,000
Balance (undistributed net income as of the close of 1979)	1,700
Taxes imposed on the trust attributable to the undistributed net income as of the close of 1979 (1,700/8,700 × $3,400)	664

(d) The accumulation distribution of $26,000 for 1980 is deemed to have been made on the last day of the preceding taxable years of the trust to the extent of $24,800, the total of the undistributed net income for such years, as shown in the tabulation below. In addition, $9,864, the total taxes imposed on the trust attributable to the undistributed net income for such years is also deemed to have been distributed on the last day of such years, as shown below:

Year	Undistributed net income	Taxes imposed on the trust
1974	$1,700	$664
1975	10,900	5,200
1976	4,740	1,360
1977	None	None
1978	7,460	2,640
1979	None	None

Example (2). (a) Under the terms of a trust instrument, the trustee has discretion to accumulate or distribute the income to X and to invade corpus for the benefit of X. The entire income of the trust is from royalties. Both X and the trust report on the calendar year basis. All of the income for 1974 was accumulated. The distributable net income of the trust for the taxable year 1974 is $20,100 and the income taxes paid by the trust for 1974 attributable to the undistributed net income are $7,260. All of the income for 1975 and 1976 was distributed and in addition the trustee made accumulation distributions within the meaning of section 665(b) of $5,420 for each year.

(b) The undistributed net income of the trust determined under section 665(a) as of the close of 1974, is $12,840, computed as follows:

Distributable net income	$20,100
Less: Taxes imposed on the trust attributable to the undistributed net income	7,260
Undistributed net income as of the close of 1974	12,840

(c) The accumulation distribution of $5,420 made during the taxable year 1975 is deemed under section 666(a) to have been made on December 31, 1974. Since this accumulation distribution is less than the 1974 undistributed net income of $12,840, a portion of the taxes imposed on the trust for 1974 is also deemed under section 666(c) to have been distributed on December 31, 1974. The total amount deemed to have been distributed to X on December 31, 1974 is $8,484, computed as follows:

Accumulation distribution	$5,420
Taxes deemed distributed (5,420/12,840 × $7,260)	3,064
Total	8,484

(d) After the application of the provisions of subpart D to the accumulation distribution of 1975, the undistributed net income of the trust for 1974 is $7,420, computed as follows:

Undistributed net income as of the close of 1974	$12,840
Less: 1975 accumulation distribution deemed distributed on December 31, 1974 (paragraph (c) of this example)	5,420
Undistributed net income for 1974 as of the close of 1975	7,420

(e) The taxes imposed on the trust attributable to the undistributed net income for the taxable year 1974, as adjusted to give effect to the 1975 accumulation distribution, amount to $4,196, computed as follows:

Taxes imposed on the trust attributable to undistributed net income as of the close of 1974	$7,260
Less: Taxes deemed distributed in 1974	3,064
Taxes attributable to the undistributed net income determined as of the close of 1975	4,196

(f) The accumulation distribution of $5,420 made during the taxable year 1976 is, under section 666(a), deemed a distribution to X on December 31, 1974, within the meaning of section 661(a)(2). Since the accumulation distribution is less than the 1974 adjusted undistributed net income of $7,420, the trust is deemed under section 666(c) also to have distributed on December 31, 1974, a portion of the taxes imposed on the trust for 1974. The total amount deemed to be distributed on December 31, 1974, with respect to the accumulation distribution made in 1976, is $8,484, computed as follows:

Accumulation distribution	$5,420
Taxes deemed distributed (5,420/7,420 × $4,196)	3,064
Total	8,484

(g) After the application of the provisions of subpart D to the accumulation distribution of 1976, the undistributed net income of the trust for 1974 is $2,000, computed as follows:

Undistributed net income for 1974 as of the close of 1975	$7,420
Less: 1976 accumulation distribution deemed distributed on December 31, 1974 (paragraph (f) of this example)	5,420
Undistributed net income for 1974 as of the close of 1976	2,000

(h) The taxes imposed on the trust attributable to the undistributed net income of the trust for the taxable year 1974, determined as of the close of the taxable year 1976, amount to $1,132 ($4,196 less $3,064).

[T.D. 7204, 37 FR 17145, Aug. 25, 1972]

§ 1.666(d)–1A Information required from trusts.

(a) Adequate records required. For all taxable years of a trust, the trustee must retain copies of the trust's income tax return as well as information pertaining to any adjustments in the tax shown as due on the return. The trustee shall also keep the records of the trust required to be retained by section 6001 and the regulations thereunder for each taxable year as to which the period of limitations on assessment of tax under section 6501 has not expired. If the trustee fails to produce such copies and records, and such failure is due to circumstances beyond the reasonable control of the trustee or any predecessor trustee, the trustee may reconstruct the amount of corpus, accumulated income, etc., from competent sources (including, to the extent permissible, Internal Revenue Service records). To the extent that an accurate reconstruction can be made for a taxable year, the requirements of this paragraph shall be deemed satisfied for such year.

(b) Rule when information is not available—(1) Accumulation distributions. If adequate records (as required by paragraph (a) of this section) are not available to determine the proper application of subpart D to an accumulation distribution made in a taxable year by a trust, such accumulation distribution shall be deemed to consist of undistributed net income earned during the earliest preceding taxable year (as defined in § 1.665(e)–1A) of the trust in which it can be established that the trust was in existence. If adequate records are available for some years, but not for others, the accumulation distribution shall be allocated first to the earliest preceding taxable year of the trust for which there are adequate records and then to each subsequent preceding taxable year for which there are adequate records. To the extent that the distribution is not allocated in such manner to years for which adequate records are available, it will be deemed distributed on the last day of the earliest preceding taxable year of the trust in which it is established that the trust was in existence and for which the trust has no records. The provisions of this subparagraph may be illustrated by the following example:

Example. A trust makes a distribution in 1975 of $100,000. The trustee has adequate records for 1973, 1974, and 1975. The records show that the trust is on the calendar year basis, had distributable net income in 1975 of $20,000, and undistributed net income in 1974 of $15,000, and in 1973 of $16,000. The trustee has no other records of the trust except for a copy of the trust instrument showing that the trust was established on January 1, 1965. He establishes that the loss of the records was due to circumstances beyond his control. Since the distribution is made in 1975, the earliest "preceding taxable year", as defined in § 1.665(e)–1A, is 1969. Since $80,000 of the distribution is an accumulation distribution, and $31,000 thereof is allocated to 1974 and 1973, $49,000 is deemed to have been distributed on the last day of 1969.

(2) Taxes. (i) If an amount is deemed under this paragraph to be undistributed net income allocated to a preceding taxable year for which adequate records are not available, there shall be deemed to be "taxes imposed on the trust" for such preceding taxable year an amount equal to the taxes that the trust would have paid if the deemed undistributed net income were the amount remaining when the taxes were subtracted from taxable income of the trust for such year. For example, assume that an accumulation distribution in 1975 of $100,000 is deemed to be undistributed net income from 1971, and that the taxable income required to produce $100,000 after taxes in 1971 would be $284,966. Therefore the amount deemed to be "taxes imposed on the trust" for such preceding taxable year is $184,966.

(ii) The credit allowed by section 667(b) shall not be allowed for any amount deemed under this subparagraph to be "taxes imposed on the trust."

[T.D. 7204, 37 FR 17146, Aug. 25, 1972]

§ 1.666(a)–1 Amount allocated.

(a)(1) If a trust other than a foreign trust created by a U.S. person makes an accumulation distribution in any taxable year, the distribution is included in the beneficiary's gross income for that year to the extent of the undistributed net income of the trust for the preceding 5 years. It is therefore necessary to determine the extent to which there is undistributed net income for the preceding 5 years. For this purpose, an accumulation distribution made in any taxable year is allocated to each of the 5 preceding taxable years in turn, beginning with the most recent year, to the extent of the undistributed net income of each of those years. Thus, an accumulation distribution is deemed to have been made from the most recently accumulated income of the trust.

(2) If a foreign trust created by a U.S. person makes an accumulation distribution in any year after December 31, 1962, the distribution is included in the beneficiary's gross income for that year to the extent of the undistributed net income of the trust for the trust's preceding taxable years which began after December 31, 1953, and ended after August 16, 1954. It is therefore necessary to determine the extent to which there is undistributed net income for such preceding taxable years. For this purpose, an accumulation distribution made in any taxable year is first allocated to each of such preceding taxable years in turn, beginning with the most recent year, to the extent of the undistributed net income of each of those years. Thus, an accumulation distribution is deemed to have been made from the most recently accumulated income of the trust.

(3) If a trust that is in part a foreign trust created by a U.S. person and in part a foreign trust created by a person other than a U.S. person makes an accumulation distribution in any year after December 31, 1962, the distribution is deemed made from the undistributed net income of the foreign trust created by a U.S. person in the proportion that the total undistributed net income for all preceding years of the foreign trust created by the U.S. person bears to the total undistributed net income for all years of the entire foreign trust. In addition, such distribution is deemed made from the undistributed net income of the foreign trust created by a person other than a U.S. person in the proportion that the total undistributed net income for all preceding years of the foreign trust created by a person other than a U.S. person bears to the total undistributed net income for all years of the entire foreign trust. Accordingly, an accumulation distribution of such a trust is composed of two portions with one portion relating to the undistributed net income of the foreign trust created by the U.S. person and the other portion relating to the undistributed net income of the foreign trust created by the person other than a U.S. person. For these purposes, each portion of an accumulation distribution made in any taxable year is first allocated to each of such preceding taxable years in turn, beginning with the most recent year, to the extent of the undistributed net income for the applicable foreign trust for each of those years. Thus, each portion of an accumulation distribution is deemed to have been made from the most recently accumulated income of the applicable trust. If the foreign trust created by a U.S. person makes an accumulation distribution in any year after December 31, 1962, the distribution is included in the beneficiary's gross income for that year to the extent of the undistributed net income of the trust for the trust's preceding taxable years which began after December 31, 1953, and ended after August 16, 1954. If the foreign trust created by a person other than a U.S. person makes an accumulation distribution in any taxable year, the distribution is included in the beneficiary's gross income for that year to the extent of the undistributed net income of the trust for the preceding 5 years.

(b) If, before the application of the provisions of subpart D (section 665 and following), part I, subchapter J, chapter 1 of the Code, to an accumulation distribution for the taxable year, there is no undistributed net income for a preceding taxable year, then no portion of the accumulation distribution is deemed distributed on the last day of such preceding taxable year. Thus, if an accumulation distribution is made during the taxable year 1960 and the trust had no undistributed net income for the taxable year 1959, then no portion of the 1960 accumulation distribution is deemed distributed on the last day of 1959. For purposes of subpart D, the term "5 preceding taxable years" includes only the 5 taxable years immediately preceding the taxable year in which the accumulation distribution is made and which are subject to part I (section 641 and following) of such subchapter J even though the trust has no undistributed net income during one or more of those years.

(c) Paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). In 1964, a domestic trust, reporting on the calendar year basis, makes an accumulation distribution of $25,000. In 1963, the trust had $7,000 of undistributed net income; in 1962, none; in 1961, $12,000; in 1960, $4,000; in 1959, $4,000. The accumulation distribution is deemed distrib-

uted $7,000 in 1963, none in 1962, $12,000 in 1961, $4,000 in 1960, and $2,000 in 1959.

Example (2). In 1964, a foreign trust created by a U.S. person, reporting on the calendar year basis, makes an accumulation distribution of $50,000. In 1963, the trust had $12,000 of undistributed net income; in 1962, none; in 1961, $10,000; in 1960, $8,000; in 1959, $5,000; in 1958, $14,000; in 1957, none; in 1956, $3,000; in 1955, $2,000; and in 1954, $1,000. The accumulation distribution is deemed distributed $12,000 in 1963, none in 1962, $10,000 in 1961, $8,000 in 1960, $5,000 in 1959, $14,000 in 1958, none in 1957, $1,000 in 1956.

Example (3). A trust is created in 1952 under the laws of Country X by the transfer to a trustee in Country X of money and property by both a U.S. person and a person other than a U.S. person. Both the trust and the only beneficiary of the trust (who is a U.S. person) report their taxable income on a calendar year basis. On March 31, 1964, the trust makes an accumulation distribution of $150,000 to the U.S. beneficiary. The distributable net income of both the portion of the trust which is a foreign trust created by a U.S. person and the portion of the trust which is a foreign trust created by a person other than a U.S. person for each year is computed in accordance with the provisions of paragraph (b)(3) of § 1.643(d)–1 and the undistributed net income for each portion of the trust for each year is computed as described in paragraph (b) of § 1.665(a)–1. For the taxable years 1952 through 1963, the portion of the trust which is a foreign trust created by a U.S. person and the portion of the trust which is a foreign trust created by a person other than a U.S. person had the following amounts of undistributed net income:

Year	Undistributed net income—portion of the trust created by a U.S. person	Undistributed net income—portion of the trust created by a person other than a U.S. person
1963	$20,000	$10,000
1962	25,000	12,000
1961	None	None
1960	16,000	9,000
1959	17,000	8,000
1958	4,000	2,000
1957	None	None
1956	8,000	3,000
1955	11,000	5,000
1954	None	None
1953	12,000	7,000
1952	7,000	4,000
Totals	120,000	60,000

The accumulation distribution in the amount of $150,000 is deemed to have been distributed in the amount of $100,000 (120,000/180,000×$150,000) from the portion of the trust which is a foreign trust created by a U.S. person, and in the amount of $50,000 (60,000/180,000×$150,000) from the portion of the trust which is a foreign trust created by a person other than a U.S. person computed as follows:

Year	Throwback to preceding years of foreign trust created by a U.S. person	Throwback to preceding years of portion of the entire foreign trust which is not a foreign trust created by a U.S. person
1963	$20,000	$10,000
1962	25,000	12,000
1961	None	None
1960	16,000	9,000
1959	17,000	8,000
1958	4,000	2,000
1957	None	None
1956	8,000	3,000
1955	10,000	5,000
1954	None	None
1953	None	1,000
1952	None	None
Totals	100,000	50,000

Pursuant to paragraph (a)(3) of this section, the accumulation distribution in the amount of $100,000 from the portion of the trust which is a foreign trust created by a U.S. person is included in the beneficiary's gross income for 1964, as this amount represents undistributed net income of the trust for the trust's preceding taxable years which began after December 31, 1953, and ended after August 16, 1954. The accumulation distribution in the amount of $50,000 from the portion of the trust which is a foreign trust created by a person other than a U.S. person is included in the beneficiary's gross income for 1964 to the extent of the undistributed net income of the trust for the preceding 5 years. Accordingly, with respect to the portion of the trust which is a foreign trust created by a person other than a U.S. person only the undistributed net income for the years 1959 through 1963 which totals $39,000 is includible in the beneficiary's gross income for 1964. Thus, of the $150,000 distribution made in 1964, the beneficiary is required to include a total of $139,000 in his gross income for 1964.

Example (4). Assume the same facts as in example (3) and, in addition, that by December 31, 1964, the undistributed net income for 1964 is determined to be $20,000, and that in accordance with the provisions of paragraph (b)(3) of § 1.643(d)–1 and paragraph (b) of § 1.665(a)–1, $10,000 is allocated to the portion of the trust which is a foreign trust created by a U.S. person and $10,000 is allocated to the portion of the trust which is a foreign trust created by a person other than a U.S. person. On March 31, 1965, the trust makes an accumulation distribution of $25,000 to the U.S. beneficiary. For the taxable years 1952 through 1964, the portion of the trust which is a foreign trust created by a U.S. person and the portion of the trust which is a foreign trust created by a person other than a U.S. person had the following amounts of undistributed net income:

Year	Undistributed net income—portion of the trust created by a U.S. person	Undistributed net income—portion of the trust created by a person other than a U.S. person
1964	$10,000	$10,000
1963	None	None
1962	None	None
1961	None	None
1960	None	None
1959	None	None
1958	None	None
1957	None	None
1956	None	None
1955	1,000	None

Year	Undistributed net income—portion of the trust created by a U.S. person	Undistributed net income—portion of the trust created by a person other than a U.S. person
1954	None	None
1953	12,000	6,000
1952	7,000	4,000
Totals	30,000	20,000

The accumulation distribution is deemed to have been distributed in the amount of $15,000 (30,000/50,000×$25,000), from the portion of the trust which is a foreign trust created by a U.S. person, and in the amount of $10,000 (20,000/50,000 × $25,000) from the portion of the trust which is a foreign trust created by a person other than a U.S. person computed as follows:

Year	Throwback to preceding years of foreign trust created by U.S. person	Throwback to preceding years of portion of the entire foreign trust which is not a foreign trust created by a U.S. person
1964	$10,000	$10,000
1963	None	None
1962	None	None
1961	None	None
1960	None	None
1959	None	None
1958	None	None
1957	None	None
1956	None	None
1955	1,000	None
1954	None	None
1953	4,000	None
1952	None	None
Totals	15,000	10,000

Pursuant to paragraph (a)(3) of this section, only $11,000 of the accumulation distribution in the amount of $15,000 from the portion of the trust which is a foreign trust created by a U.S. person is includible in the beneficiary's gross income for 1965 as the $11,000 amount represents undistributed net income of the trust for the trust's preceding taxable years which began after December 31, 1953, and ended after August 16, 1954. The accumulation distribution in the amount of $10,000 from the portion of the trust which is a foreign trust created by a person other than a U.S. person is included in the beneficiary's gross income for 1965 to the extent of the undistributed net income of the trust for the preceding 5 years. Accordingly, the entire $10,000 (representing the undistributed net income for the year 1964) is includible in the beneficiary's gross income for 1965. Thus, of the $25,000 distribution made in 1965, the beneficiary is required to include a total of $21,000 in his gross income for 1965.

(d) For the purposes of allocating to any preceding taxable year an accumulation distribution of the taxable year, the undistributed net income of such preceding taxable year is computed without regard to the accumulation distribution of the taxable year or of taxable years following the taxable year. However, accumulation distributions of any taxable years intervening between such preceding taxable year and the taxable year are taken into account. Accordingly, if a trust has undistributed net income for the taxable year 1954 and makes an accumulation distribution during the taxable year 1955, the undistributed net income for 1954 is computed without regard to the accumulation distribution for 1955 or any subsequent year. If the trust makes a further accumulation distribution for 1956, the undistributed net income for 1954 is computed without regard to the accumulation distribution for 1956 or subsequent years; but in determining the undistributed net income for 1954 for purposes of the 1956 accumulation distribution the accumulation distribution for 1955 will be taken into account.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 736, Jan. 17, 1969]

§ 1.666(b)-1 Total taxes deemed distributed.

(a) If an accumulation distribution is deemed under § 1.666(a)-1 to be distributed on the last day of a preceding taxable year and the amount is not less than the undistributed net income for such preceding taxable year, then an additional amount equal to the "taxes imposed on the trust" (as defined in § 1.665(d)-1) for such preceding taxable year is likewise deemed distributed under section 661(a)(2). For example, a trust has taxable income of $11,032 (not including any capital gains) and undistributed net income of $8,000 for the taxable year 1954. The taxes imposed on the trust are $3,032. During the taxable year 1955, an accumulation distribution of $8,000 is made to the beneficiary, which is deemed under § 1.666(a)-1 to have been distributed on the last day of 1954. The taxes imposed on the trust for 1954 of $3,032 are also deemed to have been distributed on the last day of 1954 since the 1955 accumulation distribution is not less than the 1954 undistributed net income. Thus, a total of $11,032 will be deemed to have been distributed on the last day of 1954 because of the accumulation distribution of $8,000 made in 1955.

(b) For the purpose of paragraph (a) of this section, the undistributed net income of any preceding taxable year is computed without regard to the accumulation distribution of the taxable year or any taxable year following such taxable year. However, any accumulation distribution of taxable years intervening between such preceding taxable year and the taxable year are taken into account.

See paragraph (d) of § 1.666(a)–1 and paragraphs (f)(5) and (g)(1) of § 1.668(b)–2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 741, Jan. 17, 1969]

§ 1.666(c)–1 Pro rata portion of taxes deemed distributed.

(a) If an accumulation distribution is deemed under § 1.666(a)–1 to be distributed on the last day of a preceding taxable year and the amount is less than the undistributed net income for such preceding taxable year, then an additional amount is likewise deemed distributed under section 661(a)(2). The additional amount is equal to the taxes imposed on the trust, as defined in § 1.665(d)–1, for such preceding taxable year, multiplied by the fraction of which the numerator is the amount of the accumulation distribution and the denominator is the undistributed net income for such preceding taxable year. See paragraph (b) of example (1) and paragraphs (c) and (f) of example (2) in § 1.666(c)–2, and paragraph (f)(2) of § 1.668(b)–2 for illustrations of this paragraph.

(b) For the purpose of paragraph (a) of this section, the undistributed net income of any preceding taxable year is computed without regard to the accumulation distribution of the taxable year or any taxable year following the taxable year. However, accumulation distributions of any taxable years intervening between such preceding taxable year and the taxable year are taken into account. See paragraph (d) of § 1.666(a)–1, paragraph (c) of example (1) and paragraphs (e) and (h) of example (2) in § 1.666(c)–2 and paragraph (f)(5)(iii) of § 1.668(b)–2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 741, Jan. 17, 1969]

§ 1.666(c)–2 Illustration of the provisions of section 666.

The application of the provisions of §§ 1.666(a)–1, 1.666(b)–1, and 1.666(c)–1 may be illustrated by the following examples:

Example (1). (a) A trust makes accumulation distributions as follows:

1959	$7,000
1960	25,000

For 1954 through 1958, the undistributed portion of distributable net income taxes imposed on the trust, and undistributed net income are as follows:

Year	Undistributed portion of distributable net income	Taxes imposed on the trust	Undistributed net income
1958	$12,100	$3,400	$8,700
1957	16,100	5,200	10,900
1956	6,100	1,360	4,740
1955	None	None	None
1954	10,100	2,640	7,460

(b) Since the entire amount of the accumulation distribution for 1959 ($7,000), determined without regard to the accumulation distribution for 1960, is less than the undistributed net income for 1958 ($8,700), an additional amount of $2,736 (7,000/8,700×$3,400) is likewise deemed distributed under section 666(c).

(c) In allocating the accumulation distribution for 1960, the undistributed net income for 1958 will take into account the accumulation distribution for 1959, and the additional amount of taxes imposed on the trust for 1958 deemed distributed. The undistributed net income for 1958 will then be $1,906; and the taxes imposed on the trust for 1958 will then be $458, determined as follows:

Undistributed portion of distributable net income as of the close of 1958		$12,100
Less:		
Accumulation distribution (1959)	$7,000	
Taxes deemed distributed under section 666(c) (7,000/8,700 × $3,400)	2,736	
		9,736
Balance (undistributed portion of distributable net income as of the close of 1959)		2,364
Less: Personal exemption		100
Balance		2,264
Taxes imposed on the trust (income taxes on $2,264)		458
Undistributed portion of distributable net income as of the close of 1959		2,364
Less: Income taxes attributable thereto		458
Undistributed net income for 1958 as of the close of 1959		1,906

(d) The accumulation distribution of $25,000 for 1960 is deemed to have been made on the last day of the 5 preceding taxable years of the trust to the extent of $17,546, the total of the undistributed net income for such years, as shown in the tabulation below. In addition, $7,018, the total taxes imposed on the trust for such years is also deemed to have been distributed on the last day of such years, as shown below:

Year	Undistributed net income	Taxes imposed on the trust
1959	None	None
1958	$1,906	$458
1957	10,900	5,200
1956	4,740	1,360
1955	None	None

(e) No portion of the 1960 accumulation distribution is deemed made on the last day of 1954 because, as to 1960, 1954 is the sixth preceding taxable year.

Example (2). (a) Under the terms of a trust instrument, the trustee has discretion to accumulate or distribute the income to X and to invade corpus for the benefit of X. The entire income of the trust is from royalties. Both X and the trust report on the calendar year basis. All of the income for 1954 was accumulated. The distributable net income of the trust for the taxable year 1954 is $20,100 and the income taxes paid by the trust for 1954 with respect to its distributable net income are $7,260. All of the income for 1955 and 1956 was distributed and in addition the trustee made accumulation distributions within the meaning of section 665(b) of $6,420 for each year.

(b) The undistributed net income of the trust determined under section 665(a) as of the close of 1954, is $12,840, computed as follows:

Distributable net income	$20,100
Less: Taxes imposed on the trust	7,260
Undistributed net income as of the close of 1954	12,840

(c) The accumulation distribution of $6,420 made during the taxable year 1955 is deemed under section 666(a) to have been made on December 31, 1954. Since this accumulation distribution is less than the 1954 undistributed net income of $12,840, a portion of the taxes imposed on the trust for 1954 is also deemed under section 666(c) to have been distributed on December 31, 1954. The total amount deemed to have been distributed to X on December 31, 1954, is $10,050, computed as follows:

Accumulation distribution	$6,420
Taxes deemed distributed (6,420/12,840 × $7,260)	3,630
Total	10,050

(d) After the application of the provisions of subpart D (section 665 and following), part I, subchapter J, chapter 1 of the Code, to the accumulation distribution of 1955, the undistributed portion of the distributable net income of the trust for 1954, is $10,050, and the taxes imposed with respect thereto are $2,623, computed as follows:

Distributable net income as of the close of 1954	$20,100
Less: 1955 accumulation distribution and taxes deemed distributed on December 31, 1954 (paragraph (c) of this example)	10,050
Undistributed portion of the 1954 distributable net income adjusted as of the close of 1955	10,050
Less: Personal exemption	100
Balance	9,950
Income taxes on $9,950	2,623

(e) The undistributed net income of the trust for the taxable year 1954, as adjusted to give effect to the 1955 accumulation distribution, is $7,427, computed as follows:

Undistributed portion of distributable net income as of the close of 1955	$10,050
Less: Income taxes applicable thereto	2,623
Undistributed net income determined as of the close of 1955	7,427

(f) Inasmuch as all of the income of the trust for the taxable year 1955 was distributed to X, the trust had no undistributed net income for that year. Accordingly, the accumulation distribution of $6,420 made during the taxable year 1956 is, under section 666(a), deemed a distribution to X on December 31, 1954, within the meaning of section 661(a)(2). Since this accumulation distribution is less than the 1954 adjusted undistributed net income of $7,427, the trust is deemed under section 666(c) also to have distributed on December 31, 1954, a portion of the taxes imposed on the trust for 1954. The total amount deemed to be distributed on December 31, 1954, with respect to the accumulation distribution made in 1956, is $8,687, computed as follows:

Accumulation distribution	$6,420
Taxes deemed distributed (6,420/7,427 × $2,623)	2,267
Total	8,687

(g) After the application of the provisions of subpart D to the accumulation distribution of 1956, the undistributed portion of the distributable net income of the trust for 1954, is $1,363, and the taxes imposed on the trust with respect thereto are $253, computed as follows:

Undistributed portion of distributable net income as of the close of 1955	$10,050
Less: 1956 accumulation distribution and taxes deemed distributed on December 31, 1954 (paragraph (f) of this example)	8,687
Undistributed portion of distributable net income as of the close of 1956	1,363
Less: Personal exemption	100
Balance	1,263
Income taxes on $1,263	253

(h) The undistributed net income of the trust for the taxable year 1954, determined as of the close of the taxable year 1956, is $1,110 ($1,363 less $253).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.667–1 Denial of refund to trusts.

(a) If an amount is deemed under section 666 to be an amount paid, credited, or required to be distributed on the last day of a preceding taxable year, the trust is not allowed a refund or credit of the amount of "taxes imposed on the trust", as defined in § 1.665(d)–1, which would not have been payable for the preceding taxable year had the trust in fact made such distribution on the last day of such year. However, such taxes are allowed as a credit under section 668(b) against the tax of the beneficiaries who are treated as having received the distributions in the preceding taxable year. The amount of taxes which may not be refunded or credited to the trust under this paragraph and which are allowed as a credit under section 668(b) against the tax of the beneficiaries, is an amount equal to the excess of:

(1) The taxes imposed on the trust (as defined in section 665(d) and § 1.655(d)–1) for any preceding taxable year (computed without regard to the accumulation distribution for the taxable year) over

(2) The amount of taxes for such preceding taxable year which would be imposed on the undistributed portion of distributable net income of the trust for such preceding taxable year after the application of subpart D (section 665 and following), part I, subchapter J, chapter 1 of the Code, on account of the accumulation distribution determined for the taxable year.

It should be noted that the credit under section 667 is computed by the use of a different ratio from that used for computing the amount of taxes deemed distributed under section 666(c).

(b) Paragraph (a) of this section may be illustrated by the following examples:

Example (1). In 1954, a trust of which A is the sole beneficiary has taxable income of $20,000 (including capital gains of $5,100 allocable to corpus less a personal exemption of $100), on which a tax of $7,260 is paid.

The undistributed portion of distributable net income is $15,000, to which $6,160 of the tax is allocable under section 665. The undistributed net income is therefore $8,840 ($15,000 minus $6,160). In 1955, the trust makes an accumulation distribution of $8,840. Under section 666(b), the total taxes for 1954 attributable to the undistributed net income are deemed distributed, so $15,000 is deemed distributed. The amount of the tax which may not be refunded to the trust under section 667 and the credit to which A is entitled under section 668(b) is the excess of $6,160 over zero, since after the distribution and the application of subpart D there is no remaining undistributed portion of distributable net income for 1954.

Example (2). The same trust as in example (1) of this paragraph distributes $5,000 in 1955, rather than $8,840. The amount of the tax which may not be refunded to the trust but which is available to A as a credit is $4,044, computed as follows:

Accumulation distribution in 1955		$5,000
Taxes deemed distributed under section 666(c) (5,000/8,840 × $6,160)		3,484
Total amount deemed distributed out of the undistributed portion of distributable net income		8,484
Tax attributable to the undistributed portion of distributable net income ($15,000) before 1955 distribution (see example (1) of this paragraph)		6,160
Tax on $11,516 (taxable income of $20,000 minus $8,484, amount deemed distributed)	$3,216	
Tax on $5,000 (capital gains of $5,100, less personal exemption of $100, allocable to corpus)	1,100	
Tax attributable to undistributed portion of distributable net income after 1955 distribution		2,116
Refund disallowed to the trust and credit available to A in 1955		4,044

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 741, Jan. 17, 1969]

§ 1.667(a)–1A Denial of refund to trusts.

If an amount is deemed under section 666 or 669 to be an amount paid, credited, or required to be distributed on the last day of a preceding taxable year, the trust is not allowed a refund or credit of the amount of "taxes imposed on the trust", as defined in § 1.665(d)–1A. However, such taxes imposed on the trust are allowed as a credit under section 667(b) against the tax of certain beneficiaries who are treated as having received the distributions in the preceding taxable year.

[T.D. 7204, 37 FR 17147, Aug. 25, 1972]

§ 1.667(b)–1A Authorization of credit to beneficiary for taxes imposed on the trust.

(a) Determination of credit—(1) In general. Section 667(b) allows under certain circumstances a credit (without interest) against the tax imposed by subtitle A of the Code on the beneficiary for the taxable year in which the accumulation distribution is required to be included in income under section 668(a). In the case of an accumulation distribution consisting only of undistributed net income, the amount of such credit is the total of the taxes deemed distributed to such beneficiary under section 666(b) and (c) as a result of such accumulation distribution for preceding taxable years of the trust on the last day of which such beneficiary was in being, less the amount of such taxes for such preceding taxable years taken into account in reducing the amount of partial tax determined under § 1.668(b)–1A. In the case of an accumulation distribution consisting only of undistributed capital gain, the amount of such credit is the total of the taxes deemed distributed as a result of the accumulation distribution to such beneficiary under section 669(d) and (e) for preceding taxable years of the trust on the last day of which such beneficiary was in being, less the amount of such taxes for such preceding taxable years taken into account in reducing the amount of partial tax determined under § 1.669(b)–1A. In the case of an accumulation distribution consisting of both undistributed net income and undistributed capital gain, a credit will not be available unless the total taxes deemed distributed to the beneficiary for all preceding taxable years as a result of the accumulation distribution exceeds the beneficiary's partial tax determined under §§ 1.668(b)–1A and 1.669(b)–1A without reference to the taxes deemed distributed. A credit is not allowed for any taxes deemed distributed as a

result of an accumulation distribution to a beneficiary by reason of sections 666(b) and (c) or sections 669(d) and (e) for a preceding taxable year of the trust before the beneficiary was born or created. However, if as a result of an accumulation distribution the total taxes deemed distributed under sections 668(a)(2) and 668(a)(3) in preceding taxable years before the beneficiary was born or created exceed the partial taxes attributable to amounts deemed distributed in such years, such excess may be used to offset any liability for partial taxes attributable to amounts deemed distributed as a result of the same accumulation distribution in preceding taxable years after the beneficiary was born or created.

(2) **Exact method.** In the case of the tax computed under the exact method provided in §§ 1.668(b)-1A(b) and 1.669(b)-1A(b), the credit allowed by this section is computed as follows:

(i) Compute the total taxes deemed distributed under §§ 1.666(b)-1A and 1.666(c)-1A or §§ 1.669(d)-1A and 1.669(e)-1A, whichever are appropriate, for the preceding taxable years of the trust on the last day of which the beneficiary was in being.

(ii) Compute the total of the amounts of tax determined under § 1.668(b)-1A(b)(1) or § 1.669(b)-1A(b)(1), whichever is appropriate, for the prior taxable years of the beneficiary in which he was in being.

If the amount determined under subdivision (i) of this subparagraph does not exceed the amount determined under subdivision (ii) of this subparagraph, no credit is allowable. If the amount determined under subdivision (i) of this subparagraph exceeds the amount determined under subdivision (ii) of this subparagraph, the credit allowable is the lesser of the amount of such excess or the amount of taxes deemed distributed to the beneficiary for all preceding taxable years to the extent that such taxes are not used in § 1.668(b)-1A(b)(2) or § 1.669(b)-1A(b)(2) in determining the beneficiary's partial tax under section 668(a)(2) or 668(a)(3). The application of this subparagraph may be illustrated by the following example:

Example. An accumulation distribution made in 1975 is deemed distribution in 1973 and 1974, years in which the beneficiary was in being. The taxes deemed distributed in such years are $4,000 and $2,000, respectively, totaling $6,000. The amounts of tax computed under § 1.668(b)-1A(b)(1) attributable to the amounts thrown back are $3,000 and $2,000, respectively, totaling $5,000. The credit allowable under this subparagraph is therefore $1,000 ($6,000 less $5,000).

(3) **Short-cut method.** In the case of the tax computed under the short-cut method provided in § 1.668(b)-1A(c) or 1.669(b)-1A(c), the credit allowed by this section is computed as follows:

(i) Compute the total taxes deemed distributed in all preceding taxable years of the trust under §§ 1.666(b)-1A and 1.666(c)-1A or §§ 1.669(d)-1A and 1.669(e)-1A, whichever are appropriate.

(ii) Compute the beneficiary's partial tax determined under either § 1.668(b)-1A(c)(1)(v) or § 1.669(b)-1A(c)(1)(v), whichever is appropriate.

If the amount determined under subdivision (i) of this subparagraph does not exceed the amount determined under subdivision (ii) of this subparagraph, no credit is allowable. If the amount determined under subdivision (i) of this subparagraph exceeds the amount determined under subdivision (ii) of this subparagraph,

(iii) Compute the total taxes deemed distributed under §§ 1.666(b)-1A and 1.666(c)-1A or §§ 1.669(d)-1A and 1.669(e)-1A, which are appropriate, for the preceding taxable years of the trust on the last day of which the beneficiary was in being.

(iv) Multiply the amount by which subdivision (i) of this subparagraph exceeds subdivision (ii) of this subparagraph by a fraction, the numerator of which is the amount determined under subdivision (iii) of this subparagraph and the denominator of which is the amount determined under subdivision (i) of this subparagraph. The result is the allowable credit. The application of this subparagraph may be illustrated by the following example:

Example. An accumulation distribution that consists only of undistributed net income is made in 1975. The taxes deemed distributed in the preceding years under §§ 1.666(b)-1A and 1.666(c)-1A are $15,000. The amount determined under § 1.668(b)-1A(c)(1)(v) is $12,000. The beneficiary was in being on the last day of all but one preceding taxable year in which the accumulation distribution was deemed made, and the taxes deemed distributed in those years was $10,000. Therefore, the excess of the subdivision (i) amount over the subdivision (ii) amount is $3,000, and is multiplied by 10,000/15,000, resulting in an answer of $2,000, which is the credit allowable when computed under the short-cut method.

* * * * *

(b) **Year of credit.** The credit to which a beneficiary is entitled under this section is allowed for the taxable year in which the accumulation distribution (to which the credit relates) is required to be included in the income of the beneficiary under section 668(a). Any excess over the total tax liability of the beneficiary for such year is treated

as an overpayment of tax by the beneficiary. See section 6401(b) and the regulations thereunder. [T.D. 7204, 37 FR 17147, Aug. 25, 1972]

§ 1.668(a)–1A Amounts treated as received in prior taxable years; inclusion in gross income.

(a) Section 668(a) provides that the total of the amounts treated under sections 666 and 669 as having been distributed by the trust on the last day of a preceding taxable year of the trust shall be included in the income of the beneficiary or beneficiaries receiving them. The total of such amounts is includable in the income of each beneficiary to the extent the amounts would have been included under section 662(a)(2) and (b) as if the total had actually been an amount properly paid by the trust under section 661(a)(2) on the last day of such preceding taxable year. The total is included in the income of the beneficiary for the taxable year of the beneficiary in which such amounts are in fact paid, credited, or required to be distributed unless the taxable year of the beneficiary differs from the taxable year of the trust (see section 662(c) and the regulations thereunder). The character of the amounts treated as received by a beneficiary in prior taxable years, including taxes deemed distributed, in the hands of the beneficiary is determined by the rules set forth in section 662(b) and the regulations thereunder.

(b) Any deduction allowed to the trust in computing distributable net income for a preceding taxable year (such as depreciation, depletion, etc.) is not deemed allocable to a beneficiary because of amounts included in a beneficiary's gross income under this section since the deduction has already been utilized in reducing the amount included in the beneficiary's income.

(c) For purposes of applying section 668(a)(3), a trust shall be considered to be other than a "trust which is not required to distribute all of its income currently" for each taxable year prior to the first taxable year beginning after December 31, 1968, and ending after November 30, 1969, in which income is accumulated. Income will not be deemed to have been accumulated for purposes of applying section 668(a)(3) in a year if the trustee makes a determination, as evidenced by a statement on the return, to distribute all of the trust's income for such year and also makes a good faith determination as to the amount of such income and actually distributed for such year the entire amount so determined. The term "income," as used in the preceding two sentences, is defined in §§ 1.643(b)–1 and 1.643(b)–2. Since, under such definitions, certain items may be included in distributable net income but are not, under applicable local law, "income" (as, for example, certain extraordinary dividends), a trust that has undistributed net income from such sources might still qualify as a trust that has not accumulated income. Also, for example, if a trust establishes a reserve for depreciation or depletion and applicable local law permits the deduction for such reserve in the computation of "income," amounts so added to the reserve do not constitute an accumulation of income. If a trust has separate shares, and any share accumulates income, all shares of the trust will be considered to have accumulated income for purposes of section 668(a)(3). Amounts retained by a trust or a portion of a trust that is subject to subpart E (sections 671–678) shall not be considered accumulated income.

(d) See section 1302(a)(2)(B) to the effect that amounts included in the income of a beneficiary of a trust under section 668(a) are not eligible for income averaging.

[T.D. 7204, 37 FR 17148, Aug. 25, 1972]

§ 1.668(a)–2A Allocation among beneficiaries; in general.

The portion of the total amount includible in income under § 1.668(a)–1A which is includible in the income of a particular beneficiary is based upon the ratio determined under the second sentence of section 662(a)(2) for the taxable year (and not for the preceding taxable year). This section may be illustrated by the following example:

Example. (a) Under the terms of a trust instrument, the trustee may accumulate the income or make distributions to A and B. The trustee may also invade corpus for the benefit of A and B. The distributable net income of the trust for taxable year 1975 is $10,000. The trust had undistributed net income for taxable year 1973, the first year of the trust, of $5,000, to which a tax of $1,100 was allocable. On May 1, 1975, the trustee distributes $10,000 to A, and on November 29, 1975, he distributes $5,000 to B. Thus, of the total distribution of $15,000, A received two-thirds and B receives one-third.

(b) For the purposes of determining the amounts includible in the beneficiaries' gross income for 1975, the trust is deemed to have made the following distributions:

Amount distributed out of 1975 income (distributable net income)	$10,000
Accumulation distribution deemed distributed by the trust on the last day of 1973 under section 666(a)	5,000
Taxes imposed on the trust attributable to the undistributed net income deemed distributed under section 666(b)	1,100

(c) A will include in his income for 1975 two-thirds of each item shown in paragraph (b) of this example. Thus, he will include in gross income $6,666.67 (10,000/15,000×$10,000) of

the 1975 distributable net income of the trust as provided in section 662(a)(2) (which is not an amount includable in his income under § 1.668(a)–1A(a)). He will include in his income $3,333.33 (10,000/15,000×$5,000) of the accumulation distribution and $733.33 (10,000/15,000×$1,100) of the taxes imposed on the trust, as provided in section 668(a).

(d) B will include in his income for 1975 one-third of each item shown in paragraph (b) of this example, computed in the manner shown in paragraph (c) of this example.

(e) To the extent the total accumulation distribution consists of undistributed net income and undistributed capital gain, A and B shall be treated as receiving a pro rata share of each for the preceding taxable year 1973.

[T.D. 7204, 37 FR 17148, Aug. 25, 1972]

§ 1.668(a)–3A Determination of tax.

In a taxable year in which an amount is included in a beneficiary's income under § 1.668(a)–1A(a), the tax on the beneficiary for such taxable year is determined only as provided in section 668 and consists of the sum of—

(a) A partial tax computed on (1) the beneficiary's taxable income reduced by (2) an amount equal to the total amounts includible in his income under § 1.668(a)–1A(a), at the rate and in the manner as if section 668 had not been enacted,

(b) A partial tax determined as provided in § 1.668(b)–1A, and

(c) In the case of a beneficiary of a trust which is not required to distribute all of its income currently, a partial tax determined as provided in § 1.669(b)–1A.

[T.D. 7204, 37 FR 17148, Aug. 25, 1972]

§ 1.668(b)–1A Tax on distribution.

(a) In general. The partial tax imposed on the beneficiary by section 668(a)(2) shall be the lesser of—

(1) The tax computed under paragraph (b) of this section (the "exact" method), or

(2) The tax computed under paragraph (c) of this section (the "short-cut" method),

except as provided in § 1.668(b)–4A (relating to failure to furnish proper information) and paragraph (d) of this section (relating to disallowance of short-cut method). For purposes of this paragraph, the method used in the return shall be accepted as the method that produces the lesser tax. The beneficiary's choice of the two methods is not dependent upon the method that he uses to compute his partial tax imposed by section 668(a)(3).

(b) Computation of partial tax by the exact method. The partial tax referred to in paragraph (a)(1) of this section is computed as follows:

(1) First, compute the tax attributable to the section 666 amounts for each of the preceding taxable years. For purposes of this paragraph, the "section 666 amounts" for a preceding taxable year are the amounts deemed distributed under section 666(a) on the last day of the preceding taxable year, plus the amount of taxes deemed distributed on such day under section 666(b) or (c). The tax attributable to such amounts in each prior taxable year of the beneficiary is the difference between the tax for such year computed with the inclusion of the section 666 amounts in the beneficiary's gross income and the tax for such year computed without including them in such gross income. Tax computations for each such year shall reflect a taxpayer's marital, dependency, exemption, and filing status for such year. To the extent the undistributed net income of a trust deemed distributed in an accumulation distribution includes amounts received as an accumulation distribution from another trust, for purposes of this paragraph they shall be considered as amounts deemed distributed by the trust under section 666(a) on the last day of each of the preceding taxable years in which such amounts were accumulated by such other trust. For example, assume trust Z, a calendar year trust, received in its taxable year 1975 an accumulation distribution from trust Y, a calendar year trust, that included undistributed net income and taxes of trust Y for the taxable years 1972, 1973, and 1974. To the extent an accumulation distribution made by trust Z in its taxable year 1976 includes such undistributed net income and taxes, it shall be considered an accumulation distribution by trust Z in the taxable year 1976 and under section 666(a) will be deemed distributed on the last day of the preceding taxable years 1972, 1973, and 1974.

(2) From the sum of the taxes for the prior taxable years attributable to the section 666 amounts (computed in accordance with subparagraph (1) of this paragraph), subtract so much of the amount of taxes deemed distributed to the beneficiary under §§ 1.666(b)–1A and 1.666(c)–1A as does not exceed such sum. The resulting amount, if any, is the partial tax, computed under the exact method, for the taxable year in which the accumulation distribution is paid, credited, or required to be distributed to the beneficiary.

(3) The provisions of this paragraph may be illustrated by the following example:

Example. (i) Assume that in 1979 a trust makes an accumulation distribution of $15,000 to A. The accumulation distribution is allocated under section 666(a) in the amounts of $5,000 to 1971, $4,000 to 1972, and $6,000 to 1973. Under section 666(b) and (c), taxes in the amounts of $935, $715, and $1,155 (totaling $2,805) are deemed distributed in 1971, 1972, and 1973, respectively.

(ii) A, the beneficiary, had taxable income and paid income tax in 1971–73 as follows:

Year	Taxable income	Tax
1971	$10,000	$2,190
1972	12,000	2,830
1973	14,000	3,550

(iii) Taxes attributable to the section 666 amounts (paragraph (i) of this example) are $6,979, computed as follows:

1971		
Taxable income including section 666 amounts ($10,000 + $5,000 + $935)	$15,935	
Tax on $15,935		$4,305
Less: Tax paid by A in 1971		2,190
Tax attributable to 1971 section 666 amounts		2,115
1972		
Taxable income including section 666 amounts ($12,000 + $4,000 + $715)	$16,715	
Tax on $16,715		$4,620
Less: Tax paid by A in 1972		2,830
Tax attributable to 1972 section 666 amounts		1,790
1973		
Taxable income including section 666 amounts ($14,000 + $6,000 + $1,155)	$21,155	
Tax on $21,155		$6,624
Less: Tax paid by A in 1973		3,550
Tax attributable to 1973 section 666 amounts		3,074
Total tax attributable to section 666 amounts:		
1971	$2,115	
1972	1,790	
1973	3,074	
Total	6,979	

(iv) The partial tax computed under the exact method is $4,174, computed by subtracting the taxes deemed distributed ($2,805) from the tax attributable to the section 666 amounts ($6,979).

(c) Computation of tax by the short-cut method. (1) The tax referred to in paragraph (a)(2) of this section is computed as follows:

(i) First, determine the number of preceding taxable years of the trust on the last day of which an amount is deemed under section 666(a) to have been distributed. For purposes of the preceding sentence, the preceding taxable years of a trust that has received an accumulation distribution from another trust shall include the taxable years of such other trust in which an amount was deemed distributed in such accumulation distribution. For example, assume trust Z, a calendar year trust, received in its taxable year 1975 an accumulation distribution from trust Y, a calendar year trust, that included undistributed net income of trust Y for the taxable years 1972, 1973, and 1974. To the extent an accumulation distribution made by trust Z in its taxable year 1976 includes such undistributed net income, it shall be considered an accumulation distribution by trust Z in the taxable year 1976 and under section 666(a) will be deemed distributed on the last day of the preceding taxable years 1972, 1973, and 1974. For purposes of this subparagraph, such number of preceding taxable years of the trust shall not include any preceding taxable year of the trust in which the undistributed net income deemed distributed is less than 25 percent of (a) the total amounts deemed under section 666(a) to be undistributed net income from preceding taxable years divided by (b) the number of such preceding taxable years of the trust on the last day of which an amount is deemed under section 666(a) to have been distributed without application of this sentence. For example, assume that an accumulation distribution of $90,000 made to a beneficiary in 1979 is deemed distributed in the amounts of $29,000 in each of the years 1972, 1973, and 1974, and $3,000 in 1975. The number of preceding taxable years on the last day of which an amount was deemed distributed without reference to the second sentence of this subparagraph is four. However, the distribution deemed made in 1975 ($3,000) is less than $5,625, which is 25 percent of (a) the total undistributed net income deemed distributed under section 666(a) ($90,000) divided by (b) the number of such preceding taxable years (4), or $22,500. Therefore, for purposes of this subparagraph the accumulation distribution is deemed distributed in only 3 preceding taxable years (1972, 1973, and 1974).

(ii) Second, divide the amount (representing the accumulation distribution and taxes deemed distributed) required under section 668(a) to be included in the income of the beneficiary for the taxable year by the number of preceding taxable years of the trust on the last day of which an amount is deemed under section 666(a) to have been distributed (determined as provided in subdivision (i) of this subparagraph). The amount determined under this subdivision, including taxes deemed distributed, consists of the same proportion of each class of income as the total of each class of income deemed distributed in the accumulation distribution bears to the total undistributed net income from such preceding taxable years deemed distributed in the accumulation distribution. For example, assume that an amount of

$50,000 is deemed distributed under section 666(a) from undistributed net income of 5 preceding taxable years of the trust, and consists of $25,000 of interest, $15,000 of dividends, and $10,000 of net rental income. Taxes attributable to such amounts in the amount of $10,000 are also deemed distributed. The amount determined under this subdivision, $12,000 ($50,000 income plus $10,000 tax divided by 5 years), is deemed to consist of $6,000 in interest, $3,600 in dividends, and $2,400 in net rental income.

(iii) Third, compute the tax of the beneficiary for each of the 3 taxable years immediately preceding the year in which the accumulation distribution is paid, credited, or required to be distributed to him,

(a) With the inclusion in gross income of the beneficiary for each of such 3 years of the amount determined under subdivision (ii) of this subparagraph, and

(b) Without such inclusion.

The difference between the amount of tax computed under (a) of this subdivision for each year and the amount computed under (b) of this subdivision for that year is the additional tax resulting from the inclusion in gross income for that year of the amount determined under subdivision (ii) of this subparagraph. For example, assume that a distribution of $12,000, is includible in the income of each of the beneficiary's 3 preceding taxable years when his income (without the inclusion of the accumulation distribution) was $20,000, $30,000, and $40,000. The inclusion of $12,000 in income would produce taxable income of $32,000, $42,-000, and $52,000, and the tax attributable to such increases would be $4,000, $5,000, and $6,000, respectively.

(iv) Fourth, add the additional taxes resulting from the application of subdivision (iii) of this subparagraph and then divide this amount by 3. For example, if these additional taxes are $4,000, $5,000, and $6,000 for the 3 preceding taxable years, this amount would be $5,000 ($4,000+$5,-000+$6,000 divided by 3).

(v) Fifth, the resulting amount is then multiplied by the number of preceding taxable years of the trust on the last day of which an amount is deemed under section 666(a) to have been distributed (previously determined under subdivision (i) of this subparagraph). For example, if an amount is deemed distributed for 5 preceding taxable years, the resulting amount would be five times the $5,000 amount.

(vi) Sixth, the resulting amount, less so much of the amount of taxes deemed distributed to the beneficiary under §§ 1.666(b)–1A and 1.666(c)–1A as does not exceed such resulting amount, is the tax under the short-cut method provided in section 668(b)(1)(B).

(2) The computation of the tax by the short-cut method may be illustrated by the following example:

Example: In 1971, X creates a trust which is to accumulate its income and pay the income to Y when Y reaches 30. Y is 19. Over the 11 years of the trust, the trust earns $1,200 of interest income annually and has expenses each year of $100 allocable to the production of income. The trust pays a total tax of $1,450 on the accumulated income. In 1981, when Y reaches 30, the $9,550 of accumulated undistributed net income and the $1,100 of current net income are distributed to Y. Y is treated as having received a total distribution of $11,000 (the $9,550 accumulation distribution plus the taxes paid by the trust which are deemed to have been distributed to Y). The income of the current year (1981) is taxed directly to Y. The computation is as follows: $11,000 (accumulation distribution plus taxes) divided by 10 (number of years out of which distribution was made) equals $1,100. The $1,100 added to the income of the beneficiary's preceding 3 years produces increases in tax as follows:

1980	$350
1979	300
1978	250
Total	900

$900 (total additional tax) divided by 3 equals $300 (average annual increase in tax). $300 (average annual increase in tax) times 10 equals $3,000, from which is deducted the amount of taxes ($1,450) paid by the trust attributable to the undistributed net income deemed distributed. The amount of tax to be paid currently under the short-cut method is therefore $1,550.

(d) Disallowance of short-cut method. If, in any prior taxable year of the beneficiary in which any part of the accumulation distribution of undistributed net income is deemed to have been distributed under section 666(a) to such beneficiary, any part of prior accumulation distributions of undistributed net income by each of two or more other trusts is deemed under section 666(a) to have been distributed to such beneficiary, then the short-cut method under paragraph (c) of this section may not be used and the partial tax imposed by section 668(a)(2) shall be computed only under the exact method under paragraph (b) of this section. For example, assume that, in 1978, trust X makes an accumulation distribution of undistributed net income to A, who is on the calendar year basis, and part of the accumulation distribution is deemed under section 666(a) to have been distributed on March 31, 1974. In 1977, A had received an accumulation distribution of undistributed net income from both trust Y and trust Z. Part of the accumulation distribution from trust Y was

deemed under section 666(a) to have been distributed to A on June 30, 1974, and part of the accumulation distribution from trust Z was deemed under section 666(a) to have been distributed to A on December 31, 1974. Because there were portions of accumulation distributions of undistributed net income from two other trusts deemed distributed within the same prior taxable year of A (1974), the 1978 accumulation distribution from trust X may not be computed under the short-cut method provided in paragraph (c) of this section. Therefore the exact method under paragraph (b) of this section must be used to compute the tax imposed by section 666(a)(2).

[T.D. 7204, 37 FR 17149, Aug. 25, 1972]

§ 1.668(b)–2A Special rules applicable to section 668.

(a) Rule when beneficiary not in existence on the last day of a taxable year. If a beneficiary was not in existence on the last day of a preceding taxable year of the trust with respect to which a distribution is deemed made under section 666(a), it shall be assumed, for purposes of the computations under paragraphs (b) and (c) of § 1.668(b)–1A, that the beneficiary—

(1) Was in existence on such last day,

(2) Was a calendar year taxpayer,

(3) Had no gross income other than the amounts deemed distributed to him from such trust in his calendar year in which such last day occurred and from all other trusts from which amounts are deemed to have been distributed to him in such calendar year,

(4) If an individual, was unmarried and had no dependents,

(5) Had no deductions other than the standard deduction, if applicable, under section 141 for such calendar year, and

(6) Was entitled to the personal exemption under section 151 or 642(b).

For example, assume that part of an accumulation distribution made in 1980 is deemed under section 666(a) to have been distributed to the beneficiary, A, in 1973; $10,000 of a prior accumulation distribution was deemed distributed in 1973. A was born on October 9, 1975. It will be assumed for purposes of § 1.668(b)–1A that A was alive in 1973, was on the calendar year basis, had no income other than (i) the $10,000 from the earlier accumulation distribution deemed distributed in 1973, and (ii) the part of the 1980 distribution deemed distributed in 1973, and had no deductions other than the personal exemption provided in section 151. It should be noted that the standard deduction for 1973 will be available to A with respect to the distribution only to the extent it qualifies as "earned income" in the hands of the trust. See section 141(e) and the regulations thereunder and § 1.652(b)–1. If A were a trust or estate created after 1973, the same assumptions would apply, except that the trust or estate would not be entitled to the standard deduction and would receive the personal exemption provided under section 642(b) in the same manner as allowed under such section for A's first actual taxable year.

(b) Effect of other distributions. The income of the beneficiary, for any of his prior taxable years for which a tax is being recomputed under § 1.668(b)–1A, shall include any amounts of prior accumulation distributions (including prior capital gain distributions) deemed distributed under sections 666 and 669 in such prior taxable year. For purposes of the preceding sentence, a "prior accumulation distribution" is a distribution from the same or another trust which was paid, credited, or required to be distributed in a prior taxable year of the beneficiary. The term "prior accumulation distribution" also includes accumulation distributions of other trusts which were paid, credited, or required to be distributed to the beneficiary in the same taxable year and which the beneficiary has determined under paragraph (c) of this section to treat as having been distributed before the accumulation distribution for which tax is being computed under § 1.668(b)–1A. Any capital gain distribution from the same trust paid, credited, or required to be distributed in the same taxable year of the beneficiary shall not be considered under this paragraph to be a "prior capital gain distribution."

(c) Multiple distributions in the same taxable year. For purposes of paragraph (b) of this section, accumulation distributions made from more than one trust in the same taxable year of the beneficiary, regardless of when in the taxable year they were actually made, shall be treated as having been made consecutively, in whichever order the beneficiary may determine. However, the beneficiary must treat them as having been made in the same order for the purpose of computing the partial tax on the several accumulation distributions. The beneficiary shall indicate the order he has determined to deem the accumulation distributions to have been received by him on his return for the taxable year. A failure by him so to indicate, however, shall not affect his right to

make such determination. The purpose of this rule is to assure that the tax resulting from the later (as so deemed under this paragraph) distribution is computed with the inclusion of the earlier distribution in the taxable base and that the tax resulting from the earlier (as so deemed under this paragraph) distribution is computed with the later distribution excluded from the taxable base.

(d) Examples. The provisions of paragraphs (b) and (c) of this section may be illustrated by the following examples:

Example (1). In 1978, trust X made an accumulation distribution of undistributed net income to A, a calendar year taxpayer, of which $3,000 was deemed to have been distributed in 1974. In 1980, trust X makes another accumulation distribution of undistributed net income to A, $10,000 of which is deemed under section 666 to have been distributed in 1974. Also in 1980, trust Y makes an accumulation distribution of undistributed net income to A, of which $5,000 is deemed under section 666 to have been distributed in 1974. A determines to treat the 1980 distribution from trust Y as having been made prior to the 1980 distribution from trust X. In computing the tax on the 1980 trust Y distribution, A's gross income for 1974 includes (i) the $3,000 deemed distributed from the 1978 distribution, and (ii) the $5,000 deemed distributed in 1974 from the 1980 trust Y accumulation distribution. To compute A's tax under the exact method for 1974 on the $10,000 from the 1980 trust X accumulation distribution deemed distributed in 1974, A's gross income for 1974 includes (i) the $10,000, (ii) the $3,000 previously deemed distributed in 1974 from the 1978 trust X accumulation distribution, and (iii) the $5,000 deemed distribution in 1974 from the 1980 trust Y accumulation distribution.

Example (2). In 1978, trust T makes an accumulation distribution of undistributed net income to B, a calendar year taxpayer. Determination of the tax on the accumulation distribution under the short-cut method requires the use of B's gross income for 1975, 1976, and 1977. In 1977, B received an accumulation distribution of undistributed net income from trust U, of which $2,000 was deemed to have been distributed in 1975, and $3,000 in 1976. B's gross income for 1975, for purposes of using the short-cut method to determine the tax from the trust T accumulation distribution, will be deemed to include the $2,000 deemed distributed in 1975 by trust U, and his gross income for 1976 will be deemed to include the $3,000 deemed distributed by trust U in 1976.

[T.D. 7204, 37 FR 17151, Aug. 25, 1972]

§ 1.668(b)–3A Computation of the beneficiary's income and tax for a prior taxable year.

(a) Basis for computation. (1) The beneficiary's income and tax paid for any prior taxable year for which a recomputation is involved under either the exact method or the short-cut method shall be determined by reference to the information required to be furnished by him under § 1.668(b)–4A(a). The gross income, related deductions, and taxes paid for a prior taxable year of the beneficiary as finally determined shall be used for computation purposes. The term "as finally determined" has reference to the final status of the gross income, deductions, credits, and taxes of the taxable year after the expiration of the period of limitations or after completion of any court action regarding the tax for the taxable year.

(2) If any computations rely on the beneficiary's return for a prior taxable year for which the applicable period of limitations on assessment under section 6501 has expired, and such return shows a mathematical error on its face which resulted in the wrong amount of tax being paid for such year, the determination of both the tax for such year computed with the inclusion of the section 666 amount in the beneficiary's gross income and the tax for such year computed without including such amounts in such gross income shall be based upon the return after the correction of such mathematical errors, and the beneficiary shall be credited for the correct amount of tax that should have been properly paid.

(b) Effect of allocation of undistributed net income on items based on amount of income and with respect to a net operating loss, a charitable contributions carryover, or a capital loss carryover. (1) In computing the tax for any taxable year under either the exact method or the short-cut method, any item which depends upon the amount of gross income, adjusted gross income, or taxable income shall be recomputed to take into consideration the amount of undistributed net income allocated to such year. For example, if $1,000 of undistributed net income is allocated to 1970, adjusted gross income for 1970 is increased from $5,000 to $6,000. The allowable 50 percent charitable deduction under section 170(b)(1)(A) is then increased and the amount of the nondeductible medical expenses under section 213 (3 percent of adjusted gross income) is also increased.

(2) In computing the tax attributable to the undistributed net income deemed distributed to the beneficiary in any of his prior taxable years under either the exact method or the short-cut method, the effect of amounts of undistributed net income on a net operating loss carryback or carryover, a charitable contributions carryover, or a capital loss carryback or carryover, shall be taken into account. In determining the amount of tax attributable to such deemed distribution, a computation shall also be made for any taxable year which is affected by a net operating loss carryback or carryover, by a charitable contributions carryover, or by a capital loss carryback or carryover determined by reference to the taxable year to which amounts are allocated under either method and which carryback or carryover is reduced or increased by

such amounts so allocated. The provisions of this subparagraph may be illustrated by the following example:

Example. In 1978, a trust makes an accumulation distribution of undistributed net income to X of $50,000 that is deemed under section 666(a) to have been distributed in 1972. X had income in 1972, 1973, and 1974, and had a net operating loss in 1975 that offset his taxable income (computed as provided in § 1.172–5) for those years, as follows:

Year	Actual income (or loss)	Income after net operating loss carryback (n.o.l.c.b.)
1972	$10,000	$0
1973	50,000	0
1974	50,000	10,000
1975	(100,000)	0

As a result of the allocation of the 1973 accumulation distribution to 1972, X's income for 1972, 1973, 1974, and 1975, after taking into account the 1975 n.o.l.c.b., is deemed to be as follows:

Year	Income deemed to have been earned after consideration of n.o.l.c.b. and accumulation distribution
1972	0 ($10,000 + $50,000 – $60,000 n.o.l.c.b.).
1973	$10,000 ($50,000 – $40,000 balance of n.o.l.c.b.).
1974	$50,000.
1975	0.

Therefore, the tax on the 1978 accumulation distribution to X is the tax X would have paid in 1973 and 1974 had he had the above income in such years.

(c) Averaging. A beneficiary who uses the exact method may recompute his tax for a prior taxable year by using income averaging for all of his actual income for that year, plus the amount deemed distributed in that year under section 666, even though he may not have actually used section 1301 to determine his income tax for such taxable year. For purposes of such recomputation, the beneficiary's income for all other taxable years involved must include any amounts deemed distributed in such years from the current and all prior accumulation distributions. See § 1.668(b)–4A(c)(3) for additional information requirements. The beneficiary may not apply the provisions of this paragraph to a taxable year in which an amount is deemed to be income by reason of § 1.666(d)–1A(b). The accumulation distribution itself is not eligible for income averaging in the years in which it is paid, credited, or required to be distributed. See section 1302(a)(2)(B) and the regulations thereunder.

[T.D. 7204, 37 FR 17151, Aug. 25, 1972]

§ 1.668(b)–4A Information requirements with respect to beneficiary.

(a) Information to be supplied by beneficiary—(1) In general. The beneficiary must supply the information required by subparagraph (3) of this paragraph for any prior taxable year for which a recomputation is required under either the exact method or the short-cut method. Such information shall be filed with the beneficiary's return for the year in which the tax under section 668(a)(2) is imposed.

(2) Failure to furnish. If the beneficiary fails to furnish the information required by this paragraph for any prior year involved in the exact method, he may not use such method and the tax computed under paragraph (c) of § 1.668(b)–1A (the short-cut method) shall be deemed to be the amount of partial tax imposed by section 668(a)(2). See, however, paragraph (b) of this section for an exception to this rule where the short-cut method is not permitted. If he cannot furnish the information required for a prior year involved in the short-cut method, such year will be recomputed on the basis of the best information available.

(3) Information required. The beneficiary shall file the following items with his income tax return for the taxable year in which the accumulation distribution is included in income:

(i) A statement showing the gross income, adjustments, deductions, credits, taxes paid, and computations for each of his taxable years for which a computation is required under the method by which he computes his partial tax imposed by section 668(a)(2). Such statement shall include such amounts for the taxable year as adjusted by any events subsequent to such year, such as any adjustment resulting from the determination of a deficiency or an overpayment, or from a court action regarding the tax.

(ii) A copy of the statement required by this subparagraph to be furnished by the beneficiary for any prior taxable year in which an accumulation distribution was received by him which was also deemed distributed in whole or in part in the prior taxable year for which the statement under subdivision (i) of this subparagraph is required.

(iii) A copy of any statements furnished the beneficiary by the trustee (such as schedules E and J of Form 1041, etc.) with regard to the current taxable year or any prior taxable year for which a statement is furnished under subdivision (i) of this subparagraph.

(b) Exception. If by reason of § 1.668(b)–1A(e) the beneficiary may not compute the partial tax on the accumulation distribution under § 1.668(b)–1A(c) (the short-cut method), the provisions of subparagraph (2) of paragraph (a) of this section shall not apply. In such case, if the beneficiary fails to provide the information required by subparagraph (3) of paragraph (a) of this section for any prior taxable year, the district director shall, by utilizing whatever information is available to him (including information supplied by the beneficiary), determine the beneficiary's income and related expenses for such prior taxable year.

(c) Records to be supplied by the beneficiary—(1) Year when return was filed. If the beneficiary filed an income tax return for a taxable year for which a recomputation is necessary, and the period of limitations on assessment under section 6501 for such year has expired as of the filing of the return for the year in which the accumulation distribution was made, then a copy of such return, plus proof of any changes of liability for such year due to the determination of a deficiency or an overpayment, court action, etc., shall, to the extent they verify the statements required under paragraph (a) of this section, serve as proof of such statements. If the period of limitations on assessment under section 6501 for a prior taxable year has not expired as of the filing of the beneficiary's return for the year in which the accumulation distribution was received, then the records required by section 6001 to be retained by the beneficiary for such prior taxable year shall serve as the basis of proof of the statements required to be filed under paragraph (a) of this section.

(2) Year for which no return was filed. If the beneficiary did not file a return for a taxable year for which a recomputation is necessary, he shall be deemed to have had in such year, in the absence of proof to the contrary, gross income in the amount equal to the maximum amount of gross income that he could have received without having had to file a return under section 6012 for such year.

(3) Distributions deemed averaged. In order for a beneficiary to use income averaging with respect to a prior taxable year (see § 1.668(b)–3A(c)), he must furnish all the information that would support the computation under section 1301 as if the distribution were actually received and averaged in such prior taxable year, even if a portion of the information relates to years in which no amount was deemed distributed to the beneficiary.

[T.D. 7204, 37 FR 17152, Aug. 25, 1972]

§ 1.668(a)–1 Amounts treated as received in prior taxable years; inclusion in gross income.

(a) Section 668(a) provides that the total of the amounts treated under section 666 as having been distributed by the trust on the last day of a preceding taxable year of the trust shall be included in the gross income of the beneficiary or beneficiaries receiving them. The total of such amounts is includible in the gross income of each beneficiary to the extent the amounts would have been included under section 662(a)(2) and (b) if the total had actually been paid by the trust on the last day of such preceding taxable year. The total is included in the gross income of the beneficiary for the taxable year of the beneficiary in which such amounts are in fact paid, credited, or required to be distributed unless the taxable year of the beneficiary differs from the taxable year of the trust (see section 662(c) and the regulations thereunder). The character of the amounts treated as received by a beneficiary in prior taxable years, including taxes deemed distributed, in the hands of the beneficiary is determined by the rules set forth in section 662(b) and the regulations thereunder. See paragraphs (h)(1)(ii) and (j)(1)(ii) of § 1.668(b)–2.

(b) The total of the amounts treated under section 666 as having been distributed by the trust on the last day of a preceding taxable year of the trust are included as prescribed in paragraph (a) of this section in the gross income of the beneficiary even though as of that day the beneficiary would not have been entitled to receive them had they actually been distributed on that day.

(c) Any deduction allowed to the trust in computing distributable net income for a preceding taxable year (such as depreciation, depletion, etc.) is not deemed allocable to a beneficiary because of amounts included in a beneficiary's gross income under this section since the deduction has already been utilized in reducing the amount included in the beneficiary's income.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.668(a)–2 Allocation among beneficiaries; in general.

The portion of the total amount includible in gross income under § 1.668(a)–1 which is includible in the gross income of a particular beneficiary is based upon the ratio determined under the second sentence of section 662(a)(2) for the taxable year (and not for the preceding taxable year).

This section may be illustrated by the following example:

Example. (a) Under the terms of a trust instrument, the trustee may accumulate the income or make distributions to A and B. The trustee may also invade corpus for the benefit of A and B. The distributable net income of the trust for the taxable year 1955 is $10,000. The trust had undistributed net income for the taxable year 1954 of $5,000, to which a tax of $1,100 was allocable. During the taxable year 1955, the trustee distributes $10,000 to A and $5,000 to B. Thus, of the total distribution of $15,000, A received two-thirds and B received one-third.

(b) For the purposes of determining the amounts includible in the beneficiaries' gross income for 1955, the trust is deemed to have made the following distributions:

Amount distributed out of 1955 income (distributable net income)	$10,000
Accumulation distribution deemed distributed by the trust on the last day of 1954 under section 666(a)	5,000
Taxes imposed on the trust deemed distributed under section 666(b)	1,100

(c) A will include in his gross income for 1955 two-thirds of each item shown in paragraph (b) of this example. Thus, he will include in gross income $6,666.67 (10,000/15,000 × $10,000) of the 1955 distributable net income of the trust as provided in section 662(a)(2), and $3,333.33 (10,000/$15,000 × $5,000) of the accumulation distribution and $733.33 (10,000/15,000 × $1,100) of the taxes imposed on the trust as provided in section 668(a).

(d) B will include in his gross income for 1955 one-third of each item shown in paragraph (b) of this example, computed in the manner shown in paragraph (c) of this example.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.668(a)–3 Excluded amounts.

When a trust pays, credits, or is required to distribute to a beneficiary amounts which are excluded under section 665(b)(1), (2), (3), or (4) from the computation of an accumulation distribution, the amount includible under subpart D (section 665 and following), part I, subchapter J, chapter 1 of the Code, in the gross income of the beneficiaries pursuant to § 1.668(a)–1 is first allocated to the beneficiaries as provided in § 1.668(a)–2 and, second, the amount allocable to the beneficiary receiving amounts which are excluded under section 665(b)(1), (2), (3), or (4) is reduced by the excluded amounts. This section may be illustrated by the following examples, in which it is assumed the trusts and beneficiaries report on the calendar year basis and the income of the trusts was derived entirely from taxable interest:

Example (1). (a) A trust in 1957 has income as defined in section 643(b) of $35,000 and expenses allocable to corpus of $5,000. Its distributable net income is, therefore, $30,000 ($35,000–$5,000). The undistributed net income of the trust and the taxes imposed on the trust were $12,840 and $7,260, respectively, for each of the years 1956, 1955, and 1954. The terms of the trust instrument provide for the accumulation of income during the minority of beneficiaries A and B. However, the trustee may make discretionary distributions to either beneficiary after he becomes 21 years of age. Also, the trustee may invade corpus for the benefit of A and B. B became 21 years of age on January 1, 1957, and, as of that date, A was 25 years old. The trustee distributed $50,000 each to A and B during 1957.

(b) Since each beneficiary received one-half of the total amount distributed by the trust, each must include in gross income under section 662(a)(2) one-half ($15,000) of the distributable net income ($30,000) of the trust for 1957.

(c) The excess distribution of $35,000 ($50,000–$15,000) received by B is excluded from the determination of an accumulation distribution under section 665(b)(1) and accordingly is not includible in B's gross income under section 668(a). Nor is such amount treated as an accumulation distribution for the purpose of determining the amount includible in A's gross income under section 668(a).

(d) The accumulation distribution of the trust is $35,000, computed as follows:

Total distribution by the trust		$100,000
Less:		
Distributable net income for 1957	$30,000	
Excess distribution to B	35,000	
		65,000
Accumulation distribution to A		35,000

(e) The accumulation distribution of $35,000 will be allocated to the preceding taxable years 1956, 1955, and 1954, and the trust will be deemed to have made the following distributions to A on the last day of those years:

	1956	1955	1954	Total
Undistributed net income	$12,840	$12,840	$9,320	$35,000
Taxes imposed on the trust	7,260	7,260	5,270	19,790
Total	20,100	20,100	14,590	54,790

Thus, A will include $54,790 in his gross income for 1957 under section 668(a). A will, however, receive credit against his tax under section 668(b).

Example (2). (a) Under the terms of a trust the trustee may make discretionary distributions out of income to A during her life. The balance of the income is to be accumulated during the minority of her son, B, and is to be distributed to him when he becomes 21 years of age. Thereafter the trustee may also make discretionary payments of income to B. Also, the trustee may invade corpus for the benefit of A and B. B became 21 years of age on December 31, 1955. The distributable net income of the trust for 1955 is $30,000. It had undistributed net income of $12,840 for the preceding taxable year 1954 and the taxes imposed on the trust for such year were $7,260. The trustee distributed $15,000 to A during 1955 and on December 31, 1955, he distributed $60,000 to B, which represented income accumulated during his minority.

(b) Since B received four-fifths of the total amount ($75,000) distributed by the trust during 1955, he must include in his gross income under section 662(a)(2) four-fifths ($24,000) of the distributable net income ($30,000) of the trust for 1955. A will include in her gross income under section 662(a)(2) one-fifth ($6,000) of the distributable net income ($30,000) of the trust for 1955.

(c) The excess distribution of $36,000 ($60,000–$24,000) received by B is excluded from the determination of an accumulation distribution under section 665(b)(1) and accordingly is not includible in his gross income under section 668(a).

(d) The amount treated as an accumulation distribution for the purpose of determining the amount includible in A's gross income for 1955 under section 668(a) is $9,000, computed as follows:

Total distribution by the trust		$75,000
Less:		
Distributable net income for 1955	$30,000	
Excess distribution to B	36,000	
		66,000
Amount treated as an accumulation distribution		9,000

(e) Inasmuch as the amount of $9,000 is less than the total undistributed net income of the trust ($12,840) for the preceding taxable year 1954, a pro rata portion of the taxes imposed on the trust for that year are also deemed distributed by the trust. Thus, A will include $14,089 in her gross income for 1955 under section 668(a) computed as follows:

1954	
Accumulation distribution	$9,000
Taxes imposed on the trust (9,000/12,840 × $7,260)	5,089
Total	14,089

A will, however, receive credit against her tax under section 668(b).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.668(a)–4 Tax attributable to throwback.

(a) The tax attributable to amounts deemed distributed under section 666 is imposed on the beneficiary for the taxable year of the beneficiary in which the accumulation distribution is made unless the taxable year of the beneficiary is different from that of the trust (see section 662(c) and the regulations thereunder). In the case of a trust (other than a foreign trust created by a U.S. person), the tax cannot be greater than the aggregate of the taxes attributable to those amounts had they been included, in accordance with the provisions of section 662(a)(2) and (b), in the gross income of the beneficiary for the preceding taxable year or years in which they were deemed distributed. In the case of a foreign trust created by a U.S. person, the tax on the beneficiary shall be computed in accordance with the provisions of section 669 and the regulations thereunder. The tax liability of the beneficiary of a trust (other than a foreign trust created by a U.S. person), including the portion of an entire foreign trust which does not constitute a foreign trust created by a U.S. person (see § 1.643(d)–1), for the taxable year is computed in the following manner:

(1) First, compute the amount of tax for the taxable year attributable to the section 666 amounts which are included in the gross income of the beneficiary for the year. The tax attributable to those amounts is the difference between the tax for the taxable year computed with the inclusion of the section 666 amounts in gross income and the tax computed without including them in gross income.

(2) Next, compute the tax attributable to the section 666 amounts for each of the preceding taxable years as if they had been included in gross income for those years. The tax attributable to such amounts in each such preceding taxable year is the difference between the tax for such preceding year computed with the inclusion of the section 666 amounts in gross income and the tax for such year computed without including them in gross income. The tax computation for each preceding year shall reflect the taxpayer's marital and dependency status for that year.

(3) The total tax for the taxable year is the tax for that year computed without including the section 666 amounts, *plus*—

(i) The amount of the tax for the taxable year attributable to the section 666 amounts (computed in accordance with subparagraph (1) of this paragraph),

or

(ii) The sum of the taxes for the preceding taxable years attributable to the section 666 amounts (computed in accordance with subparagraph (2) of this paragraph),

whichever is the smaller.

(b) The provisions of paragraph (a) of this section may be illustrated by the following example:

Example. (1) During the taxable year 1956, $10,000 is deemed distributed under section 666 to a beneficiary, of which $6,000 is deemed distributed by the trust on the last day of 1955 and $4,000 on the last day of 1954. The beneficiary had taxable income (after deductions) from other sources of $5,000 for 1956, $10,000 for 1955, and $10,000 for 1954. The beneficiary's tax liability for 1956 is $4,730 determined as follows:

Year 1956	
Tax on $15,000 (taxable income including section 666 amounts)	$4,730
Tax on $5,000 (taxable income excluding section 666 amounts)	1,100
Tax attributable to section 666 amounts	3,630

Year 1955	
Tax on $16,000 (taxable income including section 666 amounts)	$5,200

Tax on $10,000 (taxable income excluding section 666 amounts)	$2,640
Tax attributable to section 666 amounts	2,560

Year 1954

Tax on $14,000 (taxable income including section 666 amounts)	$4,260
Tax on $10,000 (taxable income excluding section 666 amounts)	2,640
Tax attributable to section 666 amounts	1,620

(2) Inasmuch as the tax of $3,630 attributable to the section 666 amounts as computed at 1956 rates is less than the aggregate of the taxes of $4,180 ($2,560 plus $1,620) determined for the preceding taxable years the amount of $3,630 is added to the tax ($1,100) computed for 1956 without including the section 666 amounts.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 737, Jan. 17, 1969]

§ 1.668(b)-1 Credit for taxes paid by the trust.

(a) The taxes imposed on a complex trust for a taxable year which would not have been payable by the trust if amounts deemed under section 666 to have been distributed in the year had in fact been distributed in the year are not allowable as a refund to the trust but are allowable as a credit against the tax of the beneficiaries to whom the amounts described in section 666(a) are distributed.

(b) The credit to which a beneficiary is entitled under section 668(b) is allowed for the taxable year in which the accumulation distribution (to which the credit relates) is required to be included in the gross income of the beneficiary. Any excess over the total tax liability of the beneficiary is treated as an overpayment of tax by the beneficiary.

(c) The beneficiary is entitled to a portion of the credit described in paragraph (a) of this section in the ratio which the amount of the accumulation distribution to him bears to the accumulation distributions to all the beneficiaries.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.668(b)-2 Illustration of the provisions of Subpart D.

The provisions of Subpart D (section 665 and following), Part I, Subchapter J, Chapter 1 of the Code, other than provisions relating to a foreign trust created by a U.S. person, may be illustrated by the following example:

Example. **(a) Facts.** (1) Under the terms of a trust instrument, one-half of the trust income is required to be distributed currently to beneficiary A. The trustee may in his discretion accumulate the balance of the income of the trust or he may make distributions to B out of income or corpus. The trust is to terminate upon the death of A and the corpus is to be distributed to B. Capital gains are allocable to corpus. All of the expenses of the trust are charges against income. The trust instrument provides for a reserve for depreciation, so that depreciation is deductible in computing distributable net income. The trust and both beneficiaries report on the calendar year basis. The trust had long-term capital gains of $20,000 for 1954, and $10,000 for 1955, which were allocated to corpus. The distributable net income of the trust as determined under section 643(a) for 1954, 1955, 1956, and 1957 is deemed to consist of the following items of income:

	Dividends	Rents	Interest (taxable)	Interest (exempt)	Total
1954 ...	$15,000	$20,000	$10,000	$5,000	$50,000
1955 ...	10,000	15,000	10,000	5,000	40,000
1956 ...	10,000	20,000	15,000	5,000	50,000
1957 ...	10,000	15,000	15,000	5,000	45,000

(2) One-half ($7,500) of the dividends for 1954 was received by the trust on or before July 31, 1954, and the balance was received after that date.

(3) The following distributions were made by the trustee to A and B during the taxable years 1954 through 1957:

	A	B
1954	$25,000	None
1955	20,000	None
1956	25,000	$45,000
1957	22,500	29,550

(b) Distributions to A. A is deemed to have received one-half of each item of income entering into the computation of distributable net income as shown in paragraph (a)(1) of this example. See § 1.662(a)-2 for rules for the treatment of currently distributable income in the hands of the beneficiary.

(c) Tax liability of the trust—(1) 1954. (i) The tax liability of the trust for the taxable year 1954 is $13,451, computed as follows:

Distributable net income under section 643(a) (paragraph (a)(1) of this example)		$50,000
Less amounts not includible in gross income:		
Tax-exempt interest	$5,000	
Dividend exclusion	50	
		5,050
Distributable net income as adjusted		44,950
Add: Capital gains (long-term)		20,000
Total		64,950
Deductions:		
Distributions to A	$22,475	
Capital gain deduction	$10,000	
Personal exemption	100	
		32,575
Taxable income		32,375
Alternative tax		13,601
Dividend received credit		150
Tax liability		13,451

(ii) See paragraph (b) of this example for character of income deemed distributed to A and section 661 for rules for computing the amount deductible by a trust for distributions to beneficiaries. Inasmuch as one-half of the dividends of the trust is deemed to be distributed to A, $25 of such distribution is deemed to be made from the dividend exclusion of $50, and

the balance from dividends included in the gross income of the trust (that is, since the year 1954 is involved, $3,725 from dividends received on or before July 31, 1954, and $3,750 from dividends received after July 31, 1954). The trust is entitled to a dividend received credit attributable to the dividends of $3,750 received after July 31, 1954, which were not distributed to any beneficiary during the taxable year.

(2) 1955. (i) The tax liability of the trust for the taxable year 1955 is $8,189, computed as follows:

Distributable net income under section 643(a) (paragraph (a)(1) of this example)		$40,000
Less amounts not includible in gross income:		
Tax-exempt interest	$5,000	
Dividend exclusion	50	
		5,050
Distributable net income as adjusted		34,950
Add: Capital gains (long-term)		10,000
Total		44,950
Deductions:		
Distributions to A	$17,475	
Capital gain deduction	5,000	
Personal exemption	100	
		22,575
Taxable income		22,375
Alternative tax		8,388
Dividend received credit		199
Tax liability		8,189

(ii) See paragraph (b) of this example for character of income deemed distributed to A and section 661 for rules for computing the amount deductible by a trust for distributions to beneficiaries. Inasmuch as one-half ($4,975) of the dividends of $9,950 ($10,000 less dividend exclusion of $50) included in the gross income of the trust is deemed distributed to A, the trust is entitled to a dividend received credit with respect to the dividends of $4,975 which were not distributed to any beneficiary during the taxable year.

(3) 1956 and 1957. The trust had no tax liability for the taxable years 1956 and 1957 since all of its income was distributed during such years.

(d) Accumulation distributions. (1) Accumulation distributions of $20,000 and $7,050, as defined in section 665(b), were made to B during the years 1956 and 1957, respectively, computed as shown below:

	1956	1957
Distributable net income of the trust as computed under section 643(a)	$50,000	$45,000
Less. Income currently distributable to A	25,000	22,500
Balance of income	25,000	22,500
Other amounts distributed to B	45,000	29,550
Accumulation distributions to B	20,000	7,050

(2) B is deemed to have received one-half of each item of income entering into the computation of distributable net income (shown in paragraph (a)(1) of this example) for the years 1956 and 1957.

(3) The accumulation distribution for 1956 must first be allocated to the preceding taxable years as provided in section 666. After the application of the provisions of subpart D to the 1956 accumulation distribution and to the undistributed net incomes of the preceding taxable years, a similar allocation must be made of the 1957 accumulation distribution.

(e) Throwback of 1956 accumulation distribution to 1955. The accumulation distribution of $20,000 for 1956 must be allocated to the first preceding taxable year 1955, before allocation is made to the second preceding taxable year 1954.

(1) 1955 Undistributed net income. (i) The undistributed net income of the trust for 1955, determined as of the close of 1955, is $12,885, computed as follows:

Distributable net income as computed under section 643(a) (paragraph (a)(1) of this example)		$40,00
Less:		
Distributions to A	$20,000	
Taxes imposed on the trust	7,115	
		27,115
Undistributed net income as of the close of 1955		12,885

(ii) The taxes imposed on the trust of $7,115 are that portion of the taxes paid by the trust for 1955 which is attributable to the undistributed portion of distributable net income included in the taxable income of the trust (the "balance" in the computation below) and is determined as follows:

Taxable income (paragraph (c)(2)(i) of this example)			$22,375
Capital gains allocable to corpus		$10,000	
Less:			
Capital gain deduction	$5,000		
Personal exemption	100		
		5,100	
Portion of taxable income allocable to corpus			4,900
Balance			17,475
Total taxes paid by the trust			8,189
Taxes on income ($4,900) allocable to corpus			1,074
Taxes imposed on the trust (section 665(c))			7,115

(iii) The amount of $1,074 is the taxes which the trust would have paid for 1955 had all of the distributable net income been distributed during the year.

(2) Allocation of 1956 accumulation distribution to the preceding taxable year 1955. The portion of the 1956 accumulation distribution which is deemed under section 666(a) to be distributed to B on the last day of 1955 (the first preceding taxable year) is $12,885, an amount equal to the undistributed net income for 1955. An additional amount equal to the taxes imposed on the trust ($7,115) is, under section 666(b), also deemed to be distributed to B on the last day of 1955. Thus, a total of $20,000 ($12,885 plus $7,115) is deemed to be distributed to B on December 31, 1955, by reason of the allocation of the 1956 accumulation distribution to the first preceding taxable year. See paragraph (h) of this example for the treatment of the amount of $20,000 in the hands of B.

(3) Character of amounts deemed distributed. Inasmuch as one-half of the 1955 distributable net income of the trust as determined under section 643(a) was currently distributable to A and the balance of such income is deemed under section 666 to be distributed to B on December 31, 1955, the distribution to B is deemed to consist of one-half of each item of income entering into the computation of the 1955 distributable net income; that is, dividends of $5,000, rents of $7,500, taxable interest of $5,000, and tax-exempt interest of $2,500.

(4) **Credit for taxes paid by the trust.** The amount of the taxes for the year 1955 which may not be refunded or credited to the trust under section 667 and which is allowed as a credit against the tax of B for 1956 under section 668(b) is $7,115. See also paragraph (h)(3) of this example.

(5) **Effect of application of provisions of subpart D to the year 1955.** After the allocation of the 1956 accumulation distribution to the preceding taxable year 1955, the undistributed portion of the distributable net income, the undistributed net income, and the taxes imposed on the trust for 1955 are zero. The portion of the 1956 accumulation distribution which is unabsorbed by the 1955 undistributed net income is $7,115, determined as follows:

1956 accumulation distribution (paragraph (d)(1) of this example)	$20,000
Less: Amount allocable to 1955	12,885
Balance allocable to second preceding taxable year 1954	7,115

(f) **Throwback of 1956 accumulation distribution to 1954.** The unabsorbed portion of the 1956 accumulation distribution of $7,115 is allocable to the second preceding taxable year 1954 and is treated under section 666 as a distribution to B on the last day of such year.

(1) **1954 undistributed net income.** (i) The undistributed net income of the trust for 1954, determined as of the close of 1954, is $14,155, computed as follows:

Distributable net income as computed under section 643(a) (paragraph (a)(1) of this example)		$50,000
Less:		
Distributions to A	$25,000	
Taxes imposed on the trust	10,845	
		35,845
Undistributed net income as of the close of 1954		14,155

(ii) The taxes imposed on the trust of $10,845 are that portion of the taxes paid by the trust for 1954 which is attributable to the undistributed portion of distributable net income included in the taxable income of the trust (the "balance" in the computation below in this subdivision) and is determined as follows:

Taxable income (paragraph (c)(1)(i) of this example)			$32,375
Capital gains allocable to corpus		$20,000	
Less:			
Capital gain deduction	$10,000		
Personal exemption	100		
		10,100	
Portion of taxable income allocable to corpus			$9,900
Balance			22,475
Total taxes paid by the trust			13,451
Taxes on income ($9,900) allocable to corpus			2,606
Taxes imposed on the trust (section 665(c))			10,845

(iii) The amount of $2,606 is the taxes which the trust would have paid for 1954 had all of the distributable net income been distributed during that year.

(2) **Allocation of 1956 accumulation distribution to the second preceding taxable year 1954.** Since the unabsorbed portion of the 1956 accumulation distribution of $7,115 is less than the 1954 undistributed net income of $14,155, the trust is deemed under section 666(c) to have also distributed an additional amount ($5,451) equal to a pro rata portion (7,115/14,155×$10,845) of the taxes imposed on the trust for 1954. Thus, a total of $12,566 ($7,115 plus $5,451) is deemed to be distributed to B on December 31, 1954, by reason of the throwback of the 1956 accumulation distribution. See paragraph (h) of this example for the treatment of the amount of $12,566 in the hands of B.

(3) **Character of amounts deemed distributed to B.** The amount of $12,566 which, under section 666, is deemed to be distributed to B on December 31, 1954, is deemed to be composed of the following items of income of the trust: Dividends, $3,770 (15,000/50,000×$12,566); rents, $5,026 (20,000/50,000×$12,566); taxable interest, $2,513 (10,000/50,000×$12,566); and tax-exempt interest, $1,257 (5,000/50,000×$12,566). One-half of the dividends of $3,770 is considered as distributed from the dividends received by the trust on or before July 31, 1954, of which $13 (3,770/15,000×$50) is deemed distributed from the dividends excluded under section 116, and the other half as distributed from the dividends received after July 31, 1954. Thus, of the total of $12,566 deemed distributed to B, $11,296 is considered as made from income included in the gross income of the trust and $1,270 from non-taxable income of the trust.

(4) **Credit for taxes paid by the trust.** The amount of the taxes for the year 1954 which may not be refunded or credited to the trust under section 667 and which is allowed as a credit against the tax of B for 1956 under section 668(b), because of the allocation of the 1956 accumulation distribution to 1954, is $5,401, computed as follows:

Taxable income of the trust as of the close of 1954 (paragraph (c)(1) of this example)	$32,375
Less: Amount deemed distributed to B under section 666 from the taxable income of the trust	11,296
Taxable income adjusted as of the close of 1956	21,079
(Taxes on $21,079 (alternative tax)	$8,050
Taxes on income allocable to corpus (subparagraph (1)(ii) of this paragraph)	$2,606
Taxes imposed on the trust determined as of the close of 1956	5,444
Taxes imposed on the trust determined as of the close of 1954	$10,845
Taxes imposed on the trust determined as of the close of 1956	5,444
Amount of taxes allowed as a credit to B under section 668(b)	5,401

(5) **Effect of application of provisions of subpart D to the year 1954.** (i) The undistributed portion of the distributable net income of the trust for the year 1954, determined as of the close of 1956, is $12,434, computed as follows:

Distributable net income (section 643(a))		$50,000
Less:		
Amount currently distributable to A	$25,000	
Amount deemed distributed to B under section 666	12,566	
		37,566
Undistributed portion of distributable net income as of the close of 1956		12,434

(ii) The amount of $12,434 is deemed to consist of dividends of $3,730, rents of $4,974, taxable interest of $2,487, and tax-exempt interest of $1,243, determined as follows:

	Dividends	Rents	Interest (taxable)	Interest (exempt)	Total
Trust income	$15,000	$20,000	$10,000	$5,000	[1] $50,000
Distributions:					
To A	7,500	10,000	5,000	2,500	[2] 25,000
To B	3,770	5,026	2,513	1,257	[3] 12,566
Total	11,270	15,026	7,513	3,757	37,566
Balance	3,730	4,974	2,487	1,243	12,434

[1] See paragraph (a)(1) of this example.
[2] See paragraph (b) of this example.
[3] See paragraph (f)(3) of this example.

(iii) The undistributed net income of the trust for 1954, determined as of the close of 1956, is $6,990, computed as follows:

Undistributed portion of distributable net income as of the close of 1956	$12,434
Less: Taxes imposed on the trust determined as of the close of 1956 (subparagraph (4) of this paragraph)	5,444
Undistributed net income as of the close of 1956	6,990

(g) Throwback of 1957 accumulation distribution. Inasmuch as all of the income of the trust for the first preceding taxable year 1956 was distributed during such year and the trust had no undistributed net income for the second preceding taxable year 1955 after the application of subpart D to the accumulation distribution made during 1956, the 1957 accumulation distribution of $7,050 is allocable to the third preceding taxable year 1954. See paragraph (d)(1) of this example for computation of the accumulation distribution.

(1) Allocation of 1957 accumulation distribution to the preceding taxable year 1954. The portion of the 1957 accumulation distribution which is deemed under section 666(a) to be distributed to B on the last day of 1954 is $6,990, an amount equal to the undistributed net income of the trust for 1954, determined as of the close of 1956. An additional amount equal to the taxes imposed on the trust ($5,444), determined as of the close of 1956, is under section 666(b) also deemed to be distributed to B on the last day of 1954. See paragraph (f)(4) and (5) of this example. Thus, a total of $12,434 ($6,990 plus $5,444) is deemed to be distributed to B on December 31, 1954, by reason of the allocation of the 1957 accumulation distribution to the taxable year 1954. See paragraph (j) of this example for the treatment of the amount of $12,434 in the hands of B.

(2) Character of amounts deemed distributed. Inasmuch as the balance of the 1954 distributable net income of the trust is deemed under section 666 to be distributed to B on December 31, 1954, the distribution is deemed to consist of dividends of $3,730, rents of $4,974, taxable interest of $2,487, and tax-exempt interest of $1,243. See paragraph (f)(5)(ii) of this example.

(3) Credit for taxes paid by the trust. The amount of taxes for the year 1954 which may not be refunded or credited to the trust under section 667 and which is allowed as a credit against the tax of B under section 668(b) is $5,444, the amount of taxes imposed on the trust determined as of the close of 1956. See paragraph (f)(4) of this example.

(4) Effect of application of provisions of subpart D to the year 1954. After the allocation of the 1957 accumulation distribution to the preceding taxable year 1954, the undistributed portion of the distributable net income, the undistributed net income, and the taxes imposed on the trust for 1954 are zero. The balance of $60 ($7,050 less $6,990) of the 1957 accumulation distribution remaining after the allocation of the accumulation distribution to the year 1954, may not be allocated to the year 1953 since that year is not subject to the provisions of the Internal Revenue Code of 1954.

(h) Determination of B's tax liability; taxable year 1956—(1) Amount of trust income includible in gross income. (i) Of the amount of $45,000 distributed by the trust to B during the taxable year 1956, $25,000 is treated as a distribution out of trust income for that year within the meaning of section 662(a)(2), and $20,000 as an accumulation distribution within the meaning of section 665(b) (see paragraph (d) of this example). However, $12,885 plus taxes of $7,115 is deemed distributed to B on December 31, 1955, and $7,115 plus taxes of $5,451 on December 31, 1954, under section 666 by reason of the accumulation distribution made during 1956, and these amounts are includible in B's gross income for 1956 to the extent that they would have been includible in his gross income under section 662(a)(2) and (b) for 1955 and 1954, respectively, had they been distributed on the last day of those years.

(ii) The amounts distributed to B out of trust income for the year 1956, and the amounts deemed distributed out of income for the preceding taxable years 1955 and 1954 have the following character for the purpose of determining the amount includible in B's gross income for 1956:

Year	Dividends	Rents	Interest (taxable)	Interest (exempt)	Total
1956	$5,000	$10,000	$7,500	$2,500	[1] $25,000
1955	5,000	7,500	5,000	2,500	[2] 20,000
1954	3,770	5,026	2,513	1,257	[3] 12,566
Total	13,770	22,526	15,013	6,257	57,566

[1] See paragraph (d)(2) of this example.
[2] See paragraph (e)(3) of this example.
[3] See paragraph (f)(3) of this example.

Thus, B will include in gross income for 1956 dividends of $13,770 (subject to the dividend exclusion), rents of $22,526, and taxable interest of $15,013, and will exclude the tax-exempt interest of $6,257.

(2) Computation of tax. (i) For the purpose of computing B's tax liability, it is assumed that he was single during the taxable years 1954, 1955, and 1956, and that his taxable income

(derived from salary) for each of the years 1954 and 1955 amounted to $13,400 on which a tax of $4,002 was paid for each year. It is also assumed that his income (other than distributions from the trust) for 1956 was $15,000 derived from salary, and he had allowable deductions of $10,600, which included the deduction for personal exemption.

(ii) The computation of the tax for the taxable year 1956 attributable to the section 666 amounts which are included in B's gross income for such year, as provided in paragraph (a)(1) of § 1.668(a)–4, is as follows:

	(1) Section 666 amounts excluded	(2) Section 666 amounts included
Salary	$15,000	$15,000
Income from trust:		
Dividends ($50 excluded)	4,950	13,720
Rents	10,000	22,526
Taxable interest	7,500	15,013
Total	37,450	66,259
Less: Allowable deductions	10,600	10,600
Taxable income	26,850	55,659
Total tax	11,267	31,064
Less: Dividend received credit	198	475
Tax liability	$11,069	30,589
Tax on income from which section 666 amounts are excluded	....	11,069
1956 tax attributable to section 666 amounts	....	19,520

Only that portion of the dividends received by the trust after July 31, 1954, and deemed distributed to B under section 666, on the last day of such year is included in computing the dividend received credit shown in column (2). See paragraph (f)(3) of this example.

(iii) The computation of the taxes for the preceding taxable years attributable to the section 666 amounts which are deemed distributed by the trust on the last day of these years, as provided in paragraph (a)(2) of § 1.668(a)–4, is as follows:

	Preceding taxable years	
	First 1955	Second 1954
Taxable income previously reported	$13,400	$13,400
Section 666 amounts:		
Dividends ($50 excluded)	4,950	3,720
Rents	7,500	5,026
Taxable interest	5,000	2,513
Taxable income as adjusted	30,850	24,659
Total tax	13,747	9,949
Less: Dividend received credit	198	75
Balance of tax	13,549	9,874
Tax liability	4,002	4,002
Tax attributable to section 666 amounts	9,547	5,872

Only that portion ($1,885) of the dividends received by the trust after July 31, 1954, and deemed distributed under section 666 on the last day of that year, is included in computing the dividend received credit of $75 for the year 1954. See paragraph (f)(3) of this example.

(iv) Inasmuch as the aggregate of the taxes of $15,419 ($9,547 plus $5,872) attributable to the section 666 amounts as determined for the preceding taxable years is less than the tax of $19,520 determined for the taxable year 1956, the amount of $15,419 shall be added to the tax computed for 1956 without including the section 666 amounts. Thus, B's tax liability for 1956 is $26,488 ($11,069 plus $15,419).

(3) **Credits against the tax.** B is allowed under section 668(b) a credit of $12,516 ($5,401 for 1954 and $7,115 for 1955) against his 1956 tax liability for the taxes paid by the trust for the preceding taxable years and which may not be refunded or credited to the trust under section 667. See paragraphs (e)(4) and (f)(4) of this example.

(i) **[Reserved]**

(j) **Taxable year 1957—(1) Amount of trust income includible in gross income.** (i) Of the amount of $29,550 distributed by the trust to B during the taxable year 1957, $22,500 is treated as a distribution out of trust income for that year within the meaning of section 662(a)(2), and $7,050 as an accumulation distribution within the meaning of section 665(b) (see paragraph (d) of this example). However, $6,990 plus taxes of $5,444 is deemed distributed to B on December 31, 1954, under section 666 by reason of the accumulation distribution made during 1957, and that amount is includible in B's gross income for 1957, to the extent that it would have been includible in his gross income under section 662(a)(2) and (b) for 1954, had it been distributed on the last day of that year.

(ii) The amounts deemed distributed to B out of trust income for the year 1957 and the preceding taxable year 1954 are deemed to have the following character for the purpose of determining the amount includible in B's gross income for 1957:

Year	Dividends	Rents	Interest (taxable)	Interest (exempt)	Total
1957	$5,000	$7,500	$7,500	$2,500	[1]$22,500
1954	3,730	4,974	2,487	1,243	[2]12,434
Total	8,730	12,474	9,987	3,743	34,934

[1] See paragraph (d)(2) of this example.
[2] See paragraph (g)(2) of this example.

Thus, B will include in gross income for the year 1957 dividends of $8,730 (subject to the dividend exclusion), rents of $12,474, and taxable interest of $9,987 and will exclude the tax-exempt interest of $3,743.

(2) **Computation of tax.** (i) For the purpose of computing B's tax liability for 1957, it is assumed that he was single for the entire year and had income (other than distributions from the trust) of $15,000 from salary. Also, he had allowable deductions of $8,100, which included the deductions for personal exemption.

(ii) The computation of the tax for the taxable year 1957 attributable to the section 666 amounts which are included in B's gross income for that year, as provided in paragraph (a)(1) of § 1.668(a)–4, is as follows:

	Section 666 amounts excluded	Section 666 amounts included
Salary	$15,000	$15,000
Trust income:		
Dividends ($50 excluded)	4,950	8,680
Rents	7,500	12,474
Taxable interest	7,500	9,987
Total	34,950	46,141

	Section 666 amounts excluded	Section 666 amounts included
Less: Allowable deductions	$8,100	$8,100
Taxable income	26,850	38,041
Total tax	11,267	18,388
Less: Dividends received credit	198	275
Tax liability	11,069	18,113
Tax on income from which section 666 amounts are excluded	....	11,069
1957 tax attributable to section 666 amounts	....	7,044

See explanation following computation in paragraph (h)(2)(ii) of this example with respect to the computation of the dividend received credit on dividends received by the trust in 1954.

(iii) The amount of tax, computed at 1954 rates, attributable to the section 666 amounts which are deemed to have been distributed by the trust on the last day of 1954, is $6,939, computed as follows:

1954 taxable income as adjusted (paragraph (h)(2)(iii) of this example)		$24,659
Section 666 amounts:		
Dividends		3,730
Rents		4,974
Taxable interest		2,487
Taxable income as adjusted		35,850
Total tax		16,963
Less: Dividends received credit		150
Balance of tax		16,813
Tax liability for 1954	$4,002	
Tax attributable to 1956 accumulation distribution (this example)	5,872	
		9,874
Tax attributable to the section 666 amounts distributed in 1957		6,939

Only that portion ($3,750) of the dividends received by the trust after July 31, 1954, and deemed distributed under section 666 on the last day of that year, is included in computing the dividend received credit of $150. See paragraphs (f)(3) and (g)(2) of this example.

(iv) Inasmuch as the tax of $6,939 attributable to the section 666 amounts as determined for the preceding taxable year 1954 is less than the tax of $7,044 attributable to these amounts for the year 1957, the amount of $6,939 shall be added to the tax computed for 1957 without including in gross income the section 666 amounts. Thus, B's tax liability for 1957 is $18,008 ($11,069 plus $6,939).

(3) **Credit against the tax.** B is allowed under section 668(b) a credit of $5,444 against his 1957 tax liability for the balance of the taxes paid by the trust for 1954 and which may not be refunded or credited to the trust under section 667. See paragraph (g)(3) of this example.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 738, Jan. 17. 1969]

§ 1.669(a)–1A Amount allocated.

(a) **In general.** After a trust has distributed all of its undistributed net income, the rules concerning the treatment of capital gain distributions (prescribed under section 669) may become applicable to an accumulation distribution. This section prescribes rules to determine from which years capital gain distributions are considered to be made. For the definition of "capital gain distribution," see § 1.665(g)–1A. Section 669 does not apply to a trust that has distributed all of its income currently since its inception. See § 1.668(a)–1A(c). Capital gain retains its character in the hands of the beneficiary. See § 1.669(f)–1A. A capital gain distribution to more than one beneficiary will be allocated among them. See § 16.668(a)–2A.

(b) **First-in, first-out rule.** A capital gain distribution is allocated to the preceding taxable years of the trust (as defined in § 1.665(e)–1A(a)(1)(iii)), according to the undistributed capital gain of the trust for such years. For this purpose, a capital gain distribution is first allocated to the earliest such preceding taxable year in which there is undistributed capital gain and shall then be allocated in turn, beginning with the next earliest, to any remaining preceding taxable years of the trust. The portion of the capital gain distribution allocated to the earliest preceding taxable year is the amount of undistributed capital gain for that preceding taxable year. The portion of the capital gain distribution allocated to any preceding taxable year subsequent to the earliest such preceding taxable year is the excess of the capital gain distribution over the aggregate of the undistributed capital gain for all earlier preceding taxable years. See paragraph (c) of this section for adjustments to undistributed capital gain for prior distributions.

(c) **Reduction of undistributed capital gain for prior capital gain distributions.** For the purposes of allocating to any preceding taxable year a capital gain distribution of the taxable year, the undistributed capital gain of such preceding taxable year is reduced by the amount from such year deemed distributed in any capital gain distribution made in any taxable year intervening between such preceding taxable year and the taxable year. Accordingly, for example, if a trust subject to the capital gain throwback has no undistributed net income but has undistributed capital gain for 1974, and makes capital gain distributions during the taxable years 1978 and 1979, then in determining that part of the 1979 capital gain distribution that is thrown back to 1974, the undistributed capital gain for 1974 is reduced by the amount of such undistributed capital gain for 1974 deemed distributed in the 1978 capital gain distribution.

(d) **Rule when no undistributed capital gain.** If, before the application of the provisions of subpart D to a capital gain distribution for the taxable

year, there is no undistributed capital gain for a preceding taxable year, then no portion of the capital gain distribution is deemed distributed on the last day of such preceding taxable year. Thus, for example, if a capital gain distribution is made during the taxable year 1975 from a trust whose earliest preceding taxable year is taxable year 1970, and the trust had no undistributed capital gain for 1970, then no portion of the 1975 capital gain distribution is deemed distributed on the last day of 1970.

(e) **Example.** The provisions of this section may be illustrated by the following example:

Example. In 1977, a trust reporting on the calendar year basis makes a capital gain distribution of $33,000. In 1969, the trust had $6,000 of undistributed capital gain; in 1970, $4,000; in 1971, none; in 1972, $7,000; in 1973, $5,000; in 1974, $8,000; in 1975, $6,000; in 1976, $4,000; and $6,000 in 1977. The capital gain distribution is deemed distributed $6,000 in 1969, $4,000 in 1970, none in 1971, $7,000 in 1972, $5,000 in 1973, $8,000 in 1974, and $3,000 in 1975.

[T.D. 7204, 37 FR 17153, Aug. 25, 1972]

§ 1.669(b)–1A Tax on distribution.

(a) **In general.** The partial tax imposed on the beneficiary by section 668(a)(3) shall be the lesser of—

(1) The tax computed under paragraph (b) of this section (the "exact" method), or

(2) The tax computed under paragraph (c) of this section (the "short-cut" method),

except as provided in § 1.669(c)–3A (relating to failure to furnish proper information) and paragraph (d) of this section (relating to disallowance of short-cut method). For purposes of this paragraph, the method used in the return shall be accepted as the method that produces the lesser tax. The beneficiary's choice of the two methods is not dependent upon the method that he uses to compute his partial tax imposed by section 668(a)(2).

(b) **Computation of partial tax by the exact method.** The partial tax referred to in paragraph (a)(1) of this section is computed as follows:

(1) First, compute the tax attributable to the section 669 amounts for each of the preceding taxable years. For purposes of this paragraph, the "section 669 amounts" for a preceding taxable year are the amounts deemed distributed under section 669(a) on the last day of such preceding taxable year, plus the amount of taxes deemed distributed on such day under section 669 (d) or (e). The tax attributable to such amounts in each prior taxable year of the beneficiary is the difference between the tax for such year computed with the inclusion of the section 669 amounts in the beneficiary's gross income and the tax for such year computed with the inclusion of them in such gross income. Tax computations for each such year shall reflect a taxpayer's marital, dependency, exemption, and filing status for such year. To the extent the undistributed capital gain of a trust deemed distributed in a capital gain distribution includes amounts received as a capital gain distribution from another trust, for purposes of this paragraph they shall be considered as amounts deemed distributed by the trust under section 669(a) on the last day of each of the preceding taxable years in which such amounts were accumulated by such other trust. For example, assume trust Z, a calendar year trust received in its taxable year 1975 a capital gain distribution from trust Y, a calendar year trust, that included undistributed capital gain of trust Y for the taxable years 1972, 1973, and 1974. To the extent a capital gain distribution made by trust Z in its taxable year 1976 includes such undistributed capital gain, it shall be considered a capital gain distribution by trust Z in the taxable year 1976 and under section 669(a) will be deemed distributed on the last day of the preceding taxable years 1972, 1973, and 1974.

(2) From the sum of the taxes for the prior taxable years attributable to the section 669(a) amounts (computed in accordance with subparagraph (1) of this paragraph), subtract so much of the amount of taxes deemed distributed to the beneficiary under §§ 1.669(d)–1A and 1.669(e)–1A as does not exceed such sum. The resulting amount, if any, is the partial tax on the beneficiary, computed under the exact method, for the taxable year in which the capital gain distribution is paid, credited, or required to be distributed to the beneficiary.

(c) **Computation of tax by the short-cut method.** (1) The tax referred to in paragraph (a)(2) of this section is computed as follows:

(i) First, determine the number of preceding taxable years of the trust on the last day of which an amount is deemed under section 669(a) to have been distributed. For purposes of the preceding sentence, the preceding taxable years of a trust that has received a capital gain distribution from another trust shall include the taxable years of such other trust in which an amount was deemed distributed in such capital gain distribution. For example, assume trust Z, a calendar year trust, received in its taxable year 1975 a capital gain distribution from trust Y, a calendar year trust,

that included undistributed capital gain of trust Y for the taxable years 1972, 1973, and 1974. To the extent a capital gain distribution made by trust Z in its taxable year 1976 includes such undistributed capital gain, it shall be considered a capital gain distribution by trust Z in the taxable year 1976 and under section 669(a) will be deemed distributed on the last day of the preceding taxable years 1972, 1973, and 1974. For purposes of this subparagraph, such number of preceding taxable years of the trust shall not include any preceding taxable year of the trust in which the undistributed capital gain deemed distributed is less than 25 percent of (a) the total amounts deemed under section 669(a) to be undistributed capital gain from preceding taxable years, divided by (b) the number of such preceding taxable years of the trust on the last day of which an amount is deemed under section 669(a) to have been distributed without application of this sentence. For example, assume that a capital gain distribution of $90,000 made to a beneficiary in 1979 is deemed distributed in the amounts of $29,000 in each of the years 1972, 1973, and 1974, and $3,000 in 1975. The number of preceding taxable years on the last day of which an amount was deemed distributed without reference to the second sentence of this subparagraph is 4. However, the distribution deemed made in 1975 ($3,000) is less than $5,625, which is 25 percent of (a) the total undistributed capital gain deemed distributed under section 669(a) ($90,000) divided by (b) the number of such preceding taxable years (4), or $22,500. Therefore, for purposes of this subparagraph, the capital gain distribution is deemed distributed in only 3 preceding taxable years (1972, 1973, and 1974).

(ii) Second, divide the amount (representing the capital gain distribution and taxes deemed distributed) required under section 668(a) to be included in the income of the beneficiary for the taxable year by the number of preceding taxable years of the trust on the last day of which an amount is deemed under section 669(a) to have been distributed (determined as provided in subdivision (i) of this paragraph). The amount determined under this subdivision, including taxes deemed distributed, consists of the same proportion of long-term and short-term capital gain as the total of each type of capital gain deemed distributed in the capital gain distribution bears to the total undistributed capital gain from such preceding taxable years deemed distributed in the capital gain distribution. For example, assume that an amount of $50,000 is deemed distributed under section 669(a) from undistributed capital gain of 5 preceding taxable years of the trust, and consists of $30,000 of long-term capital gain and $20,000 of short-term capital gain. Taxes attributable to such amounts in the amount of $10,000 are also deemed distributed. The amount determined under this subdivision, $12,000 ($50,000 income plus $10,000 tax, divided by 5 years), is deemed to consist of $7,200 of long-term capital gain and $4,800 in short-term capital gain.

(iii) Third, compute the tax of the beneficiary for each of the 3 taxable years immediately preceding the year in which the capital gain distribution is paid, credited, or required to be distributed to him,

(a) With the inclusion in gross income of the beneficiary for each of such 3 years of the amount determined under subdivision (ii) of this subparagraph, and

(b) Without such inclusion.

The difference between the amount of tax computed under (a) of this subdivision for each year and the amount computed under (b) of this subdivision for that year is the additional tax resulting from the inclusion in gross income for that year of the amount determined under subdivision (ii) of this subparagraph.

(iv) Fourth, add the additional taxes resulting from the application of subdivision (iii) of this subparagraph and then divide this amount by 3.

(v) Fifth, the resulting amount is then multiplied by the number of preceding taxable years of the trust on the last day of which an amount is deemed under section 669(a) to have been distributed (previously determined under subdivision (i) of this subparagraph).

(vi) The resulting amount, less so much of the amount of taxes deemed distributed to the beneficiary under §§ 1.669(d)–1A and 1.669(e)–1A as does not exceed such resulting amount, is the tax under the short-cut method provided in section 669(b)(1)(B).

(2) See § 1.668(b)–1A(c) for examples of the short-cut method in the context of an accumulation distribution.

(d) **Disallowance of short-cut method.** If, in any prior taxable year of the beneficiary in which any part of the capital gain distribution is deemed to have been distributed under section 669(a) to such beneficiary, any part of prior capital gain distributions by each of two or more other trusts is deemed under section 669(a) to have been distributed to such beneficiary, then the short-cut meth-

od under paragraph (c) of this section may not be used and the partial tax imposed by section 668(a)(3) shall be computed only under the exact method under paragraph (b) of this section. For example, assume that, in 1978, trust X makes a capital gain distribution to A, who is on the calendar year basis, and part of the distribution is deemed under section 669(a) to have been distributed on March 31, 1974. In 1977, A had received a capital gain distribution from both trust Y and trust Z. Part of the capital gain distribution from trust Y was deemed under section 669(a) to have been distributed to A on June 30, 1974, and part of the capital gain distribution from trust Z was deemed under section 669(a) to have been distributed to A on December 31, 1974. Because there were portions of capital gain distributions from two other trusts deemed distributed within the same prior taxable year of A (1974), the 1978 capital gain distribution from trust X may not be computed under the short-cut method provided in paragraph (c) of this section. Therefore the exact method under paragraph (b) of this section must be used to compute the tax imposed by section 668(a)(3).

[T.D. 7204, 37 FR 17153, Aug. 25, 1972]

§ 1.669(c)–1A Special rules applicable to section 669.

(a) Effect of other distributions. The income of the beneficiary, for any of his prior taxable years for which a tax is being recomputed under § 1.669(b)–1A, shall include any amounts of prior accumulation distributions (including prior capital gain distributions) deemed distributed under sections 666 and 669 in such prior taxable year. For purposes of the preceding sentence, a "prior accumulation distribution" is a distribution from the same or another trust which was paid, credited, or required to be distributed in a prior taxable year of the beneficiary. The term "prior accumulation distribution" also includes accumulation distributions of the same or other trusts which were distributed to the beneficiary in the same taxable year. The term "prior capital gain distribution" also includes capital gain distributions of other trusts which were paid, credited, or required to be distributed to the beneficiary in the same taxable year and which the beneficiary has determined under paragraph (b) of this section to treat as having been distributed before the capital gain distribution for which tax is being computed under § 1.669(b)–1A.

(b) Multiple distributions in the same taxable year. For purposes of paragraph (a) of this section, capital gain distributions made from more than one trust in the same taxable year of the beneficiary, regardless of when in the taxable year they were actually made, shall be treated as having been made consecutively, in whichever order the beneficiary may determine. However, the beneficiary must treat them as having been made in the same order for the purpose of computing the partial tax on the several capital gain distributions. The beneficiary shall indicate the order he has determined to deem the capital gain distributions to have been received by him on his return for the taxable year. A failure by him so to indicate, however, shall not affect his right to make such determination. The purpose of this rule is to assure that the tax resulting from the later (as so deemed under this paragraph) distribution is computed with the inclusion of the earlier distribution in the taxable base and that the tax resulting from the earlier (as so deemed under this paragraph) distribution is computed with the later distribution excluded from the taxable base.

(c) Rule when beneficiary not in existence on the last day of a taxable year. If a beneficiary was not in existence on the last day of a preceding taxable year of the trust with respect to which a distribution is deemed made under section 669(a), it shall be assumed, for purposes of the computations under paragraphs (b) and (c) of § 1.669(b)–1A, that the beneficiary—

(1) Was in existence on such last day,

(2) Was a calendar year taxpayer,

(3) Had no gross income other than the amounts deemed distributed to him from such trust in his calendar year in which such last day occurred and from all other trusts from which amounts are deemed to have been distributed to him in such calendar year,

(4) If an individual, was unmarried and had no dependents,

(5) Had no deductions other than the standard deduction, if applicable, under section 141 for such calendar year, and

(6) Was entitled to the personal exemption under section 151 or 642(b).

For example, assume that part of a capital gain distribution made in 1980 is deemed under section 669(a) to have been distributed to the beneficiary, A, in 1973. $10,000 of a prior accumulation distribution was deemed distributed in 1973. A was born on October 9, 1975. It will be assumed for purposes of § 1.669(b)–1A that A was alive in

1973, was on the calendar year basis, had no income other than (i) the $10,000 from the accumulation distribution deemed distributed in 1973 and (ii) the part of the 1980 distribution deemed distributed in 1973, and had no deductions other than the personal exemption provided in section 151. If A were a trust or estate created after 1973, the same assumptions would apply, except that the trust or estate would not be entitled to the standard deduction and would receive the personal exemption provided under section 642(b) in the same manner as allowed under such section for A's first actual taxable year.

(d) Examples. The provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). In 1978, trust X made a capital gain distribution to A, a calendar year taxpayer, of which $3,000 was deemed to have been distributed in 1974. In 1980, trust X makes another capital gain distribution to A, $10,000 of which is deemed under section 669(a) to have been distributed in 1974. Also in 1980, trust Y makes a capital gain distribution to A, of which $5,000 is deemed under section 669(a) to have been distributed in 1974. A determines to treat the 1980 distribution from trust Y as having been made prior to the 1980 distribution from trust X. In computing the tax on the 1980 trust Y distribution, A's gross income for 1974 includes (i) the $3,000 deemed distributed from the 1978 distribution, and (ii) the $5,000 deemed distributed in 1974 from the 1980 Trust Y capital gain distribution. To compute A's tax under the exact method for 1974 on the $10,000 from the 1980 trust X capital gain distribution deemed distributed in 1974. A's gross income for 1974 includes (i) the $10,000, (ii) the $3,000 previously deemed distributed in 1974 from the 1978 trust X capital gain distribution, and (iii) the $5,000 deemed distributed in 1974 from the 1980 trust Y capital gain distribution.

Example (2). In 1978, trust T makes a capital gain distribution to B, a calendar year taxpayer. Determination of the tax on the distribution under the short-cut method requires the use of B's gross income for 1975, 1976, and 1977. In 1977, B received an accumulation distribution from trust U, of which $2,000 was deemed to have been distributed in 1975, and $3,000 in 1976. B's gross income for 1975, for purposes of using the short-cut method to determine the tax from the trust T capital gain distribution, will be deemed to include the $2,000 deemed distributed in 1975 by trust U, and his gross income for 1976 will be deemed to include the $3,000 deemed distributed by trust U in 1976.

[T.D. 7204, 37 FR 17155, Aug. 25, 1972]

§ 1.669(c)–2A Computation of the beneficiary's income and tax for a prior taxable year.

(a) Basis for computation. (1) The beneficiary's income and tax paid for any prior taxable year for which a recomputation is involved under either the exact method or the short-cut method shall be determined by reference to the information required to be furnished by him under § 1.669(c)–3A(a). The gross income, related deductions, and taxes paid for a prior taxable year of the beneficiary as finally determined shall be used for recomputation purposes. The term "as finally determined" shall have the same meaning for purposes of this section as in § 1.668(b)–3A(a).

(2) If any computations rely on the beneficiary's return for a prior taxable year for which the applicable period of limitations on assessment under section 6501 has expired, and such return shows a mathematical error on its face which resulted in the wrong amount of tax being paid for such year, the determination of both the tax for such year computed with the inclusion of the section 669 amounts in the beneficiary's gross income, and the tax for such year computed without including such amounts in such gross income, shall be based upon the return after the correction of such mathematical errors.

(b) Effect of allocation of undistributed capital gain on items based on amount of income and with respect to a net operating loss, a charitable contributions carryover, or a capital loss carryover. (1) In computing the tax for any taxable year under either the exact method or the short-cut method, any item which depends upon the amount of gross income, adjusted gross income, or taxable income shall be recomputed to take into consideration the amount of undistributed capital gain allocated to such year. For example, if $2,000 of undistributed long-term capital gain is allocated to 1970, adjusted gross income for 1970 is increased from $5,000 to $6,000. The allowable 50 percent charitable deduction under section 170(b)(1)(A) is then increased and the amount of the nondeductible medical expenses under section 213 (3 percent of adjusted gross income) is also increased.

(2) In computing the tax attributable to the undistributed capital gain deemed distributed to the beneficiary in any of his prior taxable years under either the exact method or the short-cut method, the effect of amounts of undistributed capital gain on a net operating loss carryback or carryover, a charitable contributions carryover, or a capital loss carryback or carryover, shall be taken into account. In determining the amount of tax attributable to such deemed distribution, a computation shall also be made for any taxable year which is affected by a net operating loss carryback or carryover, by a charitable contributions carryover, or by a capital loss carryback or carryover determined by reference to the taxable year to which amounts are allocated under either method and which carryback or carryover is reduced or increased by such amounts so allocated.

[T.D. 7204, 37 FR 17155, Aug. 25, 1972]

§ 1.669(c)–3A Information requirements with respect to beneficiary.

(a) **Information to be supplied by beneficiary—(1) Use of exact method.** The beneficiary must supply the information required by subparagraph (3) of § 1.668(b)–4A(a) for any prior taxable year for which a recomputation is required under either the exact method or the short-cut method. Such information shall be filed with the beneficiary's return for the year in which the tax under section 668(a)(3) is imposed.

(2) **Failure to furnish.** If the beneficiary fails to furnish the information required by this paragraph for any prior year involved in the exact method, he may not use such method and the tax computed under paragraph (c) of § 1.669(b)–1A (the short-cut method) shall be deemed to be the amount of partial tax imposed by section 668(a)(3). See, however, paragraph (b) of this section for an exception to this rule where the short-cut method is not permitted. If he cannot furnish the information required for a prior year involved in the short-cut method, such year will be recomputed on the basis of the best information available.

(b) **Exception.** If, by reason of § 1.669(b)–1A(e), the beneficiary may not compute the partial tax on the capital gain distribution under § 1.669(b)–1A(c) (the short-cut method), the provisions of subparagraph (2) of paragraph (a) of this section shall not apply. In such case, if the beneficiary fails to provide the information required by § 1.668(b)–4A(a)(3) for any prior taxable year, the district director shall, by utilizing whatever information is available to him (including information supplied by the beneficiary), determine the beneficiary's income and related expenses for such prior taxable year.

[T.D. 7204, 37 FR 17156, Aug. 25, 1972]

§ 1.669(d)–1A Total taxes deemed distributed.

(a) If a capital gain distribution is deemed under § 1.669(a)–1A to be distributed on the last day of a preceding taxable year and the amount is not less than the undistributed capital gain for such preceding taxable year, then an additional amount equal to the "taxes imposed on the trust attributable to the undistributed capital gain" (as defined in § 1.665(d)–1A(c)) for such preceding taxable year is also deemed to have been properly distributed. For example, assume a trust has no distributable net income and has undistributed capital gain of $18,010 for the taxable year 1974. The taxes imposed on the trust attributable to the undistributed capital gain are $2,190. During the taxable year 1977, a capital gain distribution of $18,010 is made to the beneficiary which is deemed under § 1.669(a)–1A to have been distributed on the last day of 1974. The 1977 capital gain distribution is not less than the 1974 undistributed capital gain. Accordingly, taxes of $2,190 imposed on the trust attributable to the undistributed capital gain for 1974 are also deemed to have been distributed on the last day of 1974. Thus, a total of $20,200 will be deemed to have been distributed on the last day of 1974.

(b) For the purpose of paragraph (a) of this section, the undistributed capital gain of any preceding taxable year and the taxes imposed on the trust for such preceding taxable year attributable to such undistributed capital gain are computed after taking into account any capital gain distributions of taxable years intervening between such preceding taxable year and the taxable year. See paragraph (c) of § 1.669(a)–1A.

[T.D. 7204, 37 FR 17156, Aug. 25, 1972]

§ 1.669(e)–1A Pro rata portion of taxes deemed distributed.

(a) If a capital gain distribution is deemed under § 1.669(a)–1A to be distributed on the last day of a preceding taxable year and the amount is less than the undistributed capital gain for such preceding taxable year, then an additional amount is also deemed to have been properly distributed. The additional amount is equal to the "taxes imposed on the trust attributable to the undistributed capital gain" (as defined in § 1.665(d)–1A(c)) for such preceding taxable year, multiplied by a fraction, the numerator of which is the amount of the capital gain distribution allocated to such preceding taxable year and the denominator of which is the undistributed capital gain for such preceding taxable year. See paragraph (b) of example (1) and paragraphs (c) and (f) of example (2) in § 1.669(e)–2A for illustrations of this paragraph.

(b) For the purpose of paragraph (a) of this section, the undistributed capital gain of any preceding taxable year and the taxes imposed on the trust for such preceding taxable year attributable to such undistributed capital gain are computed after taking into account any capital gain distributions of any taxable years intervening between such preceding taxable year and the taxable year. See paragraph (c) of § 1.669(a)–1A, paragraph (c) of example (1) and paragraphs (e) and (h) of example (2) in § 1.669(e)–2A.

[T.D. 7204, 37 FR 17156, Aug. 25, 1972]

§ 1.669(e)–2A Illustration of the provisions of section 669.

The application of the provisions of §§ 1.669(a)–1A, 1.669(d)–1A, and 1.669(e)–1A may be illustrated by the following examples:

Example (1). (a) A trust created on January 1, 1974, makes capital gain distributions as follows:

1979	$14,000
1980	60,000

The trust had accumulated income in 1974.

For 1974 through 1978, the undistributed portion of capital gain, taxes imposed on the trust attributable to the undistributed capital gain, and undistributed capital gain are as follows:

Year	Undistributed portion of capital gain	Taxes imposed on the trust attributable to the undistributed capital gain	Undistributed capital gain
1974	$24,200	$2,830	$21,370
1975	32,200	4,330	27,870
1976	12,200	1,130	11,070
1977	None	None	None
1978	10,200	910	9,290

(b) Since the entire amount of the capital gain distribution for 1979 ($14,000), determined without regard to the capital gain distribution for 1980, is less than the undistributed capital gain for 1974 ($21,370), an additional amount of $1,854 (14,000/21,370×$2,830) is deemed distributed under section 669(e).

(c) In allocating the capital gain distribution for 1980, the amount of undistributed capital gain for 1974 will reflect the capital gain distribution for 1979. The undistributed capital gain for 1974 will then be $7,370 and the taxes imposed on the trust for 1974 will be $976, determined as follows:

Undistributed capital gain as of the close of 1974	$21,370
Less: Capital gain distribution (1979)	14,000
Balance (undistributed capital gain as of the close of 1979)	7,370
Taxes imposed on the trust attributable to the undistributed capital gain as of the close of 1979 (7,370/21,370×2,830)	976

(d) The capital gain distribution of $60,000 for 1980 is deemed to have been made on the last day of the preceding taxable years of the trust to the extent of $55,600, the total of the undistributed capital gain for such years, as shown in the tabulation below. In addition, $7,346, the total taxes imposed on the trust attributable to the undistributed capital gain for such years is also deemed to have been distributed on the last day of such years, as shown below:

Year	Undistributed capital gain	Taxes imposed on the trust attributable to the undistributed capital gain
1974	$7,370	$976
1975	27,870	4,330
1976	11,070	1,130
1977	None	None
1978	$9,290	$910
1979	None	None
Total	55,600	7,346

Example (2). (a) Under the terms of a trust instrument, the trustee has discretion to accumulate or distribute the income to X and to invade corpus for the benefit of X. The trust is subject to capital gain throwback. Both X and the trust report on the calendar year basis. All of the income for 1974 was distributed and the capital gain was accumulated. The capital gain of the trust for the taxable year 1974 is $40,200 and the income taxes paid by the trust for 1974 attributable to the undistributed capital gain are $6,070. All of the income and capital gains for 1975 and 1976 were distributed and in addition the trustee made capital gain distributions within the meaning of section 665(g) of $8,000 for each year.

(b) The undistributed capital gain of the trust determined under section 665(f) as of the close of 1974 is $34,130, computed as follows:

Capital gain	$40,200
Less: Taxes imposed on the trust attributable to the undistributed capital gain	6,070
Undistributed capital gain as of the close of 1974	34,130

(c) The capital gain distribution of $8,000 made during the taxable year 1975 is deemed under section 669(a) to have been made on December 31, 1974. Since this capital gain distribution is less than the 1974 undistributed capital gain of $34,130, a portion of the taxes imposed on the trust for 1974 is also deemed under section 669(e) to have been distributed on December 31, 1974. The total amount deemed to have been distributed to X on December 31, 1974, is $9,486, computed as follows:

Capital gain distribution	$8,000
Taxes deemed distributed (8,000/34,130× $6,070)	1,423
Total	9,423

(d) After the application of the provisions of subpart D to the capital gain distribution of 1975, the undistributed capital gain of the trust for 1974 is $26,130, computed as follows:

Undistributed capital gain as of the close of 1974	$34,130
Less: 1975 capital gain distribution deemed distributed on December 31, 1974 (paragraph (c) of this example)	8,000
Undistributed capital gain for 1974 as of the close of 1975	26,130

(e) The taxes imposed on the trust attributable to the undistributed capital gain for the taxable year 1974, as adjusted to give effective to the 1975 capital gain distribution, amount to $4,647, computed as follows:

Taxes imposed on the trust attributable to undistributed capital gain as of the close of 1974	$6,070
Less: Taxes deemed distributed in 1974	1,423
Taxes attributable to the undistributed capital gain determined as of the close of 1975	4,647

(f) The capital gain distribution of $8,000 made during the taxable year 1976 is, under section 669(a), deemed an amount

properly distributed to X on December 31, 1974. Since the capital gain distribution is less than the 1974 adjusted undistributed capital gain of $26,130, the trust is deemed under section 669(e) also to have distributed on December 31, 1974, a portion of the taxes imposed on the trust for 1974. The total amount deemed to be distributed on December 31, 1974, with respect to the capital gain distribution made in 1976, is $9,423, computed as follows:

Capital gain distribution	$8,000
Taxes deemed distributed (8,000/26,130× $4,647)	1,423
Total	9,423

(g) After the application of the provisions of subpart D to the capital gain distribution of 1976, the undistributed capital gain of the trust for 1974 is $18,130, computed as follows:

Undistributed capital gain for 1974 as of the close of 1975	$26,130
Less:	
1976 capital gain distribution deemed distributed on December 31, 1974 (paragraph (f) of this example)	8,000
Undistributed capital gain for 1974 as of the close of 1976	18,130

(h) The taxes imposed on the trust attributable to the undistributed capital gain of the trust for the taxable year 1974, determined as of the close of the taxable year 1976, amount to $3,224 ($4,647 less $1,423).

[T.D. 7204, 37 FR 17156, Aug. 25, 1972]

§ 1.669(f)–1A Character of capital gain.

Amounts distributed as a capital gain distribution and the taxes attributable thereto (determined under § 1.665(d)–1A(c)) retain the character that the gain had with respect to the trust. Thus, a capital gain that was taxed to the trust as a "long-term" capital gain and the pro rata amount of taxes attributable to such long-term gain shall be treated to the beneficiary as a "long-term" capital gain when they are deemed distributed as part of a capital gain distribution. If a trust has different types of capital gain for the same taxable year, and all of the capital gains are not deemed distributed for such year under section 669(a), the amount deemed distributed from such year (including taxes deemed distributed) shall be treated as consisting of the different types of gains in the ratio that the total of each such type of gains of the trust bears to the total of all such gains for the taxable year. For example, assume that in 1975 a trust had net long-term capital gains of $4,000 and net short-term capital gains of $2,000. Taxes attributable to such undistributed capital gain were $700. Therefore, undistributed capital gain for 1975 is $5,300. In 1980, the trust distributes $2,650 that is deemed to be undistributed capital gain from 1975. Such distribution is deemed to consist of long-term gain of $1,766.67 and short-term gain of $883.33. The taxes deemed distributed of $350 consist of long-term gain of $233.33 and short-term gain of $116.67.

[T.D. 7204, 37 FR 17157, Aug. 25, 1972]

§ 1.669(f)–2A Exception for capital gain distributions from certain trusts.

(a) General rule. If a capital gain distribution is paid, credited, or required to be distributed before January 1, 1973, from a trust that was in existence on December 31, 1969, section 669 shall not apply and no tax shall be imposed on such capital gain distribution under section 668(a)(3). If capital gain distributions from more than one such trust are paid, credited, or required to be distributed to a beneficiary before January 1, 1973, the exception under the preceding sentence shall apply only to the capital gain distributions from one of the trusts. The beneficiary shall indicate on his income tax return for the taxable year in which the distribution would otherwise be included in income under section 668(a) the trust to which the exception provided by this section shall apply.

(b) Special rule for section 2056(b)(5) trust. A capital gain distribution paid, credited, or required to be distributed by a trust that qualifies under section 2056(b)(5) of the Code (commonly known as a "marital deduction trust") to a surviving spouse shall, in general, not be taxed under section 668(a)(3) since such a trust is required to distribute all of its income annually or more often. See section 2056(b)(5) and the regulations thereunder.

(c) Effect of exception. If this section applies to a capital gain distribution from a trust, such distribution shall reduce the undistributed capital gain of the trust. Since section 669 does not apply to such capital gain distribution, no amount of taxes paid by the trust attributable to such capital gain distribution are deemed distributed under sections 669(d) and (e).

[T.D. 7204, 37 FR 17157, Aug. 25, 1972]

§ 1.669(a)–1 Limitation on tax.

(a) In general. Section 669 provides that, at the election of a beneficiary who is a U.S. person (as defined in section 7701(a)(30)) and who satisfies the requirements of section 669(b) (that certain information with respect to the operation and accounts of the trust be supplied), the tax attributable to the amounts treated under section 668(a) as having been received by him, from a foreign trust created by a U.S. person, on the last day of a preceding taxable year of the trust shall not be greater than the tax computed under section

669(a)(1)(A) (the computation under this provision will hereinafter be referred to as the "exact throwback" method) or under section 669(a)(1)(B) (the computation under this provision will hereinafter be referred to as the "short-cut throwback" method). This election of the beneficiary with respect to the taxable year of the beneficiary in which the distribution is made shall be made with the district director before the expiration of the period of limitations for assessment provided in section 6501 for such taxable year.

(b) Where no election is made. If the beneficiary does not make the election provided in section 669(a) in the manner required in section 669(b) and § 1.669(b)–2, or furnish the information with respect to the operation and accounts of the foreign trust created by a U.S. person required by section 669(b) and § 1.669(b)–1, the tax on an accumulation distribution treated under section 668(a) as having been received by him from such foreign trust on the last day of a preceding taxable year of the trust shall be computed without reference to section 668 or 669. In such case, the entire accumulation distribution will be included in the gross income of the beneficiary in the year in which it is paid, credited, or required to be distributed, and tax for such year will be computed on the basis of the beneficiary's total taxable income for the year after taking into account such inclusion in gross income.

(c) Year for which tax is payable. The tax, regardless of the manner in which computed, of the beneficiary which is attributable to an accumulation distribution is imposed on the beneficiary for the taxable year of the beneficiary in which the accumulation distribution is made to him unless the taxable year of the beneficiary is different from that of the trust. See section 662(c) and § 1.662(c)–1.

[T.D. 6989, 34 FR 738, Jan. 17, 1969]

§ 1.669(a)–2 Rules applicable to section 669 computations.

(a) In general. (1) Section 668(a) provides that the total of the amounts treated under section 666 as having been distributed by the foreign trust created by a U.S. person on the last day of a preceding taxable year of such trust shall be included in the gross income of the beneficiary or the beneficiaries who are U.S. persons receiving them. The total of such amounts is includible in the gross income of each beneficiary to the extent the amount would have been included in his gross income under section 662(a)(2) and (b) if the total had actually been paid by the trust on the last day of such preceding taxable year. The total is included in the gross income of the beneficiary for the taxable year of the beneficiary in which such amounts are in fact paid, credited, or required to be distributed unless the taxable year of the beneficiary differs from the taxable year of the trust (see section 662(c) and § 1.662(c)–1). The character of the amounts treated as received by a beneficiary in prior taxable years, including taxes deemed distributed, in the hands of the beneficiary is determined by the rules contained in section 662(b) and §§ 1.662(b)–1 and 1.662(b)–2.

(2) The total of the amounts treated under section 666 as having been distributed by the trust on the last day of a preceding taxable year of the trust are included as prescribed in subparagraph (1) of this paragraph in the gross income of the beneficiary even though as of that day the beneficiary would not have been entitled to receive them had they actually been distributed on that day.

(3) Any deduction allowed to the trust in computing distributable net income for a preceding taxable year (such as depreciation, depletion, etc.) is not deemed allocable to a beneficiary because of the amounts included in a beneficiary's gross income under this section since the deduction has already been utilized in reducing the amount included in the beneficiary's income.

(b) Allocation among beneficiaries of a foreign trust. Where there is more than one beneficiary the portion of the total amount includible in gross income under paragraph (a) of this section which is includible in the gross income of a beneficiary who is a U.S. person is based upon the ratio determined under the second sentence of section 662(a)(2) for the taxable year in which distributed (and not for the preceding taxable year). This paragraph may be illustrated by the example in § 1.668(a)–2.

(c) Treatment of income taxes paid by the trust—(1) Current distributions. The income taxes imposed by the provisions of section 871 on the income of a foreign trust created by a U.S. person shall be included in the gross income of the beneficiary, who is a U.S. person, for the taxable year in which such income is paid, credited, or required to be distributed to the beneficiary.

(2) Accumulation distribution. (i) If an accumulation distribution is deemed under § 1.666(a)–1 to be distributed on the last day of a preceding taxable year and the amount is not less than the undistributed net income for such preceding taxable year, then an additional amount equal

to the taxes imposed on the trust pursuant to the provisions of section 871 for such preceding taxable year is likewise deemed distributed under section 661(a)(2).

(ii) If an accumulation distribution is deemed under § 1.666(a)–1 to be distributed on the last day of a preceding taxable year and the amount is less than the undistributed net income for such preceding taxable year, then an additional amount (representing taxes) is likewise deemed distributed under section 661(a)(2). The additional amount is equal to the taxes imposed on the trust pursuant to the provisions of section 871 for such preceding taxable year, multiplied by the fraction the numerator of which is the amount of the accumulation distribution attributable to such preceding taxable year and the denominator of which is the undistributed net income for such preceding taxable year.

(3) **Credits under sections 32 and 668(b).** Credit under section 32 is allowable to the beneficiary for income taxes withheld at source under subchapters A and B of chapter 3 and which are deemed distributed to him. Credit under section 668(b) is allowable to the beneficiary for income taxes imposed upon the foreign trust by section 871(b). These credits shall be allowed against the tax of the beneficiary for the taxable year of the beneficiary in which the income is paid, credited, or required to be distributed to him, or in which the accumulation distribution to which such taxes relate is made to him.

(d) **Credit for foreign income taxes paid by the trust.** To the extent provided in section 901, credit under section 33 is allowable to the beneficiary for the foreign taxes paid or accrued by the trust to a foreign country.

[T.D. 6989, 34 FR 738, Jan. 17, 1969]

§ 1.669(a)–3 Tax computed by the exact throwback method.

(a) **Tax attributable to amounts treated as received in preceding taxable years.** If a taxpayer elects to compute the tax, on amounts deemed distributed under section 666, by the exact throwback method provided in section 669(a)(1)(A), the tax liability of the beneficiary for the taxable year in which the accumulation distribution is paid, credited, or required to be distributed is computed as provided in paragraph (b) of this section. The beneficiary may not elect to use the exact throwback method of computing his tax on an accumulation distribution as provided in section 669(a)(1)(A) if he were not alive on the last day of each preceding taxable year of the foreign trust created by a U.S. person with respect to which a distribution is deemed made under section 666(a). Thus, if a portion of an amount received as an accumulation distribution was accumulated by the trust during years before the beneficiary was born, the beneficiary is not permitted to elect the exact throwback method provided in section 669(a)(1)(A). See § 1.669(a)–4 for the computation of the tax on an accumulation distribution by the short-cut throwback method provided in section 669(a)(1)(B) under these circumstances.

(b) **Computation of tax.** The tax referred to in paragraph (a) of this section is computed as follows:

(1) First, compute the tax attributable to the section 666 amounts for each of the preceding taxable years. To determine the section 666 amounts attributable to each of the preceding taxable years, see § 1.666(a)–1. The tax attributable to such amounts in each such preceding taxable year is the difference between the tax for such preceding taxable year computed with the inclusion of the section 666 amounts in gross income, and the tax for such year computed without including them in gross income. Tax computations for each preceding year shall reflect the taxpayer's marital and dependency status for that year.

(2) Second, add

(i) The sum of the taxes for the preceding taxable years attributable to the section 666 amounts (computed in accordance with subparagraph (1) of this paragraph), and

(ii) The tax for the taxable year of the beneficiary in which the accumulation distribution is paid, credited, or required to be distributed to him, computed without including the section 666 amounts in gross income.

The total of these amounts is the beneficiary's tax, computed under section 669(a)(1)(A) for the taxable year in which the accumulation distribution is paid, credited, or required to be distributed to him.

(c) **Effect of prior election.** In computing the tax attributable to an accumulation distribution for the taxable year in which such accumulation distribution is paid, credited, or required to be distributed to him, the beneficiary in computing the tax attributable to section 666 amounts for each of the preceding taxable years, must include in his gross income for each such year the section 666 amounts deemed distributed to him in such year resulting from prior accumulation distributions made to him in taxable years prior to the current

taxable year. These section 666 amounts resulting from such prior accumulation distributions must be included in the gross income for such preceding taxable year even though the tax on the accumulation distribution of such prior taxable year was computed by the short-cut throwback method provided in section 669(a)(1)(B) and § 1.669(a)–4. [T.D. 6989, 34 FR 739, Jan. 17, 1969]

§ 1.669(a)–4 Tax attributable to short-cut throwback method.

(a) Manner of computing tax. If a beneficiary has elected under section 669(a) to compute the tax on the amounts deemed distributed under section 666 by the short-cut throwback method provided in section 669(a)(1)(B), the tax liability of the beneficiary for the taxable year is computed in the following manner:

(1) First, determine the number of preceding taxable years of the trust, on the last day of which an amount is deemed under section 666(a) to have been distributed. In any case where there has been a prior accumulation distribution with respect to which the beneficiary has elected to compute his tax either by the exact throwback method or by the short-cut throwback method, or to which the next to the last sentence of section 668(a) has applied, for purposes of an election to use the short-cut throwback method with respect to a subsequent accumulation distribution, in determining the number of preceding taxable years of the trust with respect to which an amount of the subsequent accumulation distribution is deemed distributed to a beneficiary under section 666(a), there shall be excluded any preceding taxable year during which any part of the prior accumulation distribution was deemed distributed to the beneficiary. For example, assume that an accumulation distribution of $90,000 made to a beneficiary in 1963 is deemed distributed in the amounts of $25,000 in each of the years 1962, 1961, and 1960, and in the amount of $15,000 in 1959, and a subsequent accumulation distribution of $85,000 made to the same beneficiary in 1964 is deemed distributed in the amount of $10,000 during 1959, and $25,000 during each of the years 1958, 1957, and 1956. The accumulation distribution made in 1963 is deemed distributed in 4 preceding taxable years of the trust (1962, 1961, 1960, and 1959). Inasmuch as the year 1959 was a year during which part of the 1963 accumulation distribution was deemed distributed, for purposes of determining the number of preceding taxable years in which the accumulation distribution of $85,000 made in 1964 is deemed distributed, the year 1959 is excluded and the $85,000 accumulation distribution is deemed distributed in three preceding taxable years (1958, 1957, and 1956),

(2) Second, divide the number of preceding taxable years of the trust, on the last day of which an amount is deemed under section 666(a) to have been distributed (determined as provided in subparagraph (1) of this paragraph) into the amount (representing an accumulation distribution made by a foreign trust created by a U.S. person) required to be included under section 669(a) in the gross income of the beneficiary for the taxable year,

(3) Third, compute the tax of the beneficiary for the current taxable year (the year in which the accumulation distribution is paid, credited, or required to be distributed to him) and for each of the 2 taxable years immediately preceding such year,

(i) With the inclusion in gross income of the beneficiary for each of such 3 years of the amount determined under subparagraph (2) of this paragraph, and

(ii) Without such inclusion.

The difference between the amount of tax computed under subdivision (i) of this subparagraph for each year and the amount computed under subdivision (ii) of this subparagraph for that year is the additional tax resulting from the inclusion in gross income for that year of the amount determined under subparagraph (2) of this paragraph. If the number of preceding taxable years of the trust, on the last day of which an amount is deemed under section 666(a) to have been distributed, is less than three, the taxable years of the beneficiary for which this recomputation is made shall equal the number of years in which an amount is deemed under section 666(a) to have been distributed, commencing with the taxable year of the beneficiary in which the accumulation distribution is paid, credited, or required to be distributed to him. If the beneficiary was not alive during one of the two taxable years immediately preceding the taxable year, the tax resulting from the inclusion of the amount determined in subparagraph (2) of this paragraph in the gross income of the beneficiary will be computed only for the taxable year in which the accumulation distribution was paid, credited, or required to be distributed to him and the preceding year during which the beneficiary was alive. In the event the beneficiary was not alive during either of the 2 years immediately preceding the taxable year in which the accumulation distribution was paid, credited, or required to

be distributed, the tax shall be computed on the basis of the beneficiary's taxable year without regard to the inclusion in income required by section 668(a) of any amount other than pursuant to section 669(a)(1)(B). For example, assume that a foreign trust created by a U.S. person accumulates $3,000 of income in 1964 and $7,000 in 1963 and then distributes the accumulated income on January 1, 1965, to a beneficiary who is a U.S. person. The limitation on tax is determined by recomputing the beneficiary's gross income for 1964 and 1965 by adding $5,000 to his gross income for each year. If the same distribution were made to an infant who was born in 1965, the limitation on tax would be computed by adding $5,000 to his gross income for such year. In the case of the infant, the resulting increase in tax would be multiplied by two to arrive at the limitation on the increase in his tax for 1965 attributable to such distribution.

(4) Fourth, add the additional taxes resulting from the application of subparagraph (3) of this paragraph for the taxable year and the 2 taxable years (or the 1 taxable year, where applicable) immediately preceding the year in which the accumulation distribution is paid, credited, or required to be distributed and then divide this amount by three (or two, where applicable). The resulting amount is then multiplied by the number of preceding taxable years of the trust on the last day of which an amount is deemed under section 666(a) to have been distributed (previously determined under subparagraph (1) of this paragraph). The resulting amount is the tax, under the short-cut throwback method provided in section 669(a)(1)(B), which is attributable to the amounts treated under section 668(a) as having been received by the beneficiary from a foreign trust created by a U.S. person on the last day of the preceding taxable year.

(5) Fifth, add the amount determined under subparagraph (4) of this paragraph to the beneficiary's tax for the taxable year in which the accumulation distribution was paid, credited, or required to be distributed to him, computed without inclusion of the accumulation distribution in gross income for that year. The total is the beneficiary's income tax for such year.

(b) Credit for tax paid by trust. The income taxes deemed distributed to a beneficiary in the manner described in paragraphs (c) and (d) of § 1.669(a)–2 are included in the beneficiary's gross income for purposes of the computations required by this section. To the extent provided in § 1.669(a)–2, credits for such taxes are allowable to the beneficiary. In the computations under the short-cut throwback method provided in section 669(a)(1)(B), the rules set forth in section 662(b) and § 1.662(b)–1 shall be applied in determining the character, in the hands of the beneficiary, of the amounts, including taxes includible in the distribution or deemed distributed, treated as received by a beneficiary in prior taxable years. For example, if one-fifth of such amounts represents tax-free income, then one-fifth of the amount determined under paragraph (a)(2) of this section shall be treated as tax-free income.

[T.D. 6989, 34 FR 739, Jan. 17, 1969]

§ 1.669(b)–1 Information requirements.

The election of a beneficiary who is a U.S. person to apply the limitations on tax provided in section 669(a) shall not be effective unless the beneficiary, at or before the time the election is made, supplies, in a letter addressed to the district director for the internal revenue district in which the taxpayer files his return (or the Director of International Operations where appropriate), or in a statement attached to his return, the following information with respect to the operation and accounts of the foreign trust created by a U.S. person for each of the preceding taxable years, on the last day of which an amount is deemed distributed under section 666(a):

(a) The gross income of the trust: The gross income should be separated to show the amount of each type of income received by the trust and to identify its source. For example, the beneficiary should list separately, by type (dividends, rents, capital gains, taxable interest, exempt interest, etc.) and source (name and country of payor), each item of income included in the gross income of the trust. For this purpose, the gross income of the trust includes gross income from U.S. sources which is exempt from taxation under section 894.

(b) The amount of tax withheld under section 1441 by the United States on income from sources within the United States.

(c) The amount of the tax paid to each foreign country by the trust.

(d) The expenses of the trust attributable to each type of income disclosed in paragraph (b) of this section, and the general expenses of the trust.

(e) The distributions, if any, made by the trust to the beneficiaries (including those who are not U.S. persons). These distributions should be separated into amounts of income required to be distributed currently within the meaning of section

661(a)(1), and any other amounts properly paid, credited, or required to be distributed within the meaning of section 661(a)(2).

(f) Any other information which is necessary for the computation of tax on the accumulation distribution as provided in section 669(a).

(g) If the foreign trust created by a U.S. person is less than the entire foreign trust, the information listed in paragraphs (a) through (f) of this section shall also be furnished with respect to that portion of the entire foreign trust which is not a foreign trust created by a U.S. person.

[T.D. 6989, 34 FR 740, Jan. 17, 1969]

§ 1.669(b)–2 Manner of exercising election.

(a) By whom election is to be made. Except as otherwise provided in this paragraph, a taxpayer whose tax liability is affected by the election shall make the election provided in section 669(a). In the case of a partnership, or a corporation electing under the provisions of Subchapter S, Chapter 1 of the Code, the election shall be exercised by the partnership or such corporation.

(b) Time and manner of making election. The election under section 669(a) may be made, or revoked, at any time before the expiration of the period provided in section 6501 for assessment of the tax. If an election is revoked, a new election may be made at any time before the expiration of such period. The election (or a revocation of an election) may be made in a letter addressed to the district director of internal revenue for the district in which the taxpayer files his tax return (or the Director of International Operations where appropriate) or may be made in a statement attached to the return. In any case where all the information described in § 1.669(b)–1 is not furnished at or before the time the beneficiary signifies his intention of making an election and by reason thereof an election has not been made, and subsequent thereto, but before the expiration of the period provided in section 6501 for the assessment of the tax, there is furnished the required information not previously furnished, the election will be considered as made at the time such additional information is furnished.

[T.D. 6989, 34 FR 740, Jan. 17, 1969]

Grantors and Others Treated as Substantial Owners

§ 1.671–1 Grantors and others treated as substantial owners; scope.

(a) Subpart E (section 671 and following), part I, subchapter J, Chapter 1 of the Code, contains provisions taxing income of a trust to the grantor or another person under certain circumstances even though he is not treated as a beneficiary under Subparts A through D (section 641 and following) of such Part I. Sections 671 and 672 contain general provisions relating to the entire subpart. Sections 673 through 677 define the circumstances under which income of a trust is taxed to a grantor. These circumstances are in general as follows:

(1) If the grantor has retained a reversionary interest in the trust, within specified time limits (section 673);

(2) If the grantor or a nonadverse party has certain powers over the beneficial interests under the trust (section 674);

(3) If certain administrative powers over the trust exist under which the grantor can or does benefit (section 675).

(4) If the grantor or a nonadverse party has a power to revoke the trust or return the corpus to the grantor (section 676); or

(5) If the grantor or a nonadverse party has the power to distribute income to or for the benefit of the grantor or the grantor's spouse (section 677).

Under section 678, income of a trust is taxed to a person other than the grantor to the extent that he has the sole power to vest corpus or income in himself.

(b) Sections 671 through 677 do not apply if the income of a trust is taxable to a grantor's spouse under section 71 or 682 (relating respectively to alimony and separate maintenance payments, and the income of an estate or trust in the case of divorce, etc.).

(c) Except as provided in such Subpart E, income of a trust is not included in computing the taxable income and credits of a grantor or another person solely on the grounds of his dominion and control over the trust. However, the provisions of subpart E do not apply in situations involving an assignment of future income, whether or not the assignment is to a trust. Thus, for example, a person who assigns his right to future income under an employment contract may be taxed on that income even though the assignment is to a trust over which the assignor has retained none of

the controls specified in sections 671 through 677. Similarly, a bondholder who assigns his right to interest may be taxed on interest payments even though the assignment is to an uncontrolled trust. Nor are the rules as to family partnerships affected by the provisions of subpart E, even though a partnership interest is held in trust. Likewise, these sections have no application in determining the right of a grantor to deductions for payments to a trust under a transfer and leaseback arrangement. In addition, the limitation of the last sentence of section 671 does not prevent any person from being taxed on the income of a trust when it is used to discharge his legal obligation. See § 1.662(a)–4. He is then treated as a beneficiary under subparts A through D or treated as an owner under section 677 because the income is distributed for his benefit, and not because of his dominion or control over the trust.

(d) The provisions of subpart E are not applicable with respect to a pooled income fund as defined in paragraph (5) of section 642(c) and the regulations thereunder, a charitable remainder annuity trust as defined in paragraph (1) of section 664(d) and the regulations thereunder, or a charitable remainder unitrust as defined in paragraph (2) of section 664(d) and the regulations thereunder.

(e) For the effective date of subpart E see section 683 and the regulations thereunder.

(f) For rules relating to the treatment of liabilities resulting on the sale or other disposition of encumbered trust property due to a renunciation of powers by the grantor or other owner, see § 1.1001-2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7148, 36 FR 20749, Oct. 29, 1971; T.D. 7741, 45 FR 81745, Dec. 12, 1980]

§ 1.671-2 Applicable principles.

(a) Under section 671 a grantor or another person includes in computing his taxable income and credits those items of income, deduction, and credit against tax which are attributable to or included in any portion of a trust of which he is treated as the owner. Sections 673 through 678 set forth the rules for determining when the grantor or another person is treated as the owner of any portion of a trust. The rules for determining the items of income, deduction, and credit against tax that are attributable to or included in a portion of the trust are set forth in § 1.671-3.

(b) Since the principle underlying subpart E (section 671 and following), part I, subchapter J, chapter 1 of the Code, is in general that income of a trust over which the grantor or another person has retained substantial dominion or control should be taxed to the grantor or other person rather than to the trust which receives the income or to the beneficiary to whom the income may be distributed, it is ordinarily immaterial whether the income involved constitutes income or corpus for trust accounting purposes. Accordingly, when it is stated in the regulations under subpart E that "income" is attributed to the grantor or another person, the reference, unless specifically limited, is to income determined for tax purposes and not to income for trust accounting purposes. When it is intended to emphasize that income for trust accounting purposes (determined in accordance with the provisions set forth in § 1.643(b)–1 is meant, the phrase "ordinary income" is used.

(c) An item of income, deduction, or credit included in computing the taxable income and credits of a grantor or another person under section 671 is treated as if it had been received or paid directly by the grantor or other person (whether or not an individual). For example, a charitable contribution made by a trust which is attributed to the grantor (an individual) under sections 671 through 677 will be aggregated with his other charitable contributions to determine their deductibility under the limitations of section 170(b)(1). Likewise, dividends received by a trust from sources in a particular foreign country which are attributed to a grantor or another person under subpart E will be aggregated with his other income from sources within that country to determine whether the taxpayer is subject to the limitations of section 904 with respect to credit for the tax paid to that country.

(d) Items of income, deduction, and credit not attributed to or included in any portion of a trust of which the grantor or another person is treated as the owner under subpart E are subject to the provisions of subparts A through D (section 641 and following), of such part I.

(e) The term "grantor" as used in the regulations under subpart E includes a corporation.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.671-3 Attribution or inclusion of income, deductions, and credits against tax.

(a) When a grantor or another person is treated under subpart E (section 671 and following) as the owner of any portion of a trust, there are included in computing his tax liability those items of in-

come, deduction, and credit against tax attributable to or included in that portion. For example:

(1) If a grantor or another person is treated as the owner of an entire trust (corpus as well as ordinary income), he takes into account in computing his income tax liability all items of income, deduction, and credit (including capital gains and losses) to which he would have been entitled had the trust not been in existence during the period he is treated as owner.

(2) If the portion treated as owned consists of specific trust property and its income, all items directly related to that property are attributable to the portion. Items directly related to trust property not included in the portion treated as owned by the grantor or other person are governed by the provisions of subparts A through D (section 641 and following), part I, subchapter J, chapter 1 of the Code. Items that relate both to the portion treated as owned by the grantor and to the balance of the trust must be apportioned in a manner that is reasonable in the light of all the circumstances of each case, including the terms of the governing instrument, local law, and the practice of the trustee if it is reasonable and consistent.

(3) If the portion of a trust treated as owned by a grantor or another person consists of an undivided fractional interest in the trust, or of an interest represented by a dollar amount, a pro rata share of each item of income, deduction, and credit is normally allocated to the portion. Thus, where the portion owned consists of an interest in or a right to an amount of corpus only, a fraction of each item (including items allocated to corpus, such as capital gains) is attributed to the portion. The numerator of this fraction is the amount which is subject to the control of the grantor or other person and the denominator is normally the fair market value of the trust corpus at the beginning of the taxable year in question. The share not treated as owned by the grantor or other person is governed by the provisions of subparts A through D. See the last three sentences of paragraph (c) of this section for the principles applicable if the portion treated as owned consists of an interest in part of the ordinary income in contrast to an interest in corpus alone.

(b) If a grantor or another person is treated as the owner of a portion of a trust, that portion may or may not include both ordinary income and other income allocable to corpus. For example—

(1) Only ordinary income is included by reason of an interest in or a power over ordinary income alone. Thus, if a grantor is treated under section 673 as an owner by reason of a reversionary interest in ordinary income only, items of income allocable to corpus will not be included in the portion he is treated as owning. Similarly, if a grantor or another person is treated under sections 674–678 as an owner of a portion by reason of a power over ordinary income only, items of income allocable to corpus are not included in that portion. (See paragraph (c) of this section to determine the treatment of deductions and credits when only ordinary income is included in the portion.)

(2) Only income allocable to corpus is included by reason of an interest in or a power over corpus alone, if satisfaction of the interest or an exercise of the power will not result in an interest in or the exercise of a power over ordinary income which would itself cause that income to be included. For example, if a grantor has a reversionary interest in a trust which is not such as to require that he be treated as an owner under section 673, he may nevertheless be treated as an owner under section 677(a)(2) since any income allocable to corpus is accumulated for future distribution to him, but items of income included in determining ordinary income are not included in the portion he is treated as owning. Similarly, he may have a power over corpus which is such that he is treated as an owner under section 674 or 676(a), but ordinary income will not be included in the portion he owns, if his power can only affect income received after a period of time such that he would not be treated as an owner of the income if the power were a reversionary interest. (See paragraph (c) of this section to determine the treatment of deductions and credits when only income allocated to corpus is included in the portion.)

(3) Both ordinary income and other income allocable to corpus are included by reason of an interest in or a power over both ordinary income and corpus, or an interest in or a power over corpus alone which does not come within the provisions of subparagraph (2) of this paragraph. For example, if a grantor is treated under section 673 as the owner of a portion of a trust by reason of a reversionary interest in corpus, both ordinary income and other income allocable to corpus are included in the portion. Further, a grantor includes both ordinary income and other income allocable to corpus in the portion he is treated as owning if he is treated under section 674 or 676 as an owner because of a power over corpus which can affect income received within a period such that he would be treated as an owner under section 673 if the power were a reversionary interest. Similarly, a grantor or another person in-

cludes both ordinary income and other income allocable to corpus in the portion he is treated as owning if he is treated as an owner under section 675 or 678 because of a power over corpus.

(c) If only income allocable to corpus is included in computing a grantor's tax liability, he will take into account in that computation only those items of income, deductions, and credit which would not be included under subparts A through D in the computation of the tax liability of the current income beneficiaries if all distributable net income had actually been distributed to those beneficiaries. On the other hand, if the grantor or another person is treated as an owner solely because of his interest in or power over ordinary income alone, he will take into account in computing his tax liability those items which would be included in computing the tax liability of a current income beneficiary, including expenses allocable to corpus which enter into the computation of distributable net income. If the grantor or other person is treated as an owner because of his power over or right to a dollar amount of ordinary income, he will first take into account a portion of those items of income and expense entering into the computation of ordinary income under the trust instrument or local law sufficient to produce income of the dollar amount required. There will then be attributable to him a pro rata portion of other items entering into the computation of distributable net income under subparts A through D, such as expenses allocable to corpus, and a pro rata portion of credits of the trust. For examples of computations under this paragraph, see paragraph (g) of § 1.677(a)–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6989, 34 FR 742, Jan. 17, 1969]

§ 1.671–4 Method of reporting.

(a) **Portion of trust income taxed to grantor.** Except as provided in paragraphs (b)(1) and (2) of this section, items of income, deduction, and credit attributable to any portion of a trust which, under the provisions of subpart E (section 671 and following), part I, subchapter J, chapter 1 of the Code, are treated as owned by the grantor or another person should not be reported by the trust on Form 1041, but should be shown on a separate statement to be attached to that form.

(b) **Trust income taxed entirely to grantor.** (1) In the case of a trust when

(i) The same individual is both grantor and trustee (or co-trustee), and

(ii) That individual is treated as owner for the taxable year of all of the assets of the trust by the application of section 676,

A Form 1041 should not be filed. Instead, all items of income, deduction, and credit from the trust should be reported on the individual's Form 1040 in accordance with its instructions. For provisions dealing with taxpayer identifying numbers, see § 301.6109–1 (Regulations on Procedure and Administration).

(2) In the case of a trust when

(i) A husband and wife are the sole grantors, and

(ii) One spouse is trustee or co-trustee with a third party or both spouses are trustees or co-trustees with a third party, and

(iii) One or both spouses are treated as owners of all of the assets of the trust for the taxable year by the application of section 676, and

(iv) The husband and wife for the taxable year make a single return jointly of income taxes under section 6013,

A Form 1041 should not be filed. Instead, all items of income, deduction, and credit from the trust should be reported on the spouses' Form 1040 in accordance with its instructions.

(3) The grantor of a trust described in § 1.671–(b)(1) or (2) who filed a Form 1041 on or before November 24, 1981 may continue to report income, deductions, and credits of the trust pursuant to § 1.671–4(a). Alternatively, the grantor of such a trust may file a final Form 1041 for the trust's current taxable year pursuant to § 1.671–4(a). In such a case, the grantor must write across the front of the Form 1041 a statement in substance saying "Pursuant to § 1.671–4(b), this is the final Form 1041 for this grantor trust." For the next taxable year, the grantor must furnish payers of income with his or her social security number, pursuant to § 301.6109–1(a)(2), and must follow the rule of § 1.671–4(b)(1) or (2), as the case may be.

(4) This paragraph (b) of this section shall not apply to a trust if the situs of the trust or any of the assets of the trust are not in the United States.

(c) **Effective date.** Paragraphs (b)(1) and (2) of this section apply to trusts created in tax years beginning on or after January 1, 1981. Paragraph (b)(3) of this section is effective immediately.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; T.D. 7796, 46 FR 57481, Nov. 24, 1981]

§ 1.672(a)–1 Definition of adverse party.

(a) Under section 672(a) an adverse party is defined as any person having a substantial beneficial interest in a trust which would be adversely affected by the exercise or nonexercise of a power which he possesses respecting the trust. A trustee is not an adverse party merely because of his interest as trustee. A person having a general power of appointment over the trust property is deemed to have a beneficial interest in the trust. An interest is a substantial interest if its value in relation to the total value of the property subject to the power is not insignificant.

(b) Ordinarily, a beneficiary will be an adverse party, but if his right to share in the income or corpus of a trust is limited to only a part, he may be an adverse party only as to that part. Thus, if A, B, C, and D are equal income beneficiaries of a trust and the grantor can revoke with A's consent, the grantor is treated as the owner of a portion which represents three-fourths of the trust; and items of income, deduction, and credit attributable to that portion are included in determining the tax of the grantor.

(c) The interest of an ordinary income beneficiary of a trust may or may not be adverse with respect to the exercise of a power over corpus. Thus, if the income of a trust is payable to A for life, with a power (which is not a general power of appointment) in A to appoint the corpus to the grantor either during his life or by will, A's interest is adverse to the return of the corpus to the grantor during A's life, but is not adverse to a return of the corpus after A's death. In other words, A's interest is adverse as to ordinary income but is not adverse as to income allocable to corpus. Therefore, assuming no other relevant facts exist, the grantor would not be taxable on the ordinary income of the trust under section 674, 676, or 677, but would be taxable under section 677 on income allocable to corpus (such as capital gains), since it may in the discretion of a nonadverse party be accumulated for future distribution to the grantor. Similarly, the interest of a contingent income beneficiary is adverse to a return of corpus to the grantor before the termination of his interest but not to a return of corpus after the termination of his interest.

(d) The interest of a remainderman is adverse to the exercise of any power over the corpus of a trust, but not to the exercise of a power over any income interest preceding his remainder. For example, if the grantor creates a trust which provides for income to be distributed to A for 10 years and then for the corpus to go to X if he is then living, a power exercisable by X to revest corpus in the grantor is a power exercisable by an adverse party; however, a power exercisable by X to distribute part or all of the ordinary income to the grantor may be a power exercisable by a nonadverse party (which would cause the ordinary income to be taxed to the grantor).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.672(b)–1 Nonadverse party.

A "nonadverse party" is any person who is not an adverse party.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.672(c)–1 Related or subordinate party.

Section 672(c) defines the term "related or subordinate party". The term, as used in sections 674(c) and 675(3), means any nonadverse party who is the grantor's spouse if living with the grantor; the grantor's father, mother, issue, brother or sister; an employee of the grantor; a corporation or any employee of a corporation in which the stock holdings of the grantor and the trust are significant from the viewpoint of voting control; or a subordinate employee of a corporation in which the grantor is an executive. For purposes of sections 674(c) and 675(3), these persons are presumed to be subservient to the grantor in respect of the exercise or nonexercise of the powers conferred on them unless shown not to be subservient by a preponderance of the evidence.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.672(d)–1 Power subject to condition precedent.

Section 672(d) provides that a person is considered to have a power described in subpart E (section 671 and following), part I, subchapter J, chapter 1 of the Code, even though the exercise of the power is subject to a precedent giving of notice or takes effect only after the expiration of a certain period of time. However, although a person may be considered to have such a power, the grantor will nevertheless not be treated as an owner by reason of the power if its exercise can only affect beneficial enjoyment of income received after the expiration of a period of time such that, if the power were a reversionary interest, he would not be treated as an owner under section 673. See sections 674(b)(2), 676(b), and the last sentence of section 677(a). Thus, for example, if a grantor creates a trust for the benefit of his son and retains a power to revoke which takes effect only after the

expiration of 2 years from the date of exercise, he is treated as an owner from the inception of the trust. However, if the grantor retains a power to revoke, exercisable at any time, which can only affect the beneficial enjoyment of the ordinary income of a trust received after the expiration of 10 years commencing with the date of the transfer in trust, or after the death of the income beneficiary, the power does not cause him to be treated as an owner with respect to ordinary income during the first 10 years of the trust or during the income beneficiary's life, as the case may be. See section 676(b).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.673(a)–1 Reversionary interests; income payable to beneficiaries other than certain charitable organizations; general rule.

(a) Under section 673(a), a grantor, in general, is treated as the owner of any portion of a trust in which he has a reversionary interest in either the corpus or income if, as of the inception of that portion of the trust, the grantor's interest will or may reasonably be expected to take effect in possession or enjoyment within 10 years commencing with the date of transfer of that portion of the trust. However, the following types of reversionary interests are excepted from the general rule of the preceding sentence:

(1) A reversionary interest after the death of the income beneficiary of a trust (see paragraph (b) of this section); and

(2) Except in the case of transfers in trust made after April 22, 1969, a reversionary interest in a charitable trust meeting the requirements of section 673(b) (see § 1.673(b)–1).

Even though the duration of the trust may be such that the grantor is not treated as its owner under section 673, and therefore is not taxed on the ordinary income, he may nevertheless be treated as an owner under section 677(a)(2) if he has a reversionary interest in the corpus. In the latter case, items of income, deduction, and credit allocable to corpus, such as capital gains and losses, will be included in the portion he owns. See § 1.671–3 and the regulations under section 677. See § 1.673(d)–1 with respect to a postponement of the date specified for reacquisition of a reversionary interest.

(b) Section 673(c) provides that a grantor is not treated as the owner of any portion of a trust by reason of section 673 if his reversionary interest in the portion is not to take effect in possession or enjoyment until the death of the person or persons to whom the income of the portion is regardless of the life expectancies of the income beneficiaries. If his reversionary interest is to take effect on or after the death of an income beneficiary or upon the expiration of a specific term of years, whichever is earlier, the grantor is treated as the owner if the specific term of years is less than 10 years (but not if the term is 10 years or longer).

(c) Where the grantor's reversionary interest in a portion of a trust is to take effect in possession or enjoyment by reason of some event other than the expiration of a specific term of years or the death of the income beneficiary, the grantor is treated as the owner of the portion if the event may reasonably be expected to occur within 10 years from the date of transfer of that portion, but he is not treated as the owner under section 673 if the event may not reasonably be expected to occur within 10 years from that date. For example, if the reversionary interest in any portion of a trust is to take effect on or after the death of the grantor (or any person other than the person to whom the income is payable) the grantor is treated under section 673 as the owner of the portion if the life expectancy of the grantor (or other person) is less than 10 years on the date of transfer of the portion, but not if the life expectancy is 10 years or longer. If the reversionary interest in any portion is to take effect on or after the death of the grantor (or any person other than the person to whom the income is payable) or upon the expiration of a specific term of years, whichever is earlier, the grantor is treated as the owner of the portion if on the date of transfer of the portion either the life expectancy of the grantor (or other person) or the specific term is less than 10 years; however, if both the life expectancy and the specific term are 10 years or longer the grantor is not treated as the owner of the portion under section 673. Similarly, if the grantor has a reversionary interest in any portion which will take effect at the death of the income beneficiary or the grantor, whichever is earlier, the grantor is not treated as an owner of the portion unless his life expectancy is less than 10 years.

(d) It is immaterial that a reversionary interest in corpus or income is subject to a contingency if the reversionary interest may, taking the contingency into consideration, reasonably be expected to take effect in possession or enjoyment within 10 years. For example, the grantor is taxable where the trust income is to be paid to the grantor's son for 3 years, and the corpus is then to be returned

to the grantor if he survives that period, or to be paid to the grantor's son if he is already deceased.

(e) See section 671 and §§ 1.671-2 and 1.671-3 for rules for treatment of items of income, deduction, and credit when a person is treated as the owner of all or only a portion of a trust.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7357, 40 FR 23742, June 2, 1975]

§ 1.673(b)-1 Income payable to charitable beneficiaries (before amendment by Tax Reform Act of 1969).

(a) Pursuant to section 673(b) a grantor is not treated as an owner of any portion of a trust under section 673, even though he has a reversionary interest which will take effect within 10 years, to the extent that, under the terms of the trust, the income of the portion is irrevocably payable for a period of at least 2 years (commencing with the date of the transfer) to a designated beneficiary of the type described in section 170(b)(1)(A).

(b) Income must be irrevocably payable to a designated beneficiary for at least 2 years commencing with the date of the transfer before the benefit of section 673(b) will apply. Thus, section 673(b) will not apply if income of a trust is irrevocably payable to University A for 1 year and then to University B for the next year; or if income of a trust may be allocated among two or more charitable beneficiaries in the discretion of the trustee or any other person. On the other hand, section 673(b) will apply if half the income of a trust is irrevocably payable to University A and the other half is irrevocably payable to University B for two years.

(c) Section 673(b) applies to the period of 2 years or longer during which income is paid to a designated beneficiary of the type described in section 170(b)(1)(A)(i), (ii), or (iii), even though the trust term is to extend beyond that period. However, the other provisions of section 673 apply to the part of the trust term, if any, that extends beyond that period. This paragraph may be illustrated by the following example:

Example. G transfers property in trust with the ordinary income payable to University C (which qualifies under section 170(b)(1)(A)(ii)) for 3 years, and then to his son, B, for 5 years. At the expiration of the term the trust reverts to G. G is not taxed under section 673 of the trust income payable to University C for the first 3 years because of the application of section 673(b). However, he is taxed on income for the next 5 years because he has a reversionary interest which will take effect within 10 years commencing with the date of the transfer. On the other hand, if the income were payable to University C for 3 years and then to R for 7 years so that the trust corpus would not be returned to G within 10 years, G would not be taxable under section 673 on income payable to University C and to B during any part of the term.

(d) This section does not apply to transfers in trust made after April 22, 1969.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6605, 27 FR 8097, Aug. 15, 1962; T.D. 7357, 40 FR 23743, June 2, 1975]

§ 1.673(c)-1 Reversionary interest after income beneficiary's death.

The subject matter of section 673(c) is covered in paragraph (b) of § 1.673(a)-1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.673(d)-1 Postponement of date specified for reacquisition.

Any postponement of the date specified for the reacquisition of possession or enjoyment of any reversionary interest is considered a new transfer in trust commencing with the date on which the postponement is effected and terminating with the date prescribed by the postponement. However, the grantor will not be treated as the owner of any portion of a trust for any taxable year by reason of the foregoing sentence if he would not be so treated in the absence of any postponement. The rules contained in this section may be illustrated by the following example:

Example. G places property in trust for the benefit of his son B. Upon the expiration of 12 years or the earlier death of B the property is to be paid over to G or his estate. After the expiration of 9 years G extends the term of the trust for an additional 2 years. G is considered to have made a new transfer in trust for a term of 5 years (the remaining 3 years of the original transfer plus the 2-year extension). However, he is not treated as the owner of the trust under section 673 for the first 3 years of the new term because he would not be so treated if the term of the trust had not been extended. G is treated as the owner of the trust, however, for the remaining 2 years.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.674(a)-1 Power to control beneficial enjoyment; scope of section 674.

(a) Under section 674, the grantor is treated as the owner of a portion of trust if the grantor or a nonadverse party has a power, beyond specified limits, to dispose of the beneficial enjoyment of the income or corpus, whether the power is a fiduciary power, a power of appointment, or any other power. Section 674(a) states in general terms that the grantor is treated as the owner in every case in which he or a nonadverse party can affect the beneficial enjoyment of a portion of a trust, the limitations being set forth as exceptions in subsections (b), (c), and (d) of section 674. These exceptions are discussed in detail in §§ 1.674(b)-1

through 1.674(d)–1. Certain limitations applicable to section 674(b), (c), and (d) are set forth in § 1.674(d)–2. Section 674(b) describes powers which are excepted regardless of who holds them. Section 674(c) describes additional powers of trustees which are excepted if at least half the trustees are independent, and if the grantor is not a trustee. Section 674(d) describes a further power which is excepted if it is held by trustees other than the grantor or his spouse (if living with the grantor).

(b) In general terms the grantor is treated as the owner of a portion of a trust if he or a nonadverse party or both has a power to dispose of the beneficial enjoyment of the corpus or income unless the power is one of the following:

(1) **Miscellaneous powers over either ordinary income or corpus.** (i) A power that can only affect the beneficial enjoyment of income (including capital gains) received after a period of time such that the grantor would not be treated as an owner under section 673 if the power were a reversionary interest (section 674(b)(2));

(ii) A testamentary power held by anyone (other than a testamentary power held by the grantor over accumulated income) (section 674(b)(3));

(iii) A power to choose between charitable beneficiaries or to affect the manner of their enjoyment of a beneficial interest (section 674(b)(4));

(iv) A power to allocate receipts and disbursements between income and corpus (section 674(b)(8)).

(2) **Powers of distribution primarily affecting only one beneficiary.** (i) A power to distribute corpus to or for a current income beneficiary, if the distribution must be charged against the share of corpus from which the beneficiary may receive income (section 674(b)(5)(B));

(ii) A power to distribute income to or for a current income beneficiary or to accumulate it either (a) if accumulated income must either be payable to the beneficiary from whom it was withheld or as described in paragraph (b)(6) of § 1.674(b)–1 (section 674(b)(6)); (b) if the power is to apply income to the support of a dependent of the grantor, and the income is not so applied (section 674(b)(1)); or (c) if the beneficiary is under 21 or under a legal disability and accumulated income is added to corpus (section 674(b)(7)).

(3) **Powers of distribution affecting more than one beneficiary.** A power to distribute corpus or income to or among one or more beneficiaries or to accumulate income, either (i) if the power is held by a trustee or trustees other than the grantor, at least half of whom are independent (section 674(c)), or (ii) if the power is limited by a reasonably definite standard in the trust instrument, and in the case of a power over income, if in addition the power is held by a trustee or trustees other than the grantor and the grantor's spouse living with the grantor (section 674(b)(5)(A) and (d)). (These powers include both powers to "sprinkle" income or corpus among current beneficiaries, and powers to shift income or corpus between current beneficiaries and remaindermen; however, certain of the powers described under subparagraph (2) of this paragraph can have the latter effect incidentally.)

(c) See section 671 and §§ 1.671–2 and 1.671–3 for rules for the treatment of income, deductions, and credits when a person is treated as the owner of all or only a portion of a trust.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.674(b)–1 Excepted powers exercisable by any person.

(a) Paragraph (b)(1) through (8) of this section sets forth a number of powers which may be exercisable by any person without causing the grantor to be treated as an owner of a trust under section 674(a). Further, with the exception of powers described in paragraph (b)(1) of this section, it is immaterial whether these powers are held in the capacity of trustee. It makes no difference under section 674(b) that the person holding the power is the grantor, or a related or subordinate party (with the qualifications noted in paragraph (b)(1) and (3) of this section).

(b) The exceptions referred to in paragraph (a) of this section are as follows (see, however, the limitations set forth in § 1.674(d)–2):

(1) **Powers to apply income to support of a dependent.** Section 674(b)(1) provides, in effect, that regardless of the general rule of section 674(a), the income of a trust will not be considered as taxable to the grantor merely because in the discretion of any person (other than a grantor who is not acting as a trustee or cotrustee) it may be used for the support of a beneficiary whom the grantor is legally obligated to support, except to the extent that it is in fact used for that purpose. See section 677(b) and the regulations thereunder.

(2) **Powers affecting beneficial enjoyment only after a period.** Section 674(b)(2) provides an exception to section 674(a) if the exercise of a power can only affect the beneficial enjoyment of the

income of a trust received after a period of time which is such that a grantor would not be treated as an owner under section 673 if the power were a reversionary interest. See §§ 1.673(a)–1 and 1.673(b)–1. For example, if a trust created on January 1, 1955, provides for the payment of income to the grantor's son, and the grantor reserves the power to substitute other beneficiaries of income or corpus in lieu of his son on or after January 1, 1965, the grantor is not treated under section 674 as the owner of the trust with respect to ordinary income received before January 1, 1965. But the grantor will be treated as an owner on and after that date unless the power is relinquished. If the beginning of the period during which the grantor may substitute beneficiaries is postponed, the rules set forth in § 1.673(d)–1 are applicable in order to determine whether the grantor should be treated as an owner during the period following the postponement.

(3) Testamentary powers. Under paragraph (3) of section 674(b) a power in any person to control beneficial enjoyment exercisable only by will does not cause a grantor to be treated as an owner under section 674(a). However, this exception does not apply to income accumulated for testamentary disposition by the grantor or to income which may be accumulated for such distribution in the discretion of the grantor or a nonadverse party, or both, without the approval or consent of any adverse party. For example, if a trust instrument provides that the income is to be accumulated during the grantor's life and that the grantor may appoint the accumulated income by will, the grantor is treated as the owner of the trust. Moreover, if a trust instrument provides that the income is payable to another person for his life, but the grantor has a testamentary power of appointment over the remainder, and under the trust instrument and local law capital gains are added to corpus, the grantor is treated as the owner of a portion of the trust and capital gains and losses are included in that portion. (See § 1.671–3.)

(4) Powers to determine beneficial enjoyment of charitable beneficiaries. Under paragraph (4) of section 674(b) a power in any person to determine the beneficial enjoyment of corpus or income which is irrevocably payable (currently or in the future) for purposes specified in section 170(c) (relating to definition of charitable contributions) will not cause the grantor to be treated as an owner under section 674(a). For example, if a grantor creates a trust, the income of which is irrevocably payable solely to educational or other organizations that qualify under section 170(c), he is not treated as an owner under section 674 although he retains the power to allocate the income among such organizations.

(5) Powers to distribute corpus. Paragraph (5) of section 674(b) provides an exception to section 674(a) for powers to distribute corpus, subject to certain limitations, as follows:

(i) If the power is limited by a reasonably definite standard which is set forth in the trust instrument, it may extend to corpus distributions to any beneficiary or beneficiaries or class of beneficiaries (whether income beneficiaries or remaindermen) without causing the grantor to be treated as an owner under section 674. See section 674(b)(5)(A). It is not required that the standard consist of the needs and circumstances of the beneficiary. A clearly measurable standard under which the holder of a power is legally accountable is deemed a reasonably definite standard for this purpose. For instance, a power to distribute corpus for the education, support, maintenance, or health of the beneficiary; for his reasonable support and comfort; or to enable him to maintain his accustomed standard of living; or to meet an emergency, would be limited by a reasonably definite standard. However, a power to distribute corpus for the pleasure, desire, or happiness of a beneficiary is not limited by a reasonably definite standard. The entire context of a provision of a trust instrument granting a power must be considered in determining whether the power is limited by a reasonably definite standard. For example, if a trust instrument provides that the determination of the trustee shall be conclusive with respect to the exercise or nonexercise of a power, the power is not limited by a reasonably definite standard. However, the fact that the governing instrument is phrased in discretionary terms is not in itself an indication that no reasonably definite standard exists.

(ii) If the power is not limited by a reasonably definite standard set forth in the trust instrument, the exception applies only if distributions of corpus may be made solely in favor of current income beneficiaries, and any corpus distribution to the current income beneficiary must be chargeable against the proportionate part of corpus held in trust for payment of income to that beneficiary as if it constituted a separate trust (whether or not physically segregated). See section 674(b)(5)(B).

(iii) This subparagraph may be illustrated by the following examples:

Example (1). A trust instrument provides for payment of the income to the grantor's two brothers for life, and for payment of the corpus to the grantor's nephews in equal shares.

The grantor reserves the power to distribute corpus to pay medical expenses that may be incurred by his brothers or nephews. The grantor is not treated as an owner by reason of this power because section 674(b)(5)(A) excepts a power, exercisable by any person, to invade corpus for any beneficiary, including a remainderman, if the power is limited by a reasonably definite standard which is set forth in the trust instrument. However, if the power were also exercisable in favor of a person (for example, a sister) who was not otherwise a beneficiary of the trust, section 674(b)(5)(A) would not be applicable.

Example (2). The facts are the same as in example (1) except that the grantor reserves the power to distribute any part of the corpus to his brothers or to his nephews for their happiness. The grantor is treated as the owner of the trust. Paragraph (5)(A) of section 674(b) is inapplicable because the power is not limited by a reasonably definite standard. Paragraph (5)(B) is inapplicable because the power to distribute corpus permits a distribution of corpus to persons other than current income beneficiaries.

Example (3). A trust instrument provides for payment of the income to the grantor's two adult sons in equal shares for 10 years, after which the corpus is to be distributed to his grandchildren in equal shares. The grantor reserves the power to pay over to each son up to one-half of the corpus during the 10-year period, but any such payment shall proportionately reduce subsequent income and corpus payments made to the son receiving the corpus. Thus, if one-half of the corpus is paid to one son, all the income from the remaining half is thereafter payable to the other son. The grantor is not treated as an owner under section 674(a) by reason of this power because it qualifies under the exception of section 674(b)(5)(B).

(6) Powers to withhold income temporarily. (i) Section 674(b)(6) excepts a power which, in general, enables the holder merely to effect a postponement in the time when the ordinary income is enjoyed by a current income beneficiary. Specifically, there is excepted a power to distribute or apply ordinary income to or for a current income beneficiary or to accumulate the income, if the accumulated income must ultimately be payable either:

(a) To the beneficiary from whom it was withheld, his estate, or his appointees (or persons designated by name, as a class, or otherwise as alternate takers in default of appointment) under a power of appointment held by the beneficiary which does not exclude from the class of possible appointees any person other than the beneficiary, his estate, his creditors, or the creditors of his estate (section 674(b)(6)(A));

(b) To the beneficiary from whom it was withheld, or if he does not survive a date of distribution which could reasonably be expected to occur within his lifetime, to his appointees (or alternate takers in default of appointment) under any power of appointment, general or special, or if he has no power of appointment to one or more designated alternate takers (other than the grantor of the grantor's estate) whose shares have been irrevocably specified in the trust instrument (section 674(b)(6)(A) and the flush material following); or

(c) On termination of the trust, or in conjunction with a distribution of corpus which is augmented by the accumulated income, to the current income beneficiaries in shares which have been irrevocably specified in the trust instrument, or if any beneficiary does not survive a date of distribution which would reasonably be expected to occur within his lifetime, to his appointees (or alternate takers in default of appointment) under any power of appointment, general or special, or if he has no power of appointment to one or more designated alternate takers (other than the grantor or the grantor's estate) whose shares have been irrevocably specified in the trust instrument (section 674(b)(6)(B) and the flush material following).

(In the application of (a) of this subdivision, if the accumulated income of a trust is ultimately payable to the estate of the current income beneficiary or is ultimately payable to his appointees or takers in default of appointment, under a power of the type described in (a) of this subdivision, it need not be payable to the beneficiary from whom it was withheld under any circumstances. Furthermore, if a trust otherwise qualifies for the exception in (a) of this subdivision the trust income will not be considered to be taxable to the grantor under section 677 by reason of the existence of the power of appointment referred to in (a) of this subdivision.) In general, the exception in section 674(b)(6) is not applicable if the power is in substance one to shift ordinary income from one beneficiary to another. Thus, a power will not qualify for this exception if ordinary income may be distributed to beneficiary A, or may be added to corpus which is ultimately payable to beneficiary B, a remainderman who is not a current income beneficiary. However, section 674(b)(6)(B), and (c) of this subdivision, permit a limited power to shift ordinary income among current income beneficiaries, as illustrated in example (1) of this subparagraph.

(ii) The application of section 674(b)(6) may be illustrated by the following examples:

Example (1). A trust instrument provides that the income shall be paid in equal shares to the grantor's two adult daughters but the grantor reserves the power to withhold from either beneficiary any part of that beneficiary's share of income and to add it to the corpus of the trust until the younger daughter reaches the age of 30 years. When the younger daughter reaches the age of 30, the trust is to terminate and the corpus is to be divided equally between the two daughters or their estates. Although exercise of this power may permit the shifting of accumulated income from one beneficiary to the other (since the corpus with the accumulations is to be divided

equally) the power is excepted under section 674(b)(6)(B) and subdivision (i)(c) of this subparagraph.

Example (2). The facts are the same as in example (1), except that the grantor of the trust reserves the power to distribute accumulated income to the beneficiaries in such shares as he chooses. The combined powers are not excepted by section 674(b)(6)(B) since income accumulated pursuant to the first power is neither required to be payable only in conjunction with a corpus distribution nor required to be payable in shares specified in the trust instrument. See, however, section 674(c) and § 1.674(c)–1 for the effect of such a power if it is exercisable only by independent trustees.

Example (3). A trust provides for payment of income to the grantor's adult son with the grantor retaining the power to accumulate the income until the grantor's death, when all accumulations are to be paid to the son. If the son predeceases the grantor, all accumulations are, at the death of the grantor, to be paid to his daughter, or if she is not living, to alternate takers (which do not include the grantor's estate) in specified shares. The power is excepted under section 674(b)(6)(A) since the date of distribution (the date of the grantor's death) may, in the usual case, reasonably be expected to occur during the beneficiary's (the son's) lifetime. It is not necessary that the accumulations be payable to the son's estate or his appointees if he should predecease the grantor for this exception to apply.

(7) Power to withhold income during disability. Section 674(b)(7) provides an exception for a power which, in general, will permit ordinary income to be withheld during the legal disability of an income beneficiary or while he is under 21. Specifically, there is excepted a power, exercisable only during the existence of a legal disability of any current income beneficiary or the period during which any income beneficiary is under the age of 21 years, to distribute or apply ordinary income to or for that beneficiary or to accumulate the income and add it to corpus. To qualify under this exception it is not necessary that the income ultimately be payable to the income beneficiary from whom it was withheld, his estate, or his appointees; that is, the accumulated income may be added to corpus and ultimately distributed to others. For example, the grantor is not treated as an owner under section 674 if the income of a trust is payable to his son for life, remainder to his grandchildren, although he reserves the power to accumulate income and add it to corpus while his son is under 21.

(8) Powers to allocate between corpus and income. Paragraph (8) of section 674(b) provides that a power to allocate receipts and disbursements between corpus and income, even though expressed in broad language, will not cause the grantor to be treated as an owner under the general rule of section 674(a).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.674(c)–1 Excepted powers exercisable only by independent trustees.

Section 674(c) provides an exception to the general rule of section 674(a) for certain powers that are exercisable by independent trustees. This exception is in addition to those provided for under section 674(b) which may be held by any person including an independent trustee. The powers to which section 674(c) apply are powers (a) to distribute, apportion, or accumulate income to or for a beneficiary or beneficiaries, or to, for, or within a class of beneficiaries, or (b) to pay out corpus to or for a beneficiary or beneficiaries or to or for a class of beneficiaries (whether or not income beneficiaries). In order for such a power to fall within the exception of section 674(c) it must be exercisable solely (without the approval or consent of any other person) by a trustee or trustees none of whom is the grantor and no more than half of whom are related or subordinate parties who are subservient to the wishes of the grantor. (See section 672(c) for definitions of these terms.) An example of the application of section 674(c) is a trust whose income is payable to the grantor's three adult sons with power in an independent trustee to allocate without restriction the amounts of income to be paid to each son each year. Such a power does not cause the grantor to be treated as the owner of the trust. See however, the limitations set forth in § 1.674(d)–2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.674(d)–1 Excepted powers exercisable by any trustee other than grantor or spouse.

Section 674(d) provides an additional exception to the general rule of section 674(a) for a power to distribute, apportion, or accumulate income to or for a beneficiary or beneficiaries or to, for, or within a class of beneficiaries, whether or not the conditions of section 674(b)(6) or (7) are satisfied, if the power is solely exercisable (without the approval or consent of any other person) by a trustee or trustees none of whom is the grantor or spouse living with the grantor, and if the power is limited by a reasonably definite external standard set forth in the trust instrument (see paragraph (b)(5) of § 1.674(b)–1 with respect to what constitutes a reasonably definite standard). See, however, the limitations set forth in § 1.674(d)–2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.674(d)–2 Limitations on exceptions in section 674(b), (c), and (d).

(a) Power to remove trustee. A power in the grantor to remove, substitute, or add trustees (oth-

er than a power exercisable only upon limited conditions which do not exist during the taxable year, such as the death or resignation of, or breach of fiduciary duty by, an existing trustee) may prevent a trust from qualifying under section 674(c) or (d). For example, if a grantor has an unrestricted power to remove an independent trustee and substitute any person including himself as trustee, the trust will not qualify under section 674(c) or (d). On the other hand if the grantor's power to remove, substitute, or add trustees is limited so that its exercise could not alter the trust in a manner that would disqualify it under section 674(c) or (d), as the case may be, the power itself does not disqualify the trust. Thus, for example, a power in the grantor to remove or discharge an independent trustee on the condition that he substitute another independent trustee will not prevent a trust from qualifying under section 674(c).

(b) Power to add beneficiaries. The exceptions described in section 674(b)(5), (6), and (7), (c), and (d), are not applicable if any person has a power to add to the beneficiary or beneficiaries or to a class of beneficiaries designated to receive the income or corpus, except where the action is to provide for after-born or after-adopted children. This limitation does not apply to a power held by a beneficiary to substitute other beneficiaries to succeed to his interest in the trust (so that he would be an adverse party as to the exercise or nonexercise of that power). For example, the limitation does not apply to a power in a beneficiary of a nonspendthrift trust to assign his interest. Nor does the limitation apply to a power held by any person which would qualify as an exception under section 674(b)(3) (relating to testamentary powers).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.675–1 Administrative powers.

(a) General rule. Section 675 provides in effect that the grantor is treated as the owner of any portion of a trust if under the terms of the trust instrument or circumstances attendant on its operation administrative control is exercisable primarily for the benefit of the grantor rather than the beneficiaries of the trust. If a grantor retains a power to amend the administrative provisions of a trust instrument which is broad enough to permit an amendment causing the grantor to be treated as the owner of a portion of the trust under section 675, he will be treated as the owner of the portion from its inception. See section 671 and §§ 1.671–2 and 1.671–3 for rules for treatment of items of income, deduction, and credit when a person is treated as the owner of all or only a portion of a trust.

(b) Prohibited controls. The circumstances which cause administrative controls to be considered exercisable primarily for the benefit of the grantor are specifically described in paragraphs (1) through (4) of section 675 as follows:

(1) The existence of a power, exercisable by the grantor or a nonadverse party, or both, without the approval or consent of any adverse party, which enables the grantor or any other person to purchase, exchange, or otherwise deal with or dispose of the corpus or the income of the trust for less than adequate consideration in money or money's worth. Whether the existence of the power itself will constitute the holder an adverse party will depend on the particular circumstances.

(2) The existence of a power exercisable by the grantor or a nonadverse party, or both, which enables the grantor to borrow the corpus or income of the trust, directly or indirectly, without adequate interest or adequate security. However, this paragraph does not apply where a trustee (other than the grantor acting alone) is authorized under a general lending power to make loans to any person without regard to interest or security. A general lending power in the grantor, acting alone as trustee, under which he has power to determine interest rates and the adequacy of security is not in itself an indication that the grantor has power to borrow the corpus or income without adequate interest or security.

(3) The circumstance that the grantor has directly or indirectly borrowed the corpus or income of the trust and has not completely repaid the loan, including any interest, before the beginning of the taxable year. The preceding sentence does not apply to a loan which provides for adequate interest and adequate security, if it is made by a trustee other than the grantor or a related or subordinate trustee subservient to the grantor. See section 672(c) for definition of "a related or subordinate party".

(4) The existence of certain powers of administration exercisable in a nonfiduciary capacity by any nonadverse party without the approval or consent of any person in a fiduciary capacity. The term "powers of administration" means one or more of the following powers:

(i) A power to vote or direct the voting of stock or other securities of a corporation in which the holdings of the grantor and the trust are significant from the viewpoint of voting control;

(ii) A power to control the investment of the trust funds either by directing investments or reinvestments, or by vetoing proposed investments or reinvestments, to the extent that the trust funds consist of stocks or securities of corporations in which the holdings of the grantor and the trust are significant from the viewpoint of voting control; or

(iii) A power to reacquire the trust corpus by substituting other property of an equivalent value.

If a power is exercisable by a person as trustee, it is presumed that the power is exercisable in a fiduciary capacity primarily in the interests of the beneficiaries. This presumption may be rebutted only by clear and convincing proof that the power is not exercisable primarily in the interests of the beneficiaries. If a power is not exercisable by a person as trustee, the determination of whether the power is exercisable in a fiduciary or a nonfiduciary capacity depends on all the terms of the trust and the circumstances surrounding its creation and administration.

(c) Authority of trustee. The mere fact that a power exercisable by a trustee is described in broad language does not indicate that the trustee is authorized to purchase, exchange, or otherwise deal with or dispose of the trust property or income for less than an adequate and full consideration in money or money's worth, or is authorized to lend the trust property or income to the grantor without adequate interest. On the other hand, such authority may be indicated by the actual administration of the trust.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.676(a)-1 Power to revest title to portion of trust property in grantor; general rule.

If a power to revest in the grantor title to any portion of a trust is exercisable by the grantor or a nonadverse party, or both, without the approval or consent of an adverse party, the grantor is treated as the owner of that portion, except as provided in section 676(b) (relating to powers affecting beneficial enjoyment of income only after the expiration of certain periods of time). If the title to a portion of the trust will revest in the grantor upon the exercise of a power by the grantor or a nonadverse party, or both, the grantor is treated as the owner of that portion regardless of whether the power is a power to revoke, to terminate, to alter or amend, or to appoint. See section 671 and §§ 1.671-2 and 1.671-3 for rules for treatment of items of income, deduction, and credit when a person is treated as the owner of all or only a portion of a trust.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.676(b)-1 Powers exercisable only after a period of time.

Section 676(b) provides an exception to the general rule of section 676(a) when the exercise of a power can only affect the beneficial enjoyment of the income of a trust received after the expiration of a period of time which is such that a grantor would not be treated as the owner of that portion, except as power were a reversionary interest. See §§ 1.673(a)-1 and 1.673(b)-1. Thus, for example, a grantor is excepted from the general rule of section 676(a) with respect to ordinary income if exercise of a power to revest corpus in him cannot affect the beneficial enjoyment of the income received within 10 years after the date of transfer of that portion of the trust. It is immaterial for this purpose that the power is vested at the time of the transfer. However, the grantor is subject to the general rule of section 676(a) after the expiration of the period unless the power is relinquished. Thus, in the above example, the grantor may be treated as the owner and be taxed on all income in the eleventh and succeeding years if exercise of the power can affect beneficial enjoyment of income received in those years. If the beginning of the period during which the grantor may revest is postponed, the rules set forth in § 1.673(d)-1 are applicable to determine whether the grantor should be treated as an owner during the period following the postponement.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.677(a)-1 Income for benefit of grantor; general rule.

(a)(1) Scope. Section 677 deals with the treatment of the grantor of a trust as the owner of a portion of the trust because he has retained an interest in the income from that portion. For convenience, "grantor" and "spouse" are generally referred to in the masculine and feminine genders, respectively, but if the grantor is a woman the reference to "grantor" is to her and the reference to "spouse" is to her husband. Section 677 also deals with the treatment of the grantor of a trust as the owner of a portion of the trust because the income from property transferred in trust after October 9, 1969, is, or may be, distributed to his spouse or applied to the payment of premiums on policies of insurance on the life of his spouse. However, section 677 does not apply when the income of a trust is taxable to a grantor's spouse

under section 71 (relating to alimony and separate maintenance payments) or section 682 (relating to income of an estate or trust in case of divorce, etc.). See section 671–1(b).

(2) Cross references. See section 671 and §§ 1.671–2 and 1.671–3 for rules for treatment of items of income, deduction, and credit when a person is treated as the owner of all or a portion of a trust.

(b) Income for benefit of grantor or his spouse; general rule—(1) Property transferred in trust prior to October 10, 1969. With respect to property transferred in trust prior to October 10, 1969, the grantor is treated, under section 677, in any taxable year as the owner (whether or not he is treated as an owner under section 674) of a portion of a trust of which the income for the taxable year or for a period not within the exception described in paragraph (e) of this section is, or in the discretion of the grantor or a nonadverse party, or both (without the approval or consent of any adverse party) may be:

(i) Distributed to the grantor;

(ii) Held or accumulated for future distribution to the grantor; or

(iii) Applied to the payment of premiums on policies of insurance on the life of the grantor, except policies of insurance irrevocably payable for a charitable purpose specified in section 170(c).

(2) Property transferred in trust after October 9, 1969. With respect to property transferred in trust after October 9, 1969, the grantor is treated, under section 677, in any taxable year as the owner (whether or not he is treated as an owner under section 674) of a portion of a trust of which the income for the taxable year or for a period not within the exception described in paragraph (e) of this section is, or in the discretion of the grantor, or his spouse, or a nonadverse party, or any combination thereof (without the approval or consent of any adverse party other than the grantor's spouse) may be:

(i) Distributed to the grantor or the grantor's spouse;

(ii) Held or accumulated for future distribution to the grantor or the grantor's spouse; or

(iii) Applied to the payment of premiums on policies of insurance on the life of the grantor or the grantor's spouse, except policies of insurance irrevocably payable for a charitable purpose specified in section 170(c).

With respect to the treatment of a grantor as the owner of a portion of a trust solely because its income is, or may be, distributed or held or accumulated for future distribution to a beneficiary who is his spouse or applied to the payment of premiums for insurance on the spouse's life, section 677(a) applies to the income of a trust solely during the period of the marriage of the grantor to a beneficiary. In the case of divorce or separation, see sections 71 and 682 and the regulations thereunder.

(c) Constructive distribution; cessation of interest. Under section 677 the grantor is treated as the owner of a portion of a trust if he has retained any interest which might, without the approval or consent of an adverse party, enable him to have the income from that portion distributed to him at some time either actually or constructively (subject to the exception described in paragraph (e) of this section). In the case of a transfer in trust after October 9, 1969, the grantor is also treated as the owner of a portion of a trust if he has granted or retained any interest which might, without the approval or consent of an adverse party (other than the grantor's spouse), enable his spouse to have the income from the portion at some time, whether or not within the grantor's lifetime, distributed to the spouse either actually or constructively. See paragraph (b)(2) of this section for additional rules relating to the income of a trust prior to the grantor's marriage to a beneficiary. Constructive distribution to the grantor or to his spouse includes payment on behalf of the grantor or his spouse to another in obedience to his or her direction and payment of premiums upon policies of insurance on the grantor's, or his spouse's, life (other than policies of insurance irrevocably payable for charitable purposes specified in section 170(c)). If the grantor (in the case of property transferred prior to Oct. 10, 1969) or the grantor and his spouse (in the case of property transferred after Oct. 9, 1969) are divested permanently and completely of every interest described in this paragraph, the grantor is not treated as an owner under section 677 after that divesting. The word "interest" as used in this paragraph does not include the possibility that the grantor or his spouse might receive back from a beneficiary an interest in a trust by inheritance. Further, with respect to transfers in trust prior to October 10, 1969, the word "interest" does not include the possibility that the grantor might receive back from a beneficiary an interest in a trust as a surviving spouse under a statutory right of election or a similar right.

(d) Discharge of legal obligation of grantor or his spouse. Under section 677 a grantor is, in general, treated as the owner of a portion of a trust whose income is, or in the discretion of the grantor or a nonadverse party, or both, may be applied in discharge of a legal obligation of the grantor (or his spouse in the case of property transferred in trust by the grantor after October 9, 1969). However, see § 1.677(b)–1 for special rules for trusts whose income may not be applied for the discharge of any legal obligation of the grantor or the grantor's spouse other than the support or maintenance of a beneficiary (other than the grantor's spouse) whom the grantor or grantor's spouse is legally obligated to support.

(e) Exception for certain discretionary rights affecting income. The last sentence of section 677(a) provides that a grantor shall not be treated as the owner when a discretionary right can only affect the beneficial enjoyment of the income of a trust received after a period of time during which a grantor would not be treated as an owner under section 673 if the power were a reversionary interest. See §§ 1.673(a)–1 and 1.673(b)–1. For example, if the ordinary income of a trust is payable to B for 10 years and then in the grantor's discretion income or corpus may be paid to B or to the grantor (or his spouse in the case of property transferred in trust by the grantor after October 9, 1969), the grantor is not treated as an owner with respect to the ordinary income under section 677 during the first 10 years. He will be treated as an owner under section 677 after the expiration of the 10-year period unless the power is relinquished. If the beginning of the period during which the grantor may substitute beneficiaries is postponed, the rules set forth in § 1.673(d)–1 are applicable in determining whether the grantor should be treated as an owner during the period following the postponement.

(f) Accumulation of income. If income is accumulated in any taxable year for future distribution to the grantor (or his spouse in the case of property transferred in trust by the grantor after Oct. 9, 1969), section 677(a)(2) treats the grantor as an owner for that taxable year. The exception set forth in the last sentence of section 677(a) does not apply merely because the grantor (or his spouse in the case of property transferred in trust by the grantor after Oct. 9, 1969) must await the expiration of a period of time before he or she can receive or exercise discretion over previously accumulated income of the trust, even though the period is such that the grantor would not be treated as an owner under section 673 if a reversionary interest were involved. Thus, if income (including capital gains) of a trust is to be accumulated for 10 years and then will be, or at the discretion of the grantor, or his spouse in the case of property transferred in trust after October 9, 1969, or a nonadverse party, may be, distributed to the grantor (or his spouse in the case of property transferred in trust after Oct. 9, 1969), the grantor is treated as the owner of the trust from its inception. If income attributable to transfers after October 9, 1969 is accumulated in any taxable year during the grantor's lifetime for future distribution to his spouse, section 677(a)(2) treats the grantor as an owner for that taxable year even though his spouse may not receive or exercise discretion over such income prior to the grantor's death.

(g) Examples. The application of section 677(a) may be illustrated by the following examples:

Example (1). G creates an irrevocable trust which provides that the ordinary income is to be payable to him for life and that on his death the corpus shall be distributed to B, an unrelated person. Except for the right to receive income, G retains no right or power which would cause him to be treated as an owner under sections 671 through 677. Under the applicable local law capital gains must be applied to corpus. During the taxable year 1970 the trust has the following items of gross income and deductions:

Dividends	$5,000
Capital gain	1,000
Expenses allocable to income	200
Expenses allocable to corpus	100

Since G has a right to receive income he is treated as an owner of a portion of the trust under section 677. Accordingly, he should include the $5,000 of dividends, $200 income expense, and $100 corpus expense in the computation of his taxable income for 1970. He should not include the $1,000 capital gain since that is not attributable to the portion of the trust that he owns. See § 1.671–3(b). The tax consequences of the capital gain are governed by the provisions of subparts A, B, C, and D (section 641 and following), part I, subchapter J, chapter 1 of the Code. Had the trust sustained a capital loss in any amount the loss would likewise not be included in the computation of G's taxable income, but would also be governed by the provisions of such subparts.

Example (2). G creates a trust which provides that the ordinary income is payable to his adult son. Ten years and one day from the date of transfer or on the death of his son, whichever is earlier, corpus is to revert to G. In addition, G retains a discretionary right to receive $5,000 of ordinary income each year. (Absent the exercise of this right all the ordinary income is to be distributed to his son.) G retained no other right or power which would cause him to be treated as an owner under subpart E (section 671 and following). Under the terms of the trust instrument and applicable local law capital gains must be applied to corpus. During the taxable year 1970 the trust had the following items of income and deductions:

Dividends	$10,000
Capital gain	2,000
Expenses allocable to income	400
Expenses allocable to corpus	200

Since the capital gain is held or accumulated for future distributions to G, he is treated under section 677(a)(2) as an owner of a portion of the trust to which the gain is attributable. See § 1.671-3(b).

Therefore, he must include the capital gain in the computation of his taxable income. (Had the trust sustained a capital loss in any amount, G would likewise include that loss in the computation of his taxable income.) In addition, because of G's discretionary right (whether exercised or not) he is treated as the owner of a portion of the trust which will permit a distribution of income to him of $5,000. Accordingly, G includes dividends of $5,208.33 and income expenses of $208.33 in computing his taxable income, determined in the following manner:

Total dividends	$10,000.00
Less: Expenses allocable to income	400.00
Distributable income of the trust	9,600.00
Portion of dividends attributable to G (5,000 /9,600×$10,000)	5,208.33
Portion of income expenses attributable to G (5,000/9,600×$400)	208.33
Amount of income subject to discretionary right	5,000.00

In accordance with § 1.671-3(c), G also takes into account $104.17 (5,000/9,600×$200) of corpus expenses in computing his tax liability. The portion of the dividends and expenses of the trust not attributable to G are governed by the provisions of Subparts A through D.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7148, 36 FR 20749, Oct. 29, 1971]

§ 1.677(b)-1 Trusts for support.

(a) Section 677(b) provides that a grantor is not treated as the owner of a trust merely because its income may in the discretion of any person other than the grantor (except when he is acting as trustee or cotrustee) be applied or distributed for the support or maintenance of a beneficiary (other than the grantor's spouse in the case of income from property transferred in trust after October 9, 1969), such as the child of the grantor, whom the grantor or his spouse is legally obligated to support. If income of the current year of the trust is actually so applied or distributed the grantor may be treated as the owner of any portion of the trust under section 677 to that extent, even though it might have been applied or distributed for other purposes. In the case of property transferred to a trust before October 10, 1969, for the benefit of the grantor's spouse, the grantor may be treated as the owner to the extent income of the current year is actually applied for the support or maintenance of his spouse.

(b) If any amount applied or distributed for the support of a beneficiary, including the grantor's spouse in the case of property transferred in trust before October 10, 1969, whom the grantor is legally obligated to support is paid out of corpus or out of income other than income of the current year, the grantor is treated as a beneficiary of the trust, and the amount applied or distributed is considered to be an amount paid within the meaning of section 661(a)(2), taxable to the grantor under section 662. Thus, he is subject to the other relevant portions of subparts A through D (section 641 and following), part I, subchapter J, chapter 1 of the Code. Accordingly, the grantor may be taxed on an accumulation distribution or a capital gain distribution under subpart D (section 665 and following) of such part I. Those provisions are applied on the basis that the grantor is the beneficiary.

(c) For the purpose of determining the items of income, deduction, and credit of a trust to be included under this section in computing the grantor's tax liability, the income of the trust for the taxable year of distribution will be deemed to have been first distributed. For example, in the case of a trust reporting on the calendar year basis, a distribution made on January 1, 1956, will be deemed to have been made out of ordinary income of the trust for the calendar year 1956 to the extent of the income for that year even though the trust had received no income as of January 1, 1956. Thus, if a distribution of $10,000 is made on January 1, 1956, for the support of the grantor's dependent, the grantor will be treated as the owner of the trust for 1956 to that extent. If the trust received dividends of $5,000 and incurred expenses of $1,000 during that year but subsequent to January 1, he will take into account dividends of $5,000 and expenses of $1,000 in computing his tax liability for 1956. In addition, the grantor will be treated as a beneficiary of the trust with respect to the $6,000 ($10,000 less distributable income of $4,000 (dividends of $5,000 less expenses of $1,000)) paid out of corpus or out of other than income of the current year. See paragraph (b) of this section.

(d) The exception provided in section 677(b) relates solely to the satisfaction of the grantor's legal obligation to support or maintain a beneficiary. Consequently, the general rule of section 677(a) is applicable when in the discretion of the grantor or nonadverse parties income of a trust may be applied in discharge of a grantor's obligations other than his obligation of support or maintenance falling within section 677(b). Thus, if the grantor creates a trust the income of which may in the discretion of a nonadverse party be applied in the payment of the grantor's debts, such as the payment of his rent or other household expenses, he is treated as an owner of the trust

regardless of whether the income is actually so applied.

(e) The general rule of section 677(a), and not section 677(b), is applicable if discretion to apply or distribute income of a trust rests solely in the grantor, or in the grantor in conjunction with other persons, unless in either case the grantor has such discretion as trustee or cotrustee.

(f) The general rule of section 677(a), and not section 677(b), is applicable to the extent that income is required, without any discretionary determination, to be applied to the support of a beneficiary whom the grantor is legally obligated to support.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7148, 36 FR 20750, Oct. 29, 1971]

§ 1.678(a)–1 Person other than grantor treated as substantial owner; general rule.

(a) Where a person other than the grantor of a trust has a power exercisable solely by himself to vest the corpus or the income of any portion of a testamentary or inter vivos trust in himself, he is treated under section 678(a) as the owner of that portion, except as provided in section 678(b) (involving taxation of the grantor) and section 678(c) (involving an obligation of support). The holder of such a power also is treated as an owner of the trust even though he has partially released or otherwise modified the power so that he can no longer vest the corpus or income in himself, if he has retained such control of the trust as would, if retained by a grantor, subject the grantor to treatment as the owner under sections 671 to 677, inclusive. See section 671 and §§ 1.671–2 and 1.671–3 for rules for treatment of items of income, deduction, and credit where a person is treated as the owner of all or only a portion of a trust.

(b) Section 678(a) treats a person as an owner of a trust if he has a power exercisable solely by himself to apply the income or corpus for the satisfaction of his legal obligations, other than an obligation to support a dependent (see § 1.678(c)–1 subject to the limitation of section 678(b)). Section 678 does not apply if the power is not exercisable solely by himself. However, see § 1.662(a)–4 for principles applicable to income of a trust which, pursuant to the terms of the trust instrument, is used to satisfy the obligations of a person other than the grantor.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.678(b)–1 If grantor is treated as the owner.

Section 678(a) does not apply with respect to a power over income, as originally granted or thereafter modified, if the grantor of the trust is treated as the owner under sections 671 to 677, inclusive.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.678(c)–1 Trusts for support.

(a) Section 678(a) does not apply to a power which enables the holder, in the capacity of trustee or cotrustee, to apply the income of the trust to the support or maintenance of a person whom the holder is obligated to support, except to the extent the income is so applied. See paragraphs (a), (b), and (c) of § 1.677(b)–1 for applicable principles where any amount is applied for the support or maintenance of a person whom the holder is obligated to support.

(b) The general rule in section 678(a) (and not the exception in section 678(c)) is applicable in any case in which the holder of a power exercisable solely by himself is able, in any capacity other than that of trustee or cotrustee, to apply the income in discharge of his obligation of support or maintenance.

(c) Section 678(c) is concerned with the taxability of income subject to a power described in section 678(a). It has no application to the taxability of income which is either required to be applied pursuant to the terms of the trust instrument or is applied pursuant to a power which is not described in section 678(a), the taxability of such income being governed by other provisions of the Code. See § 1.662(a)–4.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.678(d)–1 Renunciation of power.

Section 678(a) does not apply to a power which has been renounced or disclaimed within a reasonable time after the holder of the power first became aware of its existence.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

Miscellaneous

§ 1.681(a)–1 Limitation on charitable contributions deductions of trusts; scope of section 681.

Under section 681, the unlimited charitable contributions deduction otherwise allowable to a trust under section 642(c) is, in general, subject to percentage limitations, corresponding to those applicable to contributions by an individual under section 170(b)(1)(A) and (B), under the following circumstances:

(a) To the extent that the deduction is allocable to "unrelated business income";

(b) For taxable years beginning before January 1, 1970, if the trust has engaged in a prohibited transaction;

(c) For taxable years beginning before January 1, 1970, if income is accumulated for a charitable purpose and the accumulation is (1) unreasonable, (2) substantially diverted to a noncharitable purpose, or (3) invested against the interests of the charitable beneficiaries.

Further, if the circumstance set forth in paragraph (a) or (c) of this section is applicable, the deduction is limited to income actually paid out for charitable purposes, and is not allowed for income only set aside or to be used for those purposes. If the circumstance set forth in paragraph (b) of this section is applicable, deductions for contributions to the trust may be disallowed. The provisions of section 681 are discussed in detail in §§ 1.681(a)–2 through 1.681(c)–1. For definition of the term "income", see section 643(b) and § 1.643(b)–1. [T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7428, 41 FR 34627, Aug. 16, 1976]

§ 1.681(a)–2 Limitation on charitable contributions deduction of trusts with trade or business income.

(a) In general. No charitable contributions deduction is allowable to a trust under section 642(c) for any taxable year for amounts allocable to the trust's unrelated business income for the taxable year. For the purpose of section 681(a) the term "unrelated business income" of a trust means an amount which would be computed as the trust's unrelated business taxable income under section 512 and the regulations thereunder, if the trust were an organization exempt from tax under section 501(a) by reason of section 501(c)(3). For the purpose of the computation under section 512, the term "unrelated trade or business" includes a trade or business carried on by a partnership of which a trust is a member, as well as one carried on by the trust itself. While the charitable contributions deduction under section 642(c) is entirely disallowed by section 681(a) for amounts allocable to "unrelated business income", a partial deduction is nevertheless allowed for such amounts by the operation of section 512(b)(11), as illustrated in paragraphs (b) and (c) of this section. This partial deduction is subject to the percentage limitations applicable to contributions by an individual under section 170(b)(1)(A) and (B), and is not allowed for amounts set aside or to be used for charitable purposes but not actually paid out during the taxable year. Charitable contributions deductions otherwise allowable under section 170, 545(b)(2), or 642(c) for contributions to a trust are not disallowed solely because the trust has unrelated business income.

(b) Determination of amounts allocable to unrelated business income. In determining the amount for which a charitable contributions deduction would otherwise be allowable under section 642(c) which are allocable to unrelated business income, and therefore not allowable as a deduction, the following steps are taken:

(1) There is first determined the amount which would be computed as the trust's unrelated business taxable income under section 512 and the regulations thereunder if the trust were an organization exempt from tax under section 501(a) by reason of section 501(c)(3), but without taking the charitable contributions deduction allowed under section 512(b)(11).

(2) The amount for which a charitable contributions deduction would otherwise be allowable under section 642(c) is then allocated between the amount determined in subparagraph (1) of this paragraph and any other income of the trust. Unless the facts clearly indicate to the contrary, the allocation to the amount determined in subparagraph (1) of this paragraph is made on the basis of the ratio (but not in excess of 100 percent) of the amount determined in subparagraph (1) of this paragraph to the taxable income of the trust, determined without the deduction for personal exemption under section 642(b), the charitable contributions deduction under section 642(c), or the deduction for distributions to beneficiaries under section 661(a).

(3) The amount for which a charitable contributions deduction would otherwise be allowable under

der section 642(c) which is allocable to unrelated business income as determined in subparagraph (2) of this paragraph, and therefore not allowable as a deduction, is the amount determined in subparagraph (2) of this paragraph reduced by the charitable contributions deduction which would be allowed under section 512(b)(11) if the trust were an organization exempt from tax under section 501(a) by reason of section 501(c)(3).

(c) Examples. (1) The application of this section may be illustrated by the following examples, in which it is assumed that the Y charity is not a charitable organization qualifying under section 170(b)(1)(A) (see subparagraph (2) of this paragraph):

Example (1). The X trust has income of $50,000. There is included in this amount a net profit of $31,000 from the operation of a trade or business. The trustee is required to pay half of the trust income to A, an individual, and the balance of the trust income to the Y charity, an organization described in section 170(c)(2). The trustee pays each beneficiary $25,000. Under these facts, the unrelated business income of the trust (computed before the charitable contributions deduction which would be allowed under section 512(b)(11)) is $30,000 ($31,000 less the deduction of $1,000 allowed by section 512(b)(12)). The deduction otherwise allowable under section 642(c) is $25,000, the amount paid to the Y charity. The portion allocable to the unrelated business income (computed as prescribed in paragraph (b)(2) of this section) is $15,000, that is, an amount which bears the same ratio to $25,000 as $30,000 bears to $50,000. The portion allocable to the unrelated business income, and therefore disallowed as a deduction, is $15,000 reduced by $6,000 (20 percent of $30,000, the charitable contributions deduction which would be allowable under section 512(b)(11)), or $9,000.

Example (2). Assume the same facts as in example (1), except that the trustee has discretion as to the portion of the trust income to be paid to each beneficiary, and the trustee pays $40,000 to A and $10,000 to the Y charity. The deduction otherwise allowable under section 642(c) is $10,000. The portion allocable to the unrelated business income computed as prescribed in paragraph (b)(2) of this section is $6,000, that is, an amount which bears the same ratio to $10,000 as $30,000 bears to $50,000. Since this amount does not exceed the charitable contributions deduction which would be allowable under section 512(b)(11) ($6,000, determined as in example (1)), no portion of it is disallowed as a deduction.

Example (3). Assume the same facts as in example (1), except that the terms of the trust instrument require the trustee to pay to the Y charity the trust income, if any, derived from the trade or business, and to pay to A all the trust income derived from other sources. The trustee pays $31,000 to the Y charity and $19,000 to A. The deduction otherwise allowable under section 642(c) is $31,000. Since the entire income from the trade or business is paid to Y charity, the amount allocable to the unrelated business income computed before the charitable contributions deduction under section 512(b)(11) is $30,000 ($31,000 less the deduction of $1,000 allowed by section 512(b)(12)). The amount allocable to the unrelated business income and therefore disallowed as a deduction is $24,000 ($30,000 less $6,000).

Example (4). (i) Under the terms of the trust, the trustee is required to pay half of the trust income to A, an individual, for his life, and the balance of the trust income to the Y charity, an organization described in section 170(c)(2). Capital gains are allocable to corpus and upon A's death the trust is to terminate and the corpus is to be distributed to the Y charity. The trust has taxable income of $50,000 computed without any deduction for personal exemption, charitable contributions, or distributions. The amount of $50,000 includes $10,000 capital gains, $30,000 ($31,000 less the $1,000 deduction allowed under section 512(b)(12)) unrelated business income (computed before the charitable contributions deduction which would be allowed under section 512(b)(11)) and other income of $9,000. The trustee pays each beneficiary $20,000.

(ii) The deduction otherwise allowable under section 642(c) is $30,000 ($20,000 paid to Y charity and $10,000 capital gains allocated to corpus and permanently set aside for charitable purposes). The portion allocable to the unrelated business income is $15,000, that is, an amount which bears the same ratio to $20,000 (the amount paid to Y charity) as $30,000 bears to $40,000 ($50,000 less $10,000 capital gains allocable to corpus). The portion allocable to the unrelated business income, and therefore disallowed as a deduction, is $15,000 reduced by $6,000 (the charitable contributions deduction which would be allowable under section 512(b)(11)), or $9,000.

(2) If, in the examples in subparagraph (1) of this paragraph, the Y charity were a charitable organization qualifying under section 170(b)(1)(A), then the deduction allowable under section 512(b)(11) would be computed at a rate of 30 percent.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6605, 27 FR 8097, Aug. 15, 1962]

§ 1.681(b)–1 Cross reference.

For disallowance of certain charitable, etc., deductions otherwise allowable under section 642(c), see sections 508(d) and 4948(c)(4). See also 26 CFR §§ 1.681(b)–1 and 1.681(c)–1 (rev. as of Apr. 1, 1974) for provisions applying before January 1, 1970.

[T.D. 7428, 41 FR 34627, Aug. 16, 1976]

§ 1.682(a)–1 Income of trust in case of divorce, etc.

(a) In general. (1) Section 682(a) provides rules in certain cases for determining the taxability of income of trusts as between spouses who are divorced, or who are separated under a decree of separate maintenance or a written separation agreement. In such cases, the spouse actually entitled to receive payments from the trust is considered the beneficiary rather than the spouse in discharge of whose obligations the payments are made, except to the extent that the payments are specified to be for the support of the obligor spouse's minor children in the divorce or separate maintenance decree, the separation agreement or the governing trust instrument. For convenience, the beneficiary spouse will hereafter in this section and in § 1.682(b)–1 be referred to as the "wife"

and the obligor spouse from whom she is divorced or legally separated as the "husband". (See section 7701(a)(17).) Thus, under section 682(a) income of a trust—

(i) Which is paid, credited, or required to be distributed to the wife in a taxable year of the wife, and

(ii) Which, except for the provisions of section 682, would be includible in the gross income of her husband,

is includible in her gross income and is not includible in his gross income.

(2) Section 682(a) does not apply in any case to which section 71 applies. Although section 682(a) and section 71 seemingly cover some of the same situations, there are important differences between them. Thus, section 682(a) applies, for example, to a trust created before the divorce or separation and not in contemplation of it, while section 71 applies only if the creation of the trust or payments by a previously created trust are in discharge of an obligation imposed upon or assumed by the husband (or made specific) under the court order or decree divorcing or legally separating the husband and wife, or a written instrument incident to the divorce status or legal separation status, or a written separation agreement. If section 71 applies, it requires inclusion in the wife's income of the full amount of periodic payments received attributable to property in trust (whether or not out of trust income), while, if section 71 does not apply, section 682(a) requires amounts paid, credited, or required to be distributed to her to be included only to the extent they are includible in the taxable income of a trust beneficiary under subparts A through D (section 641 and following), part I, subchapter J, chapter 1 of the Code.

(3) Section 682(a) is designed to produce uniformity as between cases in which, without section 682(a), the income of a so-called alimony trust would be taxable to the husband because of his continuing obligation to support his wife or former wife, and other cases in which the income of a so-called alimony trust is taxable to the wife or former wife because of the termination of the husband's obligation. Furthermore, section 682(a) taxes trust income to the wife in all cases in which the husband would otherwise be taxed not only because of the discharge of his alimony obligation but also because of his retention of control over the trust income or corpus. Section 682(a) applies whether the wife is the beneficiary under the terms of the trust instrument or is an assignee of a beneficiary.

(4) The application of section 682(a) may be illustrated by the following examples, in which it is assumed that both the husband and wife make their income tax returns on a calendar year basis:

Example (1). Upon the marriage of H and W, H irrevocably transfers property in trust to pay the income to W for her life for support, maintenance, and all other expenses. Some years later, W obtains a legal separation from H under an order of court. W, relying upon the income from the trust payable to her, does not ask for any provision for her support and the decree recites that since W is adequately provided for by the trust, no further provision is being made for her. Under these facts, section 682(a), rather than section 71, is applicable. Under the provisions of section 682(a), the income of the trust which becomes payable to W after the order of separation is includible in her income and is deductible by the trust. No part of the income is includible in H's income or deductible by him.

Example (2). H transfers property in trust for the benefit of W, retaining the power to revoke the trust at any time. H, however, promises that if he revokes the trust he will transfer to W property in the value of $100,000. The transfer in trust and the agreement were not incident to divorce, but some years later W divorces H. The court decree is silent as to alimony and the trust. After the divorce, income of the trust which becomes payable to W is taxable to her, and is not taxable to H or deductible by him. If H later terminates the trust and transfers $100,000 of property to W, the $100,000 is not income to W nor deductible by H.

(b) Alimony trust income designated for support of minor children. Section 682(a) does not require the inclusion in the wife's income of trust income which the terms of the divorce or separate maintenance decree, separation agreement, or trust instrument fix in terms of an amount of money or a portion of the income as a sum which is payable for the support of minor children of the husband. The portion of the income which is payable for the support of the minor children is includible in the husband's income. If in such a case trust income fixed in terms of an amount of money is to be paid but a lesser amount becomes payable, the trust income is considered to be payable for the support of the husband's minor children to the extent of the sum which would be payable for their support out of the originally specified amount of trust income. This rule is similar to that provided in the case of periodic payments under section 71. See § 1.71–1.

§ 1.682(b)–1 Application of trust rules to alimony payments.

(a) For the purpose of the application of subparts A through D (section 641 and following), part I, subchapter J, chapter 1 of the Code, the wife described in section 682 or section 71 who is entitled to receive payments attributable to property in trust is considered a beneficiary of the trust, whether or not the payments are made for the

benefit of the husband in discharge of his obligations. A wife treated as a beneficiary of a trust under this section is also treated as the beneficiary of such trust for purposes of the tax imposed by section 56 (relating to the minimum tax for tax preferences). For rules relating to the treatment of items of tax preference with respect to a beneficiary of a trust, see § 1.58–3.

(b) A periodic payment includible in the wife's gross income under section 71 attributable to property in trust is included in full in her gross income in her taxable year in which any part is required to be included under section 652 or 662. Assume, for example, in a case in which both the wife and the trust file income tax returns on the calendar year basis, that an annuity of $5,000 is to be paid to the wife by the trustee every December 31 (out of trust income if possible and, if not, out of corpus) pursuant to the terms of a divorce decree. Of the $5,000 distributable on December 31, 1954, $4,000 is payable out of income and $1,000 out of corpus. The actual distribution is made in 1955. Although the periodic payment is received by the wife in 1955, since under section 662 the $4,000 income distributable on December 31, 1954, is to be included in the wife's income for 1954, the $1,000 payment out of corpus is also to be included in her income for 1954.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7564, 43 FR 40495, Sept. 12, 1978]

§ 1.682(c)–1 Definitions.

For definitions of the terms "husband" and "wife" as used in section 682, see section 7701(a)(17) and the regulations thereunder.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.683–1 Applicability of provisions; general rule.

Part I (section 641 and following), subchapter J, chapter 1 of the Code, applies to estates and trusts and to beneficiaries only with respect to taxable years which begin after December 31, 1953, and end after August 16, 1954 the date of enactment of the Internal Revenue Code of 1954. In the case of an estate or trust, the date on which a trust is created or amended or on which an estate commences, and the taxable years of beneficiaries, grantors, or decedents concerned are immaterial. This provision applies equally to taxable years of normal and of abbreviated length.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.683–2 Exceptions.

(a) In the case of any beneficiary of an estate or trust, sections 641 through 682 do not apply to any amount paid, credited, or to be distributed by an estate or trust in any taxable year of the estate or trust which begins before January 1, 1954, or which ends before August 17, 1954. Whether an amount so paid, credited, or to be distributed is to be included in the gross income of a beneficiary is determined with reference to the Internal Revenue Code of 1939. Thus, if a trust in its fiscal year ending June 30, 1954, distributed its current income to a beneficiary on June 30, 1954, the extent to which the distribution is includible in the beneficiary's gross income for his taxable year (the calendar year 1954) and the character of such income will be determined under the Internal Revenue Code of 1939. The Internal Revenue Code of 1954, however, determines the beneficiary's tax liability for a taxable year of the beneficiary to which such Code applies, with respect even to gross income of the beneficiary determined under the Internal Revenue Code of 1939 in accordance with this paragraph. Accordingly, the beneficiary is allowed credits and deductions pursuant to the Internal Revenue Code of 1954 for a taxable year governed by the Internal Revenue Code of 1954. See subparagraph (ii) of example (1) in paragraph (c) of this section.

(b) For purposes of determining the time of receipt of dividends under sections 34 (for purposes of the credit for dividends received on or before December 31, 1964) and 116, the dividends paid, credited, or to be distributed to a beneficiary are deemed to have been received by the beneficiary ratably on the same dates that the dividends were received by the estate or trust.

(c) The application of this section may be illustrated by the following examples:

Example (1). (i) A trust, reporting on the fiscal year basis, receives in its taxable year ending November 30, 1954, dividends on December 3, 1953, and April 3, July 5, and October 4, 1954. It distributes the dividends to A, its sole beneficiary (who reports on the calendar year basis) on November 30, 1954. Since the trust has received dividends in a taxable year ending after July 31, 1954, it will receive a dividend credit under section 34 with respect to dividends received which otherwise qualify under that section, in this case dividends received on October 4, 1954 (i. e., received after July 31, 1954). See section 7851(a)(1)(C). This credit, however, is reduced to the extent the dividends are allocable to the beneficiary as a result of income being paid, credited, or required to be distributed to him. The trust will also be permitted the dividend exclusion under section 116, since it received its dividends in a taxable year ending after July 31, 1954.

(ii) A is entitled to the section 34 credit with respect to the portion of the October 4, 1954, dividends which is distributed to him even though the determination of whether the amount

distributed to him is includible in his gross income is made under the Internal Revenue Code of 1939. The credit allowable to the trust is reduced proportionately to the extent A is deemed to have received the October 4 dividends. A is not entitled to a credit with respect to the dividends received by the trust on December 3, 1953, and April 3, and July 5, 1954, because, although he receives after July 31, 1954, the distribution resulting from the trust's receipt of dividends, he is deemed to have received the dividends ratably with the trust on dates prior to July 31, 1954. In determining the exclusion under section 116 to which he is entitled, all the dividends received by the trust in 1954 and distributed to him are aggregated with any other dividends received by him in 1954, since he is deemed to have received such dividends in 1954 and therefore within a taxable year ending after July 31, 1954. He is not, however, entitled to the exclusion for the dividends received by the trust in December 1953.

Example (2). (i) A simple trust reports on the basis of a fiscal year ending July 31. It receives dividends on October 3, 1953, and January 4, April 3, and July 5, 1954. It distributes the dividends to A, its sole beneficiary, on September 1, 1954. The trust, receiving dividends in a taxable year ending prior to August 17, 1954, is entitled neither to the dividend received credit under section 34 nor the dividend exclusion under section 116.

(ii) A (reporting on the calendar year basis) is not entitled to the section 34 credit, because, although he receives after July 31, 1954, the distribution resulting from the trust's receipt of dividends, he is deemed to have received the dividends ratably with the trust, that is, on October 3, 1953, and January 4, April 3, and July 5, 1954. He is, however, entitled to the section 116 exclusion with respect to the dividends received by the trust in 1954 (along with other dividends received by him in 1954) and distributed to him, since he is deemed to have received such dividends on January 4, April 3, and July 5, 1954, each a date in this taxable year ending after July 31, 1954. He is entitled to no exclusion for the dividends received by the trust on October 3, 1953, since he is deemed to receive the resulting distribution on the same date, which falls within a taxable year of his which ends before August 1, 1954, although he is required to include the October 1953 dividends in his 1954 income. See section 164 of the Internal Revenue Code of 1939.

Example (3). A simple trust on a fiscal year ending July 31, 1954, receives dividends August 5 and November 4, 1953. It distributes the dividends to A, its sole beneficiary (who is on a calendar year basis), on September 1, 1954. Neither the trust nor A is entitled to a credit under section 34 or an exclusion under section 116.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6777, 29 FR 17809, Dec. 16, 1964]

§ 1.683-3 Application of the 65-day rule of the Internal Revenue Code of 1939.

If an amount is paid, credited, or to be distributed in the first 65 days of the first taxable year of an estate or trust (heretofore subject to the provisions of the Internal Revenue Code of 1939) to which the Internal Revenue Code of 1954 applies and the amount would be treated, if the Internal Revenue Code of 1939 were applicable, as if paid, credited, or to be distributed on the last day of the preceding taxable year, sections 641 through 682 do not apply to the amount. The amount so paid, credited, or to be distributed is taken into account as provided in the Internal Revenue Code of 1939. See 26 CFR (1939) 39.162-2(c) and (d) (Regulations 118).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

Income In Respect Of Decedents

§ 1.691(a)-1 Income in respect of a decedent.

(a) Scope of section 691. In general, the regulations under section 691 cover: (1) The provisions requiring that amounts which are not includible in gross income for the decedent's last taxable year or for a prior taxable year be included in the gross income of the estate or persons receiving such income to the extent that such amounts constitute "income in respect of a decedent"; (2) the taxable effect of a transfer of the right to such income; (3) the treatment of certain deductions and credit in respect of a decedent which are not allowable to the decedent for the taxable period ending with his death or for a prior taxable year; (4) the allowance to a recipient of income in respect of a decedent of a deduction for estate taxes attributable to the inclusion of the value of the right to such income in the decedent's estate; (5) special provisions with respect to installment obligations acquired from a decedent and with respect to the allowance of a deduction for estate taxes to a surviving annuitant under a joint and survivor annuity contract; and (6) special provisions relating to installment obligations transmitted at death when prior law applied to the transmission.

(b) General definition. In general, the term "income in respect of a decedent" refers to those amounts to which a decedent was entitled as gross income but which were not properly includible in computing his taxable income for the taxable year ending with the date of his death or for a previous taxable year under the method of accounting employed by the decedent. See the regulations under section 451. Thus, the term includes—

(1) All accrued income of a decedent who reported his income by use of the cash receipts and disbursements method;

(2) Income accrued solely by reason of the decedent's death in case of a decedent who reports his income by use of an accrual method of accounting; and

(3) Income to which the decedent had a contingent claim at the time of his death.

See sections 736 and 753 and the regulations thereunder for "income in respect of a decedent" in the case of a deceased partner.

(c) Prior decedent. The term "income in respect of a decedent" also includes the amount of all items of gross income in respect of a prior decedent, if (1) the right to receive such amount was acquired by the decedent by reason of the death of the prior decedent or by bequest, devise, or inheritance from the prior decedent and if (2) the amount of gross income in respect of the prior decedent was not properly includible in computing the decedent's taxable income for the taxable year ending with the date of his death or for a previous taxable year. See example (2) of paragraph (b) of § 1.691(a)–2.

(d) Items excluded from gross income. Section 691 applies only to the amount of items of gross income in respect of a decedent, and items which are excluded from gross income under subtitle A of the Code are not within the provisions of section 691.

(e) Cross reference. For items deemed to be income in respect of a decedent for purposes of the deduction for estate taxes provided by section 691(c), see paragraph (c) of § 1.691(c)–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6808, 30 FR 3435, March 16, 1965]

§ 1.691(a)–2 Inclusion in gross income by recipients.

(a) Under section 691(a)(1), income in respect of a decedent shall be included in the gross income, for the taxable year when received, of—

(1) The estate of the decedent, if the right to receive the amount is acquired by the decedent's estate from the decedent;

(2) The person who, by reason of the death of the decedent, acquires the right to receive the amount, if the right to receive the amount is not acquired by the decedent's estate from the decedent; or

(3) The person who acquires from the decedent the right to receive the amount by bequest, devise, or inheritance, if the amount is received after a distribution by the decedent's estate of such right.

These amounts are included in the income of the estate or of such persons when received by them whether or not they report income by use of the cash receipts and disbursements methods.

(b) The application of paragraph (a) of this section may be illustrated by the following examples, in each of which it is assumed that the decedent kept his books by use of the cash receipts and disbursements method.

Example (1). The decedent was entitled at the date of his death to a large salary payment to be made in equal annual installments over five years. His estate, after collecting two installments, distributed the right to the remaining installment payments to the residuary legatee of the estate. The estate must include in its gross income the two installments received by it, and the legatee must include in his gross income each of the three installments received by him.

Example (2). A widow acquired, by bequest from her husband, the right to receive renewal commissions on life insurance sold by him in his lifetime, which commissions were payable over a period of years. The widow died before having received all of such commissions, and her son inherited the right to receive the rest of the commissions. The commissions received by the widow were includible in her gross income. The commissions received by the son were not includible in the widow's gross income but must be included in the gross income of the son.

Example (3). The decedent owned a Series E United States savings bond, with his wife as co-owner or beneficiary, but died before the payment of such bond. The entire amount of interest accruing on the bond and not includible in income by the decedent, not just the amount accruing after the death of the decedent, would be treated as income to his wife when the bond is paid.

Example (4). A, prior to his death, acquired 10,000 shares of the capital stock of the X Corporation at a cost of $100 per share. During his lifetime, A had entered into an agreement with X Corporation whereby X Corporation agreed to purchase and the decedent agreed that his executor would sell the 10,000 shares of X Corporation stock owned by him at the book value of the stock at the date of A's death. Upon A's death, the shares are sold by A's executor for $500 a share pursuant to the agreement. Since the sale of stock is consummated after A's death, there is no income in respect of a decedent with respect to the appreciation in value of A's stock to the date of his death. If, in this example, A had in fact sold the stock during his lifetime but payment had not been received before his death, any gain on the sale would constitute income in respect of a decedent when the proceeds were received.

Example (5). (1) A owned and operated an apple orchard. During his lifetime, A sold and delivered 1,000 bushels of apples to X, a canning factory, but did not receive payment before his death. A also entered into negotiations to sell 3,000 bushels of apples to Y, a canning factory, but did not complete the sale before his death. After A's death, the executor received payment from X. He also completed the sale to Y and transferred to Y 1,200 bushels of apples on hand at A's death and harvested and transferred an additional 1,800 bushels. The gain from the sale of apples by A to X constitutes income in respect of a decedent when received. On the other hand, the gain from the sale of apples by the executor to Y does not.

(2) Assume that, instead of the transaction entered into with Y, A had disposed of the 1,200 bushels of harvested apples by delivering them to Z, a cooperative association, for processing and sale. Each year the association commingles the fruit received from all of its members into a pool and assigns to each member a percentage interest in the pool based on the fruit delivered by him. After the fruit is processed and the products

are sold, the association distributes the net proceeds from the pool to its members in proportion to their interests in the pool. After A's death, the association made distributions to the executor with respect to A's share of the proceeds from the pool in which A had an interest. Under such circumstances, the proceeds from the disposition of the 1,200 bushels of apples constitute income in respect of a decedent.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.691(a)–3 Character of gross income.

(a) The right to receive an amount of income in respect of a decedent shall be treated in the hands of the estate, or by the person entitled to receive such amount by bequest, devise, or inheritance from the decedent or by reason of his death, as if it had been acquired in the transaction by which the decedent (or a prior decedent) acquired such right, and shall be considered as having the same character it would have had if the decedent (or a prior decedent) had lived and received such amount. The provisions of section 1014(a), relating to the basis of property acquired from a decedent, do not apply to these amounts in the hands of the estate and such persons. See section 1014(c).

(b) The application of paragraph (a) of this section may be illustrated by the following:

(1) If the income would have been capital gain to the decedent, if he had lived and had received it, from the sale of property, held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), the income, when received, shall be treated in the hands of the estate or of such person as capital gain from the sale of the property, held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), in the same manner as if such person had held the property for the period the decedent held it, and had made the sale.

(2) If the income is interest on United States obligations which were owned by the decedent, such income shall be treated as interest on United States obligations in the hands of the person receiving it, for the purpose of determining the credit provided by section 35, as if such person had owned the obligations with respect to which such interest is paid.

(3) If the amounts received would be subject to special treatment under part I (section 1301 and following), subchapter Q, chapter 1 of the Code, relating to income attributable to several taxable years, as in effect for taxable years beginning before January 1, 1964, if the decedent had lived and included such amounts in his gross income, such sections apply with respect to the recipient of the income.

(4) The provisions of sections 632 and 1347, relating to the tax attributable to the sale of certain oil or gas property and to certain claims against the United States, apply to any amount included in gross income, the right to which was obtained by the decedent by a sale or claim within the provisions of those sections.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6885, 31 FR 7803, June 2, 1966; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.691(a)–4 Transfer of right to income in respect of a decedent.

(a) Section 691(a)(2) provides the rules governing the treatment of income in respect of a decedent (or a prior decedent) in the event a right to receive such income is transferred by the estate or person entitled thereto by bequest, devise, or inheritance, or by reason of the death of the decedent. In general, the transferor must include in his gross income for the taxable period in which the transfer occurs the amount of the consideration, if any, received for the right or the fair market value of the right at the time of the transfer, whichever is greater. Thus, upon a sale of such right by the estate or person entitled to receive it, the fair market value of the right or the amount received upon the sale, whichever is greater, is included in the gross income of the vendor. Similarly, if such right is disposed of by gift, the fair market value of the right at the time of the gift must be included in the gross income of the donor. In the case of a satisfaction of an installment obligation at other than face value, which is likewise considered a transfer under section 691(a)(2), see § 1.691(a)–5.

(b) If the estate of a decedent or any person transmits the right to income in respect of a decedent to another who would be required by section 691(a)(1) to include such income when received in his gross income, only the transferee will include such income when received in his gross income. In this situation, a transfer within the meaning of section 691(a)(2) has not occurred. This paragraph may be illustrated by the following:

(1) If a person entitled to income in respect of a decedent dies before receiving such income, only his estate or other person entitled to such income by bequest, devise, or inheritance from the latter decedent, or by reason of the death of the latter decedent, must include such amount in gross income when received.

(2) If a right to income in respect of a decedent is transferred by an estate to a specific or residuary legatee, only the specific or residuary legatee must include such income in gross income when received.

(3) If a trust to which is bequeathed a right of a decedent to certain payments of income terminates and transfers the right to a beneficiary, only the beneficiary must include such income in gross income when received.

If the transferee described in subparagraphs (1), (2), and (3) of this paragraph transfers his right to receive the amounts in the manner described in paragraph (a) of this section, the principles contained in paragraph (a) are applied to such transfer. On the other hand, if the transferee transmits his right in the manner described in this paragraph, the principles of this paragraph are again applied to such transfer.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.691(a)–5 Installment obligations acquired from decedent.

(a) Section 691(a)(4) has reference to an installment obligation which remains uncollected by a decedent (or a prior decedent) and which was originally acquired in a transaction the income from which was properly reportable by the decedent on the installment method under section 453. Under the provisions of section 691(a)(4), an amount equal to the excess of the face value of the obligation over its basis in the hands of the decedent (determined under section 453(d)(2) and the regulations thereunder) shall be considered an amount of income in respect of a decedent and shall be treated as such. The decedent's estate (or the person entitled to receive such income by bequest or inheritance from the decedent or by reason of the decedent's death) shall include in its gross income when received the same proportion of any payment in satisfaction of such obligations as would be returnable as income by the decedent if he had lived and received such payment. No gain on account of the transmission of such obligations by the decedent's death is required to be reported as income in the return of the decedent for the year of his death. See § 1.691(e)–1 for special provisions relating to the filing of an election to have the provisions of section 691(a)(4) apply in the case of installment obligations in respect of which section 44(d) of the Internal Revenue Code of 1939 (or corresponding provisions of prior law) would have applied but for the filing of a bond referred to therein.

(b) If an installment obligation described in paragraph (a) of this section is transferred within the meaning of section 691(a)(2) and paragraph (a) of § 1.691(a)–4, the entire installment obligation transferred shall be considered a right to income in respect of a decedent but the amount includible in the gross income of the transferor shall be reduced by an amount equal to the basis of the obligation in the hands of the decedent (determined under section 453(d)(2) and the regulations thereunder) adjusted, however, to take into account the receipt of any installment payments after the decedent's death and before such transfer. Thus, the amount includible in the gross income of the transferor shall be the fair market value of such obligation at the time of the transfer or the consideration received for the transfer of the installment obligation, whichever is greater, reduced by the basis of the obligation as described in the preceding sentence. For purposes of this paragraph, the term "transfer" in section 691(a)(2) and paragraph (a) of § 1.691(a)–4 includes the satisfaction of an installment obligation at other than face value.

(c) The application of this section may be illustrated by the following example:

Example. An heir of a decedent is entitled to collect an installment obligation with a face value of $100, a fair market value of $80, and a basis in the hands of the decedent of $60. If the heir collects the obligation at face value, the excess of the amount collected over the basis is considered income in respect of a decedent and includible in the gross income of the heir under section 691(a)(1). In this case, the amount includible would be $40 ($100 less $60). If the heir collects the obligation at $90, an amount other than face value, the entire obligation is considered a right to receive income in respect of a decedent but the amount ordinarily required to be included in the heir's gross income under section 691(a)(2) (namely, the consideration received in satisfaction of the installment obligation or its fair market value, whichever is greater) shall be reduced by the amount of the basis of the obligation in the hands of the decedent. In this case, the amount includible would be $30 ($90 less $60).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6808, 30 FR 3435, March 16, 1965]

§ 1.691(b)–1 Allowance of deductions and credit in respect to decedents.

(a) Under section 691(b) the expenses, interest, and taxes described in sections 162, 163, 164, and 212 for which the decedent (or a prior decedent) was liable, which were not properly allowable as a deduction in his last taxable year or any prior taxable year, are allowed when paid—

(1) As a deduction by the estate; or

(2) If the estate was not liable to pay such obligation, as a deduction by the person who by bequest, devise, or inheritance from the decedent or by reason of the death of the decedent acquires,

subject to such obligation, an interest in property of the decedent (or the prior decedent).

Similar treatment is given to the foreign tax credit provided by section 33. For the purposes of subparagraph (2) of this paragraph, the right to receive an amount of gross income in respect of a decedent is considered property of the decedent; on the other hand, it is not necessary for a person, otherwise within the provisions of subparagraph (2) of this paragraph, to receive the right to any income in respect of a decedent. Thus, an heir who receives a right to income in respect of a decedent (by reason of the death of the decedent) subject to any income tax imposed by a foreign country during the decedent's life, which tax must be satisfied out of such income, is entitled to the credit provided by section 33 when he pays the tax. If a decedent who reported income by use of the cash receipts and disbursements method owned real property on which accrued taxes had become a lien, and if such property passed directly to the heir of the decedent in a jurisdiction in which real property does not become a part of a decedent's estate, the heir, upon paying such taxes, may take the same deduction under section 164 that would be allowed to the decedent if, while alive, he had made such payment.

(b) The deduction for percentage depletion is allowable only to the person (described in section 691(a)(1)) who receives the income in respect of the decedent to which the deduction relates, whether or not such person receives the property from which such income is derived. Thus, an heir who (by reason of the decedent's death) receives income derived from sales of units of mineral by the decedent (who reported income by use of the cash receipts and disbursements method) shall be allowed the deduction for percentage depletion, computed on the gross income from such number of units as if the heir had the same economic interest in the property as the decedent. Such heir need not also receive any interest in the mineral property other than such income. If the decedent did not compute his deduction for depletion on the basis of percentage depletion, any deduction for depletion to which the decedent was entitled at the date of his death would be allowable in computing his taxable income for his last taxable year, and there can be no deduction in respect of the decedent by any other person for such depletion.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.691(c)-1 Deduction for estate tax attributable to income in respect of a decedent.

(a) In general. A person who is required to include in gross income for any taxable year an amount of income in respect of a decedent may deduct for the same taxable year that portion of the estate tax imposed upon the decedent's estate which is attributable to the inclusion in the decedent's estate of the right to receive such amount. The deduction is determined as follows:

(1) Ascertain the net value in the decedent's estate of the items which are included under section 691 in computing gross income. This is the excess of the value included in the gross estate on account of the items of gross income in respect of the decedent (see § 1.691(a)-1 and paragraph (c) of this section) over the deductions from the gross estate for claims which represent the deductions and credit in respect of the decedent (see § 1.691(b)-1). But see section 691(d) and paragraph (b) of § 1.691(d)-1 for computation of the special value of a survivor's annuity to be used in computing the net value for estate tax purposes in cases involving joint and survivor annuities.

(2) Ascertain the portion of the estate tax attributable to the inclusion in the gross estate of such net value. This is the excess of the estate tax over the estate tax computed without including such net value in the gross estate. In computing the estate tax without including such net value in the gross estate, any estate tax deduction (such as the marital deduction) which may be based upon the gross estate shall be recomputed so as to take into account the exclusion of such net value from the gross estate. See example (2), paragraph (e) of § 1.691(d)-1.

For purposes of this section, the term "estate tax" means the tax imposed under section 2001 or 2101 (or the corresponding provisions of the Internal Revenue Code of 1939), reduced by the credits against such tax. Each person including in gross income an amount of income in respect of a decedent may deduct as his share of the portion of the estate tax (computed under subparagraph (2) of this paragraph) an amount which bears the same ratio to such portion as the value in the gross estate of the right to the income included by such person in gross income (or the amount included in gross income if lower) bears to the value in the gross estate of all the items of gross income in respect of the decedent.

(b) Prior decedent. If a person is required to include in gross income an amount of income in respect of a prior decedent, such person may deduct for the same taxable year that portion of the estate tax imposed upon the prior decedent's

estate which is attributable to the inclusion in the prior decedent's estate of the value of the right to receive such amount. This deduction is computed in the same manner as provided in paragraph (a) of this section and is in addition to the deduction for estate tax imposed upon the decedent's estate which is attributable to the inclusion in the decedent's estate of the right to receive such amount.

(c) Amounts deemed to be income in respect of a decedent. For purposes of allowing the deduction under section 691(c), the following items are also considered to be income in respect of a decedent under section 691(a):

(1) The value for estate tax purposes of stock options in respect of which amounts are includible in gross income under section 421(b) (prior to amendment by section 221(a) of the Revenue Act of 1964), in the case of taxable years ending before January 1, 1964, or under section 422(c)(1), 423(c), or 424(c)(1), whichever is applicable, in the case of taxable years ending after December 31, 1963. See section 421(d)(6) (prior to amendment by sec. 221(a) of the Revenue Act of 1964), in the case of taxable years ending before January 1, 1964, and section 421(c)(2), in the case of taxable years ending after December 31, 1963.

(2) Amounts received by a surviving annuitant during his life expectancy period as an annuity under a joint and survivor annuity contract to the extent included in gross income under section 72. See section 691(d).

(d) Examples. Paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). X, an attorney who kept his books by use of the cash receipts and disbursements method, was entitled at the date of his death to a fee for services rendered in a case not completed at the time of his death, which fee was valued in his estate at $1,000, and to accrued bond interest, which was valued in his estate at $500. In all, $1,500 was included in his gross estate in respect of income described in section 691(a)(1). There were deducted as claims against his estate $150 for business expenses for which his estate was liable and $50 for taxes accrued on certain property which he owned. In all, $200 was deducted for claims which represent amounts described in section 691(b) which are allowable as deductions to his estate or to the beneficiaries of his estate. His gross estate was $185,000 and, considering deductions of $15,000 and an exemption of $60,000, his taxable estate amounted to $110,000. The estate tax on this amount is $23,700 from which is subtracted a $75 credit for State death taxes leaving an estate tax liability of $23,625. In the year following the closing of X's estate, the fee in the amount of $1,200 was collected by X's son, who was the sole beneficiary of the estate. This amount was included under section 691(a)(1)(C) in the son's gross income. The son may deduct, in computing his taxable income for such year, $260 on account of the estate tax attributable to such income, computed as follows:

(1) (i) Value of income described in section 691(a)(1) included in computing gross estate	$1,500
(ii) Deductions in computing gross estate for claims representing deductions described in section 691(b)	200
(iii) Net value of items described in section 691(a)(1)	1,300
(2) (i) Estate tax	23,625
(ii) Less: Estate tax computed without including $1,300 (item (1)(iii)) in gross estate	23,235
(iii) Portion of estate tax attributable to net value of items described in section 691(a)(1)	390
(3) (i) Value in gross estate of items described in section 691(a)(1) received in taxable year (fee)	1,000
(ii) Value in gross estate of all income items described in section 691(a)(1) (item (1)(i))	1,500
(iii) Part of estate tax deductible on account of receipt of $1,200 fee (1,000/1,500 of $390)	260

Although $1,200 was later collected as the fee, only the $1,000 actually included in the gross estate is used in the above computations. However, to avoid distortion, section 691(c) provides that if the value included in the gross estate is greater than the amount finally collected, only the amount collected shall be used in the above computations. Thus, if the amount collected as the fee were only $500, the estate tax deductible on the receipt of such amount would be 500/1,500 of $390, or $130. With respect to taxable years ending before January 1, 1964, see paragraph (d)(3) of § 1.421–5 for a similar example involving a restricted stock option. With respect to taxable years ending after December 31, 1963, see paragraph (c)(3) of § 1.421–8 for a similar example involving a stock option subject to the provisions of part II of subchapter D.

Example (2). Assume that in example (1) the fee valued at $1,000 had been earned by prior decedent Y and had been inherited by X who died before collecting it. With regard to the son, the fee would be considered income in respect of a prior decedent. Assume further that the fee was valued at $1,000 in Y's estate, that the net value in Y's estate of items described in section 691(a)(1) was $5,000 and that the estate tax imposed on Y's estate attributable to such net value was $550. In such case, the portion of such estate tax attributable to the fee would be 1,000/5,000 of $550, or $110. When the son collects the $1,200 fee, he will receive for the same taxable year a deduction of $110 with respect to the estate tax imposed on the estate of prior decedent Y as well as the deduction of $260 (as computed in example (1)) with respect to the estate tax imposed on the estate of decedent X.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6887, 31 FR 8812, June 24, 1966]

§ 1.691(c)–2 Estates and trusts.

(a) In the case of an estate or trust, the deduction prescribed in section 691(c) is determined in the same manner as described in § 1.691(c)–1, with the following exceptions:

(1) If any amount properly paid, credited, or required to be distributed by an estate or trust to a beneficiary consists of income in respect of a decedent received by the estate or trust during the taxable year—

(i) Such income shall be excluded in determining the income in respect of the decedent with respect to which the estate or trust is entitled to a deduction under section 691(c), and

(ii) Such income shall be considered income in respect of a decedent to such beneficiary for purposes of allowing the deduction under section 691(c) to such beneficiary.

(2) For determination of the amount of income in respect of a decedent received by the beneficiary, see sections 652 and 662, and §§ 1.652(b)–2 and 1.662(b)–2. However, for this purpose, distributable net income as defined in section 643(a) and the regulations thereunder shall be computed without taking into account the estate tax deduction provided in section 691(c) and this section. Distributable net income as modified under the preceding sentence shall be applied for other relevant purposes of subchapter J, chapter 1 of the Code, such as the deduction provided by section 651 or 661, or subpart D, part I of subchapter J, relating to excess distributions by trusts.

(3) The rule stated in subparagraph (1) of this paragraph does not apply to income in respect of a decedent which is properly allocable to corpus by the fiduciary during the taxable year but which is distributed to a beneficiary in a subsequent year. The deduction provided by section 691(c) in such a case is allowable only to the estate or trust. If any amount properly paid, credited, or required to be distributed by a trust qualifies as a distribution under section 666, the fact that a portion thereof constitutes income in respect of a decedent shall be disregarded for the purposes of determining the deduction of the trust and of the beneficiaries under section 691(c) since the deduction for estate taxes was taken into consideration in computing the undistributed net income of the trust for the preceding taxable year.

(b) This section shall apply only to amounts properly paid, credited, or required to be distributed in taxable years of an estate or trust beginning after December 31, 1953, and ending after August 16, 1954, except as otherwise provided in paragraph (c) of this section.

(c) In the case of an estate or trust heretofore taxable under the provisions of the Internal Revenue Code of 1939, amounts paid, credited, or to be distributed during its first taxable year subject to the Internal Revenue Code of 1954 which would have been treated as paid, credited, or to be distributed on the last day of the preceding taxable year if the Internal Revenue Code of 1939 were still applicable shall not be subject to the provisions of section 691(c)(1)(B) or this section. See section 683 and the regulations thereunder.

(d) The provisions of this section may be illustrated by the following example, in which it is assumed that the estate and the beneficiary make their returns on the calendar year basis:

Example. (1) The fiduciary of an estate receives taxable interest of $5,500 and income in respect of a decedent of $4,500 during the taxable year. Neither the will of the decedent nor local law requires the allocation to corpus of income in respect of a decedent. The estate tax attributable to the income in respect of a decedent is $1,500. In his discretion, the fiduciary distributes $2,000 (falling within sections 661(a) and 662(a)) to a beneficiary during that year. On these facts the fiduciary and beneficiary are respectively entitled to estate tax deductions of $1,200 and $300, computed as follows:

(2) Distributable net income computed under section 643(a) without regard to the estate tax deduction under section 691(c) is $10,000, computed as follows:

Taxable interest	$5,500
Income in respect of a decedent	4,500
Total	10,000

(3) Inasmuch as the distributable net income of $10,000 exceeds the amount of $2,000 distributed to the beneficiary, the deduction allowable to the estate under section 661(a) and the amount taxable to the beneficiary under section 662(a) is $2,000.

(4) The character of the amounts distributed to the beneficiary under section 662(b) is shown in the following table:

	Taxable interest	Income in respect of a decedent	Total
Distributable net income	$5,500	$4,500	$10,000
Amount deemed distributed under section 662(b)	1,100	900	2,000

(5) Accordingly, the beneficiary will be entitled to an estate tax deduction of $300 (900/4,500×$1,500) and the estate will be entitled to an estate tax deduction of $1,200 (3,600/4,500×$1,500).

(6) The taxable income of the estate is $6,200, computed as follows:

Gross income		$10,000
Less:		
Distributions to the beneficiary	$2,000	
Estate tax deduction under section 691(c)	1,200	
Personal exemption	600	
		3,800
Taxable income		6,200

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.691(d)–1 Amounts received by surviving annuitant under joint and survivor annuity contract.

(a) In general. Under section 691(d), annuity payments received by a surviving annuitant under

a joint and survivor annuity contract (to the extent indicated in paragraph (b) of this section) are treated as income in respect of a decedent under section 691(a) for the purpose of allowing the deduction for estate tax provided for in section 691(c)(1)(A). This section applies only if the deceased annuitant died after December 31, 1953, and after the annuity starting date as defined in section 72(c)(4).

(b) Special value for surviving annuitant's payments. Section 691(d) provides a special value for the surviving annuitant's payments to determine the amount of the estate tax deduction provided for in section 691(c)(1)(A). This special value is determined by multiplying—

(1) The excess of the value of the annuity at the date of death of the deceased annuitant over the total amount excludable from the gross income of the surviving annuitant under section 72 during his life expectancy period (see paragraph (d)(1)(i) of this section)

by

(2) A fraction consisting of the value of the annuity for estate tax purposes over the value of the annuity at the date of death of the deceased annuitant.

This special value is used for the purpose of determining the net value for estate tax purposes (see section 691(c)(2)(B) and paragraph (a)(1) of § 1.691(c)–1) and for the purpose of determining the portion of estate tax attributable to the survivor's annuity (see paragraph (a) of § 1.691(c)–1).

(c) Amount of deduction. The portion of estate tax attributable to the survivor's annuity (see paragraph (a) of § 1.691(c)–1) is allowable as a deduction to the surviving annuitant over his life expectancy period. If the surviving annuitant continues to receive annuity payments beyond this period, there is no further deduction under section 691(d). If the surviving annuitant dies before expiration of such period, there is no compensating adjustment for the unused deduction.

(d) Definitions. **(1)** For purposes of section 691(d) and this section—

(i) The term "life expectancy period" means the period beginning with the first day of the first period for which an amount is received by the surviving annuitant under the contract and ending with the close of the taxable year with or in which falls the termination of the life expectancy of the surviving annuitant.

(ii) The life expectancy of the surviving annuitant shall be determined as of the date of death of the deceased annuitant, with reference to actuarial Table I set forth in § 1.72–9 (but without making any adjustment under paragraph (a)(2) of § 1.72–5).

(iii) The value of the annuity at the date of death of the deceased annuitant shall be the entire value of the survivor's annuity determined by reference to the principles set forth in section 2031 and the regulations thereunder, relating to the valuation of annuities for estate tax purposes.

(iv) The value of the annuity for estate tax purposes shall be that portion of the value determined under subdivision (iii) of this subparagraph which was includible in the deceased annuitant's gross estate.

(2) The determination of the "life expectancy period" of the survivor for purposes of section 691(d) may be illustrated by the following example:

Example. H and W file their income tax returns on the calendar year basis. H dies on July 15, 1955, on which date W is 70 years of age. On August 1, 1955, W receives a monthly payment under a joint and survivor annuity contract. W's life expectancy determined as of the date of H's death is 15 years as determined from Table I in § 1.72–9; thus her life expectancy ends on July 14, 1970. Under the provisions of section 691(d), her life expectancy period begins as of July 1, 1955, and ends as of December 31, 1970, thus giving her a life expectancy period of 15½ years.

(e) Examples. The application of section 691(d) and this section may be illustrated by the following examples:

Example (1). (1) H and W, husband and wife, purchased a joint and survivor annuity contract for $203,800 providing for monthly payments of $1,000 starting January 28, 1954, and continuing for their joint lives and for the remaining life of the survivor. H contributed $152,850 and W contributed $50,950 to the cost of the annuity. As of the annuity starting date, January 1, 1954, H's age at his nearest birthday was 70 and W's age at her nearest birthday was 67. H dies on January 1, 1957, and beginning on January 28, 1957, W receives her monthly payments of $1,000. The value of the annuity at the date of H's death is $159,000 (see paragraph (d)(1)(iii) of this section), and the value of the annuity for estate tax purposes (see paragraph (d)(1)(iv) of this section) is $119,250 (152,850/203,800 of $159,000). As of the date of H's death, W's age is 70 and her life expectancy period is 15 years (see paragraph (d) of this section for method of computation). Both H and W reported income by use of the cash receipts and disbursements method and filed income tax returns on the calendar year basis.

(2) The following computations illustrate the application of section 72 in determining the excludable portions of the annuity payments to W during her life expectancy period:

Amount of annuity payments per year (12×$1,000)	$12,000

Life expectancy of H and W as of the annuity starting date (see section 72(c)(3)(A) and Table II of § 1.72–9 (male, age 70; female, age 67))	19.7
Expected return as of the annuity starting date, January 1, 1954 ($12,000 × 19.7 as determined under section 72(c)(3)(A) and paragraph (b) of § 1.72–5)	$236,400
Investment in the contract as of the annuity starting date, Jan. 1, 1954 (see section 72(c)(1) and paragraph (a) of § 1.72–6)	$203,800
Exclusion ratio (203,800/236,400 as determined under section 72(b) and § 1.72–4) (percent)	86.2
Exclusion per year under section 72 ($12,000 × 86.2 percent)	$10,344
Excludable during W's life expectancy period ($10,344 × 15)	$155,160

(3) For the purpose of computing the deduction for estate tax under section 691(c), the value for estate tax purposes of the amounts includible in W's gross income and considered income in respect of a decedent by virtue of section 691(d)(1) is $2,880. This amount is arrived at in accordance with the formula contained in section 691(d)(2), as follows:

Value of annuity at the date of H's death	$159,000
Total amount excludable from W's gross income under section 72 during W's life expectancy period (see subparagraph (2) of this example)	$155,160
Excess	$3,840
Ratio which value of annuity for estate tax purposes bears to value of annuity at date of H's death (119,250/159,000) (percent)	75
Value for estate tax purposes (75 percent of $3,840)	$2,880

This amount ($2,880) is included in the items of income under section 691(a)(1) for the purpose of determining the estate tax attributable to each item under section 691(c)(1)(A). The estate tax determined to be attributable to the item of $2,880 is then allowed as a deduction to W over her 15-year life expectancy period (see example (2) of this paragraph).

Example (2). Assume, in addition to the facts contained in example (1) of this paragraph, that H was an attorney and was entitled at the date of his death to a fee for services rendered in a case not completed at the time of his death, which fee was valued at $1,000, and to accrued bond interest, which was valued at $500. Taking into consideration the annuity payments of example (1), valued at $2,880, a total of $4,380 was included in his gross estate in respect of income described in section 691(a)(1). There were deducted as claims against his estate $280 for business expenses for which his estate was liable and $100 for taxes accrued on certain property which he owned. In all, $380 was deducted for claims which represent amounts described in section 691(b) which are allowable as deductions to his estate or to the beneficiaries of his estate. His gross estate was $404,250 and considering deductions of $15,000, a marital deduction of $119,250 (assuming the annuity to be the only qualifying gift) and an exemption of $60,000, his taxable estate amounted to $210,000. The estate tax on this amount is $53,700 from which is subtracted a $175 credit for State death taxes, leaving an estate tax liability of $53,525. W may deduct, in computing her taxable income during each year of her 15-year life expectancy period, $14.73 on account of the estate tax attributable to the value for estate tax purposes of that portion of the annuity payments considered income in respect of a decedent, computed as follows:

(1) (i) Value of income described in section 691(a)(1) included in computing gross estate	$4,380.00
(ii) Deductions in computing gross estate for claims representing deductions described in section 691(b)	380.00
(iii) Net value of items described in section 691(a)(1)	4,000.00
(2) (i) Estate tax	53,525.00
(ii) Less: estate tax computed without including $4,000 (item (1)(iii)) in gross estate and by reducing marital deduction by $2,880 (portion of item (1)(iii) allowed as a marital deduction)	53,189.00
(iii) Portion of estate tax attributable to net value of income items	336.00
(3) (i) Value in gross estate of income attributable to annuity payments	$2,880.00
(ii) Value in gross estate of all income items described in section 691(a)(1) (item (1)(i))	4,380.00
(iii) Part of estate tax attributable to annuity income (2,880/4,380 of $336)	220.93
(iv) Deduction each year on account of estate tax attributable to annuity income ($220.93 ÷ 15 (life expectancy period))	14.73

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.691(e)–1 Installment obligations transmitted at death when prior law applied.

(a) In general—(1) Application of prior law. Under section 44(d) of the Internal Revenue Code of 1939 and corresponding provisions of prior law, gains and losses on account of the transmission of installment obligations at the death of a holder of such obligations were required to be reported in the return of the decedent for the year of his death. However, an exception to this rule was provided if there was filed with the Commissioner a bond assuring the return as income of any payment in satisfaction of these obligations in the same proportion as would have been returnable as income by the decedent had he lived and received such payments. Obligations in respect of which such bond was filed are referred to in this section as "obligations assured by bond".

(2) Application of present law. Section 691(a)(4) of the Internal Revenue Code of 1954 (effective for taxable years beginning after December 31, 1953, and ending after August 16, 1954) in effect makes the exception which under prior law applied to obligations assured by bond the general rule for obligations transmitted at death, but contains no requirement for a bond. Section 691(e)(1) provides that if the holder of the installment obligation makes a proper election, the provisions of section 691(a)(4) shall apply in the case of obligations assured by bond. Section 691(e)(1) further provides that the estate tax deduction provided by section 691(c)(1) is not allowable for any

amount included in gross income by reason of filing such an election.

(b) Manner and scope of election—(1) In general. The election to have obligations assured by bond treated as obligations to which section 691(a)(4) applies shall be made by the filing of a statement with respect to each bond to be released, containing the following information:

(i) The name and address of the decedent from whom the obligations assured by bond were transmitted, the date of his death, and the internal revenue district in which the last income tax return of the decedent was filed.

(ii) A schedule of all obligations assured by the bond on which is listed—

(a) The name and address of the obligors, face amount, date of maturity, and manner of payment of each obligation,

(b) The name, identifying number (provided under section 6109 and the regulations thereunder), and address of each person holding the obligations, and

(c) The name, identifying number, and address, of each person who at the time of the election possesses an interest in each obligation, and a description of such interest.

(iii) The total amount of income in respect of the obligations which would have been reportable as income by the decedent if he had lived and received such payment.

(iv) The amount of income referred to in subdivision (iii) of this subparagraph which has previously been included in gross income.

(v) An unqualified statement, signed by all persons holding the obligations, that they elect to have the provisions of section 691(a)(4) apply to such obligations and that such election shall be binding upon them, all current beneficiaries, and any person to whom the obligations may be transmitted by gift, bequest, or inheritance.

(vi) A declaration that the election is made under the penalties of perjury.

(2) Filing of statement. The statement with respect to each bond to be released shall be filed in duplicate with the district director of internal revenue for the district in which the bond is maintained. The statement shall be filed not later than the time prescribed for filing the return for the first taxable year (including any extension of time for such filing) to which the election applies.

(3) Effect of election. The election referred to in subparagraph (1) of this paragraph shall be irrevocable. Once an election is made with respect to an obligation assured by bond, it shall apply to all payments made in satisfaction of such obligation which were received during the first taxable year to which the election applies and to all such payments received during each taxable year thereafter, whether the recipient is the person who made the election, a current beneficiary, or a person to whom the obligation may be transmitted by gift, bequest, or inheritance. Therefore, all payments received to which the election applies shall be treated as payments made on installment obligations to which section 691(a)(4) applies. However, the estate tax deduction provided by section 691(c) is not allowable for any such payment. The application of this subparagraph may be illustrated by the following example:

Example. A, the holder of an installment obligation, died in 1952. The installment obligation was transmitted at A's death to B who filed a bond on Form 1132 pursuant to paragraph (c) of § 39.44–5 of Regulations 118 (26 CFR Part 39, 1939 ed.) for the necessary amount. On January 1, 1965, B, a calendar year taxpayer, filed an election under section 691(e) to treat the obligation assured by bond as an obligation to which section 691(a)(4) applies, and B's bond was released for 1964 and subsequent taxable years. B died on June 1, 1965, and the obligation was bequeathed to C. On January 1, 1966, C received an installment payment on the obligation which had been assured by the bond. Because B filed an election with respect to the obligation assured by bond, C is required to treat the proper proportion of the January 1, 1966, payment and all subsequent payments made in satisfaction of this obligation as income in respect of a decedent. However, no estate tax deduction is allowable to C under section 691(c)(1) for any estate tax attributable to the inclusion of the value of such obligation in the estate of either A or B.

(c) Release of bond. If an election according to the provisions of paragraph (b) of this section is filed, the liability under any bond filed under section 44(d) of the 1939 Code (or the corresponding provisions of prior law) shall be released with respect to each taxable year to which such election applies. However, the liability under any such bond for an earlier taxable year to which the election does not apply shall not be released until the district director of internal revenue for the district in which the bond is maintained is assured that the proper portion of each installment payment received in such taxable year has been reported and the tax thereon paid.

[T.D. 6808, 30 FR 3436, March 16, 1965]

§ 1.691(f)–1 Cross reference.

See section 753 and the regulations thereunder for application of section 691 to income in respect of a deceased partner.

[T.D. 6808, 30 FR 3436, March 16, 1965]

§ 1.692–1 Abatement of income taxes of certain members of the Armed Forces of the United States upon death.

(a)(1) This section applies if—

(i) An individual dies while in active service as a member of the Armed Forces of the United States, and

(ii) His death occurs while he is serving in a combat zone (as determined under section 112), or at any place as a result of wounds, disease, or injury incurred while he was serving in a combat zone.

(2) If an individual dies as described in paragraph (a)(1), the following liabilities for tax, under Subtitle A of the Internal Revenue Code of 1954 or under Chapter 1 of the Internal Revenue Code of 1939, are canceled:

(i) The liability of the deceased individual, for the last taxable year, ending on the date of his death, and for any prior taxable year ending on or after the first day he served in a combat zone in active service as a member of the U.S. Armed Forces after June 24, 1950, and

(ii) The liability of any other person to the extent the liability is attributable to an amount received after the individual's death (including income in respect of a decedent under section 691) which would have been includible in the individual's gross income for his taxable year in which the date of his death falls (determined as if he had survived).

If the tax (including interest, additions to the tax, and additional amounts) is assessed, the assessment will be abated. If the amount of the tax is collected regardless of the date of collection), the amount so collected will be credited or refunded as an overpayment.

(3) If an individual dies as described in paragraph (a)(1), there will not be assessed any amount of tax of the individual for taxable years preceding the years specified in paragraph (a)(2), under Subtitle A of the Internal Revenue Code of 1954, Chapter 1 of the Internal Revenue Code of 1939, or corresponding provisions of prior revenue laws, remaining unpaid as of the date of death. If any such unpaid tax (including interest, additions to the tax, and additional amounts) has been assessed, the assessments will be abated. If the amount of any such unpaid tax is collected after the date of death, the amount so collected will be credited or refunded as an overpayment.

(4) As to what constitutes active service as a member of the Armed Forces, service in a combat zone, and wounds, disease, or injury incurred while serving in a combat zone, see section 112. As to who are members of the Armed Forces, see section 7701(a)(15). As to the period of time within which any claim for refund must be filed, see sections 6511(a) and 7508(a)(1)(E).

(b) If such an individual and his spouse have for any such year filed a joint return, the tax abated, credited, or refunded pursuant to the provisions of section 692 for such year shall be an amount equal to that portion of the joint tax liability which is the same percentage of such joint tax liability as a tax computed upon the separate income of such individual is of the sum of the taxes computed upon the separate income of such individual and his spouse, but with respect to taxable years ending before June 24, 1950, and with respect to taxable years ending before the first day such individual served in a combat zone, as determined under section 112, the amount so abated, credited, or refunded shall not exceed the amount unpaid at the date of death. For such purpose, the separate tax of each spouse—

(1) For taxable years beginning after December 31, 1953, and ending after August 16, 1954, shall be the tax computed under Subtitle A of the Internal Revenue Code of 1954 before the application of sections 31, 32, 6401(b), and 6402, but after the application of section 33, as if such spouse were required to make a separate income tax return; and

(2) For taxable years beginning before January 1, 1954, and for taxable years beginning after December 31, 1953, and ending before August 17, 1954, shall be the tax computed under Chapter 1 of the Internal Revenue Code of 1939 before the application of sections 32, 35, and 322(a), but after the application of section 31, as if such spouse were required to make a separate income tax return.

(c) If such an individual and his spouse filed a joint declaration of estimated tax for the taxable year ending with the date of his death, the estimated tax paid pursuant to such declaration may be treated as the estimated tax of either such individual or his spouse, or may be divided between them, in such manner as his legal representative and such spouse may agree. Should they agree to treat such estimated tax, or any portion thereof, as the estimated tax of such individual, the estimated tax so paid shall be credited or refunded as an

overpayment for the taxable year ending with the date of his death.

(d) For the purpose of determining the tax which is unpaid at the date of death, amounts deducted and withheld under Chapter 24, Subtitle C of the Internal Revenue Code of 1954, or under Subchapter D, Chapter 9 of the Internal Revenue Code of 1939 (relating to income tax withheld at source on wages), constitute payment of tax imposed under Subtitle A of the Internal Revenue Code of 1954 or under Chapter 1 of the Internal Revenue Code of 1939, as the case may be.

(e) This section shall have no application whatsoever with respect to the liability of an individual as a transferee of property of a taxpayer where such liability relates to the tax imposed upon the taxpayer by Subtitle A of the Internal Revenue Code of 1954 or by Chapter 1 of the Internal Revenue Code of 1939.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7543, 43 FR 19392, May 5, 1978]

PARTNERS AND PARTNERSHIPS

Determination Of Tax Liability

§ 1.701–1 Partners, not partnership, subject to tax.

Partners are liable for income tax only in their separate capacities. Partnerships as such are not subject to the income tax imposed by Subtitle A but are required to make returns of income under the provisions of section 6031 and the regulations thereunder. For definition of the terms "partner" and "partnership", see sections 761 and 7701(a)(2), and the regulations thereunder. For provisions relating to the election of certain partnerships to be taxed as domestic corporations, see section 1361 and the regulations thereunder.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.702–1 Income and credits of partner.

(a) General rule. Each partner is required to take into account separately in his return his distributive share, whether or not distributed, of each class or item of partnership income, gain, loss, deduction, or credit described in subparagraphs (1) through (9) of this paragraph. (For the taxable year in which a partner includes his distributive share of partnership taxable income, see section 706(a) and § 1.706–1(a). Such distributive share shall be determined as provided in section 704 and § 1.704–1.) Accordingly, in determining his income tax:

(1) Each partner shall take into account, as part of his gains and losses from sales or exchanges of capital assets held for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), his distributive share of the combined net amount of such gains and losses of the partnership.

(2) Each partner shall take into account, as part of his gains and losses from sales or exchanges of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), his distributive share of the combined net amount of such gains and losses of the partnership.

(3) Each partner shall take into account, as part of his gains and losses from sales or exchanges of property described in section 1231 (relating to property used in the trade or business and involuntary conversions), his distributive share of the combined net amount of such gains and losses of the partnership. The partnership shall not combine such items with items set forth in subparagraph (1) or (2) of this paragraph.

(4) Each partner shall take into account, as part of the charitable contributions paid by him, his distributive share of each class of charitable contributions paid by the partnership within the partnership's taxable year. Section 170 determines the extent to which such amount may be allowed as a deduction to the partner. For the definition of the term "charitable contribution", see section 170(c).

(5) Each partner shall take into account, as part of the dividends received by him from domestic corporations, his distributive share of dividends received by the partnership, with respect to which the partner is entitled to a credit under section 34 (for dividends received on or before December 31, 1964), an exclusion under section 116, or a deduction under part VIII, Subchapter B, Chapter 1 of the Code.

(6) Each partner shall take into account, as part of his taxes described in section 901 which have been paid or accrued to foreign countries or to possessions of the United States, his distributive share of such taxes which have been paid or accrued by the partnership, according to its meth-

od of treating such taxes. A partner may elect to treat his total amount of such taxes, including his distributive share of such taxes of the partnership, as a deduction under section 164 or as a credit under section 901, subject to the provisions of sections 901 through 905.

(7) Each partner shall take into account, as part of the partially tax-exempt interest received by him on obligations of the United States or on obligations of instrumentalities of the United States, as described in section 35 or section 242, his distributive share of such partially tax-exempt interest received by the partnership. However, if the partnership elects to amortize premiums on bonds as provided in section 171, the amount received on such obligations by the partnership shall be reduced by the amortizable bond premium applicable to such obligations as provided in section 171(a)(3).

(8)(i) Each partner shall take into account separately, as part of any class of income, gain, loss, deduction, or credit, his distributive share of the following items: Recoveries of bad debts, prior taxes, and delinquency amounts (section 111); gains and losses from wagering transactions (section 165(d)); soil and water conservation expenditures (section 175); nonbusiness expenses as described in section 212; medical, dental, etc., expenses (section 213); expenses for care of certain dependents (section 214); alimony, etc., payments (section 215); amounts representing taxes and interest paid to cooperative housing corporations (section 216); intangible drilling and developments costs (section 263(c)); pre-1970 exploration expenditures (section 615); certain mining exploration expenditures (section 617); income, gain, or loss to the partnership under section 751(b); and any items of income, gain, loss, deduction, or credit subject to a special allocation under the partnership agreement which differs from the allocation of partnership taxable income or loss generally.

(ii) Each partner must also take into account separately his distributive share of any partnership item which if separately taken into account by any partner would result in an income tax liability for that partner different from that which would result if that partner did not take the item into account separately. Thus, if any partner would qualify for the retirement income credit under section 37 if the partnership pensions and annuities, interest, rents, dividends, and earned income were separately stated, such items must be separately stated for all partners. Under section 911(a), if any partner is a bona fide resident of a foreign country who may exclude from his gross income the part of his distributive share which qualifies as earned income as defined in section 911(b), the earned income of the partnership for all partners must be separately stated. Similarly, all relevant items of income or deduction of the partnership must be separately stated for all partners in determining the applicability of section 270 (relating to "hobby losses") and the recomputation of tax thereunder for any partner.

(iii) Each partner shall aggregate the amount of his separate deductions or exclusions and his distributive share of partnership deductions or exclusions separately stated in determining the amount allowable to him of any deduction or exclusion under Subtitle A of the Code as to which a limitation is imposed. For example, partner A has individual domestic exploration expenditures of $300,000. He is also a member of the AB partnership which in 1971 in its first year of operation has foreign exploration expenditures of $400,000. A's distributable share of this item is $200,000. However, the total amount of his distributable share that A can deduct as exploration expenditures under section 617(a) is limited to $100,000 in view of the limitation provided in section 617(h). Therefore, the excess of $100,000 ($200,000 minus $100,000) is not deductible by A.

(9) Each partner shall also take into account separately his distributive share of the taxable income or loss of the partnership, exclusive of items requiring separate computations under subparagraphs (1) through (8) of this paragraph. For limitation on allowance of a partner's distributive share of partnership losses, see section 704(d) and paragraph (d) of § 1.704–1.

(b) **Character of items constituting distributive share.** The character in the hands of a partner of any item of income, gain, loss, deduction, or credit described in section 702(a)(1) through (8) shall be determined as if such item were realized directly from the source from which realized by the partnership or incurred in the same manner as incurred by the partnership. For example, a partner's distributive share of gain from the sale of depreciable property used in the trade or business of the partnership shall be considered as gain from the sale of such depreciable property in the hands of the partner. Similarly, a partner's distributive share of partnership "hobby losses" (section 270) or his distributive share of partnership charitable contributions to organizations qualifying under section 170(b)(1)(A) retains such character in the hands of the partner.

(c) Gross income of a partner. (1) Where it is necessary to determine the amount or character of the gross income of a partner, his gross income shall include the partner's distributive share of the gross income of the partnership, that is, the amount of gross income of the partnership from which was derived the partner's distributive share of partnership taxable income or loss (including items described in section 702(a)(1) through (8)). For example, a partner is required to include his distributive share of partnership gross income:

(i) In computing his gross income for the purpose of determining the necessity of filing a return (section 6012 (a));

(ii) In determining the application of the provisions permitting the spreading of income for services rendered over a 36-month period (section 1301, as in effect for taxable years beginning before January 1, 1964);

(iii) In computing the amount of gross income received from sources within possessions of the United States (section 931); and

(iv) In determining a partner's "gross income from farming" (sections 175 and 6073).

(2) In determining the applicability of the 6-year period of limitation on assessment and collection provided in section 6501(e) (relating to omission of more than 25 percent of gross income), a partner's gross income includes his distributive share of partnership gross income (as described in section 6501(e)(1)(A)(i)). In this respect, the amount of partnership gross income from which was derived the partner's distributive share of any item of partnership income, gain, loss, deduction, or credit (as included or disclosed in the partner's return) is considered as an amount of gross income stated in the partner's return for the purposes of section 6501(e). For example, A, who is entitled to one-fourth of the profits of the ABCD partnership, which has $10,000 gross income and $2,000 taxable income, reports only $300 as his distributive share of partnership profits. A should have shown $500 as his distributive share of profits, which amount was derived from $2,500 of partnership gross income. However, since A included only $300 on his return without explaining in the return the difference of $200, he is regarded as having stated in his return only $1,500 ($300/$500 of $2,500) as gross income from the partnership.

(d) Partners in community property States. If separate returns are made by a husband and wife domiciled in a community property State, and only one spouse is a member of the partnership, the part of his or her distributive share of any item or items listed in paragraph (a)(1) through (9) of this section which is community property, or which is derived from community property, should be reported by the husband and wife in equal proportions.

(e) Cross reference. For special rules in accordance with the principles of section 702 applicable solely for the purpose of the tax imposed by section 56 (relating to the minimum tax for tax preferences) see § 1.58–2(a).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6605, 27 FR 8097, Aug. 15, 1962; T.D. 6777, 29 FR 17809, Dec. 16, 1964; T.D. 6885, 31 FR 7803, June 2, 1966; T.D. 7192, 37 FR 12949, June 30, 1972; T.D. 7564, 43 FR 40496, Sept. 12, 1978; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.702–1T Temporary regulations on requirement to separately state meal, travel, and entertainment expenses (temporary).

Each partner shall take into account separately his or her distributive share of meal, travel, and entertainment expenses paid or incurred after December 31, 1986, by partnerships that have taxable years beginning before January 1, 1987, and ending with or within partners' taxable years beginning on or after January 1, 1987. In addition, with respect to skybox rentals under section 274(*l*)(2), each partner shall take into account separately his or her distributive share of rents paid or incurred after December 31, 1986, by partnerships that have taxable years beginning before January 1, 1989, and ending with or within partners' taxable years beginning on or after January 1, 1987.

[T.D. 8182, 53 FR 6603, March 2, 1988]

§ 1.702–2 Net operating loss deduction of partner.

For the purpose of determining a net operating loss deduction under section 172, a partner shall take into account his distributive share of items of income, gain, loss, deduction, or credit of the partnership. The character of any such item shall be determined as if such item were realized directly from the source from which realized by the partnership, or incurred in the same manner as incurred by the partnership. See section 702(b) and paragraph (b) of § 1.702–1. To the extent necessary to determine the allowance under section 172(d)(4) of the nonbusiness deductions of a partner (arising from both partnership and nonpartnership sources), the partner shall separately take into

account his distributive share of the deductions of the partnership which are not attributable to a trade or business and combine such amount with his nonbusiness deductions from nonpartnership sources. Such partner shall also separately take into account his distributive share of the gross income of the partnership not derived from a trade or business and combine such amount with his nonbusiness income from nonpartnership sources. See section 172 and the regulations thereunder. [T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.702-3T 4-year spread (temporary).

(a) Applicability. This section applies to a partner in a partnership if—

(1) The partnership is required by section 806 of the Tax Reform Act of 1986 (the 1986 Act), Pub.L. 99-514, 100 Stat. 2362, to change its taxable year for the first taxable year beginning after December 31, 1986 (partnership's year of change); and

(2) As a result of such change in taxable year, items from more than one taxable year of the partnership would, but for the provisions of this section, be included in the taxable year of the partner with or within which the partnership's year of change ends.

(b) Partner's treatment of items from the partnership's year of change—(1) In general. Except as provided in paragraph (c) of this section, if a partner's share of "income items" exceeds the partner's share of "expense items," the partner's share of each and every income and expense item shall be taken into account ratably (and retain its character) over the partner's first 4 taxable years beginning with the partner's taxable year with or within which the partnership's year of change ends.

(2) Definitions—(i) Income items. For purposes of this section, the term "income items" means the sum of—

(A) The partner's distributive share of taxable income (exclusive of separately stated items) from the partnership's year of change.

(B) The partner's distributive share of all separately stated income or gain items from the partnership's year of change, and

(C) Any amount includible in the partner's income under section 707(c) on account of payments during the partnership's year of change.

(ii) Expense items. For purposes of this section, the term "expense items" means the sum of—

(A) The partner's distributive share of taxable loss (exclusive of separately stated items) from the partnership's year of change, and

(B) The partner's distributive share of all separately stated items of loss or deduction from the partnership's year of change.

(c) Electing out of 4-year spread. A partner may elect out of the rules of paragraph (b) of this section by meeting the requirements of § 5h.5 (temporary regulations relating to elections under the Tax Reform Act of 1986).

(d) Special rules for a partner that is a partnership or S corporation—(1) In general. Except as provided in paragraph (d)(2) of this section, a partner that is a partnership or S corporation may, if otherwise eligible, use the 4-year spread (with respect to partnership interests owned by the partner) described in this section.

(2) Certain partners prohibited from using 4-year spread—(i) In general. Except as provided in paragraph (d)(2)(ii) of this section, a partner that is a partnership or S corporation may not use the 4-year spread (with respect to partnership interests owned by the partner) if such partner is also changing its taxable year pursuant to section 806 of the 1986 Act.

(ii) Exception. If a partner's year of change does not include any income or expense items with respect to the partnership's year of change, such partner may, if otherwise eligible, use the 4-year spread (with respect to such partnership interest) described in this section even though the partner is a partnership or S corporation. See examples (13) and (14) in paragraph (h) of this section.

(e) Basis of partner's interest. The basis of a partner's interest in a partnership shall be determined as if the partner elected not to spread the partnership items over 4 years, regardless of whether such election was in fact made. Thus, for example, if a partner is eligible for the 4-year spread and does not elect out of the 4-year spread pursuant to paragraph (c) of this section, the partner's basis in the partnership interest will be increased in the first year of the 4-year spread period by an amount equal to the excess of the income items over the expense items. However, the partner's basis will not be increased again, with respect to the unamortized income and expense items, as they are amortized over the 4-year spread period.

(f) Effect on other provisions of the Code. Except as provided in paragraph (e) of this section, determinations with respect to a partner, for purposes of other provisions of the Code, must be made with regard to the manner in which partnership items are taken into account under the rules of this section. Thus, for example, a partner who does not elect out of the 4–year spread must take into account, for purposes of determining net earnings from self-employment under section 1402(a) for a taxable year, only the ratable portion of partnership items for that taxable year.

(g) Treatment of dispositions—(1) In general. If a partnership interest is disposed of before the last taxable year in the 4–year spread period, unamortized income and expense items that are attributable to the interest disposed of and that would be taken into account by the partner for subsequent taxable years in the 4–year spread period shall be taken into account by the partner as determined under paragraph (g)(2) of this section. For purposes of this section, the term "disposed of" means any transfer, including (but not limited to) transfers by sale, exchange, gift, and by reason of death.

(2) Year unamortized items taken into account—(i) In general. If, at the end of a partner's taxable year, the fraction determined under paragraph (g)(2)(ii) of this section is—

(A) Greater than ⅔, the partner must continue to take the unamortized income and expense items into account ratably over the 4–year spread period;

(B) Greater than ⅓ but less than or equal to ⅔, the partner must, in addition to its ratable amortization, taken into account in such year 50 percent of the income and expense items that would otherwise be unamortized at the end of such year (however, this paragraph (g)(2)(i)(B) is only applied once with respect to a partner's interest in a particular partnership); or

(C) Less than or equal to ⅓, the partner must take into account the entire balance of unamortized income and expense items in such year.

(ii) Determination of fraction. For purposes of paragraph (g)(2)(i) of this section, the numerator of the fraction is the partner's proportionate interest in the partnership at the end of the partner's taxable year and the denominator is the partner's proportionate interest in the partnership as of the last day of the partnership's year of change.

(h) Examples. The provisions of this section may be illustrated by the following examples.

Example (1). Assume that P1, a partnership with a taxable year ending September 30, is required by the 1986 Act to change its taxable year to a calendar year. All of the partners of P1 are individual taxpayers reporting on a calendar year. P1 is required to change to a calendar year for its taxable year beginning October 1, 1987, and to file a return for the short taxable year ending December 31, 1987. Based on the above facts, the partners of P1 are required to include the items from more than one taxable year of P1 in income for their 1987 taxable year. Thus, under paragraph (b) of this section, if a partner's share of income items exceeds the partner's share of expense items, the partner's share of each and every income and expense item shall be taken into account ratably by such partner in each of the partner's first four taxable years beginning with the partner's 1987 taxable year, unless such partner elects under paragraph (c) of this section to include all such amounts in his 1987 taxable year.

Example (2). Assume the same facts as in example (1), except P1 is a personal service corporation with all of its employee-owners reporting on a calendar year. Although P1 is required to change to a calendar year for its taxable year beginning October 1, 1987, neither P1 nor its employee-owners obtain the benefits of a 4–year spread. Pursuant to section 806(e)(2)(C) of the 1986 Act, the 4–year spread provision is only applicable to short taxable years of partnerships and S corporations required to change their taxable year under the 1986 Act.

Example (3). Assume the same facts as example (1) and that I is one of the individual partners of P1. Further assume that I's distributive share of P1's taxable income for the short taxable year ended December 31, 1987 (*i.e.*, P1's year of change), is $10,000. In addition, I has $8,000 of separately stated expense from P1's year of change. Since I's income items (*i.e.*, $10,000 of taxable income) exceed I's expense items (*i.e.*, $8,000 of separately stated expense) attributable to P1's year of change, I is eligible for the 4–year spread provided by this section. If I does not elect out of the 4–year spread, I will recognize $2,500 of taxable income and $2,000 of separately stated expense in his 1987 calendar year return. Assuming I does not dispose of his partnership interest in P1 by December 31, 1989, the remaining $7,500 of taxable income and $6,000 of separately stated expense will be amortized (and retain its character) over I's next three taxable years (*i.e.*, 1988, 1989 and 1990).

Example (4). Assume the same facts as example (3), except that I disposes of his entire interest in P1 during 1988. Pursuant to paragraph (g) of this section, I would recognize $7,500 of taxable income and $6,000 of separately stated expense in his 1988 calendar year return.

Example (5). Assume the same facts as in example (3), except that I disposes of 50 percent of his interest in P1 during 1989. Pursuant to paragraph (g) of this section, I would recognize $3,750 of taxable income in his 1989 calendar year return ($2,500 ratable portion for 1989 plus 50 percent of the $2,500 of income items that would otherwise be unamortized at the end of 1989). I would also recognize $3,000 of separately stated expense items in 1989 ($2,000 ratable portion for 1989 plus 50 percent of the $2,000 of separately stated expense items that would otherwise be unamortized at the end of 1989).

Example (6). Assume the same facts as in example (1), except that X, a personal service corporation as defined in section 441(i), is a partner of P1. X is a calendar year taxpayer, and thus is not required to change its taxable year under the 1986 Act. The same result occurs as in example 1 (*i.e.*, unless X elects to the contrary, X is required to include one fourth of its share of income and expense items from P1's

year of change in the first four taxable years of X beginning with the 1987 taxable year).

Example (7). Assume the same facts as in example (6), except that X is a fiscal year personal service corporation with a taxable year ending September 30. X is required under the 1986 Act to change to a calendar year for its taxable year beginning October 1, 1987, and to file a return for its short year ending December 31, 1987. Based on the above facts, X is not required to include the items from more than one taxable year of P1 in any one taxable year of X. Thus, the provisions of this section do not apply to X, and X is required to include the full amount of income and expense items from P1's year of change in X's taxable income for X's short year ending December 31. Under section 443 of the Code, X is required to annualize the taxable income for its short year ending December 31, 1987.

Example (8). Assume that P2 is a partnership with a taxable year ending September 30. Under the 1986 Act, P2 would have been required to change its taxable year to a calendar year, effective for the taxable year beginning October 1, 1987. However, P2 properly changed its taxable year to a calendar year for the year beginning October 1, 1986, and filed a return for the short period ending December 31, 1986. The provisions of the 1986 Act do not apply to P2 because the short year ending December 31, 1986, was not required by the amendments made by section 806 of the 1986 Act. Thus, the partners of P2 are required to take all items of income and expense for the short taxable year ending December 31, 1986, into account for the taxable year with or within which such short year ends.

Example (9). Assume that P3 is a partnership with a taxable year ending March 31 and I, a calendar year individual, is a partner in P3. Under the 1986 Act, P3 would have been required to change its taxable year to a calendar year. However, under Rev.Proc. 87–32, P3 establishes and changes to a natural business year beginning with the taxable year ending June 30, 1987. Thus, P3 is required to change its taxable year under section 806 of the 1986 Act, and I is required to include items from more than one taxable year of P3 in one of her taxable years. Furthermore, I's share of P3's income items exceeds her share of P3's expense items for the short period April 1, 1987 through June 30, 1987. Accordingly, under this section, unless I elects to the contrary, I is required to take one fourth of her share of items of income and expense from P3's short taxable year ending June 30, 1987 into account for her taxable year ending December 31, 1987.

Example (10). Assume that P4 is a partnership with a taxable year ending March 31. Y, a C corporation, owns a 51 percent interest in the profits and capital of P4. Y reports its income on the basis of a taxable year ending March 31. P4 establishes and changes to a natural business year beginning with the taxable year ending June 30, 1987, under Rev.Proc. 87–32. Under the above facts, P4 is not required to change its taxable year because its March 31 taxable year was the taxable year of Y, the partner owning a majority of the partnership's profits and capital. Therefore, the remaining partners of P4 owning 49 percent of the profits and capital are not permitted the 4–year spread of the items of income and expense with respect to the short year, even though they may be required to include their distributive share of P4's items from more than one taxable year in one of their years.

Example (11). Assume that X and Y are C corporations with taxable years ending June 30. Each owns a 50–percent interest in the profits and capital of partnership P5. P5 has a taxable year ending March 31. Assume that P5 cannot establish a business purpose in order to retain a taxable year ending March 31, and thus P5 must change to a June 30 taxable year, the taxable year of its partners. Furthermore, assume that X's share of P5's income items exceeds its share of P5's expense items for P5's short taxable year ending June 30, 1987. Unless X elects out of the 4–year spread, the taxable year ending June 30, 1987, is the first of the four taxable years in which X must take into account its share of the items of income and expense resulting from P5's short taxable year ending June 30, 1987.

Example (12). Assume that I, an individual who reports income on the basis of the calendar year, is a partner in two partnerships, P6 and P7. Both partnerships have a taxable year ending September 30. Neither partnership can establish a business purpose for retaining its taxable year. Consequently, each partnership will change its taxable year to December 31, for the taxable year beginning October 1, 1987. The election to avoid a 4–year spread is made at the partner level; in addition, a partner may make such elections on a partnership-by-partnership basis. Thus, assuming I is eligible to obtain the 4–year spread with respect to income and expense items from partnerships P6 and P7, I may use the 4–year spread with respect to items from P6, while not using the 4–year spread with respect to items from P7.

Example (13). I, an individual taxpayer using a calendar year, owns an interest in P8, a partnership using a taxable year ending June 30. Furthermore, P8 owns an interest in P9, a partnership with a taxable year ending March 31. Under section 806 of the 1986 Act, P8 will be required to change to a taxable year ending December 31, while P9 will be required to change to a taxable year ending June 30. As a result, P8's year of change will be July 1 through December 31, 1987, while P9's year of change will be from April 1 through June 30, 1987. Since P9's year of change does not end with or within P8's year of change, paragraph (d)(2) of this section does not prevent P8 from obtaining a 4–year spread with respect to its interest in P9.

Example (14). The facts are the same as in example (13), except that P9 has a taxable year ending September 30, and under the 1986 Act P9 is required to change to a taxable year ending December 31. Therefore, P9's year of change will be from October 1, 1987 through December 31, 1987. Although P8's year of change from July 1, 1987 through December 31, 1987 includes two taxable years of P9 (*i.e.*, October 1, 1986 through September 30, 1987 and October 1, 1987 through December 31, 1987), paragraph (d)(2) of this section prohibits P8 from using the 4–year spread with respect to its interest in P9, because P9's year of change ends with or within P8's year of change.

[T.D. 8167, 52 FR 48530, Dec. 23, 1987]

§ 1.703–1 Partnership computations.

(a) Income and deductions. **(1)** The taxable income of a partnership shall be computed in the same manner as the taxable income of an individual, except as otherwise provided in this section. A partnership is required to state separately in its return the items described in section 702(a)(1) through (7) and, in addition, to attach to its return a statement setting forth separately those items described in section 702(a)(8) which the partner is required to take into account separately in determining his income tax. See paragraph (a)(8) of § 1.702–1. The partnership is further required to compute and to state separately in its return:

(i) As taxable income under section 702(a)(9), the total of all other items of gross income (not separately stated) over the total of all other allowable deductions (not separately stated), or

(ii) As loss under section 702(a)(9), the total of all other allowable deductions (not separately stated) over the total of all other items of gross income (not separately stated).

The taxable income or loss so computed shall be accounted for by the partners in accordance with their partnership agreement.

(2) The partnership is not allowed the following deductions:

(i) The standard deduction provided in section 141.

(ii) The deduction for personal exemptions provided in section 151.

(iii) The deduction provided in section 164(a) for taxes, described in section 901, paid or accrued to foreign countries or possessions of the United States. Each partner's distributive share of such taxes shall be accounted for separately by him as provided in section 702(a)(6).

(iv) The deduction for charitable contributions provided in section 170. Each partner is considered as having paid within his taxable year his distributive share of any contribution or gift, payment of which was actually made by the partnership within its taxable year ending within or with the partner's taxable year. This item shall be accounted for separately by the partners as provided in section 702(a)(4). See also paragraph (b) of § 1.702-1.

(v) The net operating loss deduction provided in section 172. See § 1.702-2.

(vi) The additional itemized deductions for individuals provided in Part VII, Subchapter B, Chapter 1 of the Code, as follows: Expenses for production of income (section 212); medical, dental, etc., expenses (section 213); expenses for care of certain dependents (section 214); alimony, etc., payments (section 215); and amounts representing taxes and interest paid to cooperative housing corporation (section 216). However, see paragraph (a)(8) of § 1.702-1.

(vii) The deduction for capital gains provided by section 1202 and the deduction for capital loss carryover provided by section 1212.

(b) Elections of the partnership—(1) General rule. Any elections (other than those described in subparagraph (2) of this paragraph) affecting the computation of income derived from a partnership shall be made by the partnership. For example, elections of methods of accounting, of computing depreciation, of treating soil and water conservation expenditures, and the option to deduct as expenses intangible drilling and development costs, shall be made by the partnership and not by the partners separately. All partnership elections are applicable to all partners equally, but any election made by a partnership shall not apply to any partner's nonpartnership interests.

(2) Exceptions. (i) Each partner shall add his distributive share of taxes described in section 901 paid or accrued by the partnership to foreign countries or possessions of the United States (according to its method of treating such taxes) to any such taxes paid or accrued by him (according to his method of treating such taxes), and may elect to use the total amount either as a credit against tax or as a deduction from income.

(ii) Each partner shall add his distributive share of expenses described in section 615 or section 617 paid or accrued by the partnership to any such expenses paid or accrued by him and shall treat the total amount according to his method of treating such expenses, notwithstanding the treatment of the expenses by the partnership.

(iii) Each partner who is a nonresident alien individual or a foreign corporation shall add his distributive share of income derived by the partnership from real property located in the United States, as described in section 871(d)(1) or 882(d)(1), to any such income derived by him and may elect under § 1.871-10 to treat all such income as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7192, 37 FR 12949, June 30, 1972; T.D. 7332, 39 FR 44232, Dec. 23, 1974]

§ 1.704-1 Partner's distributive share.

(a) Effect of partnership agreement. A partner's distributive share of any item or class of items of income, gain, loss, deduction, or credit of the partnership shall be determined by the partnership agreement, unless otherwise provided by section 704 and paragraphs (b) through (e) of this section. For definition of partnership agreement see section 761(c).

(b) Determination of partner's distributive share—(0) Cross-references.

(1) In general—(i) Basic principles. Under section 704(b) if a partnership agreement does not provide for the allocation of income, gain, loss, deduction, or credit (or item thereof) to a partner, or if the partnership agreement provides for the allocation of income, gain, loss, deduction, or credit (or item thereof) to a partner but such allocation does not have substantial economic effect, then the partner's distributive share of such income, gain, loss, deduction, or credit (or item thereof) shall be determined in accordance with such partner's interest in the partnership (taking into account all facts and circumstances). If the partnership agreement provides for the allocation of income, gain, loss, deduction, or credit (or item thereof) to a partner, there are three ways in which such allocation will be respected under section 704(b) and this paragraph. First, the allocation can have substantial economic effect in accordance with paragraph (b)(2) of this section. Second, taking into account all facts and circumstances, the allo-

cation can be in accordance with the partner's interest in the partnership. See paragraph (b)(3) of this section. Third, the allocation can be deemed to be in accordance with the partner's interest in the partnership pursuant to one of the special rules contained in paragraph (b)(4) of this section. To the extent an allocation under the partnership agreement of income, gain, loss, deduction, or credit (or item thereof) to a partner does not have substantial economic effect, is not in accordance with the partner's interest in the partnership, and is not deemed to be in accordance with the partner's interest in the partnership, such income, gain, loss, deduction, or credit (or item thereof) will be reallocated in accordance with the partner's interest in the partnership (determined under paragraph (b)(3) of this section).

(ii) Effective dates. The provisions of this paragraph are effective for partnership taxable years beginning after December 31, 1975. However, for partnership taxable years beginning after December 31, 1975, but before May 1, 1986, (January 1, 1987, in the case of allocations of nonrecourse deductions as defined in paragraph (b)(4)(iv)(a) of this section) an allocation of income, gain, loss, deduction, or credit (or item thereof) to a partner that is not respected under this paragraph nevertheless will be respected under section 704(b) if such allocation has substantial economic effect or is in accordance with the partners' interests in the partnership as those terms have been interpreted under the relevant case law, the legislative history of section 210(d) of the Tax Reform Act of 1976, and the provisions of this paragraph in effect for partnership taxable years beginning before May 1, 1986.

(iii) Effect of other sections. The determination of a partner's distributive share of income, gain, loss, deduction, or credit (or item thereof) under section 704(b) and this paragraph is not conclusive as to the tax treatment of a partner with respect to such distributive share. For example, an allocation of loss or deduction to a partner that is respected under section 704(b) and this paragraph may not be deductible by such partner if the partner lacks the requisite motive for economic gain (see, *e.g., Goldstein v. Commissioner,* 364 F.2d 734 (2d Cir.1966)), or may be disallowed for that taxable year (and held in suspense) if the limitations of section 465 or section 704(d) are applicable. Similarly, an allocation that is respected under section 704(b) and this paragraph nevertheless may be reallocated under other provisions, such as section 482, section 704(e)(2), section 706(d) (and related assignment of income principles), and paragraph (b)(2)(ii) of § 1.751-1. If a partnership has a section 754 election in effect, a partner's distributive share of partnership income, gain, loss, or deduction may be affected as provided in § 1.743-1 (see paragraph (b)(2)(iv)(m)(2) of this section). A deduction that appears to be a nonrecourse deduction deemed to be in accordance with the partners' interests in the partnership may not be such because purported nonrecourse liabilities of the partnership in fact constitute equity rather than debt. The examples in paragraph (b)(5) of this section concern the validity of allocations under section 704(b) and this paragraph and, except as noted, do not address the effect of other sections or limitations on such allocations.

(iv) Other possible tax consequences. Allocations that are respected under section 704(b) and this paragraph may give rise to other tax consequences, such as those resulting from the application of section 61, section 83, section 751, section 2501, paragraph (f) of § 1.46-3, § 1.47-6, paragraph (b)(1) of § 1.721-1 (and related principles), and paragraph (e) of § 1.752-1. The examples in paragraph (b)(5) of this section concern the validity of allocations under section 704(b) and this paragraph and, except as noted, do not address other tax consequences that may result from such allocations.

(v) Purported allocations. Section 704(b) and this paragraph do not apply to a purported allocation if it is made to a person who is not a partner of the partnership (see section 7701(a)(2) and paragraph (d) of § 301.7701-3) or to a person who is not receiving the purported allocation in his capacity as a partner (see section 707(a) and paragraph (a) of § 1.707-1).

(vi) Section 704(c) determinations. Under section 704(c) if property is contributed by a partner to a partnership, the partners' distributive shares of income, gain, loss, and deduction, as computed for tax purposes, with respect to such property are determined so as to take account of the variation between the adjusted tax basis and fair market value of such property. Although section 704(b) does not directly determine the partners' distributive shares of tax items governed by section 704(c), the partners' distributive shares of tax items are determined under section 704(c) with reference to the partners' distributive shares of the corresponding book items, as determined under section 704(b) and this paragraph. (See paragraphs (b)(2)(iv)(d) and (b)(4)(i) of this section.) Section 704(c), as cited in this paragraph, refers to such section as in effect for property contributed to a partnership

after March 31, 1984. See example (13)(i) of paragraph (b)(5) of this section.

(vii) Bottom line allocations. Section 704(b) and this paragraph are applicable to allocations of income, gain, loss, deduction, and credit, allocations of specific items of income, gain, loss, deduction, and credit, and allocations of partnership net or "bottom line" taxable income and loss. An allocation to a partner of a share of partnership net or "bottom line" taxable income or loss shall be treated as an allocation to such partner of the same share of each item of income, gain, loss, and deduction that is taken into account in computing such net or "bottom line" taxable income or loss. See example (15)(i) of paragraph (b)(5) of this section.

(2) Substantial economic effect—(i) Two-part analysis. The determination of whether an allocation of income, gain, loss, or deduction (or item thereof) to a partner has substantial economic effect involves a two-part analysis that is made as of the end of the partnership taxable year to which the allocation relates. First, the allocation must have economic effect (within the meaning of paragraph (b)(2)(ii) of this section). Second, the economic effect of the allocation must be substantial (within the meaning of paragraph (b)(2)(iii) of this section).

(ii) Economic effect—(a) Fundamental principles. In order for an allocation to have economic effect, it must be consistent with the underlying economic arrangement of the partners. This means that in the event there is an economic benefit or economic burden that corresponds to an allocation, the partner to whom the allocation is made must receive such economic benefit or bear such economic burden.

(b) Three requirements. Based on the principles contained in paragraph (b)(2)(ii)(a) of this section, and except as otherwise provided in this paragraph, an allocation of income, gain, loss, or deduction (or item thereof) to a partner will have economic effect if, and only if, throughout the full term of the partnership, the partnership agreement provides—

(1) For the determination and maintenance of the partners' capital accounts in accordance with the rules of paragraph (b)(2)(iv) of this section.

(2) Upon liquidation of the partnership (or any partner's interest in the partnership), liquidating distributions are required in all cases to be made in accordance with the positive capital account balances of the partners, as determined after taking into account all capital account adjustments for the partnership taxable year during which such liquidation occurs (other than those made pursuant to this requirement (2) and requirement (3) of this paragraph (b)(2)(ii)(b)), by the end of such taxable year (or, if later, within 90 days after the date of such liquidation), and

(3) If such partner has a deficit balance in his capital account following the liquidation of his interest in the partnership, as determined after taking into account all capital account adjustments for the partnership taxable year during which such liquidation occurs (other than those made pursuant to this requirement (3)), he is unconditionally obligated to restore the amount of such deficit balance to the partnership by the end of such taxable year (or, if later, within 90 days after the date of such liquidation), which amount shall, upon liquidation of the partnership, be paid to creditors of the partnership or distributed to other partners in accordance with their positive capital account balances (in accordance with requirement (2) of this paragraph (b)(2)(ii)(b)).

For purposes of the preceding sentence, a partnership taxable year shall be determined without regard to section 706(c)(2)(A). Requirements (2) and (3) of this paragraph (b)(2)(ii)(b) are not violated if all or part of the partnership interest of one or more partners is purchased (other than in connection with the liquidation of the partnership) by the partnership or by one or more partners (or one or more persons related, within the meaning of section 267(b) (without modification by section 267(e)(1)) or section 707(b)(1), to a partner) pursuant to an agreement negotiated at arm's length by persons who at the time such agreement is entered into have materially adverse interests and if a principal purpose of such purchase and sale is not to avoid the principles of the second sentence of paragraph (b)(2)(ii)(a) of this section. In addition, requirement (2) of this paragraph (b)(2)(ii)(b) is not violated if, upon the liquidation of the partnership, the capital accounts of the partners are increased or decreased pursuant to paragraph (b)(2)(iv)(f) of this section as of the date of such liquidation and the partnership makes liquidating distributions within the time set out in that requirement (2) in the ratios of the partners' positive capital accounts, except that it does not distribute reserves reasonably required to provide for liabilities (contingent or otherwise) of the partnership and installment obligations owed to the partnership, so long as such withheld amounts are distributed as soon as practicable and in the ratios of the partners' positive capital account balances. See

examples (1)(i) and (ii), (4)(i), (8)(i), and (16)(i) of paragraph (b)(5) of this section.

(c) Obligation to restore deficit. If a partner is not expressly obligated to restore the deficit balance in his capital account, such partner nevertheless will be treated as obligated to restore the deficit balance in his capital account (in accordance with requirement (3) of paragraph (b)(2)(ii)(b) of this section) to the extent of—

(1) The outstanding principal balance of any promissory note (of which such partner is the maker) contributed to the partnership by such partner (other than a promissory note that is readily tradable on an established securities market), and

(2) The amount of any unconditional obligation of such partner (whether imposed by the partnership agreement or by State or local law) to make subsequent contributions to the partnership (other than pursuant to a promissory note of which such partner is the maker),

provided that such note or obligation is required to be satisfied at a time no later than the end of the partnership taxable year in which such partner's interest is liquidated (or, if later, within 90 days after the date of such liquidation). If a promissory note referred to in the previous sentence is negotiable, a partner will be considered required to satisfy such note within the time period specified in such sentence if the partnership agreement provides that, in lieu of actual satisfaction, the partnership will retain such note and such partner will contribute to the partnership the excess, if any, of the outstanding principal balance of such note over its fair market value at the time of liquidation. See paragraph (b)(2)(iv)(d)(2) of this section. See examples (1)(ix) and (x) of paragraph (b)(5) of this section. A partner in no event will be considered obligated to restore the deficit balance in his capital account to the partnership (in accordance with requirement (3) of paragraph (b)(2)(ii)(b) of this section) to the extent such partner's obligation is not legally enforceable, or the facts and circumstances otherwise indicate a plan to avoid or circumvent such obligation. See paragraphs (b)(2)(ii)(f), (b)(2)(ii)(h), and (b)(4)(vi) of this section for other rules regarding such obligation.

(d) Alternate test for economic effect. If—

(1) Requirements (1) and (2) of paragraph (b)(2)(ii)(b) of this section are satisfied, and

(2) The partner to whom an allocation is made is not obligated to restore the deficit balance in his capital account to the partnership (in accordance with requirement (3) of paragraph (b)(2)(ii)(b) of this section), or is obligated to restore only a limited dollar amount of such deficit balance, and

(3) The partnership agreement contains a "qualified income offset,"

such allocation will be considered to have economic effect under this paragraph (b)(2)(ii)(d) to the extent such allocation does not cause or increase a deficit balance in such partner's capital account (in excess of any limited dollar amount of such deficit balance that such partner is obligated to restore) as of the end of the partnership taxable year to which such allocation relates. In determining the extent to which the previous sentence is satisfied, such partner's capital account also shall be reduced for—

(4) Adjustments that, as of the end of such year, reasonably are expected to be made to such partner's capital account under paragraph (b)(2)(iv)(k) of this section for depletion allowances with respect to oil and gas properties of the partnership, and

(5) Allocations of loss and deduction that, as of the end of such year, reasonably are expected to be made to such partner pursuant to section 704(e)(2), section 706(d), and paragraph (b)(2)(ii) of § 751–1, and

(6) Distributions that, as of the end of such year, reasonably are expected to be made to such partner to the extent they exceed offsetting increases to such partner's capital account that reasonably are expected to occur during (or prior to) the partnership taxable years in which such distributions reasonably are expected to be made (other than increases pursuant to a minimum gain chargeback under paragraph (b)(4)(iv)(e) of this section).

For purposes of determining the amount of expected distributions and expected capital account increases described in (6) above, the rule set out in paragraph (b)(2)(iii)(c) of this section concerning the presumed value of partnership property shall apply. The partnership agreement contains a "qualified income offset" if, and only if, it provides that a partner who unexpectedly receives an adjustment, allocation, or distribution described in (4), (5), or (6) above, will be allocated items of income and gain (consisting of a pro rata portion of each item of partnership income, including gross income, and gain for such year) in an amount and manner sufficient to eliminate such deficit balance as quickly as possible. Allocations of items of income and gain made pursuant to the immediately preceding sentence shall be deemed to

be made in accordance with the partners' interests in the partnership if requirements (1) and (2) of paragraph (b)(2)(ii)(b) of this section are satisfied. See examples (1)(iii), (iv), (v), (vi), (viii), (ix), and (x), (15), and (16)(ii) of paragraph (b)(5) of this section.

(e) Partial economic effect. If only a portion of an allocation made to a partner with respect to a partnership taxable year has economic effect, both the portion that has economic effect and the portion that is reallocated shall consist of a proportionate share of all items that made up the allocation to such partner for such year. See examples (15)(ii) and (iii) of paragraph (b)(5) of this section.

(f) Reduction of obligation to restore. If requirements (1) and (2) of paragraph (b)(2)(ii)(b) of this section are satisfied, a partner's obligation to restore the deficit balance in his capital account (or any limited dollar amount thereof) to the partnership may be eliminated or reduced as of the end of a partnership taxable year without affecting the validity of prior allocations (see paragraph (b)(4)(vi) of this section) to the extent the deficit balance (if any) in such partner's capital account, after reduction for the items described in (4), (5), and (6) of paragraph (b)(2)(ii)(d) of this section, will not exceed the partner's remaining obligation (if any) to restore the deficit balance in his capital account. See example (1)(viii) of paragraph (b)(5) of this section.

(g) Liquidation defined. For purposes of this paragraph, a liquidation of a partner's interest in the partnership occurs upon the earlier of (1) the date upon which there is a liquidation of the partnership, or (2) the date upon which there is a liquidation of the partner's interest in the partnership under paragraph (d) of § 1.761–1. For purposes of this paragraph, the liquidation of a partnership occurs upon the earlier of (3) the date upon which the partnership is terminated under section 708(b)(1), or (4) the date upon which the partnership ceases to be a going concern (even though it may continue in existence for the purpose of winding up its affairs, paying its debts, and distributing any remaining balance to its partners). Requirements (2) and (3) of paragraph (b)(2)(ii)(b) of this section will be considered unsatisfied if the liquidation of a partner's interest in the partnership is delayed after its primary business activities have been terminated (for example, by continuing to engage in a relatively minor amount of business activity, if such actions themselves do not cause the partnership to terminate pursuant to section 708(b)(1)) for a principal purpose of deferring any distribution pursuant to requirement (2) of paragraph (b)(2)(ii)(b) of this section or deferring any partner's obligations under requirement (3) of paragraph (b)(2)(ii)(b) of this section.

(h) Partnership agreement defined. For purposes of this paragraph, the partnership agreement includes all agreements among the partners, or between one or more partners and the partnership, concerning affairs of the partnership and responsibilities of partners, whether oral or written, and whether or not embodied in a document referred to by the partners as the partnership agreement. Thus, in determining whether distributions are required in all cases to be made in accordance with the partners' positive capital account balances (requirement (2) of paragraph (b)(2)(ii)(b) of this section), and in determining the extent to which a partner is obligated to restore a deficit balance in his capital account (requirement (3) of paragraph (b)(2)(ii)(b) of this section), all arrangements among partners, or between one or more partners and the partnership relating to the partnership, direct and indirect, including puts, options, and other buy-sell agreements, and any other "stop-loss" arrangement, are considered to be part of the partnership agreement. (Thus, for example, if one partner who assumes a liability of the partnership is indemnified by another partner for a portion of such liability, the indemnifying partner (depending upon the particular facts) may be viewed as in effect having a partial deficit makeup obligation as a result of such indemnity agreement.) In addition, the partnership agreement includes provisions of Federal, State, or local law that govern the affairs of the partnership or are considered under such law to be a part of the partnership agreement (see the last sentence of paragraph (c) of § 1.761–1). For purposes of this paragraph (b)(2)(ii)(h), an agreement with a partner or a partnership shall include an agreement with a person related, within the meaning of section 267(b) (without modification by section 267(e)(1)) or section 707(b)(1), to such partner or partnership.

(i) Economic effect equivalence. Allocations made to a partner that do not otherwise have economic effect under this paragraph (b)(2)(ii) shall nevertheless be deemed to have economic effect, provided that as of the end of each partnership taxable year a liquidation of the partnership at the end of such year or at the end of any future year would produce the same economic results to the partners as would occur if requirements (1), (2), and (3) of paragraph (b)(2)(ii)(b) of this section had been satisfied, regardless of the economic

performance of the partnership. See examples (4)(ii) and (iii) of paragraph (b)(5) of this section.

(iii) Substantiality—(a) General rules. Except as otherwise provided in this paragraph (b)(2)(iii), the economic effect of an allocation (or allocations) is substantial if there is a reasonable possibility that the allocation (or allocations) will affect substantially the dollar amounts to be received by the partners from the partnership, independent of tax consequences. Notwithstanding the preceding sentence, the economic effect of an allocation (or allocations) is not substantial if, at the time the allocation becomes part of the partnership agreement, (1) the after-tax economic consequences of at least one partner may, in present value terms, be enhanced compared to such consequences if the allocation (or allocations) were not contained in the partnership agreement, and (2) there is a strong likelihood that the after-tax economic consequences of no partner will, in present value terms, be substantially diminished compared to such consequences if the allocation (or allocations) were not contained in the partnership agreement. In determining the after-tax economic benefit or detriment to a partner, tax consequences that result from the interaction of the allocation with such partner's tax attributes that are unrelated to the partnership will be taken into account. See examples (5) and (9) of paragraph (b)(5) of this section. The economic effect of an allocation is not substantial in the two situations described in paragraphs (b)(2)(iii)(b) and (c) of this section. However, even if an allocation is not described therein, its economic effect may be insubstantial under the general rules stated in this paragraph (b)(2)(iii)(a). References in this paragraph (b)(2)(iii) to allocations include capital account adjustments made pursuant to paragraph (b)(2)(iv)(k) of this section.

(b) Shifting tax consequences. The economic effect of an allocation (or allocations) in a partnership taxable year is not substantial if, at the time the allocation (or allocations) becomes part of the partnership agreement, there is a strong likelihood that—

(1) The net increases and decreases that will be recorded in the partners' respective capital accounts for such taxable year will not differ substantially from the net increases and decreases that would be recorded in such partners' respective capital accounts for such year if the allocations were not contained in the partnership agreement, and

(2) The total tax liability of the partners (for their respective taxable years in which the allocations will be taken into account) will be less than if the allocations were not contained in the partnership agreement (taking into account tax consequences that result from the interaction of the allocation (or allocations) with partner tax attributes that are unrelated to the partnership).

If, at the end of a partnership taxable year to which an allocation (or allocations) relates, the net increases and decreases that are recorded in the partners' respective capital accounts do not differ substantially from the net increases and decreases that would have been recorded in such partners' respective capital accounts had the allocation (or allocations) not been contained in the partnership agreement, and the total tax liability of the partners is (as described in (2) above) less than it would have been had the allocation (or allocations) not been contained in the partnership agreement, it will be presumed that, at the time the allocation (or allocations) became part of such partnership agreement, there was a strong likelihood that these results would occur. This presumption may be overcome by a showing of facts and circumstances that prove otherwise. See examples (6), (7)(ii) and (iii), and (10)(ii) of paragraph (b)(5) of this section.

(c) Transitory allocations. If a partnership agreement provides for the possibility that one or more allocations (the "original allocation(s)") will be largely offset by one or more other allocations (the "offsetting allocation(s)"), and, at the time the allocations become part of the partnership agreement, there is a strong likelihood that—

(1) The net increases and decreases that will be recorded in the partners' respective capital accounts for the taxable years to which the allocations relate will not differ substantially from the net increases and decreases that would be recorded in such partners' respective capital accounts for such years if the original allocation(s) and offsetting allocation(s) were not contained in the partnership agreement, and

(2) The total tax liability of the partners (for their respective taxable years in which the allocations will be taken into account) will be less than if the allocations were not contained in the partnership agreement (taking into account tax consequences that result from the interaction of the allocation (or allocations) with partner tax attributes that are unrelated to the partnership)

the economic effect of the original allocation(s) and offsetting allocation(s) will not be substantial. If, at the end of a partnership taxable year to

which an offsetting allocation(s) relates, the net increases and decreases recorded in the partners' respective capital accounts do not differ substantially from the net increases and decreases that would have been recorded in such partners' respective capital accounts had the original allocation(s) and the offsetting allocation(s) not been contained in the partnership agreement, and the total tax liability of the partners is (as described in (2) above) less than it would have been had such allocations not been contained in the partnership agreement, it will be presumed that, at the time the allocations became part of the partnership agreement, there was a strong likelihood that these results would occur. This presumption may be overcome by a showing of facts and circumstances that prove otherwise. See examples (1)(xi), (2), (3), (7), (8)(ii), and (17) of paragraph (b)(5) of this section. Notwithstanding the foregoing, the original allocation(s) and the offsetting allocation(s) will not be insubstantial (under this paragraph (b)(2)(iii)(c)) and, for purposes of paragraph (b)(2)(iii)(a), it will be presumed that there is a reasonable possibility that the allocations will affect substantially the dollar amounts to be received by the partners from the partnership if, at the time the allocations become part of the partnership agreement, there is a strong likelihood that the offsetting allocation(s) will not, in large part, be made within five years after the original allocation(s) is made (determined on a first-in, first-out basis). See example (2) of paragraph (b)(5) of this section. For purposes of applying the provisions of this paragraph (b)(2)(iii) (and paragraphs (b)(2)(ii)(d)(6) and (b)(3)(iii) of this section), the adjusted tax basis of partnership property (or, if partnership property is properly reflected on the books of the partnership at a book value that differs from its adjusted tax basis, the book value of such property) will be presumed to be the fair market value of such property, and adjustments to the adjusted tax basis (or book value) of such property will be presumed to be matched by corresponding changes in such property's fair market value. Thus, there cannot be a strong likelihood that the economic effect of an allocation (or allocations) will be largely offset by an allocation (or allocations) of gain or loss from the disposition of partnership property. See examples (1)(vi) and (xi) of paragraph (b)(5) of this section.

(iv) Maintenance of capital accounts—(a) In general. The economic effect test described in paragraph (b)(2)(ii) of this section requires an examination of the capital accounts of the partners of a partnership, as maintained under the partnership agreement. Except as otherwise provided in paragraph (b)(2)(ii)(i) of this section, an allocation of income, gain, loss, or deduction will not have economic effect under paragraph (b)(2)(ii) of this section, and will not be deemed to be in accordance with a partner's interest in the partnership under paragraph (b)(4) of this section, unless the capital accounts of the partners are determined and maintained throughout the full term of the partnership in accordance with the capital accounting rules of this paragraph (b)(2)(iv).

(b) Basic rules. Except as otherwise provided in this paragraph (b)(2)(iv), the partners' capital accounts will be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) if, and only if, each partner's capital account is increased by (1) the amount of money contributed by him to the partnership, (2) the fair market value of property contributed by him to the partnership (net of liabilities secured by such contributed property that the partnership is considered to assume or take subject to under section 752), and (3) allocations to him of partnership income and gain (or items thereof), including income and gain exempt from tax and income and gain described in paragraph (b)(2)(iv)(g) of this section, but excluding income and gain described in paragraph (b)(4)(i) of this section; and is decreased by (4) the amount of money distributed to him by the partnership, (5) the fair market value of property distributed to him by the partnership (net of liabilities secured by such distributed property that such partner is considered to assume or take subject to under section 752), (6) allocations to him of expenditures of the partnership described in section 705(a)(2)(B), and (7) allocations of partnership loss and deduction (or item thereof), including loss and deduction described in paragraph (b)(2)(iv)(g) of this section, but excluding items described in (6) above and loss or deduction described in paragraphs (b)(4)(i) or (b)(4)(iii) of this section; and is otherwise adjusted in accordance with the additional rules set forth in this paragraph (b)(2)(iv). For purposes of this paragraph, a partner who has more than one interest in a partnership shall have a single capital account that reflects all such interests, regardless of the class of interests owned by such partner (e.g., general or limited) and regardless of the time or manner in which such interests were acquired.

(c) Treatment of liabilities. For purposes of this paragraph (b)(2)(iv), (1) money contributed by a partner to a partnership includes the amount of any partnership liabilities that are assumed by such partner (other than liabilities described in paragraph (b)(2)(iv)(b)(5) of this section that are

assumed by a distributee partner) but does not include increases in such partner's share of partnership liabilities (see section 752(a)), and (2) money distributed to a partner by a partnership includes the amount of such partner's individual liabilities that are assumed by the partnership (other than liabilities described in paragraph (b)(2)(iv)(b)(2) of this section that are assumed by the partnership) but does not include decreases in such partner's share of partnership liabilities (see section 752(b)). For purposes of this paragraph (b)(2)(iv)(c), liabilities are considered assumed only to the extent the assuming party is thereby subjected to personal liability with respect to such obligation, the obligee is aware of the assumption and can directly enforce the assuming party's obligation, and, as between the assuming party and the party from whom the liability is assumed, the assuming party is ultimately liable.

(d) Contributed property—(1) In general. The basic capital accounting rules contained in paragraph (b)(2)(iv)(b) of this section require that a partner's capital account be increased by the fair market value of property contributed to the partnership by such partner on the date of contribution. See examples (13)(i) and (v) of paragraph (b)(5) of this section. Consistent with section 752(c), section 7701(g) does not apply in determining such fair market value.

(2) Contribution of promissory notes. Notwithstanding the general rule of paragraph (b)(2)(iv)(b)(2) of this section, except as provided in this paragraph (b)(2)(iv)(d)(2), if a promissory note is contributed to a partnership by a partner who is the maker of such note, such partner's capital account will be increased with respect to such note only when there is a taxable disposition of such note by the partnership or when the partner makes principal payments on such note. See example (1)(ix) of paragraph (b)(5) of this section. The first sentence of this paragraph (b)(2)(iv)(d)(2) shall not apply if the note referred to therein is readily tradable on an established securities market. See also paragraph (b)(2)(ii)(c) of this section. Furthermore, a partner whose interest is liquidated will be considered as satisfying his obligation to restore the deficit balance in his capital account to the extent of (i) the fair market value, at the time of contribution, of any negotiable promissory note (of which such partner is the maker) that such partner contributes to the partnership on or after the date his interest is liquidated and within the time specified in paragraph (b)(2)(ii)(b)(3) of this section, and (ii) the fair market value, at the time of liquidation, of the unsatisfied portion of any negotiable promissory note (of which such partner is the maker) that such partner previously contributed to the partnership. For purposes of the preceding sentence, the fair market value of a note will be no less than the outstanding principal balance of such note, provided that such note bears interest at a rate no less than the applicable federal rate at the time of valuation.

(3) Section 704(c) considerations. Section 704(c) governs the determination of the partner's distributive shares of income, gain, loss, and deduction, as computed for tax purposes, with respect to property contributed to a partnership (see paragraph (b)(1)(vi) of this section). In cases where section 704(c) applies to partnership property, the capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless the partnership agreement requires that the partners' capital accounts be adjusted in accordance with paragraph (b)(2)(iv)(g) of this section for allocation to them of depreciation, depletion, amortization, and gain and loss, as computed for book purposes, with respect to such property. See example (13)(i) of paragraph (b)(5) of this section.

(e) Distributed property—(1) In general. The basic capital accounting rules contained in paragraph (b)(2)(iv)(b) of this section require that a partner's capital account be decreased by the fair market value of property distributed by the partnership (without regard to section 7701(g)) to such partner (whether in connection with a liquidation or otherwise). To satisfy this requirement, the capital accounts of the partners first must be adjusted to reflect the manner in which the unrealized income, gain, loss, and deduction inherent in such property (that has not been reflected in the capital accounts previously) would be allocated among the partners if there were a taxable disposition of such property for the fair market value of such property (taking section 7701(g) into account) on the date of distribution. See example (14)(v) of paragraph (b)(5) of this section.

(2) Distribution of promissory notes. Notwithstanding the general rule of paragraph (b)(2)(iv)(b)(5), except as provided in this paragraph (b)(2)(iv)(e)(2), if a promissory note is distributed to a partner by a partnership that is the maker of such note, such partner's capital account will be decreased with respect to such note only when there is a taxable disposition of such note by the partner or when the partnership makes principal payments on the note. The previous sentence

shall not apply if a note distributed to a partner by a partnership who is the maker of such note is readily tradable on an established securities market. Furthermore, the capital account of a partner whose interest in a partnership is liquidated will be reduced to the extent of (i) the fair market value, at the time of distribution, of any negotiable promissory note (of which such partnership is the maker) that such partnership distributes to the partner on or after the date such partner's interest is liquidated and within the time specified in paragraph (b)(2)(ii)(b)(2) of this section, and (ii) the fair market value, at the time of liquidation, of the unsatisfied portion of any negotiable promissory note (of which such partnership is the maker) that such partnership previously distributed to the partner. For purposes of the preceding sentence, the fair market value of a note will be no less than the outstanding principal balance of such note, provided that such note bears interest at a rate no less than the applicable federal rate at time of valuation.

(f) Revaluations of property. A partnership agreement may, upon the occurrence of certain events, increase or decrease the capital accounts of the partners to reflect a revaluation of partnership property (including intangible assets such as goodwill) on the partnership's books. Capital accounts so adjusted will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless—

(1) The adjustments are based on the fair market value of partnership property (taking section 7701(g) into account) on the date of adjustment, and

(2) The adjustments reflect the manner in which the unrealized income, gain, loss, or deduction inherent in such property (that has not been reflected in the capital accounts previously) would be allocated among the partners if there were a taxable disposition of such property for such fair market value on that date, and

(3) The partnership agreement requires that the partners' capital accounts be adjusted in accordance with paragraph (b)(2)(iv)(g) of this section for allocations to them of depreciation, depletion, amortization, and gain or loss, as computed for book purposes, with respect to such property, and

(4) The partnership agreement requires that the partners' distributive shares of depreciation, depletion, amortization, and gain or loss, as computed for tax purposes, with respect to such property be determined so as to take account of the variation between the adjusted tax basis and book value of such property in the same manner as under section 704(c) (see paragraph (b)(4)(i) of this section), and

(5) The adjustments are made principally for a substantial non-tax business purpose—

(i) In connection with a contribution of money or other property (other than a de minimis amount) to the partnership by a new or existing partner as consideration for an interest in the partnership, or

(ii) In connection with the liquidation of the partnership or a distribution of money or other property (other than a de minimis amount) by the partnership to a retiring or continuing partner as consideration for an interest in the partnership, or

(iii) Under generally accepted industry accounting practices, provided substantially all of the partnership's property (excluding money) consists of stock, securities, commodities, options, warrants, futures, or similar instruments that are readily tradable on an established securities market.

See example (14) and (18) of paragraph (b)(5) of this section. If the capital accounts of the partners are not adjusted to reflect the fair market value of partnership property when an interest in the partnership is acquired from or relinquished to the partnership, paragraphs (b)(1)(iii) and (b)(1)(iv) of this section should be consulted regarding the potential tax consequences that may arise if the principles of section 704(c) are not applied to determine the partners' distributive shares of depreciation, depletion, amortization, and gain or loss as computed for tax purposes, with respect to such property.

(g) Adjustments to reflect book value—(1) In general. Under paragraphs (b)(2)(iv)(d) and (b)(2)(iv)(f) of this section, property may be properly reflected on the books of the partnership at a book value that differs from the adjusted tax basis of such property. In these circumstances, paragraphs (b)(2)(iv)(d)(3) and (b)(2)(iv)(f)(3) of this section provide that the capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless the partnership agreement requires the partners' capital accounts to be adjusted in accordance with this paragraph (b)(2)(iv)(g) for allocations to them of depreciation, depletion, amortization, and gain or loss, as computed for book purposes, with respect to such property. In determining whether the economic effect of an allocation of book items is substantial, consideration will be given to the effect of such

allocation on the determination of the partners' distributive shares of corresponding tax items under section 704(c) and paragraph (b)(4)(i) of this section. See example (17) of paragraph (b)(5) of this section. If an allocation of book items under the partnership agreement does not have substantial economic effect (as determined under paragraphs (b)(2)(ii) and (b)(2)(iii) of this section), or is not otherwise respected under this paragraph, such items will be reallocated in accordance with the partners' interests in the partnership, and such reallocation will be the basis upon which the partners' distributive shares of the corresponding tax items are determined under section 704(c) and paragraph (b)(4)(i) of this section. See examples (13), (14), and (18) of paragraph (b)(5) of this section.

(2) Payables and receivables. References in this paragraph (b)(2)(iv) and paragraph (b)(4)(i) of this section to book and tax depreciation, depletion, amortization, and gain or loss with respect to property that has an adjusted tax basis that differs from book value include, under analogous rules and principles, the unrealized income or deduction with respect to accounts receivable, accounts payable, and other accrued but unpaid items.

(3) Determining amount of book items. The partners' capital accounts will not be considered adjusted in accordance with this paragraph (b)(2)(iv)(g) unless the amount of book depreciation, depletion, or amortization for a period with respect to an item of partnership property is the amount that bears the same relationship to the book value of such property as the depreciation (or cost recovery deduction), depletion, or amortization computed for tax purposes with respect to such property for such period bears to the adjusted tax basis of such property. If such property has a zero adjusted tax basis, the book depreciation, depletion, or amortization may be determined under any reasonable method selected by the partnership.

(h) Determinations of fair market value. For purposes of this paragraph (b)(2)(iv), the fair market value assigned to property contributed to a partnership, property distributed by a partnership, or property otherwise revalued by a partnership, will be regarded as correct, provided that (1) such value is reasonably agreed to among the partners in arm's-length negotiations, and (2) the partners have sufficiently adverse interests. If, however, these conditions are not satisfied and the value assigned to such property is overstated or understated (by more than an insignificant amount), the capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv). Valuation of property contributed to the partnership, distributed by the partnership, or otherwise revalued by the partnership shall be on a property-by-property basis, except to the extent the regulations under section 704(c) permit otherwise.

(i) Section 705(a)(2)(B) expenditures—(1) In general. The basic capital accounting rules contained in paragraph (b)(2)(iv)(b) of this section require that a partner's capital account be decreased by allocations made to such partner of expenditures described in section 705(a)(2)(B). See example (11) of paragraph (b)(5) of this section. If an allocation of these expenditures under the partnership agreement does not have substantial economic effect (as determined under paragraphs (b)(2)(ii) and (b)(2)(iii) of this section), or is not otherwise respected under this paragraph, such expenditures will be reallocated in accordance with the partners' interest in the partnership.

(2) Expenses described in section 709. Except for amounts with respect to which an election is properly made under section 709(b), amounts paid or incurred to organize a partnership or to promote the sale of (or to sell) an interest in such a partnership shall, solely for purposes of this paragraph, be treated as section 705(a)(2)(B) expenditures, and upon liquidation of the partnership no further capital account adjustments will be made in respect thereof.

(3) Disallowed losses. If a deduction for a loss incurred in connection with the sale or exchange of partnership property is disallowed to the partnership under section 267(a)(1) or section 707(b), that deduction shall, solely for purposes of this paragraph, be treated as a section 705(a)(2)(B) expenditure.

(j) Basis adjustments to section 38 property. The capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless such capital accounts are adjusted by the partners' shares of any upward or downward basis adjustments allocated to them under this paragraph (b)(2)(iv)(j). When there is a reduction in the adjusted tax basis of partnership section 38 property under section 48(q)(1) or section 48(q)(3), section 48(q)(6) provides for an equivalent downward adjustment to the aggregate basis of partnership interests (and no additional adjustment is made under section 705(a)(2)(B)). These downward basis adjustments shall be shared

among the partners in the same proportion as the adjusted tax basis or cost of (or the qualified investment in) such section 38 property is allocated among the partners under paragraph (f) of § 1.46–3 (or paragraph (a)(4)(iv) of § 1.48–8). Conversely, when there is an increase in the adjusted tax basis of partnership section 38 property under section 48(q)(2), section 48(q)(6) provides for an equivalent upward adjustment to the aggregate basis of partnership interests. These upward adjustments shall be allocated among the partners in the same proportion as the investment tax credit from such property is recaptured by the partners under § 1.47–6.

(k) Depletion of oil and gas properties—(1) In general. The capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless such capital accounts are adjusted for depletion and gain or loss with respect to the oil or gas properties of the partnership in accordance with this paragraph (b)(2)(iv)(k).

(2) Simulated depletion. Except as provided in paragraph (b)(2)(iv)(k)(3) of this section, a partnership shall, solely for purposes of maintaining capital accounts under this paragraph, compute simulated depletion allowances with respect to its oil and gas properties at the partnership level. These allowances shall be computed on each depletable oil or gas property of the partnership by using either the cost depletion method or the percentage depletion method (computed in accordance with section 613 at the rates specified in section 613A(c)(5) without regard to the limitations of section 613A, which theoretically could apply to any partner) for each partnership taxable year that the property is owned by the partnership and subject to depletion. The choice between the simulated cost depletion method and the simulated percentage depletion method shall be made on a property-by-property basis in the first partnership taxable year beginning after April 30, 1986, for which it is relevant for the property, and shall be binding for all partnership taxable years during which the oil or gas property is held by the partnership. The partnership shall make downward adjustments to the capital accounts of the partners for the simulated depletion allowance with respect to each oil or gas property of the partnership, in the same proportion as such partners (or their predecessors in interest) were properly allocated the adjusted tax basis of each such property. The aggregate capital account adjustments for simulated percentage depletion allowances with respect to an oil or gas property of the partnership shall not exceed the aggregate adjusted tax basis allocated to the partners with respect to such property. Upon the taxable disposition of an oil or gas property by a partnership, such partnership's simulated gain or loss shall be determined by subtracting its simulated adjusted basis in such property from the amount realized upon such disposition. (The partnership's simulated adjusted basis in an oil or gas property is determined in the same manner as adjusted tax basis except that simulated depletion allowances are taken into account instead of actual depletion allowances.) The capital accounts of the partners shall be adjusted upward by the amount of any simulated gain in proportion to such partners' allocable shares of the portion of the total amount realized from the disposition of such property that exceeds the partnership's simulated adjusted basis in such property. The capital accounts of such partners shall be adjusted downward by the amount of any simulated loss in proportion to such partners' allocable shares of the total amount realized from the disposition of such property that represents recovery of the partnership's simulated adjusted basis in such property. See section 613A(c)(7)(D) and the regulations thereunder and paragraph (b)(4)(v) of this section. See example (19)(iv) of paragraph (b)(5) of this section.

(3) Actual depletion. Pursuant to section 613A(c)(7)(D) and the regulations thereunder, the depletion allowance under section 611 with respect to the oil and gas properties of a partnership is computed separately by the partners. Accordingly, in lieu of adjusting the partner's capital accounts as provided in paragraph (b)(2)(iv)(k)(2) of this section, the partnership may make downward adjustments to the capital account of each partner equal to such partner's depletion allowance with respect to each oil or gas property of the partnership (for the partner's taxable year that ends with or within the partnership's taxable year). The aggregate adjustments to the capital account of a partner for depletion allowances with respect to an oil or gas property of the partnership shall not exceed the adjusted tax basis allocated to such partner with respect to such property. Upon the taxable disposition of an oil or gas property by a partnership, the capital account of each partner shall be adjusted upward by the amount of any excess of such partner's allocable share of the total amount realized from the disposition of such property over such partner's remaining adjusted tax basis in such property. If there is no such excess, the capital account of such partner shall be adjusted downward by the amount of any excess of such partner's remaining adjusted tax basis in such

property over such partner's allocable share of the total amount realized from the disposition thereof. See section 613A(c)(7)(4)(D) and the regulations thereunder and paragraph (b)(4)(v) of this section.

(4) Effect of book values. If an oil or gas property of the partnership is, under paragraphs (b)(2)(iv)(d) or (b)(2)(iv)(f) of this section, properly reflected on the books of the partnership at a book value that differs from the adjusted tax basis of such property, the rules contained in this paragraph (b)(2)(iv)(k) and paragraph (b)(4)(v) of this section shall be applied with reference to such book value. A revaluation of a partnership oil or gas property under paragraph (b)(2)(iv)(f) of this section may give rise to a reallocation of the adjusted tax basis of such property, or a change in the partners' relative shares of simulated depletion from such property, only to the extent permitted by section 613A(c)(7)(D) and the regulations thereunder.

(*l*) Transfers of partnership interests. The capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless, upon the transfer of all or a part of an interest in the partnership, the capital account of the transferor that is attributable to the transferred interest carries over to the transferee partner. (See paragraph (b)(2)(iv)(m) of this section for rules concerning the effect of a section 754 election on the capital accounts of the partners.) However, if the transfer of an interest in a partnership causes a termination of the partnership under section 708(b)(1)(B), the capital account that carriers over to the transferee partner will be adjusted in accordance with paragraph (b)(2)(iv)(e) of this section in connection with the constructive liquidation of the partnership under paragraph (b)(1)(iv) of § 1.708–1. Moreover, the constructive reformation of such partnership will, for purposes of this paragraph, be treated as the formation of a new partnership, and the capital accounts of the partners of such new partnership will be determined and maintained accordingly. See example (13) of paragraph (b)(5) of this section.

(m) Section 754 elections—(1) In general. The capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless, upon adjustment to the adjusted tax basis of partnership property under section 732, 734, or 743, the capital accounts of the partners are adjusted as provided in this paragraph (b)(2)(iv)(m).

(2) Section 743 adjustments. In the case of a transfer of all or a part of an interest in a partnership that has a section 754 election in effect for the partnership taxable year in which such transfer occurs, adjustments to the adjusted tax basis of partnership property under section 743 shall not be reflected in the capital account of the transferee partner or on the books of the partnership, and subsequent capital account adjustments for distributions (see paragraph (b)(2)(iv)(e)(1) of this section) and for depreciation, depletion, amortization, and gain or loss with respect to such property will disregard the effect of such basis adjustment. The preceding sentence shall not apply to the extent such basis adjustment is allocated to the common basis of partnership property under paragraph (b)(1) of § 1.734–2; in these cases, such basis adjustment shall, except as provided in paragraph (b)(2)(iv)(m)(5) of this section, give rise to adjustments to the capital accounts of the partners in accordance with their interests in the partnership under paragraph (b)(3) of this section. See examples (13)(iii) and (iv) of paragraph (b)(5) of this section.

(3) Section 732 adjustments. In the case of a transfer of all or a part of an interest in a partnership that does not have a section 754 election in effect for the partnership taxable year in which such transfer occurs, adjustments to the adjusted tax basis of partnership property under section 732(d) will be treated in the capital accounts of the partners in the same manner as section 743 basis adjustments are treated under paragraph (b)(2)(iv)(m)(2) of this section.

(4) Section 734 adjustments. Except as provided in paragraph (b)(2)(iv)(m)(5) of this section, in the case of a distribution of property in liquidation of a partner's interest in the partnership by a partnership that has a section 754 election in effect for the partnership taxable year in which the distribution occurs, the partner who receives the distribution that gives rise to the adjustment to the adjusted tax basis of partnership property under section 734 shall have a corresponding adjustment made to his capital account. If such distribution is made other than in liquidation of a partner's interest in the partnership, however, except as provided in paragraph (b)(2)(iv)(m)(5) of this section, the capital accounts of the partners shall be adjusted by the amount of the adjustment to the adjusted tax basis of partnership property under section 734, and such capital account adjustment shall be shared among the partners in the manner in which the unrealized income and gain that is displaced by such adjustment would have been shared if the property whose basis is adjusted were sold immedi-

ately prior to such adjustment for its recomputed adjusted tax basis.

(5) Limitations on adjustments. Adjustments may be made to the capital account of a partner (or his successor in interest) in respect of basis adjustments to partnership property under sections 732, 734, and 743 only to the extent that such basis adjustments (i) are permitted to be made to one or more items of partnership property under section 755, and (ii) result in an increase or a decrease in the amount at which such property is carried on the partnership's balance sheet, as computed for book purposes. For example, if the book value of partnership property exceeds the adjusted tax basis of such property, a basis adjustment to such property may be reflected in a partner's capital account only to the extent such adjustment exceeds the difference between the book value of such property and the adjusted tax basis of such property prior to such adjustment.

(n) Partnership level characterization. Except as otherwise provided in paragraph (b)(2)(iv)(k) of this section, the capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless adjustments to such capital accounts in respect of partnership income, gain, loss, deduction, and section 705(a)(2)(B) expenditures (or item thereof) are made with reference to the Federal tax treatment of such items (and in the case of book items, with reference to the Federal tax treatment of the corresponding tax items) at the partnership level, without regard to any requisite or elective tax treatment of such items at the partner level (for example, under section 58(i)). However, a partnership that incurs mining exploration expenditures will determine the Federal tax treatment of income, gain, loss, and deduction with respect to the property to which such expenditures relate at the partnership level only after first taking into account the elections made by its partners under section 617 and section 703(b)(4).

(*o*) Guaranteed payments. Guaranteed payments to a partner under section 707(c) cause the capital account of the recipient partner to be adjusted only to the extent of such partner's distributive share of any partnership deduction, loss, or other downward capital account adjustment resulting from such payment.

(p) Minor discrepancies. Discrepancies between the balances in the respective capital accounts of the partners and the balances that would be in such respective capital accounts if they had been determined and maintained in accordance with this paragraph (b)(2)(iv) will not adversely affect the validity of an allocation, provided that such discrepancies are minor and are attributable to good faith error by the partnership.

(q) Adjustments where guidance is lacking. If the rules of this paragraph (b)(2)(iv) fail to provide guidance on how adjustments to the capital accounts of the partners should be made to reflect particular adjustments to partnership capital on the books of the partnership, such capital accounts will not be considered to be determined and maintained in accordance with those rules unless such capital account adjustments are made in a manner that (1) maintains equality between the aggregate governing capital accounts of the partners and the amount of partnership capital reflected on the partnership's balance sheet, as computed for book purposes, (2) is consistent with the underlying economic arrangement of the partners, and (3) is based, wherever practicable, on Federal tax accounting principles.

(r) Restatement of capital accounts. With respect to partnerships that began operating in a taxable year beginning before May 1, 1986, the capital accounts of the partners of which have not been determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) since inception, such capital accounts shall not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) for taxable years beginning after April 30, 1986, unless either—

(1) Such capital accounts are adjusted, effective for the first partnership taxable year beginning after April 30, 1986, to reflect the fair market value of partnership property as of the first day of such taxable year, and in connection with such adjustment, the rules contained in paragraph (b)(2)(iv)(f) (2), (3), and (4) of this section are satisfied, or

(2) the differences between the balance in each partner's capital account and the balance that would be in such partner's capital account if capital accounts had been determined and maintained in accordance with this paragraph (b)(2)(iv) throughout the full term of the partnership are not significant (for example, such differences are solely attributable to a failure to provide for treatment of section 709 expenses in accordance with the rules of paragraph (b)(2)(iv)(i)(2) of this section or to a failure to follow the rules in paragraph (b)(2)(iv)(m) of this section), and capital accounts are adjusted to bring them into conformity with the rules of this paragraph (b)(2)(iv) no later than

the end of the first partnership taxable year beginning after April 30, 1986.

However, compliance with the previous sentence will have no bearing on the validity of allocations that relate to partnership taxable years beginning before May 1, 1986.

(3) Partner's interest in the partnership—(i) In general. References in section 704(b) and this paragraph to a partner's interest in the partnership, or to the partner's interests in the partnership, signify the manner in which the partners have agreed to share the economic benefit or burden (if any) corresponding to the income, gain, loss, deduction, or credit (or item thereof) that is allocated. Except with respect to partnership items that cannot have economic effect (such as nonrecourse deductions of the partnership), this sharing arrangement may or may not correspond to the overall economic arrangement of the partners. Thus, a partner who has a 50 percent overall interest in the partnership may have a 90 percent interest in a particular item of income or deduction. (For example, in the case of an unexpected downward adjustment to the capital account of a partner who does not have a deficit make-up obligation that causes such partner to have a negative capital account, it may be necessary to allocate a disproportionate amount of gross income of the partnership to such partner for such year so as to bring that partner's capital account back up to zero.) The determination of a partner's interest in a partnership shall be made by taking into account all facts and circumstances relating to the economic arrangement of the partners. All partners' interests in the partnership are presumed to be equal (determined on a per capita basis). However, this presumption may be rebutted by the taxpayer or the Internal Revenue Service by establishing facts and circumstances that show that the partners' interests in the partnership are otherwise.

(ii) Factors considered. In determining a partner's interest in the partnership, the following factors are among those that will be considered:

(a) The partners' relative contributions to the partnership,

(b) The interests of the partners in economic profits and losses (if different than that in taxable income or loss),

(c) The interests of the partners in cash flow and other non-liquidating distributions, and

(d) The rights of the partners to distributions of capital upon liquidation.

The provisions of this subparagraph (b)(3) are illustrated by examples (1)(i) and (ii), (4)(i), (5)(i) and (ii), (6), (7), (8), (10)(ii), (16)(i), and (19)(iii) of paragraph (b)(5) of this section. See paragraph (b)(4)(i) of this section concerning rules for determining the partners' interests in the partnership with respect to certain tax items.

(iii) Certain determinations. If—

(a) Requirements (1) and (2) of paragraph (b)(2)(ii)(b) of this section are satisfied, and

(b) All or a portion of an allocation of income, gain, loss, or deduction made to a partner for a partnership taxable year does not have economic effect under paragraph (b)(2)(ii) of this section.

the partners' interests in the partnership with respect to the portion of the allocation that lacks economic effect will be determined by comparing the manner in which distributions (and contributions) would be made if all partnership property were sold at book value and the partnership were liquidated immediately following the end of the taxable year to which the allocation relates with the manner in which distributions (and contributions) would be made if all partnership property were sold at book value and the partnership were liquidated immediately following the end of the prior taxable year, and adjusting the result for the items described in (4), (5), and (6) of paragraph (b)(2)(ii)(d) of this section. A determination made under this paragraph (b)(3)(iii) will have no force if the economic effect of valid allocations made in the same manner is insubstantial under paragraph (b)(2)(iii) of this section. See examples (1)(iv), (v), and (vi), and (15)(ii) and (iii) of paragraph (b)(5) of this section.

(4) Special rules—(i) Allocations to reflect revaluations. If partnership property is, under paragraphs (b)(2)(iv)(d) or (b)(2)(iv)(f) of this section, properly reflected in the capital accounts of the partners and on the books of the partnership at a book value that differs from the adjusted tax basis of such property, then depreciation, depletion, amortization, and gain or loss, as computed for book purposes, with respect to such property will be greater or less than the depreciation, depletion, amortization, and gain or loss, as computed for tax purposes, with respect to such property. In these cases the capital accounts of the partners are required to be adjusted solely for allocations of the book items to such partners (see paragraph (b)(2)(iv)(g) of this section), and the partners' shares of the corresponding tax items are not independently reflected by further adjustments to the partners' capital accounts. Thus, separate al-

locations of these tax items cannot have economic effect under paragraph (b)(2)(ii)(b)(1) of this section, and the partners' distributive shares of such tax items must (unless governed by section 704(c)) be determined in accordance with the partners' interests in the partnership. These tax items must be shared among the partners in a manner that takes account of the variation between the adjusted tax basis of such property and its book value in the same manner as variations between the adjusted tax basis and fair market value of property contributed to the partnership are taken into account in determining the partners' shares of tax items under section 704(c). See examples (14) and (18) of paragraph (b)(5) of this section.

(ii) **Credits.** Allocations of tax credits and tax credit recapture are not reflected by adjustments to the partners' capital accounts (except to the extent that adjustments to the adjusted tax basis of partnership section 38 property in respect of tax credits and tax credit recapture give rise to capital account adjustments under paragraph (b)(2)(iv)(j) of this section). Thus, such allocations cannot have economic effect under paragraph (b)(2)(ii)(b)(1) of this section, and the tax credits and tax credit recapture must be allocated in accordance with the partners' interests in the partnership as of the time the tax credit or credit recapture arises. With respect to the investment tax credit provided by section 38, allocations of cost or qualified investment made in accordance with paragraph (f) of § 1.46–3 and paragraph (a)(4)(iv) of § 1.48–8 shall be deemed to be made in accordance with the partners' interests in the partnership. With respect to other tax credits, if a partnership expenditure (whether or not deductible) that gives rise to a tax credit in a partnership taxable year also gives rise to valid allocations of partnership loss or deduction (or other downward capital account adjustments) for such year, then the partners' interests in the partnership with respect to such credit (or the cost giving rise thereto) shall be in the same proportion as such partners' respective distributive shares of such loss or deduction (and adjustments). See example (11) of paragraph (b)(5) of this section. Identical principles shall apply in determining the partners' interests in the partnership with respect to tax credits that arise from receipts of the partnership (whether or not taxable).

(iii) **Excess percentage depletion.** To the extent the percentage depletion in respect of an item of depletable property of the partnership exceeds the adjusted tax basis of such property, allocations of such excess percentage depletion are not reflected by adjustments to the partners' capital accounts. Thus, such allocations cannot have economic effect under paragraph (b)(2)(ii)(b)(1) of this section, and such excess percentage depletion must be allocated in accordance with the partners' interests in the partnership. The partners' interests in the partnership for a partnership taxable year with respect to such excess percentage depletion shall be in the same proportion as such partners' respective distributive shares of gross income from the depletable property (as determined under section 613(c)) for such year. See example (12) of paragraph (b)(5) of this section. See paragraphs (b)(2)(iv)(k) and (b)(4)(v) of this section for special rules concerning oil and gas properties of the partnership.

(iv) **Nonrecourse deductions**—(a) Allocation of nonrecourse deductions. An allocation of loss, deduction, or section 705(a)(2)(B) expenditure (or item thereof) attributable to nonrecourse liabilities of the partnership ("nonrecourse deductions") cannot have economic effect because, in the event there is an economic burden that corresponds to such an allocation, the creditor alone bears that burden. Thus, nonrecourse deductions must be allocated in accordance with the partners' interests in the partnership. Paragraph (b)(4)(iv)(d) of this section, however, provides a test under which certain allocations of nonrecourse deductions will be deemed to be in accordance with the partners' interests in the partnership. If that test is not satisfied, the partners' distributive shares of nonrecourse deductions will be determined, under paragraph (b)(3) of this section, according to the partners' overall economic interests in the partnership.

(b) Determination of nonrecourse deductions. The amount of nonrecourse deductions for a partnership taxable year equals the net increase, if any, in the amount of partnership minimum gain during that taxable year. See Examples (20)(i), (21), and (22) of paragraph (b)(5) of this section. In determining such net increase for any partnership taxable year in which the capital accounts of the partners are increased pursuant to paragraph (b)(2)(iv)(f) of this section to reflect a revaluation of partnership property subject to one or more nonrecourse liabilities of the partnership, any decrease in partnership minimum gain attributable to each such revaluation shall be added back to the net decrease or increase otherwise determined. See example (22)(iii) of paragraph (b)(5) of this section. The nonrecourse deductions for a partnership taxable year shall consist first of depreciation or cost recovery deductions with respect to items of partnership property subject to one or more nonrecourse liabilities of the partnership to

the extent of the increase in minimum gain attributable to the nonrecourse liabilities to which each such item of property is subject, with the remainder of such nonrecourse deductions, if any, made up of a pro rata portion of the partnership's other items of deduction, loss, and section 705(a)(2)(B) expenditure for that year. If, however, such depreciation or cost recovery deductions exceed the net increase in partnership minimum gain, a proportional share of each such deduction shall constitute a nonrecourse deduction. See example (23) of paragraph (b)(5) of this section. In addition, if the net increase in partnership minimum gain during a partnership taxable year exceeds the total amount of items of partnership loss, deduction, and section 705(a)(2)(B) expenditure for such year, then an amount of partnership loss, deduction, and section 705(a)(2)(B) expenditure for the partnership's next succeeding taxable year (or years) equal to such excess shall constitute nonrecourse deductions, as if there had been a net increase in partnership minimum gain during such succeeding year (or years) in the amount of such excess.

(c) Partnership minimum gain. The amount of partnership minimum gain is determined by computing, with respect to each nonrecourse liability of the partnership, the amount of gain (of whatever character), if any, that would be realized by the partnership if it disposed of (in a taxable transaction) the partnership property subject to such liability in full satisfaction thereof, and by then aggregating the amounts so computed. See examples (20) (i) and (iv), (21), and (22) of paragraph (b)(5) of this section. For the purpose of determining the amount of such gain, (1) the adjusted basis of partnership property subject to two or more liabilities of equal priority shall be allocated among such liabilities in proportion to the respective outstanding balances of such liabilities, and (2) the adjusted basis of partnership property subject to two or more liabilities of unequal priority shall be allocated to the liabilities of an inferior priority (in accordance with (1) above) only to the extent of the excess, if any, of the adjusted tax basis of such property over the aggregate outstanding balance of the liabilities of superior priority. Only the portion of the property's adjusted basis allocated to nonrecourse liabilities of the partnership shall be used in computing minimum gain. See example (20) (v) and (vi) of paragraph (b)(5) of this section. If partnership property subject to one or more nonrecourse liabilities of the partnership is, under paragraph (b)(2)(iv)(d) or (b)(2)(iv)(f) of this section, properly reflected on the books of the partnership at a book value that differs from the adjusted tax basis of such property, the determinations under this paragraph (b)(4)(iv) shall be made with reference to such book value. See example (22) of paragraph (b)(5) of this section.

(d) Requirements to be satisfied. Allocations of nonrecourse deductions shall be deemed to be made in accordance with the partners' interests in the partnership if, and only if—

(1) Throughout the full term of the partnership, requirements (1) and (2) of paragraph (b)(2)(ii)(b) of this section are satisfied,

(2) Beginning in the first taxable year in which there are nonrecourse deductions and thereafter throughout the full term of the partnership, the partnership agreement provides for allocations of nonrecourse deductions among the partners in a manner that is reasonably consistent with allocations, which have substantial economic effect, of some other significant partnership item attributable to the property securing nonrecourse liabilities of the partnership (other than minimum gain recognized by the partnership),

(3) Beginning in the first taxable year of the partnership in which the partnership has nonrecourse deductions and thereafter throughout the full term of the partnership, (i) requirement (3) of paragraph (b)(2)(ii)(b) of this section is satisfied, or (ii) the partnership agreement contains a "minimum gain chargeback" (as defined in paragraph (b)(4)(iv)(e) of this section), and

(4) All other material allocations and capital account adjustments under the partnership agreement are recognized under this paragraph (b) (without regard to whether allocations of adjusted tax basis and amount realized under section 613A(c)(7)(D) are recognized under paragraph (b)(4)(v) of this section).

(e) Minimum gain chargeback. A partnership agreement contains a "minimum gain chargeback" if, and only if, it provides that, if there is a net decrease in partnership minimum gain during a partnership taxable year, all partners with a deficit capital account balance at the end of such year (excluding from each partner's deficit capital account balance any amount that such partner is obligated to restore under paragraph (b)(2)(ii)(c) of this section, as well as any addition thereto pursuant to the next to last sentence of paragraph (b)(4)(iv)(f) of this section computed with respect to the amount of partnership minimum gain after such net decrease) will be allocated, before any other allocation is made under section 704(b) of partnership items for such taxable year, items of

income and gain for such year (and, if necessary, subsequent years) in the amount and in the proportions needed to eliminate such deficits as quickly as possible. For purposes of the preceding sentence, partners' capital accounts shall be reduced for the items described in paragraphs (b)(2)(ii)(d) (4), (5), and (6) of this section. Allocations of items of income and gain made pursuant to a minimum gain chargeback shall be deemed to be made in accordance with the partners' interests in the partnership if requirements (1) and (2) of paragraph (b)(2)(ii)(b) of this section are satisfied. The minimum gain chargeback allocated in any taxable year shall consist first of gains recognized from the disposition of items of partnership property subject to one or more nonrecourse liabilities of the partnership to the extent of the decrease in minimum gain attributable to the disposition of such items of property, with the remainder of such minimum gain chargeback, if any, made up of a pro rata portion of the partnership's other items of income and gain for that year. If, however, such gains exceed the amount of the minimum gain chargeback, a proportional share of each such gain shall constitute a part of the minimum gain chargeback. For purposes of paragraph (b)(2)(ii)(d)(6) of this section, offsetting increases to a partner's capital account taken into account under that paragraph shall not include income and gain that is expected to be allocated to such partner pursuant to a minimum gain chargeback.

(f) Partner's share of partnership minimum gain. A partner's share of partnership minimum gain at the end of any partnership taxable year equals the aggregate nonrecourse deductions allocated to such partner (and such partner's predecessors in interest) up to that time, less such partner's (and such predecessors') aggregate share of the net decreases in partnership minimum gain up to that time. A partner's share of the net decrease in partnership minimum gain during a partnership taxable year equals an amount that bears the same relation to the net decrease in partnership minimum gain during such year as such partner's share of partnership minimum gain at the end of the prior taxable year of the partnership (or, if later, at the time immediately following the last time that the capital accounts of the partners are increased pursuant to paragraph (b)(2)(iv)(f) of this section to reflect a revaluation of partnership property subject to one or more nonrecourse liabilities of the partnership) bears to the amount of partnership minimum gain at the end of such prior taxable year (or such later date). See examples (20) (i) and (iv) and (21) of paragraph (b)(5) of this section. In addition, if there is a decrease in partnership minimum gain in a taxable year of the partnership (whether or not there is a net decrease in partnership minimum gain during such year) attributable to the revaluation of partnership property subject to one or more nonrecourse liabilities of the partnership, each partner's share of partnership minimum gain as of the time of such revaluation shall be reduced by the amount of the increase in such partner's capital account attributable to such revaluation to the extent of the reduction in minimum gain caused by such revaluation. See example (22)(ii) of paragraph (b)(5) of this section. For purposes of paragraph (b)(2)(ii)(d) of this section, the amount of a partner's share of minimum gain shall be added to the limited dollar amount, if any, of the deficit balance in such partner's capital account that such partner is obligated to restore. See examples (20)(i) and (22)(i) of paragraph (b)(5) of this section.

(g) Nonrecourse liabilities of the partnership where a partner has economic risk of loss. The rationale for the special rule contained in this paragraph (b)(4)(iv) is that, in the event there is an economic burden that corresponds to the nonrecourse deductions, none of the partners will bear that burden. Accordingly, for purposes of this paragraph, a nonrecourse liability of the partnership is a liability of the partnership (or portion thereof) with respect to which none of the partners has any economic risk of loss (other than through their interests as partners in the partnership assets subject to the liability). Therefore, to the extent a partner may bear the burden of an economic loss corresponding to a loss, deduction, or section 705(a)(2)(B) expenditure attributable to a partnership liability that would be considered nonrecourse for purposes of § 1.1001-2 (e.g., a purported nonrecourse loan made by such partner to the partnership or guaranteed by such partner), allocations of such loss, deduction, or section 705(a)(2)(B) expenditure are not governed by this paragraph (b)(4)(iv). Instead, allocations of such loss or deduction shall be made in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section. This will require allocations of such loss or deduction to be made to the partner or partners who bear the burden of an economic loss corresponding to such loss or deduction. See examples (20) (vii) and (viii) of paragraph (b)(5) of this section.

(h) Nonrecourse liabilities of the partnership where a person related to a partner has economic risk of loss. [Reserved]

(v) Allocations under section 613A(c)(7)(D). Allocations of the adjusted tax basis of a partner-

ship oil or gas property are controlled by section 613A(c)(7)(D) and the regulations thereunder. However, if the partnership agreement provides for an allocation of the adjusted tax basis of an oil or gas property among the partners, and such allocation is not otherwise governed under section 704(c) (or related principles under paragraph (b)(4)(i) of this section), that allocation will be recognized as being in accordance with the partners' interests in partnership capital under section 613A(c)(7)(D), provided (a) such allocation does not give rise to capital account adjustments under paragraph (b)(2)(iv)(k) of this section the economic effect of which is insubstantial (as determined under paragraph (b)(2)(iii) of this section), and (b) all other material allocations and capital account adjustments under the partnership agreement are recognized under this paragraph (b). Otherwise, such adjusted tax basis must be allocated among the partners pursuant to section 613A(c)(7)(D) in accordance with the partners' actual interests in partnership capital or income. For purposes of section 613A(c)(7)(D) the partners' allocable shares of the amount realized upon the partnership's taxable disposition of an oil or gas property will, except to the extent governed by section 704(c) (or related principles under paragraph (b)(4)(i) of this section), be determined under this paragraph (b)(4)(v). If, pursuant to paragraph (b)(2)(iv)(k)(2) of this section, the partners' capital accounts are adjusted to reflect the simulated depletion of an oil or gas property of the partnership, the portion of the total amount realized by the partnership upon the taxable disposition of such property that represents recovery of its simulated adjusted tax basis therein will be allocated to the partners in the same proportion as the aggregate adjusted tax basis of such property was allocated to such partners (or their predecessors in interest). If, pursuant to paragraph (b)(2)(iv)(k)(3) of this section, the partners' capital accounts are adjusted to reflect the actual depletion of an oil or gas property of the partnership, the portion of the total amount realized by the partnership upon the taxable disposition of such property that equals the partners' aggregate remaining adjusted basis therein will be allocated to the partners in proportion to their respective remaining adjusted tax bases in such property. An allocation provided by the partnership agreement of the portion of the total amount realized by the partnership on its taxable disposition of an oil or gas property that exceeds the portion of the total amount realized allocated under either of the previous two sentences (whichever is applicable) shall be deemed to be made in accordance with the partners' allocable shares of such amount realized, provided (c) such allocation does not give rise to capital account adjustments under paragraph (b)(2)(iv)(k) of this section the economic effect of which is insubstantial (as determined under paragraph (b)(2)(ii) of this section), and (d) all other allocations and capital account adjustments under the partnership agreement are recognized under this paragraph. Otherwise, the partners' allocable shares of the total amount realized by the partnership on its taxable disposition of an oil or gas property shall be determined in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section. See example (19) of paragraph (b)(5) of this section. (See paragraph (b)(2)(iv)(k) of this section for the determination of appropriate adjustments to the partners' capital accounts relating to section 613A(c)(7)(D).)

(vi) Amendments to partnership agreement. If an allocation has substantial economic effect under paragraph (b)(2) of this section or is deemed to be made in accordance with the partners' interests in the partnership under paragraph (b)(4) of this section under the partnership agreement that is effective for the taxable year to which such allocation relates, and such partnership agreement thereafter is modified, both the tax consequences of the modification and the facts and circumstances surrounding the modification will be closely scrutinized to determine whether the purported modification was part of the original agreement. If it is determined that the purported modification was part of the original agreement, prior allocations may be reallocated in a manner consistent with the modified terms of the agreement, and subsequent allocations may be reallocated to take account of such modified terms. For example, if a partner is obligated by the partnership agreement to restore the deficit balance in his capital account (or any limited dollar amount thereof) in accordance with requirement (3) of paragraph (b)(2)(ii)(b) of this section and, thereafter, such obligation is eliminated or reduced (other than as provided in paragraph (b)(2)(ii)(f) of this section), or is not complied with in a timely manner, such elimination, reduction, or noncompliance may be treated as if it always were part of the partnership agreement for purposes of making any reallocations and determining the appropriate limitations period.

(vii) Recapture. For special rules applicable to the allocation of recapture income or credit, see paragraph (e) of § 1.1245–1, paragraph (f) of § 1.1250–1, paragraph (c) of § 1.1254–1, and paragraph (a) of § 1.47–6.

(5) Examples. The operation of the rules in this paragraph is illustrated by the following examples:

Example (1). (i) A and B form a general partnership with cash contributions of $40,000 each, which cash is used to purchase depreciable personal property at a cost of $80,000. The partnership elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such property. The partnership agreement provides that A and B will have equal shares of taxable income and loss (computed without regard to cost recovery deductions) and cash flow and that all cost recovery deductions on the property will be allocated to A. The agreement further provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of the section, but that upon liquidation of the partnership, distributions will be made equally between the partners (regardless of capital account balances) and no partner will be required to restore the deficit balance in his capital account for distribution to partners with positive capital accounts balances. In the partnership's first taxable year, it recognizes operating income equal to its operating expenses and has an additional $20,000 cost recovery deduction, which is allocated entirely to A. That A and B will be entitled to equal distributions on liquidation, even though A is allocated the entire $20,000 cost recovery deduction, indicates A will not bear the full risk of the economic loss corresponding to such deduction if such loss occurs. Under paragraph (b)(2)(ii) of this section, the allocation lacks economic effect and will be disregarded. The partners made equal contributions to the partnership, share equally in other taxable income and loss and in cash flow, and will share equally in liquidation proceeds, indicating that their actual economic arrangement is to bear the risk imposed by the potential decrease in the value of the property equally. Thus, under paragraph (b)(3) of this section the partners' interests in the partnership are equal, and the cost recovery deduction will be reallocated equally between A and B.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that liquidation proceeds will be distributed in accordance with capital account balances if the partnership is liquidated during the first five years of its existence but that liquidation proceeds will be distributed equally if the partnership is liquidated thereafter. Since the partnership agreement does not provide for the requirement contained in paragraph (b)(2)(ii)(b)(2) of this section to be satisfied throughout the term of the partnership, the partnership allocations do not have economic effect. Even if the partnership agreement provided for the requirement contained in paragraph (b)(2)(ii)(b)(2) to be satisfied throughout the term of the partnership, such allocations would not have economic effect unless the requirement contained in paragraph (b)(2)(ii)(b)(3) of this section or the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section were satisfied.

(iii) Assume the same facts as in (i) except that distributions in liquidation of the partnership (or any partner's interest) are to be made in accordance with the partners' positive capital account balances throughout the term of the partnership (as set forth in paragraph (b)(2)(ii)(b)(2) of this section). Assume further that the partnership agreement contains a qualified income offset (as defined in paragraph (b)(2)(ii)(d) of this section) and that, as of the end of each partnership taxable year, the items described in paragraphs (b)(2)(ii)(d)(4), (5), and (6) of this section are not reasonably expected to cause or increase a deficit balance in A's capital account.

	A	B
Capital account upon formation	$40,000	$40,000
Less: year 1 cost recovery deduction	(20,000)	0
Capital account at end of year 1	$20,000	$40,000

Under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section, the allocation of the $20,000 cost recovery deduction to A has economic effect.

(iv) Assume the same facts as in (iii) and that in the partnership's second taxable year it recognizes operating income equal to its operating expenses and has a $25,000 cost recovery deduction which, under the partnership agreement, is allocated entirely to A.

	A	B
Capital account at beginning of year 2	$20,000	$40,000
Less: year 2 cost recovery deduction	(25,000)	0
Capital account at end of year 2	($5,000)	$40,000

The allocation of the $25,000 cost recovery deduction to A satisfies that alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section only to the extent of $20,000. Therefore, only $20,000 of such allocation has economic effect, and the remaining $5,000 must be reallocated in accordance with the partners' interests in the partnership. Under the partnership agreement, if the property were sold immediately following the end of the partnership's second taxable year for $35,000 (its adjusted tax basis), the $35,000 would be distributed to B. Thus, B, and not A, bears the economic burden corresponding to $5,000 of the $25,000 cost recovery deduction allocated to A. Under paragraph (b)(3)(iii) of this section, $5,000 of such cost recovery deduction will be reallocated to B.

(v) Assume the same facts as in (iv) except that the cost recovery deduction for the partnership's second taxable year is $20,000 instead of $25,000. The allocation of such cost recovery deduction to A has economic effect under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section. Assume further that the property is sold for $35,000 immediately following the end of the partnership's second taxable year, resulting in a $5,000 taxable loss ($40,000 adjusted tax basis less $35,000 sales price), and the partnership is liquidated.

	A	B
Capital account at beginning of year 2	$20,000	$40,000
Less: year 2 cost recovery deduction	(20,000)	0
Capital account at end of year 2	0	$40,000
Less: loss on sale	(2,500)	(2,500)
Capital account before liquidation	($2,500)	$37,500

Under the partnership agreement the $35,000 sales proceeds are distributed to B. Since B bears the entire economic burden corresponding to the $5,000 taxable loss from the sale of the property, the allocation of $2,500 of such loss to A does not have economic effect and must be reallocated in accordance with the partners' interests in the partnership. Under paragraph (b)(3)(iii) of this section, such $2,500 loss will be reallocated to B.

(vi) Assume the same facts as in (iv) except that the cost recovery deduction for the partnership's second taxable year is

$20,000 instead of $25,000, and that as of the end of the partnership's second taxable year it is reasonably expected that during its third taxable year the partnership will (1) have operating income equal to its operating expenses (but will have no cost recovery deductions), (2) borrow $10,000 (recourse) and distribute such amount $5,000 to A and $5,000 to B, and (3) thereafter sell the partnership property, repay the $10,000 liability, and liquidate. In determining the extent to which the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section is satisfied as of the end of the partnership's second taxable year, the fair market value of partnership property is presumed to be equal to its adjusted tax basis (in accordance with paragraph (b)(2)(iii)(c) of this section). Thus, it is presumed that the selling price of such property during tbe partnership's third taxable year will be its $40,000 adjusted tax basis. Accordingly, there can be no reasonable expectation that there will be increases to A's capital account in the partnership's third taxable year that will offset the expected $5,000 distribution to A. Therefore, the distribution of the loan proceeds must be taken into account in determining to what extent the alternate economic effect test contained in paragraph (b)(2)(ii)(d) is satisfied.

	A	B
Capital account at beginning of year 2	$20,000	$40,000
Less: expected future distribution	(5,000)	(5,000)
Less: year 2 cost recovery deduction	(20,000)	(0)
Hypothetical capital account at end of year 2	($5,000)	$35,000

Upon sale of the partnership property, the $40,000 presumed sales proceeds would be used to repay the $10,000 liability, and the remaining $30,000 would be distributed to B. Under these circumstances the allocation of the $20,000 cost recovery deduction to A in the partnership's second taxable year satisfies the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section only to the extent of $15,000. Under paragraph (b)(3)(iii) of this section, the remaining $5,000 of such deduction will be reallocated to B. The results in this example would be the same even if the partnership agreement also provided that any gain (whether ordinary income or capital gain) upon the sale of the property would be allocated to A to the extent of the prior allocations of cost recovery deductions to him, and, at end of the partnership's second taxable year, the partners were confident that the gain on the sale of the property in the partnership's third taxable year would be sufficient to offset the expected $5,000 distribution to A.

(vii) Assume the same facts as in (iv) except that the partnership agreement also provides that any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraph (b)(2)(ii)(b)(3) of this section). Thus, if the property were sold for $35,000 immediately after the end of the partnership's second taxable year, the $35,000 would be distributed to B, A would contribute $5,000 (the deficit balance in his capital account) to the partnership, and that $5,000 would be distributed to B. The allocation of the entire $25,000 cost recovery deduction to A in the partnership's second taxable year has economic effect.

(viii) Assume the same facts as in (vii) except that A's obligation to restore the deficit balance in his capital account is limited to a maximum of $5,000. The allocation of the $25,000 cost recovery deduction to A in the partnership's second taxable year has economic effect under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section. At the end of such year, A makes an additional $5,000 contribution to the partnership (thereby eliminating the $5,000 deficit balance in his capital account). Under paragraph (b)(2)(ii)(f) of this section, A's obligation to restore up to $5,000 of the deficit balance in his capital account may be eliminated after he contributes the additional $5,000 without affecting the validity of prior allocations.

(ix) Assume the same facts as in (iv) except that upon formation of the partnership A also contributes to the partnership his negotiable promissory note with a $5,000 principal balance. The note unconditionally obligates A to pay an additional $5,000 to the partnership at the earlier of (a) the beginning of the partnership's fourth taxable year, or (b) the end of the partnership taxable year in which A's interest is liquidated. Under paragraph (b)(2)(ii)(c) of this section, A is considered obligated to restore up to $5,000 of the deficit balance in his capital account to the partnership. Accordingly, under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section, the allocation of the $25,000 cost recovery deduction to A in the partnership's second taxable year has economic effect. The results in this example would be the same if (1) the note A contributed to the partnership were payable only at the end of the partnership's fourth taxable year (so that A would not be required to satisfy the note upon liquidation of his interest in the partnership), and (2) the partnership agreement provided that upon liquidation of A's interest, the partnership would retain A's note, and A would contribute to the partnership the excess of the outstanding principal balance of the note over its then fair market value.

(x) Assume the same facts as in (ix) except that A's obligation to contribute an additional $5,000 to the partnership is not evidenced by a promissory note. Instead, the partnership agreement imposes upon A the obligation to make an additional $5,000 contribution to the partnership at the earlier of (a) the beginning of the partnership's fourth taxable year, or (b) the end of the partnership taxable year in which A's interest is liquidated. Under paragraph (b)(2)(ii)(c) of this section, as a result of A's deferred contribution requirement, A is considered obligated to restore up to $5,000 of the deficit balance in his capital account to the partnership. Accordingly, under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section, the allocation of the $25,000 cost recovery deduction to A in the partnership's second taxable year has economic effect.

(xi) Assume the same facts as in (vii) except that the partnership agreement also provides that any gain (whether ordinary income or capital gain) upon the sale of the property will be allocated to A to the extent of the prior allocations to A of cost recovery deductions from such property, and additional gain will be allocated equally between A and B. At the time the allocations of cost recovery deductions were made to A, the partners believed there would be gain on the sale of the property in an amount sufficient to offset the allocations of cost recovery deductions to A. Nevertheless, the existence of the gain chargeback provision will not cause the economic effect of the allocations to be insubstantial under paragraph (b)(2)(iii)(c) of this section, since in testing whether the economic effect of such allocations is substantial, the recovery property is presumed to decrease in value by the amount of such deductions.

Example (2). C and D form a general partnership solely to acquire and lease machinery that is 5-year recovery property under section 168. Each contributes $100,000, and the partnership obtains an $800,000 recourse loan to purchase the machinery. The partnership elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such machinery. The partnership, C, and D have calendar taxable years. The partnership agreement pro-

vides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The partnership agreement further provides that (a) partnership net taxable loss will be allocated 90 percent to C and 10 percent to D until such time as there is partnership net taxable income, and therefore C will be allocated 90 percent of such taxable income until he has been allocated partnership net taxable income equal to the partnership net taxable loss previously allocated to him, (b) all further partnership net taxable income or loss will be allocated equally between C and D, and (c) distributions of operating cash flow will be made equally between C and D. The partnership enters into a 12-year lease with a financially secure corporation under which the partnership expects to have a net taxable loss in each of its first 5 partnership taxable years due to cost recovery deductions with respect to the machinery and net taxable income in each of its following 7 partnership taxable years, in part due to the absence of such cost recovery deductions. There is a strong likelihood that the partnership's net taxable loss in partnership taxable years 1 through 5 will be $100,000, $90,000, $80,000, $70,000, and $60,000, respectively, and the partnership's net taxable income in partnership taxable years 6 through 12 will be $40,000, $50,000, $60,000, $70,000, $80,000, $90,000, and $100,000, respectively. Even though there is a strong likelihood that the allocations of net taxable loss in years 1 through 5 will be largely offset by other allocations in partnership taxable years 6 through 12, and even if it is assumed that the total tax liability of the partners in years 1 through 12 will be less than if the allocations had not been provided in the partnership agreement, the economic effect of the allocations will not be insubstantial under paragraph (b)(2)(iii)(c) of this section. This is because at the time such allocations became part of the partnership agreement, there was a strong likelihood that the allocations of net taxable loss in years 1 through 5 would not be largely offset by allocations of income within 5 years (determined on a first-in, first-out basis). The year 1 allocation will not be offset until years 6, 7, and 8, the year 2 allocation will not be offset until years 8 and 9, the year 3 allocation will not be offset until years 9 and 10, the year 4 allocation will not be offset until years 10 and 11, and the year 5 allocation will not be offset until years 11 and 12.

Example (3). E and F enter into a partnership agreement to develop and market experimental electronic devices. E contributes $2,500 cash and agrees to devote his full-time services to the partnership. F contributes $100,000 cash and agrees to obtain a loan for the partnership for any additional capital needs. The partnership agreement provides that all deductions for research and experimental expenditures and interest on partnership loans are to be allocated to F. In addition, F will be allocated 90 percent, and E 10 percent, of partnership taxable income or loss, computed net of the deductions for such research and experimental expenditures and interest, until F has received allocations of such taxable income equal to the sum of such research and experimental expenditures, such interest expense, and his share of such taxable loss. Thereafter, E and F will share all taxable income and loss equally. Operating cash flow will be distributed equally between E and F. The partnership agreement also provides that E's and F's capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). These allocations have economic effect. In addition, in view of the nature of the partnership's activities, there is not a strong likelihood at the time the allocations become part of the partnership agreement that the economic effect of the allocations to F of deductions for research and experimental expenditures and interest on partnership loans will be largely offset by allocations to F of partnership net taxable income. The economic effect of the allocations is substantial.

Example (4). (i) G and H contribute $75,000 and $25,000, respectively, in forming a general partnership. The partnership agreement provides that all income, gain, loss, and deduction will be allocated equally between the partners, that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, but that all partnership distributions will, regardless of capital account balances, be made 75 percent to G and 25 percent to H. Following the liquidation of the partnership, neither partner is required to restore the deficit balance in his capital account to the partnership for distribution to partners with positive capital account balances. The allocations in the partnership agreement do not have economic effect. Since contributions were made in a 75/25 ratio and the partnership agreement indicates that all economic profits and losses of the partnership are to be shared in a 75/25 ratio, under paragraph (b)(3) of this section, partnership income, gain, loss, and deduction will be reallocated 75 percent to G and 25 percent to H.

(ii) Assume the same facts as in (i) except that the partnership maintains no capital accounts and the partnership agreement provides that all income, gain, loss, deduction, and credit will be allocated 75 percent to G and 25 percent to H. G and H are ultimately liable (under a State law right of contribution) for 75 percent and 25 percent, respectively, of any debts of the partnership. Although the allocations do not satisfy the requirements of paragraph (b)(2)(ii)(b) of this section, the allocations have economic effect under the economic effect equivalence test of paragraph (b)(2)(ii)(i) of this section.

(iii) Assume the same facts as in (i) except that the partnership agreement provides that any partner with a deficit balance in his capital account must restore that deficit to the partnership (as set forth in paragraph (b)(2)(ii)(b)(2) of this section). Although the allocations do not satisfy the requirements of paragraph (b)(2)(ii)(b) of this section, the allocations have economic effect under the economic effect equivalence test of paragraph (b)(2)(ii)(i) of this section.

Example (5). (i) Individuals I and J are the only partners of an investment partnership. The partnership owns corporate stocks, corporate debt instruments, and tax-exempt debt instruments. Over the next several years, I expects to be in the 50 percent marginal tax bracket, and J expects to be in the 15 percent marginal tax bracket. There is a strong likelihood that in each of the next several years the partnership will realize between $450 and $550 of tax-exempt interest and between $450 and $550 of a combination of taxable interest and dividends from its investments. I and J made equal capital contributions to the partnership, and they have agreed to share equally in gains and losses from the sale of the partnership's investment securities. I and J agree, however, that rather than share interest and dividends of the partnership equally, they will allocate the partnership's tax-exempt interest 80 percent to I and 20 percent to J and will distribute cash derived from interest received on the tax-exempt bonds in the same percentages. In addition, they agree to allocate 100 percent of the partnership's taxable interest and dividends to J and to distribute cash derived from interest and dividends received on the

corporate stocks and debt instruments 100 percent to J. The partnership agreement further provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partner's positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The allocation of taxable interest and dividends and tax-exempt interest has economic effect, but that economic effect is not substantial under the general rules set forth in paragraph (b)(2)(iii) of this section. Without the allocation I would be allocated between $225 and $275 of tax-exempt interest and between $225 and $275 of a combination of taxable interest and dividends, which (net of Federal income taxes he would owe on such income) would give I between $337.50 and $412.50 after tax. With the allocation, however, I will be allocated between $360 and $440 of tax-exempt interest and no taxable interest and dividends, which (net of Federal income taxes) will give I between $360 and $440 after tax. Thus, at the time the allocations became part of the partnership agreement, I is expected to enhance his after-tax economic consequences as a result of the allocations. On the other hand, there is a strong likelihood that neither I nor J will substantially diminish his after-tax economic consequences as a result of the allocations. Under the combination of likely investment outcomes least favorable for J, the partnership would realize $550 of tax-exempt interest and $450 of taxable interest and dividends, giving J $492.50 after tax (which is more than the $466.25 after tax J would have received if each of such amounts had been allocated equally between the partners). Under the combination of likely investment outcomes least favorable for I, the partnership would realize $450 of tax-exempt interest and $550 of taxable interest and dividends, giving I $360 after tax (which is not substantially less than the $362.50 he would have received if each of such amounts had been allocated equally between the partners). Accordingly, the allocations in the partnership agreement must be reallocated in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section.

(ii) Assume the same facts as in (i). In addition, assume that in the first partnership taxable year in which the allocation arrangement described in (i) applies, the partnership realizes $450 of tax-exempt interest and $550 of taxable interest and dividends, so that, pursuant to the partnership agreement, I's capital account is credited with $360 (80 percent of the tax-exempt interest), and J's capital account is credited with $640 (20 percent of the tax-exempt interest and 100 percent of the taxable interest and dividends). The allocations of tax-exempt interest and taxable interest and dividends (which do not have substantial economic effect for the reasons stated in (i) will be disregarded and will be reallocated. Since under the partnership agreement I will receive 36 percent (360/1,000) and J will receive 64 percent (640/1,000) of the partnership's total investment income in such year, under paragraph (b)(3) of this section the partnership's tax-exempt interest and taxable interest and dividends each will be reallocated 36 percent to I and 64 percent to J.

Example (6). K and L are equal partners in a general partnership formed to acquire and operate property described in section 1231(b). The partnership, K, and L have calendar taxable years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, that distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and that any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). For a taxable year in which the partnership expects to incur a loss on the sale of a portion of such property, the partnership agreement is amended (at the beginning of the taxable year) to allocate such loss to K, who expects to have no gains from the sale of depreciable property described in section 1231(b) in that taxable year, and to allocate an equivalent amount of partnership loss and deduction for that year of a different character to L, who expects to have such gains. Any partnership loss and deduction in excess of these allocations will be allocated equally between K and L. The amendment is effective only for that taxable year. At the time the partnership agreement is amended, there is a strong likelihood that the partnership will incur deduction or loss in the taxable year other than loss from the sale of property described in section 1231(b) in an amount that will substantially equal or exceed the expected amount of the section 1231(b) loss. The allocations in such taxable year have economic effect. However, the economic effect of the allocations is insubstantial under the test described in paragraph (b)(2)(iii)(b) of this section because there is a strong likelihood, at the time the allocations become part of the partnership agreement, that the net increases and decreases to K's and L's capital accounts will be the same at the end of the taxable year to which they apply with such allocations in effect as they would have been in the absence of such allocations, and that the total taxes of K and L for such year will be reduced as a result of such allocations. If in fact the partnership incurs deduction or loss, other than loss from the sale of property described in section 1231(b), in an amount at least equal to the section 1231(b) loss, the loss and deduction in such taxable year will be reallocated equally between K and L under paragraph (b)(3) of this section. If not, the loss from the sale of property described in section 1231(b) and the items of deduction and other loss realized in such year will be reallocated between K and L in proportion to the net decreases in their capital accounts due to the allocation of such items under the partnership agreement.

Example (7). (i) M and N are partners in the MN general partnership, which is engaged in an active business. Income, gain, loss, and deduction from MN's business is allocated equally between M and N. The partnership, M, and N have calendar taxable years. Under the partnership agreement the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partner's positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). In order to enhance the credit standing of the partnership, the partners contribute surplus funds to the partnership, which the partners agree to invest in equal dollar amounts of tax-exempt bonds and corporate stock for the partnership's first 3 taxable years. M is expected to be in a higher marginal tax bracket than N during those 3 years. At the time the decision to make these investments is made, it is agreed that, during the 3-year period of the investment, M will be allocated 90 percent and N 10 percent of the interest income from the tax-exempt bonds as well as any gain or loss from the sale thereof, and that M will be allocated 10 percent and N 90 percent of the dividend income from the corporate stock as well as any gain or loss from the sale thereof. At the time the allocations concerning the investments become part of the partnership agreement, there is not a strong likelihood that the gain or loss from the sale of the stock will be substantially equal to the gain or loss from the sale of the tax-exempt bonds, but there is a strong likelihood that the

tax-exempt interest and the taxable dividends realized from these investments during the 3-year period will not differ substantially. These allocations have economic effect, and the economic effect of the allocations of the gain or loss on the sale of the tax-exempt bonds and corporate stock is substantial. The economic effect of the allocations of the tax-exempt interest and the taxable dividends, however, is not substantial under the test described in paragraph (b)(2)(iii)(c) of this section because there is a strong likelihood, at the time the allocations become part of the partnership agreement, that at the end of the 3-year period to which such allocations relate, the net increases and decreases to M's and N's capital accounts will be the same with such allocations as they would have been in the absence of such allocations, and that the total taxes of M and N for the taxable years to which such allocations relate will be reduced as a result of such allocations. If in fact the amounts of the tax-exempt interest and taxable dividends earned by the partnership during the 3-year period are equal, the tax-exempt interest and taxable dividends will be reallocated to the partners in equal shares under paragraph (b)(3) of this section. If not, the tax-exempt interest and taxable dividends will be reallocated between M and N in proportion to the net increases in their capital accounts during such 3-year period due to the allocation of such items under the partnership agreement.

(ii) Assume the same facts as in (i) except that gain or loss from the sale of the tax-exempt bonds and corporate stock will be allocated equally between M and N and the partnership agreement provides that the 90/10 allocation arrangement with respect to the investment income applies only to the first $10,000 of interest income from the tax-exempt bonds and the first $10,000 of dividend income from the corporate stock, and only to the first taxable year of the partnership. There is a strong likelihood at the time the 90/10 allocation of the investment income became part of the partnership agreement that in the first taxable year of the partnership, the partnership will earn more than $10,000 of tax-exempt interest and more than $10,000 of taxable dividends. The allocations of tax-exempt interest and taxable dividends provided in the partnership agreement have economic effect, but under the test contained in paragraph (b)(2)(iii)(b) of this section, such economic effect is not substantial for the same reasons stated in (i) (but applied to the 1 taxable year, rather than to a 3-year period). If in fact the partnership realizes at least $10,000 of tax-exempt interest and at least $10,000 of taxable dividends in such year, the allocations of such interest income and dividend income will be reallocated equally between M and N under paragraph (b)(3) of this section. If not, the tax-exempt interest and taxable dividends will be reallocated between M and N in proportion to the net increases in their capital accounts due to the allocations of such items under the partnership agreement.

(iii) Assume the same facts as in (ii) except that at the time the 90/10 allocation of investment income becomes part of the partnership agreement, there is not a strong likelihood that (1) the partnership will earn $10,000 or more of tax-exempt interest and $10,000 or more of taxable dividends in the partnership's first taxable year, and (2) the amount of tax-exempt interest and taxable dividends earned during such year will be substantially the same. Under these facts the economic effect of the allocations generally will be substantial. (Additional facts may exist in certain cases, however, so that the allocation is insubstantial under the second sentence of paragraph (b)(2)(iii). See example (5) above.)

Example (8). (i) O and P are equal partners in the OP general partnership. The partnership, O, and P have calendar taxable years. Partner O has a net operating loss carryover from another venture that is due to expire at the end of the partnership's second taxable year. Otherwise, both partners expect to be in the 50 percent marginal tax bracket in the next several taxable years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The partnership agreement is amended (at the beginning of the partnership's second taxable year) to allocate all the partnership net taxable income for that year to O. Future partnership net taxable loss is to be allocated to O, and future partnership net taxable income to P, until the allocation of income to O in the partnership's second taxable year is offset. It is further agreed orally that in the event the partnership is liquidated prior to completion of such offset, O's capital account will be adjusted downward to the extent of one-half of the allocations of income to O in the partnership's second taxable year that have not been offset by other allocations, P's capital account will be adjusted upward by a like amount, and liquidation proceeds will be distributed in accordance with the partners' adjusted capital account balances. As a result of this oral amendment, all allocations of partnership net taxable income and net taxable loss made pursuant to the amendment executed at the beginning of the partnership's second taxable year lack economic effect and will be disregarded. Under the partnership agreement other allocations are made equally to O and P, and O and P will share equally in liquidation proceeds, indicating that the partners' interests in the partnership are equal. Thus, the disregarded allocations will be reallocated equally between the partners under paragraph (b)(3) of this section.

(ii) Assume the same facts as in (i) except that there is no agreement that O's and P's capital accounts will be adjusted downward and upward, respectively, to the extent of one-half of the partnership net taxable income allocated to O in the partnership's second taxable year that is not offset subsequently by other allocations. The income of the partnership is generated primarily by fixed interest payments received with respect to highly rated corporate bonds, which are expected to produce sufficient net taxable income prior to the end of the partnership's seventh taxable year to offset in large part the net taxable income to be allocated to O in the partnership's second taxable year. Thus, at the time the allocations are made part of the partnership agreement, there is a strong likelihood that the allocation of net taxable income to be made to O in the second taxable year will be offset in large part within 5 taxable years thereafter. These allocations have economic effect. However, the economic effect of the allocation of partnership net taxable income to O in the partnership's second taxable year, as well as the offsetting allocations to P, is not substantial under the test contained in paragraph (b)(2)(iii)(c) of this section because there is a strong likelihood that the net increases or decreases in O's and P's capital accounts will be the same at the end of the partnership's seventh taxable year with such allocations as they would have been in the absence of such allocations, and the total taxes of O and P for the taxable years to which such allocations relate will be reduced as a result of such allocations. If in fact the partnership, in its taxable years 3 through 7, realizes sufficient net taxable income to offset the amount allocated to O in the second taxable year, the allocations provided in the partnership agreement will be reallocated equally between the partners under paragraph (b)(3) of this section.

Example (9). Q and R form a limited partnership with contributions of $20,000 and $180,000, respectively. Q, the limited partner, is a corporation that has $2,000,000 of net operating loss carryforwards that will not expire for 8 years. Q does not expect to have sufficient income (apart from the

income of the partnership) to absorb any of such net operating loss carryforwards. R, the general partner, is a corporation that expects to be in the 46 percent marginal tax bracket for several years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The partnership's cash, together with the proceeds of an $800,000 loan, are invested in assets that are expected to produce taxable income and cash flow (before debt service) of approximately $150,000 a year for the first 8 years of the partnership's operations. In addition, it is expected that the partnership's total taxable income in its first 8 taxable years will not exceed $2,000,000. The partnership's $150,000 of cash flow in each of its first 8 years will be used to retire the $800,000 loan. The partnership agreement provides that partnership net taxable income will be allocated 90 percent to Q and 10 percent to R in the first through eighth partnership taxable years, and 90 percent to R and 10 percent to Q in all subsequent partnership taxable years. Net taxable loss will be allocated 90 percent to R and 10 percent to Q in all partnership taxable years. All distributions of cash from the partnership to partners (other than the priority distributions to Q described below) will be made 90 percent to R and 10 percent to Q. At the end of the partnership's eighth taxable year, the amount of Q's capital account in excess of one-ninth of R's capital account on such date will be designated as Q's "excess capital account." Beginning in the ninth taxable year of the partnership, the undistributed portion of Q's excess capital account will begin to bear interest which will be paid and deducted under section 707(c) at a rate of interest below the rate that the partnership can borrow from commercial lenders, and over the next several years (following the eight year) the partnership will make priority cash distributions to Q in prearranged percentages of Q's excess capital account designed to amortize Q's excess capital account and the interest thereon over a prearranged period. In addition, the partnership's agreement prevents Q from causing his interest in the partnership from being liquidated (and thereby receiving the balance in his capital account) without R's consent until Q's excess capital account has been eliminated. The below market rate of interest and the period over which the amortization will take place are prescribed such that, as of the end of the partnership's eighth taxable year, the present value of Q's right to receive such priority distributions is approximately 46 percent of the amount of Q's excess capital account as of such date. However, because the partnership's income for its first 8 taxable years will be realized approximately ratably over that period, the present value of Q's right to receive the priority distributions with respect to its excess capital account is, as of the date the partnership agreement is entered into, less than the present value of the additional Federal income taxes for which R would be liable if, during the partnership's first 8 taxable years, all partnership income were to be allocated 90 percent to R and 10 to Q. The allocations of partnership taxable income to Q and R in the first through eighth partnership taxable years have economic effect. However, such economic effect is not substantial under the general rules set forth in paragraph (b)(2)(iii) of this section. This is true because R may enhance his after-tax economic consequences, on a present value basis, as a result of the allocations to Q of 90 percent of partnership's income during taxable years 1 through 8, and there is a strong likelihood that neither R nor Q will substantially diminish its after-tax economic consequences, on a present value basis, as a result of such allocation. Accordingly, partnership taxable income for partnership taxable years 1 through 8 will be reallocated in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section.

Example (10). (i) S and T form a general partnership to operate a travel agency. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The partnership agreement provides that T, a resident of a foreign country, will be allocated 90 percent, and S 10 percent, of the income, gain, loss, and deduction derived from operations conducted by T within his country, and all remaining income, gain, loss, and deduction will be allocated equally. The amount of such income, gain, loss, or deduction cannot be predicted with any reasonable certainty. The allocations provided by the partnership agreement have substantial economic effect.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that all income, gain, loss, and deduction of the partnership will be shared equally, but that T will be allocated all income, gain, loss, and deduction derived from operations conducted by him within his country as a part of his equal share of partnership income, gain, loss, and deduction, upon[1] to the amount of such share. Assume the total tax liability of S and T for each year to which these allocations relate will be reduced as a result of such allocation. These allocations have economic effect. However, such economic effect is not substantial under the test stated in paragraph (b)(2)(iii)(b) of this section because, at the time the allocations became part of the partnership agreement, there is a strong likelihood that the net increases and decreases to S's and T's capital accounts will be the same at the end of each partnership taxable year with such allocations as they would have been in the absence of such allocations, and that the total tax liability of S and T for each year to which such allocations relate will be reduced as a result of such allocations. Thus, all items of partnership income, gain, loss, and income, gain, loss, and deduction will be reallocated equally between S and T under paragraph (b)(3) of this section.

Example (11). (i) U and V share equally all income, gain, loss, and deduction of the UV general partnership, as well as all non-liquidating distributions made by the partnership. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore such deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The agreement further provides that the partners will be allocated equal shares of any section 705(a)(2)(B) expenditures of the partnership. In the partnership's first taxable year, it pays qualified first-year wages of $6,000 and is entitled to a $3,000 targeted jobs tax credit under sections 44B and 51 of the Code. Under section 280C the partnership must reduce its deduction for wages paid by the

[1] So in original.

$3,000 credit claimed (which amount constitutes a section 705(a)(2)(B) expenditure). The partnership agreement allocates the credit to U. Although the allocations of wage deductions and section 705(a)(2)(B) expenditures have substantial economic effect, the allocation of tax credit cannot have economic effect since it cannot properly be reflected in the partners' capital accounts. Furthermore, the allocation is not in accordance with the special partners' interests in the partnership rule contained in paragraph (b)(4)(ii) of this section. Under that rule, since the expenses that gave rise to the credit are shared equally by the partners, the credit will be shared equally between U and V.

(ii) Assume the same facts as in (i) and that at the beginning of the partnership's second taxable year, the partnership agreement is amended to allocate to U all wage expenses incurred in that year (including wage expenses that constitute section 705(a)(2)(B) expenditures) whether or not such wages qualify for the credit. The partnership agreement contains no offsetting allocations. That taxable year the partnership pays $8,000 in total wages to its employees. Assume that the partnership has operating income equal to its operating expenses (exclusive of expenses for wages). Assume further that $6,000 of the $8,000 wage expense constitutes qualified first-year wages. U is allocated the $3,000 deduction and the $3,000 section 705(a)(2)(B) expenditure attributable to the $6,000 of qualified first-year wages, as well as the deduction for the other $2,000 in wage expenses. The allocations of wage deductions and section 705(a)(2)(B) expenditures have substantial economic effect. Furthermore, since the wage credit is allocated in the same proportion as the expenses that gave rise to the credit, and the allocation of those expenses has substantial economic effect, the allocation of such credit to U is in accordance with the special partners' interests in the partnership rule contained in paragraph (b)(4)(ii) of this section and is recognized thereunder.

Example (12). (i) W and X form a general partnership for the purpose of mining iron ore. W makes an initial contribution of $75,000, and X makes an initial contribution of $25,000. The partnership agreement provides that non-liquidating distributions will be made 75 percent to W and 25 percent to X, and that all items of income, gain, loss, and deduction will be allocated 75 percent to W and 25 percent to X, except that all percentage depletion deductions will be allocated to W. The agreement further provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore such deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). Assume that the adjusted tax basis of the partnership's only depletable iron ore property is $1,000 and that the percentage depletion deduction for the taxable year with respect to such property is $1,500. The allocation of partnership income, gain, loss, and deduction (excluding the percentage depletion deduction) as well as the allocation of $1,000 of the percentage depletion deduction have substantial economic effect. The allocation to W of the remaining $500 of the percentage depletion deduction, representing the excess of percentage depletion over adjusted tax basis of the iron ore property, cannot have economic effect since such amount cannot properly be reflected in the partners' capital accounts. Furthermore, the allocation to W of that $500 excess percentage depletion deduction is not in accordance with the special partners' interests in the partnership rule contained in paragraph (b)(4)(iii) of this section, under which such $500 excess depletion deduction (and all further percentage depletion deductions from the mine) will be reallocated 75 percent to W and 25 percent to X.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that all percentage depletion deductions of the partnership will be allocated 75 percent to W and 25 percent to X. Once again, the allocation of partnership income, gain, loss, and deduction (excluding the percentage depletion deduction) as well as the allocation of $1,000 of the percentage depletion deduction have substantial economic effect. Furthermore, since the $500 portion of the percentage depletion deduction that exceeds the adjusted basis of such iron ore property is allocated in the same manner as valid allocations of the gross income from such property during the taxable year (i.e., 75 percent to W and 25 percent to X), the allocation of the $500 excess percentage depletion contained in the partnership agreement is in accordance with the special partners' interests in the partnership rule contained in paragraph (b)(4)(iii) of this section.

Example (13). (i) Y and Z form a brokerage general partnership for the purpose of investing and trading in marketable securities. Y contributes cash of $10,000, and Z contributes securities of P corporation, which have an adjusted basis of $3,000 and a fair market value of $10,000. The partnership would not be an investment company under section 351(e) if it were incorporated. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The partnership uses the interim closing of the books method for purposes of section 706. The initial capital accounts of Y and Z are fixed at $10,000 each. The agreement further provides that all partnership distributions, income, gain, loss, deduction, and credit will be shared equally between Y and Z, except that the taxable gain attributable to the precontribution appreciation in the value of the securities of P corporation will be allocated to Z in accordance with section 704(c). During the partnership's first taxable year, it sells the securities of P corporation for $12,000, resulting in a $2,000 book gain ($12,000 less $10,000 book value) and a $9,000 taxable gain ($12,000 less $3,000 adjusted tax basis). The partnership has no other income, gain, loss, or deductions for the taxable year. The gain from the sale of the securities is allocated as follows:

	Y		Z	
	Tax	Book	Tax	Book
Capital account upon formation	$10,000	$10,000	$3,000	$10,000
Plus: gain	1,000	1,000	8,000	1,000
Capital account at end of year 1	$11,000	$11,000	$11,000	$11,000

The allocation of the $2,000 book gain, $1,000 each to Y and Z, has substantial economic effect. Furthermore, under section 704(c) the partners' distributive shares of the $9,000 taxable gain are $1,000 to Y and $8,000 to Z.

(ii) Assume the same facts as in (i) and that at the beginning of the partnership's second taxable year, it invests its $22,000 of cash in securities of G Corp. The G Corp. securities increase in value to $40,000, at which time Y sells 50 percent of his partnership interest (*i.e.*, a 25 percent interest in the partnership) to LK for $10,000. The partnership does not have a section 754 election in effect for the partnership taxable year

during which such sale occurs. In accordance with paragraph (b)(2)(iv)(*l*) of this section, the partnership agreement provides that LK inherits 50 percent of Y's $11,000 capital account balance. Thus, following the sale, LK and Y each have a capital account of $5,500, and Z's capital account remains at $11,000. Prior to the end of the partnership's second taxable year, the securities are sold for their $40,000 fair market value, resulting in an $18,000 taxable gain ($40,000 less $22,000 adjusted tax basis). The partnership has no other income, gain, loss, or deduction in such taxable year. Under the partnership agreement the $18,000 taxable gain is allocated as follows:

	Y	Z	LK
Capital account before sale of securities	$5,500	$11,000	$5,500
Plus: gain	4,500	9,000	4,500
Capital account at end of year 2	$10,000	$20,000	$10,000

The allocation of the $18,000 taxable gain has substantial economic effect.

(iii) Assume the same facts as in (ii) except that the partnership has a section 754 election in effect for the partnership taxable year during which Y sells 50 percent of his interest to LK. Accordingly, under § 1.743–1 there is a $4,500 basis increase to the G Corp. securities with respect to LK. Notwithstanding this basis adjustment, as a result of the sale of the G Corp. securities, LK's capital account is, as in (ii), increased by $4,500. The fact that LK recognizes no taxable gain from such sale (due to his $4,500 section 743 basis adjustment) is irrelevant for capital accounting purposes since, in accordance with paragraph (b)(2)(iv)(m)(2) of this section, that basis adjustment is disregarded in the maintenance and computation of the partners' capital accounts.

(iv) Assume the same facts as in (iii) except that immediately following Y's sale of 50 percent of this interest to LK, the G Corp. securities decrease in value to $32,000 and are sold. The $10,000 taxable gain ($32,000 less $22,000 adjusted tax basis) is allocated as follows:

	Y	Z	LK
Capital account before sale of securities	$5,500	$11,000	$5,500
Plus: gain	2,500	5,000	2,500
Capital account at end of year 2	$8,000	$16,000	$8,000

The fact that LK recognizes a $2,000 taxable loss from the sale of the G Corp. securities (due to his $4,500 section 743 basis adjustment) is irrelevant for capital accounting purposes since, in accordance with paragraph (b)(2)(iv)(m)(2) of this section, that basis adjustment is disregarded in the maintenance and computation of the partners' capital accounts.

(v) Assume the same facts as in (ii) except that Y sells 100 percent of his partnership interest (i.e., a 50 percent interest in the partnership) to LK for $20,000. Under section 708(b)(1)(B) the partnership terminates. Under paragraph (b)(1)(iv) of § 1.708–1, there is a constructive liquidation of the partnership. Immediately preceding the constructive liquidation, the capital accounts of Z and LK equal $11,000 each (LK having inherited Y's $11,000 capital account). In accordance with paragraph (b)(2)(iv)(e) of this section, the partnership agreement provides that the partners' capital accounts are adjusted to reflect how unrealized taxable gain would have been allocated if the securities had been sold for their $40,000 fair market value. Accordingly, the $18,000 of unrealized gain ($40,000 less $22,000 adjusted tax basis is credited to the partners' capital accounts as follows:

	Z	LK
Capital account following sale	$11,000	$11,000
Deemed sale adjustment	9,000	9,000
Capital account before constructive liquidation	$20,000	$20,000

Constructive liquidating distributions of the securities are made with reference to their $40,000 fair market value. Under section 732(b) the adjusted tax basis of the G Corp. securities constructively distributed to Z is equal to the $11,000 adjusted tax basis of Z's partnership interest before the constructive liquidation, and the adjusted tax basis of the G Corp. securities constructively distributed to Z is equal to the $20,000 adjusted tax basis of LK's partnership interest before the constructive liquidation. Under paragraph (b)(1)(iv) of § 1.708–1, the partners then are treated as contributing to a new partnership the property constructively distributed to them in connection with the partnership's termination. In accordance with paragraph (b)(2)(iv)(d) of this section, the capital accounts of Z and LK in the reconstituted partnership are stated at $20,000 each (i.e., the fair market value of the property constructively contributed to the new partnership by each of the partners).

Example (14). (i) MC and RW form a general partnership to which each contributes $10,000. The $20,000 is invested in securities of Ventureco (which are not readily tradable on an established securities market). In each of the partnership's taxable years, it recognizes operating income equal to its operating deductions (excluding gain or loss from the sale of securities). The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The partnership uses the interim closing of the books method for purposes of section 706. Assume that the Ventureco securities subsequently appreciate in value to $50,000. At that time SK makes a $25,000 cash contribution to the partnership (thereby acquiring a one-third interest in the partnership), and the $25,000 is placed in a bank account. Upon SK's admission to the partnership, the capital accounts of MC and RW (which were $10,000 each prior to SK's admission) are, in accordance with paragraph (b)(2)(iv)(f) of this section, adjusted upward (to $25,000 each) to reflect their shares of the unrealized appreciation in the Ventureco securities that occurred before SK was admitted to the partnership. Immediately after SK's admission to the partnership, the securities are sold for their $50,000 fair market value, resulting in taxable gain of $30,000 ($50,000 less $20,000 adjusted tax basis) and no book gain or loss. An allocation of the $30,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the $30,000 taxable gain will, in accordance with section 704(c) principles, be shared $15,000 to MC and $15,000 to RW, the partners' capital accounts will not be

considered maintained in accordance with paragraph (b)(2)(iv) of this section.

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account following SK's admission	$10,000	$25,000	$10,000	$25,000	$25,000	$25,000
Plus: gain	15,000	0	15,000	0	0	0
Capital account following sale	$25,000	$25,000	$25,000	$25,000	$25,000	$25,000
